American Railroad Journal.

New York, Saturday, January 4, 1862.

Railway and Financial Review for 1861.

The year just closed has been, by far, the most eventful in our history. A disruption of the country has taken place, and whatever may be the future, still continues. Nearly one-half in area, and one-third in population has practically disappeared from the circles of business as well as of personal intercourse. Almost complete, non-intercourse exists, and with it a vast change in the material condition of the country.

In one point of view, consequently, we cannot display with our usual complacency, the vast material progress of the country during the year that has just closed. The customary exhibit shows an increase in the mileage of our railroads to have been only 631 miles, against the usual average of over 2,000 miles for several years past. The small extent opened was in the early part of the year. In the Southern States, we presume that there is not a person employed upon new works. In the Northern, but little is doing, the great contest absorbing the whole attention as well as the means of the country. The cessation of the work of construction is of very little consequence, for the present, as there is hardly a section of the country that is not now well accommodated by existing lines.

With the change in the political condition of the country there has been a corresponding one in its commerce. Before the outbreak of the rebellion, the last cotton crop had very fully gone to market, and its value been realized. The threatened political troubles had, in the meantime, greatly diminished commercial transactions, so that the importations into the country for the calendar year have been only about one-half the amount of 1860, or say $180,000,000, against $360,000,000. The fortunate circumstance of a large demand for breadstuffs and provisions, occasioned by droughts in Europe, lead to shipments of these on an unprecedented scale, bringing the balance of trade so largely in our favor as to cause an importation in gold to the amount of nearly $50,000,000, within the year, against an export of an equal sum for 1860. For the first time, the exports of domestic produce from the port of New York have largely exceeded the imports of merchandise. Notwithstanding that cotton has disappeared from our exports, these still continue largely in excess of our imports, excluding specie, a really wonderful phenomenon, considering that the value of cotton exported for several years past has averaged nearly $200,000,000. This fact is striking testimony in favor of the resources of the country, and the capacity of our people of instantly adapting themselves to an altered state of affairs. The causes referred to have averted a great commercial revulsion, for although the Banks have recently suspended specie payment, the step was not caused by any lack of specie, or capital in the country, but to a disturbance in internal exchanges, for the want of a proper system of taxation, to return to the centres of trade the loans made in these on account of the war.

The year has, on the whole, been a very favorable one for the railroads of the Northern States. Their earnings the present season greatly exceeded those for 1860. Their traffics have immensely increased, to supply the foreign demand for breadstuffs. Their operations have not in a single instance been interfered with on account of the war, which has been carried on exclusively on Southern soil. Whatever may be the result, there is no probability that any Northern State will become the scene of hostilities. It is, consequently, a somewhat remarkable fact, that in a period of civil war, the value of railway property should have improved, while that of all other kinds has greatly deteriorated. We see no investment so little liable to be injured by it, as that in railroads. The closing of the Southern ports has had a tendency to increase the traffic of the great lines reaching inland, which for the winter will show a great increase over 1860.

While the general retrospect for the past year is not encouraging, and while we do not chose to indulge in speculations as to the future, it is no small consolation to point to the great interest to which our JOURNAL is devoted, as the one which remains unaffected, unfavorably, by the war, and whose prospect for the future is most encouraging. The internal commerce of the country has been, and remains most active, and the works over which this is carried on, most prosperous. Every year is likely to add to the traffic, showing that investments in them promise for the future to make up in a considerable degree for the losses and annoyances of the past, and to prove a stay and support when everything else is sinking from under us, or yielding greatly diminished returns.

Discounting Bills Before Acceptance.

ACCOMMODATION ACCEPTORS: THEIR LIABILITY ON BILLS DISCOUNTED BEFORE ACCEPTANCE: WHEN ONE PARTNER MAY BIND THE OTHER AFTER DISSOLUTION OF PARTNERSHIP.

The case of the Mechanics' Bank *vs.* Livingston, recently decided by the General Term of the New York Supreme Court, holds that, where a bank discounts a draft for the accommodation of the drawers, *before* it is accepted, its *subsequent* acceptance by the drawees before maturity, binds them in the same manner as though they had accepted it *before* discount. Where an accommodation draft is payable at a future day, and there is no valid agreement to accept, the drawees may refuse acceptance; although they have been in the habit of accepting other similar paper; and although the bank discounts the paper before acceptance, upon the faith that it will be accepted according to the usual course of dealings between the bank and the drawees. But if the drawees *actually accept the draft before maturity*, they cannot allege that their acceptance was without consideration. By accepting the draft the bank is delayed in their remedy against the drawer, and a forbearance is necessarily granted, which is a sufficient consideration for the acceptance.

The action was against the defendants as ac-

ceptors of a draft for the sum of $600. It was drawn by the firm of J. P. & I. S. Ballard, Clothing Merchants, in Syracuse, upon the firm of Livingston & Ballard, Grocers, in the City of New York, and was one of a series of drafts so drawn and accepted by Livingston & Ballard after having been discounted by the plaintiffs. These drafts were drawn pursuant to a verbal agreement or understanding; before being presented for acceptance they were discounted by the plaintiff, and then sent to the defendants Livingston & Ballard, who accepted and paid the drafts at maturity. By a private arrangement between Livingston & Ballard, these drafts were all accepted by Livingston, Ballard carrying the drafts to him for that purpose. Before the draft in question was accepted, the firm of Livingston & Ballard had dissolved partnership. The bank, as usual, and without knowledge of the dissolution of this partnership, discounted this draft and sent it to the defendants; and Ballard instead of Livingston accepted it in the name of the firm.

The following opinion was delivered at the Onondaga Special Term. The case was then taken to the General Term and the judgment of the Special Term affirmed.

Morgan J. The acceptances before as well as after the dissolution of the firm of Livingston & Ballard were accommodation acceptances, so far as Livingston was concerned, and he was under no legal obligation to continue them, and as between himself and Ballard the acceptance in question was, I think, without authority!

But there is no evidence that satisfies me that the plaintiff had notice of the dissolution of the firm, or of the circumstances under which the acceptances were made after its dissolution, and it makes no difference that this is accommodation papers so far as the liability of the acceptors to the bank is concerned. If the acceptance had been made before the bank discounted the draft I think it quite clear upon authority, that the plaintiff might recover against the acceptors in this case. In Vernon *vs.* the Manhattan Co., the firm of Wm. Vernon & Co., made a note for the accommodation of John A. Moore which the bank discounted and which was repeatedly renewed, and once after the dissolution of the firm by P. W. Vernon, one of the firm, without the authority of his co-partner William Vernon. It was there held that the bank must be considered as having had dealings with the firm, within the meaning of the rule, requiring an actual notice of dissolution. In that case William Vernon resisted a recovery on the ground of the dissolution of the firm previous to the making of the note. The Chancellor in his opinion says: In the present case there was a continual credit in the bank for fourteen months previous to the dissolution of the firm by eight successive renewals of the note by the partnership, and discounted on the application of Moore the payee, and as the eighth renewal, although a short time after the dissolution of the co-partnership, was by the note in the name of the firm precisely in the same form as the previous note, it was evident it was a case in which the firm would be liable to the bank, unless the bank had actual notice that the co-partnership was dissolved at the time the last renewal took place? The acceptors of this draft are in the same position as the makers of a note, and their liability must be governed by the same rules. Here was continual credits in the bank on the faith of the co-partnership of "Livingston & Ballard" through 1857 and most of the year of 1858, by successive discounts of drafts drawn by the firm of J. P. & L. F. Ballard, and discounted at the request of the drawers and for their accommodation, and accepted by the defendants. This last draft of $600, was in the same form, and for the same time, as the former drafts which the firm had accepted without objection.

I think within the case above cited, the acceptors are liable unless their liability is affected by the circumstance that the plaintiff in fact discounted the draft before acceptance.

If there was an arrangement between Ballard and Livingston, that Livingston and not Ballard should make acceptance, in order to bind that firm, that cannot affect third persons who took the paper without notice of it. It is however claimed by the counsel of Livingston that the bank discounted the draft upon the sole credit of the drawers, not upon the credit of the acceptors, for in fact it was not accepted when the bank parted with its money. It is therefore insisted that the bank is in no better position than the drawers, and must abide by their title, and as the drawers are the principal debtors and could not recover against their accommodation acceptors, it is insisted that no right exists in the bank to call on the acceptors.

I agree with the counsel that Livingston was not bound to accept the draft, and if it could be shown that he consented to the verbal agreement made by Ballard with the bank to accept them, that it would not be available to the plaintiff under the provisions of the statutes of this State.

But here is an actual acceptance, not a mere parol agreement to accept. If it had been made before the paper was discounted I have endeavored to show that it would have been binding upon Livingston and Ballard. Does the circumstance that the defendants had not accepted the paper when it was discounted change the rights of the parties? I think not. Suppose the defendants had given their note for the draft payable to the plaintiff, instead of accepting the draft. It would have been equivalent to an agreement to be answerable for the debt of a third person, expressed to be for value received; for an acceptance implies a consideration, and can no more be contradicted than the words "for value received" in a written guaranty.

A total want of consideration may be set up to defeat a promissory note in the hands of a subsequent holder with notice, and perhaps an acceptance may be defeated in like manner. But I cannot see that the rule has any application to a case like the present, for here the very act of acceptance is an undertaking to pay the demand as much as though it had been the note of the acceptors, or their guaranty expressed to be for value received; and in such a case it will not be admitted that the maker of the note or the guarantor could be heard to say, that in truth and in fact the undertaking they had made was without consideration.

By accepting a bill of exchange the acceptors admit that they have funds of the drawers in their hands to pay it. Perhaps in the case of an accommodation acceptance, this implication is not to be indulged in, still I think in such a case the acceptors in substance agree that they will see to it, that the drawers will put them in funds to take up the paper. I do not see what further the holder of an acceptance has to do with the state of funds or dealings between the drawers and acceptors; but if an actual consideration is necessary to support the acceptance in this case, it is not difficult to find one in the transaction itself.

Suppose the drawers had refused to accept, then the plaintiff were entitled to reasonable notice of the non-acceptance, whether the drawers had effects in their hands or not, for the purpose of enabling them to secure themselves against the drawers. And in case of non-acceptance the drawers would be liable immediately. But by accepting the draft the bank is postponed, and a forbearance is necessarily granted, which is a sufficient consideration for the acceptances.

It seems to me that the acceptors are bound to pay the paper they accept, in the case in which they would be holden to pay their promissory note, given upon the same consideration, and that their defence must be circumscribed within the same limits. In this case Livingston stands upon no better ground than he would have stood upon had the paper been discounted before acceptance, and his liability is to be determined by the same rules which govern the liability of co-partners, when their paper continues to be taken by their customers after dissolution, but before notice of it.

The result is that judgment must be given for the plaintiff against the defendant for the amount of the draft.

Erie Railway Company.

REPORT OF THE TRUSTEES.

To the Preferred and Common Stockholders of the Erie Railway Company:

In delivering to your officers the deed of the property and estate formerly belonging to the New York and Erie Railroad Company, we desire to make a brief statement concerning the manner in which we have executed the responsible trust which you reposed in us.

We were appointed your trustees by a contract dated the 22d day of October, 1859. By that contract it was proposed that the mortgage creditors of the New York and Erie Railroad Company should make certain concessions in regard to the payment of their interest in arrear and to accrue; that the unsecured bondholders of the Company should exchange their bonds, with four years' accrued interest, for a 7 per cent. preferred stock; and that the common stockholders should stand, as they then were, subsequent in interest to the then creditors of the Company. The trusts which we were called upon to execute were stated in the contract, naming us trustees, in the following language:

"I. To receive and hold said mortgage coupons of each class, and issue scrip therefor.

II. To receive and hold such fourth or fifth mortgage bonds, in case of foreclosure, and exchange them as herein provided.

III. To receive and hold such unsecured bonds and coupons, and exchange them for such preferred stock, and issue receipts therefor.

IV. To receive and hold such shares in the capital stock of the New York and Erie Railroad Company, for the purpose above named, and issue receipts therefor.

V. To cause proper agreements to be drawn, in order to carry out the purposes of this agreement, and they or either of them, as the attorney in fact of the subscribers hereto, to sign the same.

VI. In case a sale of the road under foreclosure is necessary to carry out this agreement, to buy the same in on our account, assessing us as here-

inafter provided; said trustees being under no liability to furnish money for that purpose.

VII. After said railroad passes out of the hands of the receiver, to receive the net earnings thereof from the new management, and apply them to the payment of—1st. Such of the present floating debt of said New York and Erie Railroad Company, not exceeding $320,000 principal sum—interest to be added to date of payment—as shall be contained in a schedule thereof, to be furnished to the said trustees by the Board of Directors, and for which fourth mortgage bonds are pledged as collateral. 2d. To the expenditures upon the Long Dock property, estimated to amount to $500,000. 3d. To the liquidation of said delayed mortgage coupons, in the order of their priority, which shall terminate said trust.

VIII. To retain from said net earnings, as a compensation for their own services, a sum to be fixed by the Board of Directors."

When we entered upon this trust we found the road in the hands of a receiver, with one coupon matured and another about to mature upon the first mortgage; with the principal of the second mortgage matured, and one coupon also due upon the same; with one coupon matured upon the third mortgage; with two coupons matured on the fourth mortgage; with one coupon matured, and one about to mature upon the fifth mortgage; with several suits pending upon the sinking fund bonds, on which they were claimed or established to be matured; with $750,000 of liabilities for labor and supplies, and taxes in arrear, charged as a preference claim upon net earnings, by order of the Supreme Court; and with a floating debt estimated at $320,000, for which fourth mortgage bonds were pledged to the amount of $2,300,000; or, to state it in a tabular form, the liabilities of the Company then matured, or soon to mature, were—

Two coupons, first mortgage	$210,000
One coupon, second mortgage	140,000
One coupon, third mortgage	210,000
Two coupons, fourth mortgage (not including hypothecated bonds)	240,000
Two coupons, fifth mortgage	125,000
Preference debt, due operatives, etc	750,000
Total mortgage, interest & preference debt.	1,675,000
Principal of second mortgage	4,000,000
Sinking fund bonds	2,200,000
Two years interest on same	308,000
Floating debt, secured by fourth mortgage collateral, at an average of about 12½ p. c.	320,000
Total matured liabilities	$8,503,000

Our first object was to protect the collateral pledged for the floating debt. The contract allowed this debt to be paid from the net earnings, if the assent of the mortgage bondholders could be secured. This could not be obtained, and, under the order of the Supreme Court (which we found it useless to attempt to resist), the net revenues of the road were ordered to be applied to the payment of the interest upon the first and second mortgages. The holders of the floating debt then gave notice that they should sell the fourth mortgage bonds held as collateral to their debts, and as the whole collateral would probably have been sacrificed by such a course, we were obliged to refer the settlement of that debt to the directors of the New York and Erie Railroad Company. They authorized the execution of a contract, eminently wise and judicious, in our opinion, under which it was retired.

Our next difficulty was with the holders of the second mortgage bonds. Finding it impossible to secure an exchange of those bonds into the third mortgage bonds on the terms authorized by the contract (namely, by giving a bonus of 10 per cent. in preferred stock), we again referred the question to the Company, under whose authority a contract was made which secured the entire extension of the second mortgage bonds for twenty years, and the absolute retirement of 1,100 outstanding hypothecated fourth mortgage bonds, and a favorable contract for the retirement of 4,000 more of such bonds ($1,000,000), if the Company desire. This contract, also, we deem an advantageous one for the Company. As a part of this arrangement, we also secured a judgment in the pending suit for the foreclosure of the fifth mortgage, affirming the validity of the mortgage debt of the old Company, and providing for the purchase of the property at the sale by ourselves as your trustees, and securing your interest in the property. This was another and most important step gained, and one that for a long time it seemed impossible to reach. In every step we consulted with the directors of the New York and Erie Railroad Company, and acted under their advice.

Before obtaining this judgment we had, with great difficulty, and in the face of a determined and organized opposition, obtained from the Legislature of New York a recognition of your organization for your protection, and an authority to ourselves, as trustees, to purchase the road, and to organize the Erie Railway Company for your benefit. We had also obtained from the States of Pennsylvania and New Jersey authority to sell so much of the property, franchises, and estate of the old Company as was in those States respectively, at any sale that might be ordered by the Supreme Court of New York, and an authority for the purchasers to convey it to any corporation that might be formed to receive it. Thus, you will perceive, we had, before obtaining the final judgment in the fifth mortgage suit, secured all the powers necessary for your complete enjoyment of the property when it should be sold and bought by us on your account. It should be observed, in this connection, that the Legislature of New York, in granting us the necessary powers to secure this property for you, enlarged the provisions of the original contract. That contract contemplated that the bonded unsecured debt only should receive preferred stock in the new Company. But the Legislature, on the representations of sundry contractors and others holding claims against the Company which were not secured by mortgage, directed us to take into the trust, and grant certificates for preferred stock for all such unsecured and judgment debts and claims as should be presented within the time specified in the act.

While the proceedings to which we have referred were going on, we opened offices in New York and London to receive assents to the plan for reorganization. The London office was under the charge of Mr. Evans, one of your directors, and the New York Office was managed by Mr. Otis, your secretary, under our own supervision. We desire to bear testimony to the great ability and fidelity with which these gentlemen executed the difficult duties they undertook. Few creditors under the first and second mortgages made the concessions required of them. They claimed the revenues of the road, which were of necessity conceded to them for the payment of their interest. A larger proportionate amount of the third mortgage coupon holders made the proposed concessions; but in the execution of the trust this became practically unimportant, as we were not able to divert the revenues of the road from the payment of the current interest on that mortgage. Nor would it have been wise to attempt to do so, and thus invoke the protracted litigation which, as your trustees, it was our duty to avoid, if possible.

The payment of the coupons in arrear, and of the accruing coupons on these mortgages, left us at the sale to provide only for the fourth and fifth mortgage coupons in arrear. We were allowed, by the terms of the judgment, to offset against our bid all such coupons held by us as trustees, and we were required by the terms of the sale to pay in cash the amount of all such coupons not held by us. On these terms we bought the road on your account, at the sale on the 28th of January last. We proceeded at once to organize the Erie Railway Company, pursuant to the terms of the acts of the Legislature of New York. We provided, in the articles of association, which were drawn up under the joint directions of ourselves and of the Board of Directors, that no new mortgage should be created on the property covered by the existing mortgages, unless the intention to create the same should be published in some newspaper in the city of New York, once a week, for ten weeks next before the annual election of directors; and also, that no floating debt should be created, except for the ordinary supplies, materials, and expenses of operating the road, and for the payment of our bid, unless authorized by a vote of three-fourths of the Board of Directors, at a meeting called for that purpose. These provisions were heartily assented to by your directors, and are regarded by all of us as wise. We also, with the assent of your directors, levied an assessment of two and one-half per cent. upon the par value of both classes of the new stock, and caused the offices to be opened for the collection of assessments and the issue of certificates.

While this was going on, we devoted ourselves, under the authority conferred upon us by the Legislature of New York, to the adjustment of the many outstanding claims against the company, which were entitled to share in the new organization, and we succeeded in adjusting every claim presented to us. In only one case was an appeal taken from our decision, and the appeal was subsequently withdrawn. As the result of our labors we have to report to you, that the whole amount of the unsecured and judgment debts of the New York and Erie Railroad Company, as settled by us with the advice of your directors, under the terms of the contract, and in compliance with the provisions of the statutes of New York, is $8,542,184; of which amount, certificates for preferred stock, and fractional certificates for such stock, and Trustees' certificates have been issued to the amount of $8,423,675 50, leaving still outstanding unsecured claims to the amount of $118,508 50. This latter sum is entirely in the form of unsecured bonds and matured coupons on the same: and as it is small in amount, we advise that authority be obtained from the Legislature of New York, to admit it to participate in the new organization, so that it may be said that no one has suffered by the proceedings which have been taken.

We have also to report to you, that of the total capital stock of the New York and Erie Railroad Company, there have been already surrendered for certificates of common stock in the Erie Railway Company, or for Trustees' certificates not yet redeemed, 112 565 shares, of the par value of $100 each, leaving still outstanding 2,935 shares. The holders of these shares should, we think, still be allowed to exchange them for common stock in the Erie Railway Company, on the same terms as the other stockholders.

In collecting assessments we authorized Mr. Otis and Mr. Evans to receive the outstanding fourth and fifth mortgage coupons as cash. By doing so the operations of the trust were greatly facilitated. We have to report to you that we have issued assessment receipts for $462,402 50, on which has been received in fourth and fifth

mortgage coupons	$214,375 00
In cash	248,027 50
Making a total of	$462,402 50

The sums in cash, as received, were deposited in the United States Trust Company, by order of the Supreme Court of the State of New York.

Before paying our bid, we secured orders from the Supreme Court directing the Receiver to pay the October 1861 coupons on the fourth mortgage, and the December 1861 coupons on the fifth mortgage, thus relieving us from the necessity of providing for the payment of those coupons from the assessments, and also carrying out the spirit of the contract. The road has now, as contemplated by the contract, resumed the regular payment of its current accruing mortgage interest.

At the time of the payment of the bid, we were the holders of fourth and fifth mortgage coupons to the aggregate amount of $704,042, which had been surrendered under the contract.

The outstanding amounts on the fourth mortgage were $80,570, and the outstanding amounts

upon the fifth mortgage were $24,885 50. These amounts we paid in cash to the Referee, and he is now distributing them to the holders of the mortgage coupons entitled to receive them.

By a resolution of your Board of Directors, passed in May last, the holders of the Trustees' certificates for mortgage coupons are entitled to receive interest on such coupons from the 1st day of May, 1861.

We have further to report to you, that we have, with the assent of your Board of Directors, distributed the balance of the cash received from the assessments among the holders of the Trustees' certificates for the fourth mortgage coupons of April and October, 1859, paying interest on their coupons for that time, and that the Receiver, under orders of the Supreme Court, has contributed from the net earnings of the road the balance necessary to complete the entire payment of those coupons and interest. In handing over the property to you, and terminating our trust so far as you are concerned, we have therefore to report, as the existing liabilities under the trust, the following, of which the coupon certificates bear interest from May 1st, 1861, and the assessment receipts bear interest from their respective dates:

4th mort.	coupons of	April, 1860.....	$126,700 00
"	"	Oct., 1860.....	125,335 00
"	"	April, 1861.....	125,125 00
5th	"	June, 1859.....	19,197 50
"	"	Dec., 1859.....	27,887 50
"	"	June, 1860.....	39,357 50
"	"	Dec., 1860.....	39,637 50
"	"	June, 1861.....	39,602 50
Assessment receipts	given in	London	155,425 00
"	"	New York	306,977 50
Total.....			$1,005,235 00

As Trustees for the holders of the mortgage liabilities, we advise that your company pursue such a policy as will ensure the speedy retirement of those obligations. It is but an act of justice to those mortgage creditors who have made valuable concessions to you for your benefit.

In every step in the execution of this trust we have advised and consulted with the Board of Directors and with the Executive Committee of the New York and Erie Railroad Company, and with the Board of Directors and with the Executive Committee of the Erie Railway Company, since its organization, of all of which bodies we are members. We should do injustice to our own feelings were we to close without bearing testimony to the assiduity with which they have worked to secure success. It will not be invidious to particularize Mr. Samuel Marsh, (President of the old Company and Vice President of the new Company, and Chairman of your Executive Committee,) and Mr. Berdell, (one of your Directors and a member of your Executive Committee, and President of the Long Dock Company,) as having rendered extremely valuable services in their respective offices.

In surrendering to you your property, we give you much more than existed when the trust was created. Then your road was without a proper terminues at New York. The old Company had invested, directly and indirectly, nearly $2,000,000 in the Long Dock property, which was intended to be the permanent terminus of your line, at deep water, opposite the city of New York; but the work was far from being finished; there were no apparent means for completing it so as to make it available; the contractors had failed, and the ignorant workmen had struck, and, in a riot, had interfered with the passage of your trains to Jersey City. Now the expensive tunnel on the Long Dock property is completed; your ferries are regularly established, with connections in the lower part of New York superior to those of any other ferry; your passenger traffic is removed from Jersey City to your own ferries; and your freight traffic is transferred from Piermont to your own Docks opposite the City of New York. Those docks when completed, will be ample for any probable future traffic of the road, and will afford terminal facilities for railway traffic unequalled in the world, so far as our observation goes. You receive this property through us from the hands of those who have had the financial charge of it for the past two years and a half, with no liability in the form of a floating debt against it. At your request they have prepared a statement concerning this property, which we append hereto.

We also transfer to you a perpetual lease of 60 miles of railway from Hornellsville, on your line, to Attica, within 30 miles of Buffalo. Perceiving an opportunity to secure this property for the Erie Railway Company, on terms favorable beyond precedent in the history of railways, we made the purchase, with the assent of the Executive Committee. In order to carry out our contracts with the sellers (which were assumed by the Erie Railway Company), and to put the road in repair (for which a large amount was necessary), a bonded debt of $200,000, having thirty years to run, was created by the Erie Railway Company, and secured by a mortgage of the road purchased. A company, made up from your directors, was organized under the general railroad act, to receive this property from us. We conveyed it to them, and they have leased it to you in perpetuity. Thus, without the payment of commissions, or of any intervening profit, you have acquired, with the creation of a moderate debt, sixty miles of new railway, in perfect order, with gradients as favorable as any on the main line, and bringing you within thirty miles of Buffalo. We understand that harmonious arrangements have been made with the Buffalo, New York, and Erie Railroad Company, connecting with your road at Attica, by which express trains are now regularly run over the newly purchased road to Buffalo. If a permanent arrangement can be made with that Company, on terms just to both parties, we advise that it be done.

In conclusion, we refer those who desire to know what the operations of the road have been during the term of our trust, to the report of the Receiver, which will be made as soon as his final accounts can be written up and examined by the officer of the Supreme Court, appointed for that purpose. The successful termination of our labors is in no small measure due to the ability and good judgment with which he has managed the property confided to him.

New York, December 31, 1861.

DUDLEY S. GREGORY,
J. C. BANCROFT DAVIS, } *Trustees.*

The Long Dock Company.

REPORT OF THE PRESIDENT.

To Messrs. Dudley S. Gregory and
J. C. Bancroft Davis, Trustees:

At your request, I send you a statement of the condition of the Long Dock Company and improvements.

In the summer of 1859 I took charge of the Long Dock Company as President: the contractor had failed, and the men had refused to work and were in open riot, stopping the New York and Erie Railroad trains for several days, and committing open violence and damage; the contractor was owing them a large amount for past work, and the Company had liabilities amounting to about $50,000; therefore, it was necessary to provide for immediate use over $100,000. The Company had expended at that time, for lands, machinery, excavations, piers, &c., $1,961,930 70.

In this condition, the entire property and the very large outlay were entirely useless to the New York and Erie Railroad Company; the stock and bonds had no reliable market value, and were little known. The Company at once made arrangements for the necessary money, and subsequently agreed with the contractor that the work should be carried forward by this Company with his superintendence, and the company pay the men and necessary outlay; and that he should superintend and manage the men for the Company's best interest, subject himself to the direction and supervision of the Company's engineer; the Company and contractor agreeing that the accounts should be kept, and estimates made up monthly, to be calculated at contract prices, and if the result showed a profit on the original contract, he was to receive it instead of salary. Since that agreement, the Company have met all obligations to the men, and the contractors on dock works, for the materials and supplies promptly, and purchases have been made on the most favorable terms. The stock and bonds of the Company are now worth par, and I believe the security is ample, that no more safe and reliable investment can be made.

The Company have finished the Tunnel, and laid a double track, constructed on stone ballast, two feet deep, with pipes and proper grade for drainage. The Tunnel has cost about $1,000,000, is cut through solid rock, 4,300 feet, or nearly one mile, and has been in use by the Receiver of the New York and Erie Railroad Company, since May last, and some fifty passenger and freight trains pass through daily; thus completing, for the use of the Erie Railway Company a continuous track of railroad, from the Hudson River, opposite the City of New York, to Dunkirk, on Lake Erie, a distance of 460 miles; also, by the purchase of the Buffalo and New York City Railroad, and by running arrangements which have been made with the Buffalo and New York and Erie Railroad, connecting the Long Dock Company and the New York and Erie Railway Company with the City of Buffalo, a distance of 422 miles.

The Company have extended Pavonia Avenue, erected commodious ferry houses and slips, and are now running one of the best ferries connected with New York, at Chambers street, and at present receiving $4,300 per month, exclusive of New York and Erie Railroad business. The Company have filled in 500,000 yards of earth, taken from west of the Tunnel, and put it into the basin between the piers and the land. This filling will be continued, we having an abundant supply for all purposes on the Company's land.

The Company have erected a large passenger-house, 40 x 460 feet; a freight-house, 54 x 420 feet; milk-house, 37 x 384 feet; engine-house, 60 x 399 feet; and repair shops, wood and coal sheds; and have laid over 20 main and side-tracks, with switches and turn-outs, making 17 miles of track on the Company's property.

The Company will build two more piers of the above dimensions, and they can furnish the necessary means to complete the improvements, and make this the best railroad terminus in the world; and it is considered by those familiar with the New York and Erie business that this improvement will facilitate and increase the business of the road one-third of its receipts; thus showing the importance of its early completion. There will be ample room for warehousing, and vessels of any size may receive freight, without drayage, from the Company's cars or piers, and load for Europe.

The cost of the work thus far, has been as follows, viz:

Grading, including the Tunnel	$1,177,272 87
Superstructure, including iron	105,294 11
Land	806,629 74
Buildings	35,862 86
Engineering	26,056 65
Docks and Piers	301,357 29
Office expenses, contingencies, &c	101,080 32
	$2,553,553 84

The sources from which the money has been derived to pay for the above, is as follows, viz:

Capital stock issued	$800,000 00
Mortgages on land	473,809 97
Mortgage bonds issued	500,000 00
Advanced by New York and Erie R.R. Co.	779,743 87
	$2,553,553 84

Respectfully yours,
ROBT. H. BERDELL,
President.

American Railroad Journal.

Saturday, January 4, 1862.

Share and Money Market.

Since our last issue the event of chief importance has been the suspension of specie payment by the Banks. This was caused not by any want of specie in the country, which on the first day of January, 1862, exceeded by $100,000,000 the amount held by our people a year ago; nor by any lack of capital, as the country was really never richer, but from a disturbance in the domestic exchanges in the country. The Banks of the leading cities furnished the expenses of the war, which were drawn in specie and expended in distant parts of the country. For a time the balances in favor of the cities almost immediately returned the specie again, but after the payment of $100,000,000, the return current ceased, leaving no alternative for the Banks but to suspend the contract with the government. The effect of such suspension upon business transactions, and upon the stock market was most favorable, though it leaves the government for the present without means. These must be supplied by some new system of finance, based on taxation. Money is easy at the lowest rates that have prevailed for some time past. Exchange is high without causing any considerable export of specie. There is but little demand for exchange by the trade, and the high rates quoted have grown out of the disturbance caused by suspension. The traffic of railroads continues large and is likely to remain so during the winter. The Share Market is very active with a great advance in prices.

Messrs. Duncan Sherman & Co. will pay the following coupons due January 1, 1862: Chicago City, Chicago City Water Loan, Buffalo City, Albany City, Utica City, Buffalo and State Line Railroad, Detroit and Pontiac Railroad, Atlantic and Great Western Railway—guarantied by the Bank of London, Detroit and Milwaukee Railroad. Also, interest on New York State Stock, 5½ per cent. Loan to Tonawanda Railroad, 6 per cent. Loan to Schenectady and Troy Railroad.

The Terre Haute and Richmond Railroad Company has declared a semi-annual dividend of 5 per cent., payable to the Eastern stockholders at the office of the Farmers' Trust Company, in this city.

The interest coupons of the third mortgage bonds, bonds of 1872, and Sinking Fund bonds of the New York and Harlem Railroad Company will be paid on and after Jan. 1, at the Treasurer's office.

Pursuant to the order of the Court of Chancery of the State of Vermont, a dividend of 3½ per cent. on the principal of the first mortgage bonds upon the Western Vermont Railroad, will be paid at the Mechanics' Bank in New York, on and after the 1st day of January, 1862, to the order of such persons as shall have proved their bonds.

The interest on Yuba County, Cal., bonds due January 1st, will be paid upon presentation of coupons at the American Exchange Bank, New York.

The coupons due 1st January, on $100,000 first mortgage bonds of the Sacramento Valley Railroad Company, will be paid at the office of Schuchardt & Gebhard.

The New York, Providence and Boston Railroad Company have declared a dividend of 2½ per cent. payable on and after January 2, at the the office of M. Morgan & Son, No. 38 William st.

The coupons of the Housatonic Railroad Company due Jan. 1, will be paid by Messrs. Ketchum, Son & Co., of New York, or by the Treasurer at Bridgeport. The bonds of the Company, maturing on that day, of which there are $50,000, may be exchanged for other bonds of the company, retaining the same perfect security, and the same rate of interest, or they will be promptly paid in cash at either of these places named, at the option of the holders.

The interest coupons due Jan. 1, 1862, on Minnesota 8 per cent. State loan, will be paid at the office of H. W. Palmer, No. 24 Pine st.

The coupons on the 1st mortgage bonds of the Joliet and Chicago Railroad Company, due Jan. 1, will be paid on presentation at the office of Messrs. M. K. Jesup & Co., No. 44 Exchange Place, on and after Jan. 2.

The interest due on Michigan State bonds 1st January, will be paid at the Metropolitan Bank.

The City of Marysville, Cal., coupons due on the 1st of January, will be paid at the Bank of the State of New York.

Wm. T. Coleman & Co. will pay the interest coupons of the City of San Francisco, including the Fire, Civil, and School bonds, on and after Jan. 2.

The coupons of the Evansville and Illinois Central Railroad Company, due January 1st, will be paid at the office of the Farmers' Loan and Trust Company, N. Y.

The coupons of the Pickaway County, Ohio, bonds, due January 1st, will be paid at the Park Bank.

The coupons of the Jackson County, Ohio, bonds, due Jan. 1, will be paid at the Ocean Bank after that date.

The coupons on second mortgage bonds of the Chicago, Iowa and Nebraska Railroad, due Jan. 1, will be paid at Webster Bank or at the office of the Treasurer, 114 State st., Boston.

The Worcester and Nashua Railroad Company have declared a dividend of $2 per share payable Jan. 1.

The coupons due Jan. 1, on the mortgage of the Long Island Railroad Company, will be paid a the Bank of the State of New York.

The Taunton Branch Railroad Company have declared a dividend of 3 per cent. payable Jan. 1.

The interest coupons of the City of Zanesville, Ohio, will be paid as usual at the Nassau Bank.

The Commissioners of the Sinking Fund of the State of Ohio will pay the interest on the foreign debt of Ohio, at their office in this city, No. 25 William street.

The coupons of the Evansville and Crawfordsville Railroad Company, due Jan. 1, will be paid on the 2nd of that month, at the office of the Farmer's Loan and Frust Company in this city.

Messrs. Winslow, Lanier & Co., will pay interest due Jan. 1, 1862, on the following securities: Indiana State Bank Bonds, issue of $1,390,000, 5 per cent.; Ross County, Ohio, 7 per cent.; City of Chillicothe, Ohio, 7 per cent.; City of Marietta, Ohio, 7 per cent.; Washington County, Ohio, 7 per cent.; Town of Harmar, Ohio, 7 per cent.; Indiana Central Railroad Company's first and second mortgage bonds; Indianapolis and Bellefontaine Railroad Company's 7 per cent. first mortgage bonds. The State of Indiana has placed money in the hands of Winslow, Lanier & Co., to pay the January interest on her 2½ and 5 per cent. stocks, on the checks of the agent of State, at No. 36 Wall st.

The Paterson and Ramapo Railroad Company has declared a dividend of 3½ per cent., the Paterson and Hudson Railroad Company one of 4 per cent., both payable at the office of the Rogers Locomotive and Machine Works, on the 4th instant.

Railroad Earnings--Weekly.

The traffic of the Great Western Railway of Canada for the week ending Dec. 27, 1861, was as follows:

Passenger	$14,011 60
Freight and live stock	35,409 15
Mails and sundries	1,308 71
Total	$50,729 46
Corresponding week of last year	34,647 01
Increase	$16,082 44

The receipts of the Grand Trunk Railway of Canada for the week ending Dec. 21, were $102,913 24
Corresponding week, 1860 62,197 15
Increase in 1861 $40,716 09
Total traffic from July 1st, 1861 $1,884,337 90
Corresponding period previous year. 1,725,375 16
Increase $158,962 74

The earnings of the Michigan Central Railroad, for the 3d week in Dec., 1861, were $44,924 90
Do. 1860 25,622 81
Increase $19,302 03

The Cleveland and Toledo Railroad earned the 3d week in December, 1861 $23,119
Do., 1860 19,402
Increase $3,717

The earnings of the St. Louis, Alton and Chicago Railroad for the 3d week in Dec., were:

	1861.	1860.
Passengers	$6,312 75	$6,133 55
Freight	12,562 64	8,811 24
Sundries	855 73	855 83
Total	$19,731 12	$15,800 62
Total this month to date	$54,972 79	$49,704 17
Total since Jan., 1st	978,098 98	923,862 42

The earnings of the Toledo, Wabash and Western Railroad the 3d week in December, 1861, were $21,473 94
Do. 1860 11,909 61
Increase $9,564 33

The earnings of the Galena and Chicago Railroad the 3d week in Dec., 1861, were:

	1860.	1861.
Freight	$11,907 00	$34,208 30
Passengers	5,693 67	5,823 31
Mails, etc.	1,000 00	1,000 00
Total	$18,600 67	$41,026 61

Railroads of the United States, Jan. 1, 1862.*†

A tabular statement showing the length and cost of each work at the end of the financial year closing nearest to the 1st January, 1862.

Names of Companies.	Mileage. Total.	Mileage. Comple'ed.	Cost of road and equipment.
1. Maine.

Medway Branch	3.60	3.60	37,909

* In the table above given the several roads are attributed to the States in which the companies owning them are domiciled. The actual mileage in each State is attained, first, by deducting the parts of road located in adjoining States, and then, by adding the mileage attributed to such adjoining States, but actually within the State to which transferred. Where a road is in two or more States, the fact is so stated. The cost of the transferred sections is deduced from the cost per mile of the whole road.

Progress of Railroads.

A table showing the mileage in operation near 1st January yearly.

Years.	Miles.	Years.	Miles.	Years.	Miles.
1830	41	1841	3,319	1852	10,878
1831	54	1842	3,877	1853	13,315
1832	131	1843	4,174	1854	15,511
1833	576	1844	4,311	1855	18,153
1834	762	1845	4,522	1856	21,440
1835	918	1846	4,870	1857	24,290
1836	1,102	1847	5,336	1858	26,210
1837	1,421	1848	5,682	1859	27,857
1838	1,843	1849	6,350	1860	29,401
1839	1,920	1850	7,475	1861	31,169
1840	2,197	1851	8,856	1862	31,800

From the above table we deduce the following which exhibits the actual and relative increase of mileage of railroads in the United States in periods of five years—the length of road in 1827 having been only three miles:

Quinquennial Periods.	Railr'd in oper'n.	Quinquennial Increase—Actual	Relative.
	Miles.	Miles.	
1827–1832	131	128	4,266.67 per cent.
1832–1837	1,421	1,290	984.73 "
1837–1842	3,877	2,456	172.83 "
1842–1847	5,336	1,459	37.64 "
1847–1852	10,878	5,542	103.86 "
1852–1857	24,290	13,412	123.30 "
1857–1862	31,800	7,510	30.90 "

In the decade just closed there have been constructed in the Union 20,922 miles of railroad or somewhat more than two-thirds of the present mileage. The following table will show to what States this vast increase belongs—

States.	Mileage Jan. 1, '52.	Mileage Jan. 1, '62	Incr'se in 10 y'rs.
Maine	283	489	206
New Hampshire	463	658	195

The Financial Crisis.

We copy from Hallett & Co.'s Circular for foreign circulation, the following remarks in reference to the suspension of specie payments and the financial position of Government:

The financial crisis impending at the issue of our two previous circulars culminated by a suspension of specie payments by the banks of the cities of New York, Boston, and Philadelphia on the 30th ultimo. By a singular improvidence, Government allowed itself to be dependent on their contributions to meet its daily expenditures, and consequently was compelled to follow their example, and suspend payment on its demand notes, although the interest on its bonds, and probably on all its obligations to mature, will unquestionably be promptly met.

The suspension was caused not by any lack of capital in the country, but for the want of policy or scheme of finance adequate to the emergency. The country never presented more substantial evidences of wealth than at the present moment. We have taken frequent occasion to set these forth, and have contributed something, we believe, to advance the credit of Government both at home and abroad. But the policy that has been steadily pursued by government, from what motive we will not inquire, has directly tended to precipitate the crisis, and to leave it without means, while those of the country have been really untouched. The remedy is perfectly obvious and simple—which is to adopt a policy which, by drawing upon the resources of the people, shall give the Government abundant means and fully restore its credit.

For the calendar year which closed yesterday, we presume the current expenditures of Government were $300,000,000. Its revenues, which were derived from lands and impost duties, did not probably exceed, if reach, $35,000,000, or one tenth the expenditures. To make up the deficit, loans were resorted to, the greater portion of them being made in the city of New York. The expenditures being largely made in distant portions of the country, the balance of indebtedness at the close of the year turned against the city, so that the payments of coin by the banks failed to return to them, leaving them no other alternative but to discontinue their advances, as a means of retaining the specie still remaining in their vaults. At the close of the last week the amount held by the banks was $29,357,712f This soon will be reduced by the amount o. $3,500,000, which they voted to advance for the purpose of enabling the treasury to meet, in specie, the January interest upon the liabilities of Government. Upon the third $50,000,000, the banks will have paid $25,000,000, making their total advances $125,000,000. Of this amount the Government has returned say $38,000,000, being proceeds of sales outside the banks, and has agreed to account for $12,000,000 more, as proceeds of such sales.

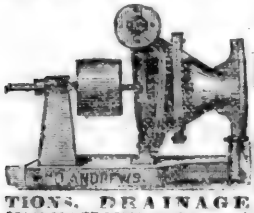
We take it for granted that the banks will go no further upon the agreement of the 19th of August. It is neitherfor the interest of the Government nor the public that they should. It is now clearly seen that the alliance between them and Government was both unbusinesslike and unfortunate, as it has in effect converted their capital into Government bonds, which are not money—capital which should never lose the attribute of money; while it led Government, so long as all its wants were supplied, to put off the adoption of any plan or system of finance necessary to produce even its expenditures upon a peace footing, upon the enlarged scale which the rebellion rendered inevitable. The arrangement was a most improvident one for both parties—and both were equally interested in bringing it to an early termination. The aid of the banks should have only been availed of to meet a present emergency. When this was passed, the advances made by them should have been returned, and the expenditures of Government met by the people, either in long loans or by taxation of one kind or another. For this reason we have for some time past advocated a suspension of specie payments as the necessary step to the adoption of a permanent and adequate policy.

Such a policy should be a system of taxation which, with customs revenues, will produce annually say $150,000,000 to $200,000,000. Customs may be made to produce probably $50,000,000 or $60,000,000. We are then left the various modes of internal taxation, such as property and income tax; stamps, and excise taxes or duties. England raises in all some $350,000,000 annually. We can certainly raise one-half this amount with as much ease as she raises the whole. We have an equal population, and in many respects superior resources.

No one doubts the ability of our people to pay such tax. Its collection, as far as government is concerned, could be anticipated by demand Treasury Notes, which by being made receivable in payment of such tax, would be readily taken by the government creditors, and till redeemed, pass current as money. Government could thus at once be placed in funds to the amount of the probable revenue, from all sources for the year. Its credit may in this way be so fully re-established that it may continue to negotiate loans to an amount sufficient, with its revenue derived from Taxation, to meet all wants.

The plans suggested as alternatives to that stated, appear to us to be not only inadequate to the emergency, but as likely to prove disastrous in their results. The one to which Mr. Secretary Chase inclines—that of *Free Banking*, based on Government bonds, would, if rendered obligatory, force the Banks of the country into general liquidation instead of creating new ones. If left optional with the public, no one will avail himself of it, as no one is going to purchase Government bonds as a condition of issuing circulation, when the same thing can now be done under State laws, without any such deposit. The Bank notes of the New England States, which are wholly unsecured, pass throughout the country, at a less rate of discount than those of this State which are amply secured. The guarantee of a deposit of United States Stocks for all the bills issued by the former would not add in the slightest degree to their solvency. They are now abundantly secured by an admirable system of Banking. They are equivalent to gold, which is certainly all the public demand. The great danger resulting from Mr. Chase's scheme is, that Congress will waste time over it which could be better employed.

The suspension by the banks operated as a great relief to the public mind. Prices at the Stock Exchange rose very rapidly—the advance over the day previous being, in many instances, as great as great as five and six per cent. Gold was never more abundant than at the present moment. It will not probably command for the future any premium. The effect of the suspension will be to correct a vicious system of national finance, which was an incubus upon the operations of business and trade no longer to be borne. We have no doubt that this system will be followed by one fully adequate to the crisis, although much precious time may be lost upon unpracticable schemes, and in experiments which are always incident to a new experience.



New York and Erie Railroad.

We give below the statement of this road for the fiscal years ending September 30th, 1860 and 1861. It will be seen that the gross earnings from freight during the past, exceeded those of the previous year, by $467,120 81; the decrease in receipts from passengers, mail, and other sources has been $56,525 91—making the increase in gross earnings $410,594 90. The increase in expenses, including taxes, during the same time, was $258,592 59—making the excess of net earnings $152,002 31.

Earnings.	1861.	1860.

Iron, Metals, new and second hand **Machinery.**

SANFORD'S
MAMMOTH OR GLOBE HEATERS.

The best stoves for RAILROAD DEPOTS and SHOPS, and all places where a great heat is required. They are very durable, and very economical of coal.

Beware of imitations that are inferior in strength and in other respects.

TESTIMONIALS.

HUDSON RIVER RAILROAD OFFICE, N. Y

This Company have now in use, over two hundred of Sanford's Mammoth Heaters, in Station Houses, Work Shops, and Engine Houses; we commenced using them in 1853, and some of the first stoves put up are still good and in use. We consider them the best Heaters now in use.

J. M. HEBARD, Supply Agent.

UNION FERRY COMPANY.

The Mammoth Heaters have been used by this Company in their waiting rooms at the several ferries and found to be very excellent stoves and more durable and valuable than any heretofore used. CYRUS P. SMITH, Managing Director.

SANFORD, TRUSLOW & CO.,
Nos. 239 and 241 Water st., N. Y.

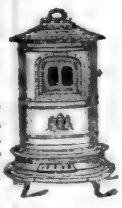
Challenge Air-tight KITCHEN RANGES,

May be placed in a fire-place without masonry, and with or without water-back; or may be set out on feet, as an ordinary stove.

This range, already very popular, has the **LARGEST OVEN** of any in the market; BAKES PERFECTLY never burning to brown at the bottom; BOILS, ROASTS and and BROILS with unequalled facility and dispatch, and with extraordinary **ECONOMY OF FUEL,** which may be either coal or wood. Flues large and easily cleaned. A child can manage it, so simple is its construction. Castings extra heavy, and design plain and chaste.

Four sizes, adapted to families and hotels.

Beacon Light



SUMMER AND WINTER
PORTABLE RANGE,

Is a very popular range, having six boiler holes, one large oven that bakes perfectly, with an arrangement for roasting, or heating irons at the end. It is very economical of fuel. For a FEW DOLLARS a family may be supplied with a PERFECT COOKING APPARATUS, equal to the highest price stove in the market.

Three sizes, adapted to coal, or wood.

SANFORD, TRUSLOW & CO.,
239 and 241 Water st., N. Y.

The COSMOPOLITE PARLOR RADIATOR, & GAS BURNER,

Introduced one year ago, already ranks as the **LEADING STOVE** for PARLORS, SITTING ROOMS, and all places where a soft, pleasant heat is desired.

Fire may be kept all winter with an astonishingly small supply of coal.

Send for description and testimonials.

SANFORD, TRUSLOW & CO.,
Nos. 239 and 241 Water st., N. Y.

PASCAL IRON WORKS,

ESTABLISHED 1821.

MORRIS, TASKER & CO.,

MANUFACTURERS OF

Lap-Welded American Charcoal Iron Boiler Flues—from 1¼ to 10 inches outside diameter, cut to definite lengths.

Wrought Iron Welded Tubes—from ⅛ inch to 8 inches inside diameter, with screw and socket connections, for Steam, Gas, Water or other purposes; also, fittings of every kind to suit the same.

Wrought Iron Galvanized Tube—strong and durable, designed especially for water purposes.

Cast Iron Gas or Water Pipe—1¼ to 24 inches in diameter, and branches for same, etc.

Gas Works Castings, etc., etc.

PHILADELPHIA.

OFFICE OF THE ILLINOIS CENTRAL R. R. Co., New York, Dec. 5, 1861.

AT a meeting of the Board of Directors of the ILLINOIS CENTRAL RAILROAD COMPANY, held at their office in New York this day, it was

Resolved, That an assessment of FIVE DOLLARS per share upon the Scrip Shares of the Capital Stock of the Company, be and the same is hereby called payable on the twentieth of January, 1862; and that the same be payable on the Stock registered in the City of New York at the office of the Company in that city; and on the Stock registered in London at the office of Messrs. ROBERT BENSON & Co., London; and that parties desiring to pay their assessment in London, may pay the same at a rate of exchange sufficient to produce five dollars per share to the Company in the City of New York.

Resolved, That the transfer books be closed on the afternoon of the 15th January next, and re-opened on the 20th day of the same month; and that no transfer be permitted, on or after that day, of shares upon which the foregoing assessment shall not have been paid.

THOMAS E. WALKER, Treasurer.

The eighty-dollar certificates to be returned on payment of the above.

OFFICE OF THE ILLINOIS CENTRAL R. R. Co., New York, Oct. 29, 1861.

HOLDERS of the stock of this Company, as registered upon the books of the company at the close of business on the 15th day of January, 1862, will be entitled to Canceled Bonds Scrip for five dollars upon each share of stock held by them deliverable on or after the 1st day of February next; and parties holding certificates are hereby notified to have the same registered in their own names on or before the said 15th day of January. 48

LOCOMOTIVE FOR SALE.

SMALL second hand Locomotive, usual gauge (4ft. 8½ in.) Weight, 10 tons—Drivers, 4ft. 6 in.—Cylinders 10x18 in. Fire-box, Crank and Tires nearly new, and the whole engine in excellent condition.

Also a second hand "Bradly" Snow Plow.

For sale low by

WILLIAMS & PAGE,
51 Boston.

New York, Saturday, January 11, 1862.

Cumberland Valley Railroad Company.

This company was chartered April 2, 1831. The work of construction was commenced in January, 1836, and the road completed from Chambersburg to the Susquehannah River, opposite Harrisburg, 49 miles, in December, 1837. By an act of the Legislature approved Feb. 2, 1836, the company was empowered to construct a bridge across the Susquehannah (4,400 feet) and extend the road through Harrisburg, to the Pennsylvania Canal, about three miles beyond the then eastern terminus, and also to connect with the Harrisburg and Lancaster and other roads centering at Harrisburg. The road thus constructed was not remunerative, its receipts being scarcely sufficient to pay expenses, and interest on a debt of about $275,000, which had gone into construction, and to which was to be added the debt created on account of the bridge and extensions, making the entire debt $423,215. The stock paid in at this time was $472,000. In 1849 it was resolved to re-construct the road, and iron it with a heavy T rail. The holders of the debt agreed to advance the necessary means, ($400,000) and the company was re-organized by the creation of a preferred stock, equal in amount to the whole debt and advance. The work was completed during the following year, at which date the total cost amounted to $1,212,912, represented in capital by $360,000 in 1st preferred stock, $252,000 in 2d preferred stock, $472,000 in old stock, and $28,412 in debt. The preferred stock calls for an 8 per cent. dividend, which has been regularly paid. By an act of the Legislature passed in 1856, the conversion of the preferred stock into 8 per cent. bonds was authorized. The amount converted under this act to the date of the last annual report is, of 1st preferred $118,100 and of 2d preferred $109,500. The Franklin Railroad, extending from Chambersburg to Hagerstown, Md., was completed in February, 1860, and has since been operated by this company. The whole amount of receipts of that road during the year ending September 30th, 1861, was $25,254 46—of which that company received $25,218 64, and the Cumberland Valley Railroad Company $16,816 34. The expenses of operating and maintaining the road amounted to $12,366 09—showing a profit of $4,450 25.

The funded debt of the company consists of $161,000 1st mortgage, and $109,500 2d mortgage bonds, dated Oct. 1, 1856, and payable Oct. 1, 1904, and coupons semi-annually April 1, and Oct. 1, at Philadelphia.

The receipts of the Cumberland Valley Railroad Company for the fiscal years ending September 30, 1860 and 1861, have been as follows:

	1860.	1861.
From passengers	$70,177 48	$115,433 21
" freight	107,296 09	129,145 28
" mails	5,200 00	5,200 00
	$182,673 57	$249,778 49
Ordinary expenses	65,851 59	90,247 05
Net earnings	$116,822 08	$159,531 44
The increase of gross earnings was		$67,104 92
" " expenses "		24,395 56
The increase of net earnings		$42,709 32

The company have purchased during the past year one new locomotive of the largest class, 300 tons of new iron, and 6,000 new white oak sills; new turntables have been put in at Bridgeport and Chambersburg; and two new passenger cars have been built—all of which are included in the ordinary expenses.

The receipts of the company from all sources during the year were as follows:

Cash and cash items, Oct. 1, 1860	$56,392 88
Rreceipts from tolls	249,778 49
" rent and interest	852 25
Share of receipts on Franklin R. R.	16,816 34
Assets and materials sold	808 82
	$324,648 78

And the expenditures were:

Dividends on stock	$62,588 50
Interest on bonds	21,640 00
State tax on dividends	8,127 65
Expenses and materials	108,889 05
Sinking fund	6,662 09
Cash and cash assets	121,741 49
	$324,648 78

GENERAL STATEMENT.

Cost of road and appurtenances	$1,126,573 80
Materials on hand	15,769 76

In April last there was paid into the sinking fund $6,662 09, and the board at its last meeting appropriated thereto the additional sum of $58,-875 17—so that the fund now amounts to $99,-397 92.

The office of the company is at Carlisle, Pa. The officers are:

President—FREDERICK WATTS.

Secretary and Treas.—EDWARD M. BIDDLE.

Superintendent—O. N. LULL.

Erie Railway Company.

OFFICERS FOR 1861-2.

Nathaniel Marsh, President; Samuel Marsh, Vice-President; Horatio N. Otis, Secretary; Talman J. Waters, Treasurer; Charles Minot, General Superintendent; B. E. Bremner, Auditor.

Directors—John Arnot, Robert H. Berdell, D. A. Cushman, J. C. Bancroft Davis, Alexander S. Diven, Daniel Drew, Wm. Evans, Dudley S. Gregory, Nathaniel Marsh, Samuel Marsh, Ralph Mead, Ambrose S. Murray, Henry L. Pierson, Wm. B. Skidmore, Cornelius Vanderbilt, Thomas D. Wright. (One vacancy).

Executive Committee—Samuel Marsh, Chairman; Nathaniel Marsh, ex-officio; Dudley S. Gregory, Daniel Drew, Robert H. Berdell, J. C. Bancroft Davis.

The National Finances.

The following statement from Hallett & Co.'s Circular gives probably a correct view of the condition of our national finances. No action has been had at Washington in the premises, but we presume this will be in accordance with the views expressed:—

THE FINANCIAL POLICY OF GOVERNMENT—THE TREASURY NOTE BILL.

The Government, as foreshadowed in our previous Circular, proposes to make an immediate issue of Treasury notes, to the amount of $100,000,000, to be receivable in the payment of Government dues; to be legal tender between individuals, and convertible into 6 per cent. bonds. The same provisions are to extend to the $50,000,000 which the Treasury has already the authority to issue.

These notes are intended to be in the nature of Exchequer bills, issued by the British Treasury; though, unlike the latter, they may bear no interest, and are payable on demand. Exchequer bills are issued in anticipation of collections of the revenue. The average amount outstanding of late years is about $75,000,000. It has been, however, as high as $250,000,000, when the necessities of the Treasury were much greater than at present. They are not used as currency, there being no need of such a medium in addition to that furnished by the Bank of England, but are regarded as very desirable investments for persons having no immediate use for their money, but who wish to have it, practically, on call, at the same time drawing interest, though at a low rate.

Treasury notes are to be issued with a similar object. It is proposed, we understand, to base such issue upon a system of taxation that shall provide for their early redemption. But such a system can not be instantly inaugurated. We are in this country unschooled in taxation, having for the last 50 years derived all the revenues into the Federal Treasury from impost duties, which, though small in amount, were, from our economical form of Government on a peace footing, quite equal to its necessities. The mode of levying and collecting it was so simple and effective that a subject which engrosses so much of the attention of other nations hardly attracted that of our own. We are now put to a new trial. We have first to study the principles upon which nations, the most expert in these matters, levy their taxes, and then see how far their condition is parallel to our own. It is certain that the system from which we are likely to copy the most—that of England—must be greatly modified in its application to this country. For all these things much time will be required and should be taken. But the necessities of the Treasury brook no delay. Hence the propriety of inverting the ordinary course of legislation, which usually provides the means of discharging obligations to be presently due, before creating them.

Such are the reasons for the immediate issue of these notes. Congress, we understand, is already turning its attention to the subject of internal taxation, and is prepared to act upon a bill providing an amount quite up to that demanded by all the necessities of Government likely to arise.

The step taken does not in itself attract so much attention as the commercial consequences that are likely to flow from it. What will be the effect of $150,000,000 of demand notes suddenly thrown upon the market to pass as money? There can be no doubt that it will cause a considerable inflation of prices, and give a very decidedly increased impulse to trade and to business operations of all kinds. But the effect will be greatly modified by the action of Congress to be taken hereafter. If, as is proposed, and what we have no doubt will be done, Congress should pass a tax bill sufficient to meet the estimated current expenditures for the next five years, on a peace footing—an amount which cannot be placed below $150,-000,000, and which may go as high as $200,-000,000—making such tax payable in Treasury notes, then their absorption will immediately commence on a large scale, which will neutralize to a very great extent the evils of an inflation, which is to be justly dreaded. Still, as their issue and purchase will call out a corresponding amount of capital to be immediately expended among us, we have a right to expect a much greater activity in all the ramifications of business than we have seen for a long time.

The passage of an adequate tax bill will have a most favorable effect upon Government securities. As the demand notes will be made exchangable for the former, they will probably be converted in large amounts as soon as issued. Congress can easily make it an inducement for any holder to adopt this course. Government 6s sold on an average from 1850 to 1861 at 118. Upon the return of peace, they would, with a good financial system, rise immediately above par. All that Congress has to do, consequently, to retire the demand notes very nearly as fast as issued, is to enact such a system. The capital of the country is abundant. Its industries were hardly ever more prosperous and productive. The great essential in the crisis is not capital, but how to draw out what we possess. Let Congress only adopt any system that commends itself to common sense and to mercantile principles, and all will be well. Such is unquestionably its disposition for the first time since our political troubles commenced, which give the future a more cheerful aspect than it has displayed for some time past.

The Pacific Railroad.

NEW ROUTE FROM GOLDEN CITY TO GREAT SALT LAKE CITY.

From a private letter of an experienced and accomplished Civil Engineer, E. L. Berthoud, Esq., dated at Golden City, Col. Ter., we take the liberty to extract the following memorandum.

—

"I have been applying myself to the subject of the P. R. R. surveys by the Missouri River, South pass, Coo-che-topa Pass, and New Mexico, together with the connections east of the Missouri and Mississippi. After explorations and surveys in every direction in Kansas, I was satisfied that the country between 39° and 41° of latitude, and between the Missouri and the Rocky Mountains, presented no engineering difficulties, would cross a region where more water, timber and grass existed than on any other route, and whereon emigration and settlements extended farther east from the Pacific, and west from the Missouri River than elsewhere, and where a more urgent necessity for a railroad now exists, since the discovery of the Rocky Mountains and Washoe gold mines on the Eastern slope of the great Cordilleras and the Sierra Nevada.

But for the selection of this route, two almost inseparable obstacles presented themselves, (as B——.G——.S——. and others thought) in the Rocky Mountains and the Wahsatch range. We had to find a good short feasible pass in each of these ranges. Could we do so this would give a great central railroad route the pre-eminence. At this problem I have been working at spare moments for the last year, and alone and on foot, with compass and barometer, have explored the whole breadth of the Rocky Mountains, from 40½° to 39° north latitude. Finally in May (after traveling fifteen miles in snow from 5 to 150 feet deep) I was rewarded by finding a low pass in about latitude 39° 42′, and longitude 105° 47′, by which we cross, in eleven chains, from the waters of the Atlantic to those of the Pacific. The mountain part of the pass is only a narrow ridge about 2 miles long, and leads into fine gentle vallies at each end, where ample scope is given by which to get an uniform practicable grade.

In July I surveyed for a company a new waggon road to Salt Lake by this pass. Proceeding through our mining region by the valley of Clear Creek, which leads to the new pass, I crossed in one day into the Middle Park, and then struck a course N. 75° W. (true). We explored the Park, the region between White Bear and Green River, crossed Green River (by swimming) 1½ miles above White River, then examined the country between the Wahsatch Mountains and Green River on Winter Duchene and Lake Firks, crossed the Wahsatch twice and then entered the Great Basin by the Rio Timpanagos, which we followed to Lake Utah. Remaining there and at Great Salt Lake City till Aug. 10th, I returned and made a chain survey from Provo in Utah to Golden City in 39 days, clearing in that time 426 miles. We found an excellent road all the way, and our survey demonstrated that where we passed the Wahsatch Mountains, the country was by no means as difficult as the Berkshire Hills, the Alleghanies, or the New York and Erie Line at or near Deposit. * * * * * * *

Cleveland, Columbus and Cincinnati R. R.

The directors of this company have issued a circular to the stockholders communicating the result of the negotiation for the purchase of the Springfield, Mount Vernon and Pittsburg, already mentioned in our columns, and calling a general meeting for the ratification of the contract, to be held on the 8th of January. According to this circular—

The portion of the road whose purchase is proposed is 49 miles in length, lying between Delaware and Springfield. It is completed and used, and stocked with 4 locomotives, 57 freight and passenger, and 24 gravel cars, and supplied with machine shops, machinery, &c., necessary for the operation the road. The sum to be paid for this is $140,000—$100,000 of which is payable Jan. 20, 1862, and the balance in bonds having 15 years to run, with interest at 7 per cent., payable semi-annually, secured by a mortgage on the said road.

New York State Canals.

ANNUAL REPORT OF THE AUDITOR.

The important facts and statements of this annual report for 1861, are presented below:

There was in the Treasury and invested Sept. 30, 1860, belonging to the Canal Fund		$2,375,017 76
Received year ending Sept. 30, 1861		5,605,247 92
Total available and unavailable		$7,980,265 68
Payments during year		5,375,644 43
Balance Sept. 30, 1861		$2,604,621 25
Deposited in banks, available	$1,946,314 75	
Deposited in banks, unavailable	489,530 29	
Total	$2,435,845 04	
Securities in Auditor's hands	168,776 21	
		2,604,621 25
Appropriations overdrawn, to be refunded out of tax of 1861		154,811 63
Total		$2,759,432 88

Of this $2,372,103 61 belongs to the several sinking funds for the redemption of the State debt, and the remainder to other funds.

The receipts from the Canals for the fiscal year were:

Tolls		$3,353,168 87
Rents of surplus waters		4,865 00
Interest on Current Canal Revenues		33,295 11
Miscellaneous		11,299 32
Total		$3,402,628 30
Repairs	$592,564 12	
Salaries, etc.	114,222 02	
		706,786 14
Surplus revenue		$2,695,842 16
Paid sinking fund, sec. 1 art. 7	$1,700,000	
Paid sinking fund, sec. 2 art. 7	350,000	
		2,050,000 00
Balance sinking fund, sec. 8 art. 7		$645,842 16

This balance is not sufficient to pay the interest on the $12,000,000 debt chargeable to this fund, and a deficiency of $64,157 84 will have to be provided for by tax.

The following table will show the receipts and expenditures on canal account (the latter other than charges on account of enlargement and completion) for four fiscal years:

	Receipts.	Expenditures.	Net.
1858.	$2,072,204 88	$1,078,878 91	$993,325 97
1859.	1,859,879 63	897,878 96	962,000 67
1860.	2,416,588 39	746,976 78	1,669,611 61
1861.	3,402,628 30	706,786 14	2,695,842 16

The following deficiencies under sec. 1, art. 1, have been supplied by extension or deficiency loans:

1857	$110,984 40
1858	706,674 03
1859	732,990 33
1860	30,388 39
Total	$1,581,037 15

Annexed is a recapitulation of the Canal Stock debt, paying interest Sept. 30, 1861:

Under art. 7, sec. 1 of the Constitut'n	$9,739,024 76
" " 3 " "	13,200,000 00
" " 10 " "	642,585 49
" " 10 " "	2,500,000 00
Total	$26,081,610 25

The annual interest on the above is $1,498,970 76.

Of this $1,200,000 was reimbursed on the 1st of January, and $900,000 more will be paid on the 1st of June next, which will reduce the debt to $23,981,610 25, and the annual interest to $1,381,970 76.

The debt contracted under sec. 10, though contracted for canal purposes, is not a charge upon the canals, but the interest is paid out of the general funds. The whole debt was reduced only $983,974 23 during the last fiscal year.

Annexed is a statement of the movements in the sinking funds during the year:

Under Sec. 1, Art. 7, Constitution.

Balance Sept. 30, 1860	$1,595,103 00
Receipts of year	2,931,533 98
Total	$4,526,636 98
Payments	2,716,794 90
Balance Sept. 30, 1861	$1,809,842 08

Applicable to payment of principal of canal debt under above section.

Under Sec. 3, Art. 7.

Balance Sept. 30, 1860	$257,191 59
Receipts	1,279,206 11
Total	$1,536,397 70
Payments	783,376 01
Balance Sept. 30, 1861	$753,021 69

Of this, $107,179 53 is invested as a sinking fund for the redemption of the principal, and $645,842 16 is applicable to the payment of interest.

No part of the 1¼ mill tax, to pay interest on the $12,000,000 debt, had been paid into this fund at the close of the fiscal year. It is estimated that it will net $1,580,742 63, which, after paying the deficiency loan of $1,200,000, due Jan. 1, 1862, and interest, will leave $445,858 48 for the fund, and a deficiency of $265,517 53 in the interest at the close of the fiscal year.

Under Sec. 12, Art. 7.

Balance Sept. 30, 1860	$75,000
Received from taxes	350,000
Total	$425,000
Payments	337,500
Balance Sept. 30, 1861	$87,500

It is estimated that the net proceeds of the tax of one-third mill, to which this fund is entitled, will be $468,368 18, of which $350,000 has been credited to it, leaving $168,368 18, which, added to the balance, will make $255,868 18. After providing for one year's interest, the balance to be carried to the credit of the fund for the payment of the first instalment of the principal of the debt of $800,000, due in 1866, will be $105,868 18.

The repair trust fund amounted on the 30th of September to $63,000, and the interest which had accrued on deposits.

Of the $499,530 29 due the canal fund by broken banks $129,270 63, owing by the Canal Bank of Albany, Walter Joy's Bank of Buffalo, and Empire City Bank of New York, will be a total loss. Of the remaining $360,259 66, $102,113 72 has been realized since the 1st of October, and there is a fair prospect of realizing a considerable portion of the remainder during the present year. The Auditor is of opinion that if the State deposits its funds in banks, it ought to have precedence in payment over all other creditors, the holders of circulating notes excepted.

The constitutional charges upon the Canals are as follows:

To pay the principal and interest of the Canal debt as it existed June 1, 1846	$1,700,000 00
To pay the interest on the General Fund debt	350,000 00
To pay the interest on the new enlargement and completion debt of $12,000,000	710,000 00
To the annual contribution to redeem the principal of that debt	406,242 65
For contributions to support Government	200,000 00
To pay the interest on the floating debt loan	150,000 00
For the annual contribution to reimburse the principal of that loan	138,888 88
Total constitutional charges	$3,655,131 53

This charge upon the Canal tolls, when fully met, relieves the State from an annual tax of 1¼ mills. When only the three first items are covered by the tolls, then the State is subject to an annual tax of one-third of a mill, as is now the case.

Beside these annual contributions, these revenues are charged with the payment of the General Fund debt after the Canal debt of 1846 is re-imbursed; and also the refunding to the general treasury all advances and contributions made to the canals, or their debt from sources other than their direct revenues.

The subject of competition with the canals of the State by the private corporations, is gone into at large, but we have not room for a summary in the present article.

The estimate for the business of the present fiscal year is as follows:

If the tonnage movement on the canals in 1862 shall correspond with that of the past season, or with that of 1860, we may safely estimate the revenue from canal tolls as follows:

Receipts from tolls from Sept. 1, 1861, to the close of navigation	$1,981,540
Receipts from tolls from the opening of navigation in the Spring of 1862, to Sept. 1 of the same year	1,800,000
Total estimated gross receipt	$3,781,540
Deduct appropriation for collection, superintendence, and ordinary repairs	800,000
Net surplus of tolls to the sinking fund.	$2,981,540
To which add the tax required to be annually levied under the act, chapter 271, laws of 1859	288,889
Estimated total net revenue	$3,270,429

This sum will be chargeable, under the Constitution, with the following payments:

Under section 1, article 7	$1,700,000	
" " 2, " 7	350,000	
" " 3, " 7	710,000	
Under the act, chapter 271, laws of 1859, for interest and sinking fund of the floating debt loan of $2,500,000	288,889	
		3,048,889
Balance sinking fund, sec. 8, art. 7		$221,540

The Auditor is of the opinion that the present toll rates should be continued except those on wheat and flour, which in his view, can be raised half-a-mill without producing any injury whatever to the canal navigating interests, and most certainly to the advantage of the State in the increased revenue it will give upon the transit. His suggestions are:

1. The imposition of rates of toll on the tonnage transported on the canals, with a view to and for the purposes of revenue.

2. A strictly rigid and economical administration and application of all funds appropriated for superintendence, the collection of tolls, and the ordinary repairs; and,

3. Legislative guards and protection, such as will be effective to carry out the object and intent of the Constitution in consecrating the canal revenues to the payment of the public debt.

Michigan Central Railroad.

At a meeting of the directors of the Michigan Central Railroad, held at Boston on the 27th ult., the following resolution was adopted:

Voted, That, in consideration of the aspect of public affairs, the subject of declaring a dividend be postponed for the present.

At this meeting the following statement was made:—

Income Account—Receipts of the Road.

	Dr.
To balance of this account, per Treasurer's report of June 1, 1861	$38,434 24
To receipts of road from June 1,'61, to December 1, 1861	1,144,617 10
Total	$1,183,051 34

	Cr.
By operating account, from June 1, 1861, to Dec. 1, 1861	$513,139 42
By annual payments toward sinking funds	84,500 00
By interest and exchange account, from June 1, 1861, to Dec. 1, 1861	357,397 14
By balance to new account	228,014 78
Total	$1,183,051 34

The balance to the credit of the income account is $228,014 78, showing an increase since the annual report of June 1, 1861, amounting to $189,580 54. If to this gain is added the annual payment made in October to the trustees of the sinking funds, $84,500, it will be found that during the six months ending November 30, 1861, the net earnings of the road, after paying operating expenditures and interest, have amounted to $274,080 54, or about 4½ per cent. upon the capital stock of the company.

During the last six months the bills payable—which upon the 1st of June pmounted to $125,000—have been entirely paid. The company is now free from floating debt.

A comparison of the six months just closed with the corresponding six months of the last year results as follows:—

The gross receipts for six months ending November 30, 1860, were	$1,176,341 80
The gross receipts for six months ending November 30, 1861	1,144,617 10
Showing a decrease in receipts of	$31,724 70
Operating and interest expenditures six months last year	$868,045 19
Operating and interest expenditures six month this year	870,536 56
Showing an increase in expenses of	$2,491 87
And net receipts less than last year of	$34,216 07

Of the sum of $228,014 78, which appears as the balance to the credit of income account, we have on hand in cash and loaned on call the sum of $145,354 80. The remainder has been used in the extinguishment of our floating debt, and will be replaced by an early realization from valuable assets.

American Railroad Journal.

Saturday, January 11, 1862.

Share and Money Market.

The Share Market the past week has been buoyant under the settlement of the English question, and the suspension of specie payment, which has caused great ease in the money market; and also in view of the proposed issue of Treasury notes to the amount of $100,000,000, to pass as money. An inflation in prices is naturally looked for under these circumstances. An unpleasant feature in the monetary circles is the high premium which gold is commanding, selling as we write at from four to five per cent. advance. It is claimed that the advance is purely speculative. It is so unquestionably, in part; but if the government undertakes to make its money legal tender, we must look for a wide difference between the prices of these, and the precious metals. This difference may be removed by a proper system of taxation, which shall restore domestic exchanges to a healthy condition, and retire the notes issued. Such a law only will correct the evil complained of. Money is abundant, there being but little demand for the trade. Exchange is nominally at from 113 to 115; the prices keeping pace with the premium on gold.

Holders of certificates of a loan made to the Receiver by the bondholders of the Chicago, Alton and St. Louis Railroad Company are requested to present the same to Messrs. Moran Brothers, of New York, on or after the 15th of January inst., and receive the interest due thereon for the year 1861.

Mr. J. M. Baker has been appointed Treasurer *pro tem* of the Chemung Railroad Company, vice William S. Brown, resigned. The dividends will be paid by him at the office of the Park Fire Insurance Company, where all the business of the company will be transacted for the present.

The Philadelphia and Reading Railroad Company have declared a dividend of 7 per cent. on the preferred stock, payable on the 15th inst., free of State tax, at the office of the company in Philadelphia, at the Farmers' Loan and Trust Co., New York, and at the office of J. E. Thayer & Brother, Boston.

The coupons due January 1st, 1862, of the registered mortgage bonds of the Elmira and Williamsport Railroad Company, will be paid on presentation at the office of the Pennsylvania Company for Insurance on Lives and Granting Annuities, No. 394 Walnut st., Philadelphia.

The Northern, late the New London, Willimantic and Palmer Railroad, has declared a dividend of $2 per share, payable on the 13th inst.

The Second and Third Street Philadelphia City Passenger Railroad Company, has declared a dividend of 5 per cent. The Fifth and Sixth, 3½ per cent. The Spruce and Pine, 50 cents per share. The Tenth and Eleventh $1.20 per share. The Girard College $1.00 per share. The Ridge Avenue and Manayunk 50 cents per share.

New Bedford and Taunton Railroad.

The report of the New Bedford and Taunton Railroad Corporation contains the following statements:—

N. B. & T. Railroad—cost of road and equipment		$553,014 70
Fairhaven Branch—cost of road and equipment		300,000 00
Running expenses of N. B. & T. R. R. for the year	$90,776 18	
Gross earn'gs for the year	122,322 37	
Net earnings for the year		$20,545 94
No. of miles run for the year	51,520	
Runing expenses of Fairhaven Br. for 5 months	$28,468 28	
Gross earn'gs for 5 months	29,191 74	
Net earnings for 5 months		$693 46
No. of miles run for 5 months	13,195	

The dividend for the last six months was passed.

Worcester and Nashua Railroad.

The earnings of this road for the year ending Nov. 30th, 1861, were $195,669 78; expenses for same time, $112,481 35; interest, $8,192 11; dividends, $60,886; total, $181,561 46; surplus not divided, $14,108 32.

Providence and Worcester Railroad.

From the seventeenth annual report of this corporation we learn that the income during the year ending Nov. 30, 1861, was:

For transportation of passengers	$120,081 79
" " merchandise	175,614 62
" " mails	5,114 25
" rents	2,140 37
" express	5,277 00
Total income	$308,228 08

Expenses for operating and maintaining the road:

Fuel	$17,694 41
Oil	2,819 18
New cars and repairs of old ones	15 504 29
Repairs of locomotives	15,881 37
Freight department	27,169 92
Passenger "	21,462 73
Maintenance of way	41,580 02
Miscellaneous	26,666 21
Total expenses	$168,781 13
Earnings, after deducting expenses	$139,446 90
Balance of interest paid by the Co.	5,158 09
Net income for the year	$134,288 81

The funded debt has been reduced $52,000 during the year, leaving the amount $147,000 still due. A considerable portion of this amount has been realized from the sale of 398 shares of the stock of the company at 6 per cent. over its par value. The road is represented to be in good order, and its appointments the same. There is no floating debt. The capital stock is $1,600,000—nearly all paid in—and the total cost of the road and equipments up to date of report has been $1,698,991 07. The average rate of interest paid stockholders

during the year has been 6 per cent. The total permanent investment and resources of the company is $1,812,330.

Boston and Lowell Railroad.

The business of the Boston and Lowell Railroad for the year ending September 30, 1861 was as follows:

Gross income	$478,586 63
Expenses	333,948 61
Net profits	$134,638 03

As compared with the last year, this shows a decrease of $69,440 14 in the receipts, and $25,468 08 in the expenses—a net decrease of $38,972 06. The amount of the reserved fund of the company is $378,661 23. Whole debt of corporation $462,382 50. Amount of sinking fund September 31, to pay this debt, $112,357 69, which will be increased on the 31st inst., by the amount of semi-annual deposit of $9,150, and of one year's accumulation.

Western, Mass., Railroad.

Notwithstanding the disturbances in business, the Western Railroad has done a large business for the year ending Nov. 30, 1861. The total income of the road has been $1,894,567 96; the expenses were $1,081,571 17, leaving a net income of $812,996 79, from which a dividend of eight per cent. was paid, $50,000 appropriated to the sinking fund, and $338,952 43 to the payment of interest on debt, &c. A surplus remains of $404,748 88. The total debt of the road is $6,347,520 Value of sinking fund $2,500,292.

This great road employs fifteen hundred and seventy-five men. It has carried 563,140 passengers during the year, equal to 23,000,000 one mile, and 508,179 tons of freight; and its cars have run 1,234,018 miles, burning 47,007 tons of wood, and 9,000 tons of coal. This road crosses the public way at grade in 109 places. Last year the income of the Western Railroad was $1,881,350 72, and the expenditures $993,096 30, an increase of income this year of $13,217 24; and of expenses of $88,474 77. It has carried 54,742 passengers less this year, but the freight convey was 2,632 tons greater than in 1860.

Boston and Providence Railroad.

The annual report of the directors of this corporation shows that the road has been conducted with the care and skill which have secured for it such prosperity during several years. The directors say:—

"It will be observed that the principal which has been adopted and rigidly adhered to for the last few years of reserving a certain amount annually as a fund for renewals, has been productive of the desired effect in exhibiting great uniformity in the expense account from year to year.

The gross receipts last year were		$588,871 49
Expenses in operating the road, includ'g int. paid.	$285,108 73	
Paid for new locomotive.	8,000 00	
" 20 new freight cars	9,550 00	
" new freight house.	7,000 00	
Carried as a reserve to the several f'ds for renewals	14,896 90	
		$324,555 63
Leaving a balance of		$264,315 76

"We have, in common with other similar corporations, experienced the effects of a partial derangement of the business of the community during the last year, but not to such an extent as to make it necessary to diminish our usual dividend. Our funded debt has been reduced during the year by the sum of $30,000. The amount still due, payable at various periods before 1868, is $132,720."

Fitchburg and Worcester Railroad.

At the recent annual meeting of this company, the following gentlemen were elected directors for the ensuing year: Ivers Phillips, Nathaniel Wood, Joseph Haskell, Dr. William D. Peck, and I. H. Spring. Col. Phillips was re-elected President, and H. F. Coggshall, Clerk.

The capital stock of this road is fixed at $275,000, of which $217,825 79 has been paid in. The funded debt amounts to $55,400, and the floating debt to $5,900; total $61,300. During the past year the earnings were $33,820 57, and the cost of working the road $26,168 76. The surplus on hand last year, after paying expenses, interest, and dividends, was $9,177 86; this year it is $1,674 45. This reduction of the surplus has been occasioned by extra expense incurred in enlarging the depot accommodations at Fitchburg. The business of the road is carefully and skillfully managed. It pays a semi-annual dividend of 8 per cent.

Panama Railroad.

The statement of this company for the year ending December 31, 1861, is as follows:

Balance to credit "Income Account," after dividend, January 2, 1861, per statement		$650,809 20
Add excess of receipts over estimate for part of December		35,615 31
Total		$686,424 51
Less amount carried to credit "Undivided earnings" account		650,809 20
		$35,615 31
Receipts from Dec. 31, 1860, to Dec. 31, 1861:		
For passengers	$694,414 36	
For freight, merchandise	630,996 32	
For freight, treasure	134,144 26	
For mails	11,515 47

Little Miami Railroad Company.

At the recent annual meeting of the stockholders of this company, the following gentlemen were elected directors for the ensuing year: Nathaniel Wright, Larz Anderson, John G. Groesbeck, James Hicks, Jr., Alphonso Traft, Charles H. Kilgour, Henry Hanna, Cincinnati; John Bacon, Springfield; Abraham Hivling, Xenia; W. H. Clement, Cincinnati; J. R. Swan, Columbus; Joseph C. Butler, Cincinnati.

The Board subsequently met and organized as follows:

W. H. Clement, President; C. H. Kilgour, Secretary; S. E. Wright, Treasurer; D. G. A. Davenport, Auditor; E. W. Woodward, Superintendent.

The earnings and expenses of the road as compared with those of the preceding year were as follows:

	1860.	1861.
Earnings	$1,328,332 84	$1,330,050 57
Expenses	830,410 32	800,069 49
Net earnings	$497,922 52	$529,981 08
Increase in gross earnings		$1,717 73
Decrease in expenses		30,340 83
Increase in net earnings		$32,058 56

Coinage in the United States in 1861.

Statement of bullion deposited at the Mint of the United States and branches during the fiscal year ending June 30, 1861:

	U. S. Mint, Phila.	Brch. Mint, San Francisco.	Assay Office, New York.	Total.
Gold.				
Fine bars	$17,865,478	....	....	$17,865,478
U. S. bullion	1,066,822	$12,306,382	$20,792,834	34,216,889
U. S. bullion (parted from all silver)	47,733	....	52,599	53,766
U. S. coin (O. S.)	1,675	....	2,513	4,188
Jewellers' bars	111,375	....	262,939	374,214
Foreign coin	2,750,375	....	27,586,517	30,624,503
Foreign bullion	24,703	....	3,664,126	3,710,630
Total gold	$51,896,763	$12,259,981	$52,358,095	116,970,002
Silver.—Bars	$1,487,279	....	....	$1,487,279
U. S. bullion	23,572	$197,814	$338,473	610,011
Foreign coins	160,754	....	1,015,069	1,369,702
" bullion	24,702	....	388,228	1,157,963
Total silver	$1,726,309	$197,944	$1,791,770	$4,624,061
Tot. gold & silver	$54,617,072	$12,456,325	$54,149,865	121,594,964
Less re-deposits at the different institutions (gold $47,885,478, silver, $1,562,914)				49,448,393
Total deposits				$72,196,571

The amount of bullion received at the Mint and its branches during the year was as follows: Gold, $116,970,002 66; silver, $4,624,961 57; total deposits, $121,594,964 23. From this total must be deducted the re-deposits of bullion, or bars made at one institution, and deposited at another for coinage. This deduction being made, the amount will be $72,146,571 01.

The coinage for the same period was as follows: Gold coins, $60,693,237; fine gold bars, $20,015,163 64; silver coins, $2,605,700; silver bars, $278,006 94; cent coins, $101,660. Total coinage, $83,693,767 58; number of pieces of all denominations of coin, 23,724,913.

The coinage of the Mint and its branches, from their respective organizations to the 30th of June, 1861, has been as follows:

Gold	$669,116,406 62
Silver	128,159,481 97
Copper	2,647,473 55
Total	$799,923,362 14

Of this coinage about $520,000,000 was from bullion derived from the mines of the United States.

Railroad Earnings--Monthly.

The earnings of the Hudson River Railroad for

December, 1861, were	$246,282 98
" 1860	220,370 19
Increase	$25,012 79

The following are the December earnings of the Buffalo, New York and Erie Railroad Company:

	1861.	1860.
Passengers	$9,537 01	$8,031 15
Freight	65,863 51	26,452 60
Other sources	2,650 00	2,401 34
Total	$78,040 52	$36,885 09
Increase	$41,164 43	

The earnings by the Chicago, Burlington and Quincy Railroad (310 miles) were in December, 1861, $166,191 61 against $132,840 47 in December, 1860, showing an increase of $33,351 14.

The earnings of the Chicago and Rock Island Railroad for December, 1861, were $107,839
Do., 1860 72,081
Increase $35,758

The earnings of the Toledo and Wabash Railroad for December were:

	1860.	1861.
Passengers	$16,986 35	$13,912 27
Freight	34,409 05	78,661 46
Totals	$51,295 40	$92,573 73
Increase		$41,278 33

The earnings of the Cleveland and Toledo Railroad in December, 1861, were $105 484
Do., 1860 82,769
Increase $22,715

The earnings of the Galena and Chicago Railroad for December, 1861, were $118,501
December, 1860 94,859
Increase $23,642

The earnings of the Michigan Central Railroad for December, 1861, were $200,133 76
Do., 1860 129,022 26
Increase $71,111 50

The receipts of the Chicago and Northwestern Railroad for the month of December, 1861, were $55,257 42
Do. 1860 53,553 88
Increase $1,703 54

Finances of Louisiana.

We copy from the N. O. *Picayune* of Nov. 29, the following synopsis of the late message of the Governor of Louisiana:

The State taxes are payable annually; on or before the 1st day of December. The Auditor's account, up to the 15th, show for:

Taxes collected, $614,816; due and still unpaid, $1,113,948. The collections have been only one-third of the assessment.

On the same day there were funds in the Treasury, amounting to $383,622 27.

We group together the statements of military expenditure, for this year, as follows:

The appropriations for military purposes made by the last Legislature amounted to	$960,000 00
The Governor has expended of this sum from the Treasury	$758,446 15
He has expended of the sum of $670,000 borrowed from the banks	656,761 66
The total military expenditures have therefore been	$1,415,207 81
There are debts for same objects unpaid, amounting to	181,600 00
Total cost of military	$1,596,807 81

To these the Governor adds an estimate for $100,000 for the equipment and subsistence of 5,000 men, for 30 days, in case of invasion. The whole war expense of the State for the year will, therefore, be, ascertained and estimated, $1,696,807 81.

This sum forms a charge against the Confederate States, and is now before the Confederate authorities at Richmond, to be audited and paid. The amount, when allowed, will be an offset against the Confederate tax laid upon the State, and will help the State to settle with the Confederate authorities, and assume the collection of the quota of Louisiana, through her own officers, and at her own convenience.

In making these expenditures, the Governor has obtained a loan of $670,000 from the banks of the city, (excepting the Bank of Orleans and the Crescent City Bank), of which sum he has on hand $106,101.

The debts to the banks for advances, to the Quartermasters, and for estimated military expenditures, reach to $951,000. There is of this unexpended $106,101 33 on hand, and authority to pay $191,553 85, the unexpended portion of the appropriation of $960,000. New appropriations will, therefore, be required for $653,944, and new means to the amount of $845,499 33.

The cash in the Treasury belonging to the several branches of domestic administration, is $383,622 27, of which only a trifle of $12,860 belongs to the general fund, applicable to appropriation.

This is the aspect of the State Treasury, which will tax the wisdom and sagacity of the Legislature to find means for supplying a public credit. The willingness of the people to contribute unstintingly to the public wants, is constrained only by the lack of ways in which to make their property and means serviceable to the cause in which we are all embarked. The measures suggested by the Governor as palliatives for the disorders of finance are:

1. An extension by the Legislature of the time for collecting taxes.

2. The making of Confederate money receivable for State taxes.

3. The authority to planters to issue "supply notes," or notes negotiable for the purchase of plantation supplies, which shall be a lien on crops.

4. The suspension by the Legislature of the duty imposed on the Attorney General to institute proceedings for a forfeiture of the Bank charters for suspension of specie payment, with provision to submit their action to a convention of the people, held after the conclusion of peace.

The issuing of small notes by the Banks, for the purpose of abating the nuisance of illegal private circulations.

The Governor reports the number of Louisiana troops now in service to be as follows: Eight regiments and two battallions in Virginia; three in Kentucky, and one in Missouri, and five more within the State.

The aggregate of soldiers furnished by Louisiana is 24,093 men, which is half of the usual voting population of the State.

Railroad Earnings--Weekly.

The receipts of the Grand Trunk Railway of Canada for the week ending Dec. 28,

were	$85,758 07
Corresponding week, 1860	60,805 49
Increase in 1861	$24,952 58
Total traffic from July 1st, 1861	$1,970,095 97
Corresponding period previous year	1,786,180 68
Increase	$183,915 29

The traffic of the Great Western Railway of Canada for the week ending Jan. 3, 1862, was as follows:

Passenger	$13,231 64
Freight and live stock	41,263 87
Mails and sundries	1,309 68
Total	$55,805 19
Corresponding week of last year	35,245 93
Increase	$20,559 26

The estimated earnings of the Cleveland and Toledo Railroad for the last eight days of December, 1861, were $34,672
Do., 1860 22,931
Increase $11,741

The earnings of the Michigan Central Railroad, for the last ten days in Dec., 1861, were $70,886 85
Do. 1860 39,845 40
Increase $31,041 45

The earnings of the Galena and Chicago Railroad the 4th week in Dec., 1861, were $25,515
Do., 1860 31,697
Decrease $6,182

Consolidation of Pennsylvania Railroads.

THE PENNSYLVANIA; AND THE PHILADELPHIA AND ERIE RAILROAD COMPANIES; THE LEASE NOT AN ASSIGNMENT FOR THE BENEFIT OF CREDITORS; THE ACT OF MARCH 7, 1861, PRONOUNCED CONSTITUTIONAL.

The case of Gratz vs. The Pennsylvania Railroad Company, and the Philadelphia and Erie Railroad Company came up before the Supreme Court of Pennsylvania, in equity, on a motion for an injunction, to restrain the defendants from carrying out certain contracts made between them in pursuance of acts of the Legislature, apparently authorizing them; and the Court have now decided in favor of the defendants, and denied the motion for an injunction.

The complainant was a stockholder in both the companies, and a citizen and taxpayer of the Commonwealth. He charged that the defendants were about to enter into contracts with each other, by which the Pennsylvania Railroad Company would become the purchaser of the Rolling Stock of the Philadelphia and Erie Railroad Company, and also of their bonds secured by a mortgage, dated March 30, 1861, (claimed to be the first mortgage upon all the railroad, except the part between Williamsport and Sunbury,) and also to become the lessee of their railroad for the term of 999 years. The reasons assigned were: first, that the defendants had not the corporated power to enter into them: second, that even if they had the power, the contracts themselves constituted an assignment in trust for the benefit of creditors, with preferences; and third, that the bonds proposed to be sold and purchased were not secured by the first lien upon the railroad, but that there was a prior mortgage of seven millions of dollars not legally satisfied; and if the contracts were consumated the bonds purchased would prove worthless in consequence of the prior incumbrance.

The Court held, that, the purchase by the railroad company (as in this instance) of the rolling stocks and bonds of another railroad, accompanied by a lease for 999 years: by the terms of which, the lessee is to keep the road in repair, maintain its equipment, and pay 30 per cent. of its gross earnings to the lessors, is valid, by virtue of the acts of April 13, 1860, and April 23, 1861; and is not an assignment for the benefit of creditors. Also that the act of March 7, 1861, authorizing the State Treasurer to cancel $3,500,000 of the bonds of the Sunbury and Erie Railroad, and directing the satisfaction of the mortgage for $7,000,000 is constitutional; and the mortgage for $5,000,000 executed March 30, 1861, is the first lien on the Philadelphia and Sunbury Railroad from Williamsport to Erie, and second only to the $1,000,000 on the road from Sunbury to Williamsport.

The following is the opinion of the Judge, delivered on the decision of the case:

STRONG J.—The last two reasons urged in support of the motion for an injunction, do not call in question either the legality of the proposed contract, or the power of the defendant to make them. They assert rather the impolicy of the arrangement, and deny that it will accomplish what the contracting parties intended. The purchasers of the bonds, it is said, instead of obtaining a security protected by a first mortgage, will, contrary to their expectations, be postponed to a prior incumbrance, satisfied of record indeed, but satisfied without authority of law. Whether for such reasons we should be authorised to interfere at the suit of a stockholder, or a tax-payer, and enjoin the defendants against consummating their proposed arrangement, we do not design now to inquire. We shall rather examine the objections urged by the complainant, and see whether they have any substantial foundation.

Is it then within the corporate powers of the two companies to enter into such contracts as they propose to make? This is hardly a debateable question. It would seem that if legislation could give it, the power has been given. Repeated Acts of Assembly have put this beyond doubt. The enactment of the second section of the Act of April 13, 1860, is, "that the President and Managers of the Sunbury and Erie Railroad Company (since changed by law to the Philadelphia and Erie Railroad Company,) be, and they are hereby authorized to make and enter into any contract or contracts with the Managers, or President and Directors of any other railroad company or companies within this Commonwealth, having relation to the completion, the working, or to the traffic originating on, or passing over or to and from the Sunbury and Erie Railroad, which may be considered just and reasonable by the contracting parties, and such contract or contracts shall be valid and binding upon the said companies represented by the said contracting parties, as fully as if the same were expressly authorized by their respective charters." It would be difficult to employ language more explicit and comprehensive than this. The contracts into which these defendants propose to enter are just such as this Act contemplated. They relate exclusively to the completion and working of the Philadelphia and Erie Railroad Company's road, and the traffic thereon. They contain not a provision or stipulation which does not bear more or less directly upon these objects. And if the Act of April 13, 1860, were not sufficient to confer upon the defendants the power to enter into such contracts, it is unmistakably given by the subsequent Act of April 23, 1861, which embraces all railroad companies created by and existing under the laws of this Commonwealth. It empowers them to purchase and hold the stock and bonds of any other railroad company chartered by the Commonwealth, and it makes it lawful for any railroad company to enter into contract for the use or lease of any other railroad, and to run, use, and operate it, provided the roads of the two companies so contracting or leasing shall be connected with each other, either directly, or by means of intervening railroads. The affidavits submitted with the bill in this case prove that the railroad of the Pennsylvania Railroad Company is connected with that of the Philadelphia and Erie Railroad Company by an intervening railroad, and so as to form a continuous route. The case is, therefore, fully covered by the provisions of this Act. It avails nothing to urge, against the words of the statue, the impolicy of contracts which substantially unite in one, two railroads so extended as those of these defendants. The question in hand is, whether the power has been given. Our province is to declare what the law is, not what the legislature should have done. We must hold that the law makers mean what they say, and we cannot therefore doubt that the defendants possess the power to make the contracts into which they propose to enter.

And if the contracts are within the corporate powers of the defendants, if they are authorized by Acts of Assembly, it may be doubted whether we should be justified in enjoining against them, even though we might be of opinion that they together would constitute an assignment in trust for the benefits of creditors, with preferences. This, however, need not be considered, for it is clear that they amount to no such assignment. They amount to a sale and a lease, not an assignment within the Act of Assembly. They create no trust. It is stipulated in each of them, that before they take effect, arrangements shall be made by the Philadelphia and Erie Railroad Company to pay or satisfy all their debts, except those secured by mortgage. By one of the contracts it is stipulated that the Pennsylvania Railroad Company shall purchase the mortgage bonds of the other party, at a fixed rate of discount, and that other party agrees to complete the construction of their unfinished railroad. By the other contract, bearing even date, the Philadelphia and Erie Railroad Company leases its road to the Pennsylvania Railroad Company for the term of nine hundred and ninety-nine years. The lessees covenant to stock the road and run it, and keep it in order and repair, fixing and collecting their own tolls and charges for freight. They also covenant to pay a rent equal to thirty per cent. of the gross revenue, and to pay it, first, in discharge of the taxes upon the property devised; secondly, as to a portion (to be agreed upon,) directly to the lessors; thirdly, in discharge of the interest on all the mortgage bonds of the lessors, according to their respective equities and priorities, and to the payment of that part of the principal of the bonds which is due to the sinking fund of the Commonwealth, and secured by one of the mortgages; fourthly, to pay the surplus, if any, to the lessors. To call this an assignment in trust for the benefit of creditors, is a perversion of terms. The case is diverse from Lucas *vs.* The Sunbury and Erie Railroad Co., 8 Casey, 458. The stipulated rent is to be paid wholly to the lessors, or in relief of the property demised from taxes and mortgages paramount to the term, and which might destroy it. This makes the ordinary case of a landlord agreeing with his tenant that the latter shall pay the taxes on the premises leased, and keep down the interest on prior incumbrances, and deduct his payments from the rent.

To understand the remaining objection of the complainant to the contracts proposed to be entered into, will require us to notice some of the legislation of the Commonwealth, and what has been done under it. By an Act passed April 21, 1858, and which was declared constitutional, in the Sunbury and Erie Railroad Co., *vs.* Cooper, the legislature authorized a sale of the canals then belonging to the Commonwealth, to the Sunbury and Erie Railroad Co., for the sum of three millions five hundred thousand dollars. The proposition was not to sell for cash, but entirely on credit. To secure the payment of the purchase money, the Act required the vendees to execute and issue their five per cent. bonds for seven millions of dollars, payable in instalments of one million each; the first in the year 1872, and an additional instalment each year thereafter, and to secure the payment of the bonds by a mortgage to two trustees, on the whole line of their railroad, finished and unfinished. Of these bonds, the State Treasurer was directed to receive an amount equal to three millions five hundred thousand dollars, in settlement for the purchase money of the said canals, and the residue were directed to be deposited also in the office of the State Treasurer, to be surrendered to the company as the work of completing their railroad progressed. The Act also provided that as a further security for the payment of the purchase money of the property sold, the vendees should execute and deliver to the State Treasurer other mortgages on the canals, and it enacted that in case of default by the vendees in paying the principal or interest of any of the bonds for ninety days after the same should become due and payable, a *scire facias* should issue, the mortgaged property should be sold, and that the proceeds of sale of the said canals should be paid into the sinking fund, and applied to the payment of the State debt.

In accordance with the proposition thus made by this Act of Assembly, the Sunbury and Erie Railroad Company became the purchaser of the State canals, and executed their bonds for seven millions of dollars, with an accompanying mortgage upon all their road. The mortgage was recorded, and all the bonds were delivered to the State Treasurer in pursuance of the requirements of the Act. One half of the bonds, to wit: three millions five hundred thousand dollars, represented the purchase money of the canals, and belonged to the Commonwealth. The other half belonged to the company that issued them, and were to

be delivered to them for negotiation, as the work on their railroad progressed. There was already a mortgage for one million of dollars, which was the first lien upon that part of the railroad extending between Sunbury and Williamsport.

Consequently some advance was made towards the completion of the unfinished pdrts of the railroad, and in making it debts were incurred by the company to contractors and material men. The advanced stage of the work, while it increased the debt of the company, necessarily enhanced the value of the property embraced within the mortgage. It was in view of this fact, doubtless, that when the mortgagors had failed to pay to the Commonwealth the interest on the bonds for the purchase money of the canals, the legislature, by the Act of April 13, 1860, directed that bringing suit on the mortgage should be postponed, and enacted that if any judicial sale of the road should thereafter be made, the amount, not exceeding six hundred thousand dollars, due contractors on that part of the road between Williamsport and Erie, for work and labor actually done, and materials furnished between the first day of August, 1859 and the first day of April, 1860, shall be postponed to the mortgage held by the Commonwealth. A list of the preferred claims was required to be furnished to the Auditor General. Some, if not all of them, were evidenced by bonds or scrip. After this Act of Assembly, it is evident the security of the Commonwealth was not less than it was when the mortgage was taken.

But the Sunbury and Erie Railroad Company were utterly unable to dispose of their portion of the bonds secured by the seven millions mortgage, which remained in the office of the State Treasurer, and of course they were unable to complete their railroad or even to pay the accruing interest on the bonds owned by the Commonwealth. This is abundantly established by the affidavits submitted to us, and it has been conceded by the legislature. The security which the Commonwealth held for the payment of the purchase money of the State canals, was therefere a mortgage upon an unfinished railroad; upon a road which could not be finished while the seven millions mortgage remained. Not only so, but there was a prior mortgage of one million of dollars upon the eastern end of the road, from Williamsport to Sunbury, and a prior lien not exceeding six hundred thousand dollars, upon the remainder. Then the other three millions five hundred thousand dollars covered by the mortgage stood in equal right with the Commonwealth. And the road was not only unfinished and incumbered with prior and coeval liens, but it was in such a condition of progress as to be of very little value for traffic or for sale. The extremities had been completed, but the large bodies by which the extremities were designed to be connected was all unmade. In such circumstances the legislature thought, and, if the affidavits submitted with the present motion are to be believed, they were warranted in thinking that the mortgage for seven millions of dollars was no adequate security, if indeed it was any security at all, for the payment of the debt due the Commonwealth. To make the security effectual, it was indispensable that the railroad should be completed. Accordingly, by the Act of March 7, 1861, it was enacted that the name of the Sunbury and Erie Railroad Co. should be changed to the Philadelphia and Erie Railroad Co., and that the company might execute new bonds for the five millions of dollars secured by a first mortgage to trustees on all their road, except, that from Sunbury to Williamsport it should be second to the one million mortgage which had before that time been given. The Act also directed that the bonds should bear interest at the rate of six per cent., should be payable in twenty years, and should be used by the said company for the purpose of completing and equiping their railroad, and for the payment of debts contracted concerning the same, and for the payment of the scrip issued by the company under the Act of April 13, 1860. To insure this required application of the bonds to the completion of the road, and the payment of the debts incurred in completing it, including the scrip previously declared prior to the claim of the Commonwealth, all the bonds were required to be deposited with the State Treasurer, and by him delivered to the company according to the progress of the work, after endorsement of the Secretary of the Commonwealth that they were issued by authority of law. The Act also authorized the company to execute other six per cent. bonds for four millions of dollars, and secure the same by a second mortgage to the Commonwealth, on the same property. It directed that these bonds, with the accompanying mortgage, should be delivered to the commissioners of the sinking fund, to be held *as collateral security* for the payment of the bonds for three millions five hundred thousand dollars, given for the purchase money of the canals. Thereupon the State Treasurer was directed to cancel and surrender all that portion of the seven millions mortgage bonds which belonged to the company, retaining uncancelled however, the bonds amounting to three millions five hundred thousand dollars, which belonged to the Commonwealth; and the trustees of the seven millions mortgage were directed to enter satisfaction on it, on the surrender and cancellation of all the bonds secured by it, except those owned by the Commonwealth.

The provisions of this last mentioned act have been accepted and performed. The five millions mortgage and bonds were executed on the 30th of March, 1861, and deposited with the State Treasurer. The four millions mortgage and bonds have also been executed and delivered to the commissioners of the sinking fund, and satisfaction has been entered upon the mortgage for seven millions.

It is now claimed that the Act of March 7, 1861 is unconstitutional; that the mortgage for seven millions of dollars has been marked satisfied without sufficient authority of law; that it still remains of force, and consequently that the five millions mortgage will not be the first lien on all the railroad between Williamsport and Erie, and subject only to the one million mortgage on that part of the road between Williamsport and Sunbury. It is insisted, that directing satisfaction to be entered on the mortgage for seven millions of dollars was a violation of section 4, article 11, of the Constitution of the State. That section provides for the establishment of a sinking fund for the payment of the public debt, and it declares that the sinking fund shall consist of the net annual income of the public works from time to time owned by the State, or the proceeds of the sale of the same or any part thereof, and of the income or proceeds of the sale of stocks owned by the State, together with other funds or resources that may be designated by law. It also declares that the said sinking fund may be increased from time to time by assigning to it any part of the taxes or other resources of the State not required for the ordinary and current expenses of government, and "that unless in case of war, invasion or insurrection, no part of the said sinking fund shall be used or applied otherwise than in extinguishment of the public debt, until the amount of such debt is reduced below the sum of five millions of dollars."

Is, then, the provisions of the Act of March 7, 1861, which directs satisfaction to be entered upon the seven millions mortgage, an *use* or *application* of any part of the sinking fund otherwise than in extinguishment of the public debt?

It is not worth the while to inquire whether at the time when the Act was passed, the bonds for the three millions five hundred thousand dollars were in the sinking fund. Strictly speaking, perhaps, they were not. The constitutional idea of that fund was doubtless that it should be money; something that could be applied directly to the payment of the public debt. But the bonds can hardly be called the proceeds of the sales of the canals. Those canals are not yet paid for. The proceeds of their sale are yet to be received. The bonds are but the evidence of indebtedness. They represent the proceeds of sale—they are not the proceeds themselves. Still less the mortgage. That was not even the representative of a debt. It was given, not to the Commonwealth, but to two other persons, who were made by it trustees of all the holders of the seven millions bonds. Each holder had as much control over it as the State herself. It added nothing to the amount due the Commonwealth, and its release could take nothing out of the treasury, or out of the sinking fund. With or without the mortgage the debt is the same; the amount of the proceeds of the sale of the canals unchanged.

But it would be a very narrow and illiberal construction of the constitutional order, were we to say that the securities taken for the purchase money of the public works are not within its protection. A Constitution is not to receive a technical construction, like a common law instrument or a statute. It is to be interpreted so as to carry out the great principles of the government, not to defeat them; Commonwealth *vs.* Clark. It must necessarily be brief, and speak in general terms, for its province is only to declare organic rules. Our duty is to enforce its meaning, to take care that what was intended to be accomplished by it shall not fail.

Treating, then, the debt due to the Commonwealth from the Philadelphia and Erie Railroad Company, and evidenced by the bonds, as within the sinking fund, and entitled to the protection of the constitutional ordinance as fully as its equivalent in money would be, how does the satisfaction of the mortgage amount to an *use* or *application* of any part of it contrary to the constitutional prohibition? To what other use is it applied? Not to the use of the Commonwealth, certainly. Not to the use of the mortgagors, for no part of the debt is released by the satisfaction of the mortgage. The debt, and the whole debt, remains due as before. The bonds for three millions five hundred thousand dollars continue in the sinking fund. The mortgagors and the obligors are still debtors as fully as ever. The proceeds of the sale of the canals are neither given away nor applied to any new use. And if there be no diversion of the fund from the object to which it was dedicated by the fundamental law, then nothing has been done which the Constitution prohibits.

It is material also to observe that if the Constitution is to be so construed as to bring the evidences of the debt due by the company to the Commonwealth, into the sinking fund, as we think it must, it follows, as a necessary consequence, that there is power in the government to manage the securities for the debt, and make such changes in them as will best effectuate the grand object which the framers of the Constitution had in view. And if this power exists, it must be in the legislature, subject perhaps, though only indirectly, to the supervision of this court. Now, what the framers of the Constitution mainly intended, was the dedication of the proceeds of the sale of the public works irrevocably to the payment of the public debt. The payment of that debt was the great end sought to be obtained, all else was but subsidiary to it. But this dominant purpose, this object of the Constitutional ordinance would be defeated, if, when a security for a debt has gone into the sinking fund, there remains no power over it except that of custody. If the commissioners of the sinking fund and the legislature must stand helpless and see the evidences of indebtedness belonging to the fund decaying from year to year into worthlessness, if they may not substitute a better for a worse security, then the Constitution but "holds the word of promise to the ear and breaks it to the hope." Such a view of it is worse than clinging to the letter and sticking in the bark, for not even the letter of the Constitution prohibits the administration and prudent management of whatever belongs to the fund. It prohibits only its perversion to any other use than the payment of the public debt. So far from inhibiting prudent measures to secure a debt, in spirit it enjoins them. It makes it the duty of all who have charge of the fund to see to it that all that belongs to it shall be effectually applied to the purpose for which the fund was created. And I cannot doubt that whenever it is made apparent that a possible change of securities is necessary to

guard any part of the fund from loss, this court would order it. In doing so, they would exercise only the ordinary powers of a court of equity over trustees, and they would be furthering the design of the framers of the Constitution. And if this is so, then it cannot be doubted that a court of equity would sanction precisely what the legislature did by Act of March 7, 1861, when they ordered the seven millions mortgage to be satisfied. We shall not go over in detail the facts as they have been exhibited to us in the proofs, not even mention again those which we have recapitulated. Let it suffice to say that the affidavits prove, without any attempt at contradiction, what is apparent also from the several Acts of Assembly, that the debt due to the Commonwealth is much safer, since the Act of March 7th, 1861, than it was before. The original debt, or rather the original evidences of debt, remain unchanged. A collateral security only has been given up, while an improved one is substituted in its place. We think this was not beyond the Constitutional power of the legislature to direct.

It remains only to add that, in our opinion, the seven millions mortgage was legally marked satisfied; that the five millions mortgage is the first mortgage upon the entire railroad from Williamsport to Erie, and second only to the one million mortgage on the part of the road between Sunbury and Williamsport; and that there is no ground for the injunction for which the complainant moves.

The motion for an injunction is therefore overruled.

Reverse Acting Tumbler LOCKS

For Railroad and other Purpose,

MADE to order and with different keys if desired. **One Thousand Dollars** has been offered by the inventor to any person who will pick one of their locks or get it out of order by any ordinary usage.

Orders filled, samples and prices furnished by application to the **Sole Agent** *of the Manufacturer.*

New York, January 4, 1862.

GEO. T. M. DAVIS,
3m2 47 Exchange Place.

FOR SALE.

5 Locomotives, 4 ft. 8½ in. gauge.
50 House Freight Cars, that have had but slight use.
The above are at Chicago, Ill.
January 4, 1862.

Apply to GEO. T. M. DAVIS,
3m2 47 Exchange Place.

RENSSELAER POLYTECHNIC INSTITUTE, TROY, N. Y.

THE seventy-sixth semi-annual session of this well-known Institution for instruction in the Mathematical, Physical and Natural Sciences, will commence on Wednesday, Feb. 19th, 1862. A full course in Military Science is now in progress. Graduates of the Institute find no difficulty in obtaining very desirable positions as Civil, Naval and Topographical Engineers. The Annual Register, giving full particulars, can be obtained of Prof. CHARLES DROWNE, Director.

612 N. S. S. BEMAN, *President.*

PASCAL IRON WORKS,

ESTABLISHED 1821.

MORRIS, TASKER & CO..

MANUFACTURERS OF

Lap-Welded American Charcoal Iron Boiler Flues—from 1¼ to 10 inches outside diameter, cut to definite lengths.

Wrought Iron Welded Tubes—from ⅛ inch to 8 inches inside diameter, with screw and socket connections, for Steam, Gas, Water or other purposes; also, fittings of every kind to suit the same.

Wrought Iron Galvanized Tube—strong and durable, designed especially for water purposes.

Cast Iron Gas or Water Pipe—1½ to 24 inches in diameter, and branches for same, etc.

Gas Works Castings, etc., etc.

PHILADELPHIA.

LOCOMOTIVE FOR SALE.

SMALL second hand Locomotive, usual gauge (4ft. 8½ in.) Weight, 10 tons—Drivers, 4ft. 6in.—Cylinders 10x18 in. Fire-box, Crank and Tires nearly new, and the whole engine in excellent condition.

Also a second hand "Bradly" Snow Plow.

For sale low by

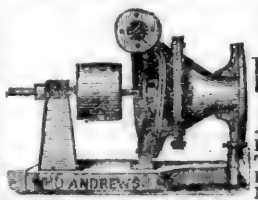
WILLIAMS & PAGE,
51 Boston.

OFFICE OF THE ILLINOIS CENTRAL R. R. Co., New York, Dec. 5, 1861.

AT a meeting of the Board of Directors of the ILLINOIS CENTRAL RAILROAD COMPANY, held at their office in New York this day, it was

Resolved, That an assessment of FIVE DOLLARS per share upon the Scrip Shares of the Capital Stock of the Company, be and the same is hereby called payable on the twentieth of January, 1862; and that the same be payable on the Stock registered in the City of New York at the office of the Company in that city; and on the Stock registered in London at the office of Messrs. ROBERT BENSON & Co., London; and that parties desiring to pay their assessment in London, may pay the same at a rate of exchange sufficient to produce five dollars per share to the Company in the City of New York.

Resolved, That the transfer books be closed on the afternoon of the 15th January next, and re-opened on the 20th day of the same month; and that no transfer be permitted, on or after that day, of shares upon which the foregoing assessment shall not have been paid.



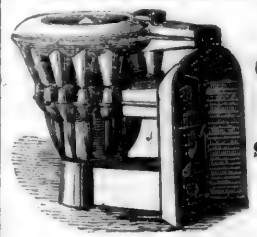
THOMAS E. WALKER, Treasurer.

The eighty-dollar certificates to be returned on payment of the above.

OFFICE OF THE ILLINOIS CENTRAL R. R. Co., New York, Oct. 29, 1861.

HOLDERS of the stock of this Company, as registered upon the books of the company at the close of business on the 15th day of January, 1862, will be entitled to Canceled Bonds Scrip for five dollars upon each share of stock held by them deliverable on or after the 1st day of February next; and parties holding certificates are hereby notified to have the same registered in their own names on or before the said 15th day of January. 48

ANDREWS' PATENT Centrifugal PUMPS



ARE the best and cheapest Pumps made for **RAILROAD STATIONS, MINES, FACTORIES, TANNERIES, PLANTATIONS, DRAINAGE, IRRIGATION, WRECKING,** and general use.

Made entirely of metal, without working valves or rubbing surfaces, they pass sand, fine ore and gravel, without injury. Capacity from 20 Galls. to 1,000 Bbls. per minute.

For descriptive pamphlet and Price List address

WM. D. ANDREWS & BRO.,
414 Water St., New York,
GENERAL DEALERS IN
Iron, Metals, new and second hand **Machinery.**

Sanford's CHALLENGE HEATERS

SET IN BRICK,

PORTABLE

OR AS

FIRE PLACE

HEATERS,

FOR WARMING BY ONE FIRE WITH PURE, SOFT AIR Dwellings, Churches, Hotels, Public Halls, Railroad Depots, Vessels, etc.,

WITH AND WITHOUT REGISTERS.

THE MOST POWERFUL HEATERS AND THE

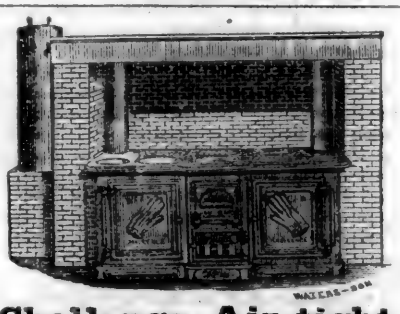
Greatest Fuel Savers in the World:

With an unparalleled mass of unimpeachable testimony of well-known Citizens, Ministers, Doctors, Lawyers, Merchants, Mechanics and others.

Send for pamphlet containing full description and testimonials.

SANFORD, TRUSLOW & CO.,
Nos. 239 and 241 Water st., N. Y.

The COSMOPOLITE PARLOR RADIATOR, & GAS BURNER,



Introduced one year ago, already ranks as the **LEADING STOVE** for PARLORS, SITTING ROOMS, and all places where a soft, pleasant heat is desired.

Fire may be kept all winter with an astonishingly small supply of coal.

Send for description and testimonials.

SANFORD, TRUSLOW & CO.,
Nos. 239 and 241 Water st., N. Y.

Challenge Air-tight KITCHEN RANGES,

May be placed in a fire-place without masonry, and with or without water-back; or may be set out on feet, as an ordinary stove.

This range, already very popular, has the **LARGEST OVEN** of any in the market; BAKES PERFECTLY, never failing to brown at the bottom; BOILS, ROASTS and and BROILS with unequalled facility and dispatch, and with extraordinary **ECONOMY OF FUEL,** which may be either coal or wood. Flues large and easily cleaned. A child can manage it, so simple is its construction. Castings extra heavy, and design plain and chaste.

Four sizes, adapted to families and hotels.

Beacon Light SUMMER AND WINTER PORTABLE RANGE,

Is a very popular range, having six boiler holes, one large oven that bakes perfectly, with an arrangement for roasting, or heating irons at the end. It is very economical of fuel. For a FEW DOLLARS a family may be supplied with a PERFECT COOKING APPARATUS, equal to the highest price stove in the market.

Three sizes, adapted to coal, or wood.

SANFORD, TRUSLOW & CO.,
239 and 241 Water st., N. Y

SANFORD'S MAMMOTH OR GLOBE HEATERS.

The best stoves for RAILROAD DEPOTS and SHOPS, and all places where a great heat is required. They are very durable, and very economical of coal.

Beware of imitations that are inferior in strength and in other respects.

TESTIMONIALS.

HUDSON RIVER RAILROAD OFFICE, N. Y

This Company have now in use, over two hundred of Sanford's Mammoth Heaters, in Station Houses, Work Shops, and Engine Houses; we commenced using them in 1853, and some of the first stoves put up are still good and in use. We consider them the best Heaters now in use.

J. M. HEBARD, Supply Agent.

UNION FERRY COMPANY.

The Mammoth Heaters have been used by this Company in their waiting rooms at the several ferries and found to be very excellent stoves and more durable and valuable than any heretofore used. CYRUS P. SMITH, Managing Director.

Our Mining Interests--Effect of the War on the Production of American Iron.

There never was a nation whose territory contained within itself so many elements of wealth, as our own. The prairies of the West yield their annual tribute of grain, our hills furnish abundant pasturage, through our valleys flow mountain streams, at all times ready to turn our mills; and beneath our soil lie millions of wealth which our children are destined to discover and turn to a practical account. The coal and iron mines of Pennsylvania are worth more to us than the yellow fields of California, and whether with or without a protective tariff, our friends of the Keystone State are destined to reap an immense income from them, in all time to come. It is natural that the presence of this immense source of wealth lying beneath their soil, should render Pennsylvanians anxious upon the subject of a tariff; and make them desirous of one that would protect them from foreign competition. The anxiety on this subject was stronger twenty years ago, than at present. Henry Clay, Daniel Webster, John C. Calhoun, all spoke earnestly and eloquently upon the question. The balance of interests was then against a high or specific tariff; and the Democrats triumphed in the establishment in 1846, of an *ad valorum* tariff of thirty per cent. on the importation of iron. But four years previously, the Whigs had adopted a high specific tariff; the result of which was to attract competition into the iron business, and to greatly increase the number of furnaces throughout the United States. This proved what a high tariff would do, and our iron manufacturers may now again congratulate themselves, that among the incidents *made necessary* by the war, is the imposition of a duty on iron, nearly equal to that of 1842. That tariff was passed by the Whigs, and established the following rates upon the importation of iron: on iron bars or bolts a duty of $17 per ton; on iron in pigs a duty of $9 per ton; on old scrape iron a duty of $10 per ton; and upon steel a duty of 15 cents per 100 lbs. As we before said, this tariff was amended in 1846, and an *ad valorum* tariff of thirty per cent. upon bolts, bars, blooms, pigs, rods, slabs, &c., &c., superceded the specific tariff of 1842. The rate of duty now collected on the importation of iron, is established by the recent act of March 2d, 1861; and the tariff imposed is, upon bar iron rolled or hammered a duty of $15 per ton; upon iron slabs a duty of $15 per ton, or not less than 20 per cent. ad valorum; upon rails, &c., fitted to be laid down without further manufacture a duty of $12 per ton; upon boiler plate iron a duty of $20 per ton; upon pig iron and old scraps a duty of $6 per ton; upon iron wire a duty ranging from 75 cents per 100 lbs., to $20 per ton; and upon steel in ingots, bars, sheets, &c., a duty of one and one-half cents per pound.

If a tariff but little higher than this produced favorable results in 1842, what may we not reasonably expect from the same tariff at the present time; or not so much at the present time, as when the war is ended, as we believe it shortly will be, and the business activity of peace becomes again general throughout our land. For, we must bear in mind, that the necessity of a revenue, the reason for the imposition of this tariff, will continue many years after the war is over, and there is, therefore, no danger to be apprehended from a repeal of this act.

We cannot expect to be freed from heavy taxation for twenty years to come; and Congress can confer no greater benefit upon the country, than in making the raising of this revenue, conduce to the development of native American Iron, and to the thrift of manufacturing interests in general. And we respectfully submit that if, as many good and able men formerly believed, and as many talented men still believe, the promotion of our manufactures should be sought, if necessary, by the imposition of heavy duties upon the importation of foreign manufactures, that the benefit is no less certain, or important, where the duty is imposed, not with the special object of promoting manufactures, but for the purpose of increasing the public revenue, or in raising money to be expended in maintaining the integrity of our common Union. The great *desideratum*, the exclusion of foreign competition, is in both cases, equally, obtained.

And our iron manufacturers are now just in a position to derive benefit from this tariff. In 1859 there were 1,159 iron mills in working order, of which 560 were furnaces, 389 were forges, and 210 were rolling mills. There were abandoned 272 furnaces, 99 forges, and 15 rolling mills. The number of tons of pig iron produced in 1854 was 724,833; the number produced in 1855 was 728,-973; and the number produced in 1856 was 812,-917. Thus showing an increase in the amount produced in each year, and from '55 to '56 an increase of nearly 85,000 tons. The following figures exhibit the number of tons of rails manufactured by the rolling mills during the four years immediately preceding 1856, in comparison with the number of tons imported from abroad.

	Made. Tons.	Imported. Tons.	Total. Tons.
1853.....	105,000	298,995	403,995
1854.....	121,000	282,867	403,867
1855.....	134,000	127,506	261,506
1856.....	142,555.	155,496	298,051

It thus appears that from 1853 to 1856, the number of rails manufactured at home gradually increased, while the number imported gradually decreased, until in 1856 the number made in this country about equalled the number imported. But in 1857 came a financial crises, and iron manufacturers suffered with all other branches of business. The last four years has pretty thoroughly sifted the chaf from the wheat; those of our merchants who were doing business on limited

means, or were poor financiers, have been compelled to go into liquidation; and we may safely calculate, that those who remain are solid men, both as regards capital and business talent.

Starting from this basis, we know that our iron manufacturers have the control of the American Market. The ruinous competition of foreign merchants, between the high tariff, and the unsettled state of things in this country and in England, is practically excluded from interfering with our domestic manufactures; and we think that English iron will never again find a sale on this half of the American Continent.

During the last five years there was an increase of 9,729 miles of railway. In 1846 when the whig tariff was repealed there was but 4,870 miles of railway, while there is now in actual operation 31,169 miles. This great length must be kept in running order, and hereafter, the rails must be the product of our own mines, the fruit of our own mechanical skill and industry. And as if to compensate us for our many other losses during the past year, there has been an unusually large foreign demand for our cereals; the graniers of the West have poured their rich treasures of life into the lap of Europe; our immense lines of railway have never before been so full of business; in the midst of war a new demand has been made upon our machine shops to supply the waste of the wear and tear of the last year; and should our difficulties be settled before another season, we do not question, but that it would be merely the beginning of a new and more enduring prosperity than ever before blessed our iron manufactures.

War is, therefore, not an unmixed evil. Manufactures is, perhaps, the greatest source of wealth, and our difficulties have compelled us to encourage home industries. With strong hearts and working hands, the past will soon be forgotten, in the realization of a brighter and a more substantial future; at least, so far as our iron manufacturing interests are concerned.

Foreign Commerce of the United States.

Anthracite Coal Trade of the United States.

The Southern division or field includes all the coal basins South of the Nescopeck Mountain; in the Northern division or field is included the canoe-shaped basin North of Wyoming Mountain, which is watered exclusively by the North Branch of the Susquehanna and the Lackawanna rivers, whose junction is at Pittston, near the centre of the coal area.

The Southern Coal Field, situated between the Mountains Nescopeck and Kittatining and the rivers Lehigh and Susquehanna, comprising the Schuylkill, Lehigh, Mahanoy, Shamokin, Wiconisco, Swatara basins, or districts contains the Southern Coal Field—233 square miles or 149,120 acres. The Northern Coal Field, comprising vale Wyoming and dell Lackawanna contains 178 square miles or 113,920 acres—making a total area of 411 square miles, or 263,040 acres.

National Finances.

We give from Messrs. Samuel Hallett & Co.'s Circular what we regard as a well digested view of the condition of the government, in relation to its finances, as well as in reference to the political complications that exists. The aspect of affairs is decidedly more favorable, and we very confidently predict that the lapse of another month will witness the authority of government reasserted in very extensive portions of the Southern States:

Congress has yet taken no definite action upon the various schemes before it for the relief of the Treasury, but there is no doubt of the adoption, as soon as it can be matured, of a system of national taxation that shall at least assume to provide for the expenses of government on a peace footing. The necessity and expediency of such a step is fully appreciated, which is a great point gained. There is no question of the willingness of Congress to act, but the whole matter is novel to us, and our internal condition is so unlike that of other countries that we have to frame, really for the first time in our history, a system which will require much time, and perhaps repeated experiments, before it can be so adjusted as to bear evenly, and not too oppressively, and at the same time produce all the money needed. Congress will act soon enough. The danger is that it may too precipitately in view of the

necessities which press upon it. With a declaration, however, of its determination, to follow up the treasury note bill by an adequate tax bill, the former may be immediately passed which would afford the requisite relief; and followed in good time by the other measures, will solve the whole difficulty by the confidence it would impart to the long bonds of government. All that is wanted to put these to *par*, is ample provisions for their interest, and to show that we shall not, after peace, be compelled to borrow for our current expenditures.

In the present CIRCULAR we can only urge upon Congress the measures that should be adopted. It is a great misfortune that the only ones that can give real relief should have been postponed until the present time. We cannot long carry on the war by borrowing. The suspension of the Banks resulted not at all from the lack of capital, but from a derangement in the domestic exchanges. The city of New York, through the loans that have been negotiated, supplied the greater part of the money for the war. This money was distributed all over the country. For a time it returned, to pay the balances due the city. After these were discharged, it remained where it was paid out, or did not find its way back fast enough to fill the vacuum created. An adequate tax would have returned it, and preserved a proper equilibrium. This will be gradually restored under the laws of trade. It will be still further aided by the issue of Treasury notes which will be paid out to the creditors of government wherever they are found, by whom they must, at present at least, be held. If sent to the cities they will help to supply the capital they have parted with. They will be converted, to some extent, into the long bonds of the government; and should these advance under proper financial measures, they may be absorbed nearly as fast as they are issued. Notwithstanding, consequently, the vast expenditure going on, our national finances have not presented since the war commenced an aspect so encouraging, in the disposition shown to place, by an adequate system of taxation, the whole available means of the country at the disposal of the government. We are entirely confident of the ability of the country to surmount every difficulty that may be encountered. Notwithstanding the inexplicable delays that have been suffered in military operations, the confidence of the people in their ultimate success remains unabated. There appears to be good ground for believing that the long period of inaction has been at last broken, and that a forward movement has already taken place along an immense line of operation of nearly 2,000 miles, extending from the Chesapeake to the distant territory of Kansas.

We have in previous CIRCULARS enlarged upon the ability of the country to sustain the enormous expenditures going on. Thus far the revenues of the Federal Government have been derived almost entirely from impost duties. All the other sources upon which other governments chiefly rely, are left open to us. Of the total amount received into the British Exchequer in 1860, 1861, $360,000,000, only $115,000,000 were received from Customs duties. Excise produced $95,000,000. At a similar rate of taxation upon similar sources of revenues, it may be made to produce in the United States, at least $60,000,000; and a much larger sum should it be extended to the production of cotton, tobacco and sugar, in imitation of excise duty, in England, on *hops*. England derives an impost revenue on tobacco of 80 cents per pound, or about $30,000,000 in the aggregate. We export annually some 175,000,000 pounds, of which, that country takes about 35,000,000 pounds. The revenue derived to foreign governments upon tobacco grown in the United States equals probably one dollar per pound, or $175,000,000. We see no reason why our own government should not derive some portion of its revenues from this most important article in commerce. Cotton may be properly taxed in the same way. The future expenses of government are to be largely incurred in the support of a local police, which should be a charge upon the products of the territory protected.

Stamps in England produced in 1860, 1861, about $42,000,000. Similar rates here would produce a larger sum from the vastly greater number of contracts entered into in this country. The income tax would produce less here than in England, but still would yield a large sum. Such a tax is levied equal to three per cent. on all incomes over $800. A direct tax of $20,000,000 is also laid. It will thus be seen that with the $100,000,000 already provided for, in impost revenues and lands, and in income and direct taxes, it will not be difficult to swell the amount to $200,000,000, or $250,000,000, a sum quite up to our anticipated wants. Our ability and disposition to pay is not to be questioned, and the readiness with which our people will assume their new and vast responsibilities, will create quite as much surprise abroad, as the courteous surrender of Messrs. Slidell and Mason, whom English journalists affected to believe would be detained against the decision of our government, if not torn to peices by an infuriated mob.

Louisville and Frankfort and Lexington and Frankfort Railroads.

The length of the Louisville and Frankfort Railroad is 65 miles; of the Lexington and Frankfort, 29 miles. These roads are operated as one; the net earnings, after the payment of all operating expenses, being divided between the companies in the proportion of the lengths of their respective roads. The receipts from the joint operations of these roads during the fiscal years ending June 30, 1860 and 1861 were as follows:

	1860.	1861.
From passengers	$212,133 69	$181,303 74
" freight	165,982 37	161,260 15
" mail	8,963 00	8,960 00
" miscellaneous	3,299 11	3,331 38
	$390,378 17	$354,855 27

The expenditures during the past year were:

Repair of road	$45,633 13	
" locomotives	21,736 52	
" cars	23,393 44	
" bridges	348 47	
" rails	8,982 24	
" buildings, etc.	4,100 89	
Fuel	20,654 19	
Wages	45,421 55	
Chairs and spikes	2,135 57	
Cross-ties	15,280 76	
Ballast	6,719 75	
Miscellaneous	18,501 19	
		212,907 70
Balance net profit		$141,947 57
The decrease in gross earnings was		$35,522 90
With an increase in expenses of		1,673 57
Making the decrease in net earnings		$37,196 47

LOUISVILLE AND FRANKFORT RAILROAD.

The proportion of gross and net earnings and expenses applicable to this road is as follows:

	1860.	1861.
Gross earnings	$270,053 08	$245,910 86
Operating expenses	145,183 23	147,230 98
Net earnings	$124,869 85	$98,679 88

Of the net earnings of the past year, $44,178 have been appropriated to the payment of two cash dividends, declared the one in January, and the other in June, 1861; and the balance to the payment of interest, reduction of the debt of the company, .

The gross earnings have been $24,142 22, and the net earnings $26,189 97 less than for the preceding year. The expenses were $2,047 75 greater, arising from the increased outlay in repairs of rails, cross-ties, and repairs of locomotives, amounting in the aggregate to $13,822 65 more than during the previous year.

The business of the road for the ensuing year must be much more diminished, and until a reviving change takes place the company cannot hope to realize more than will pay the interest on its debt, and meets its liabilities as they fall due, if it can do that much. The directors cannot promise another dividend until the troubles of the country are settled.

Since the last annual report, a stock dividend of 50 per cent. has been declared, so as to make the amount of the stock and the debt of the company represent the cost of the road.

BALANCE SHEET JULY 1, 1861.

Capital stock		$1,104,587 50
Stock to be issued for interest and dividends		5,006 90
City of Louisville bonds		124,000 00
State of Kentucky		74,519 50
Railroad bonds, old and new		216,000 00
Cash dividends unclaimed		10,268 31
Profit and loss		115,169 46
		$1,649,551 67
Construction	$1,383,526 43	
Proportion of rolling stock	126,735 00	
" materials	52,276 52	
Stock of other companies	6,540 00

Bills receivable	4,863 81	
Cash in New York to pay bonds	10,029 49	
" " " interest	3,639 40	
Cash on hand	23,770 66	
		$1,649,551 67

President—EDWARD D. HOBBS.
Superintendent—SAMUEL GILL.
Secretary and Treas.—W. H. REYNROTH.

LEXINGTON AND FRANKFORT RAILROAD.

The proportion of gross and net earnings and expenses applicable to this road is as follows:

	1860.	1861.
Gross earnings	$120,325 09	$108,944 41
Expenses	66,050 90	65,676 72
Net earnings	$54,274 19	$43,267 69

The gross earnings show a decrease of $11,380 68, with a decrease in expenses of $374 18—making the decrease in net earnings $11,006 50.

BALANCE SHEET, JULY 1, 1861.

Capital stock		$514,433 39
Bonds		180,000 00
Dividends unpaid		8,774 24
Sinking fund		19,500 00
Renewal and contingent		37,337 26
Stock profits		22,415 70
Profit and loss		2,851 53

Proportion of rolling stock	52,300 50
" materials	28,557 20
Bonds receivable	51,000 00
Bills receivable	3,199 50
Real estate	1,025 12
Treasurer	208 38
Cash	7,900 56
	$735,312 12

President—EDWARD H. HOBBS.
Superintendent—SAMUEL GILL.
Secretary—E. S. DUNCANSON.

The proposition alluded to in the last report with regard to the Lexington and Big Sandy and the Shelby Railroads remain in *statu quo*—no action having been taken as to the Big Sandy road, and the efforts to complete the Shelby road having been suspended owing to the pressure in the financial condition of the country.

The equipment of the entire line consists of 13 locomotives; 10 passenger, 5 baggage, 160 freight, stock and platform, and 65 construction, ballast and hand cars.

The whole number of passengers carried was 188,286. The total mileage of passengers was 5,326,994. The number of ton of freight carried was 69,344. The number of tons carried one mile was 3,687,576.

The number of miles run by locomotives with passenger trains was 143,837; by freight trains, 79,649; by other trains, 21,297—total, 244,773.

Corporations--The Statute of New York Prohibiting Transfers of their Property.

TRANSFERS OF THEIR EFFECTS EXCEEDING $1,000—DESIGN OF THE ACT—AUTHORITY OF THE OFFICERS—PRESUMTION AS TO THEIR USUAL OR CUSTOMARY ACTS.

The case of *Elwell et al. vs. Dodge et al.* was brought upon a promissory note of the defendants, for $1,671 81, payable twelve months after date to the "Globe Mutual Insurance Company or order." The note was endorsed to the plaintiffs by "L. Gregory, president;" he being at the time president of the company and named in the note as payee. This was the usual manner in which the company endorsed and transferred its paper. The note was transferred to the plaintiff as collateral to a stock note of the company upon a loan by the plaintiffs of their notes, in lieu of money, to the company, which notes the plaintiffs paid at maturity. The loan was $20,000, and the collaterals received by the plaintiffs exceeded that amount by $5,000, or $6,000, and the whole amount loaned had not been repaid.

The defendants urged in their behalf, first, the want of authority in the company to transfer the note; they being prohibited by the statute from transferring effects exceeding $1,000 in value without special authority of the directors, and there being no such authority shown in the case; second, that the endorsement of "L. Gregory, president," was not the endorsement of the Globe Mutual Insurance Company, so as to pass title to the note: and, third, that the note was given for a consideration specified, and that they were only to pay such amounts as the company should earn as premiums on property insured for the defendants, and that the premiums only amounted to $853.99. At the trial the court directed a verdict for the plaintiffs for the amount of the note and the interest, and the defendants appealed to the General Term. The following is a portion of the opinion of the court, delivered at the decision of the case, overruling the exceptions and points of the defendants, and affirming the judgment of the court below.

ALLEN, J.—A general resolution of the directors, delegating the power to transfer property or choses in action to meet the exigencies of the company, or a ratification of this particular transfer by act or resolution of the board, or acceptance or appropriation of the fruits of the transaction, if a special resolution authorizing the transfer and use of this note was wanting, would be sufficient to sustain the endorsement as the act of the company, and might have been proved had the precise point now made been then taken. The evidence given did not preclude the possibility or even probability that such evidence could be given. The presumption is that acts which an officer usually and customarily performs in behalf of the company are authorized by the directors: and the authority to act in a class of cases may be conferred by a single resolution, as well as by a distinct resolution for each case. The usage and practice of this company was proved, and it would hardly be supposed that the want of a special resolution and want of proof of authority in the officer of the company to make the transfers to the plaintiffs, was the ground of the defendant's objections, taken on his motions to dismiss the complaint. * * * *

But if the point had been distinctly taken, it would not have availed the defendants for several reasons: 1st, The statute prohibiting transfers of the effects of moneyed corporations exceeding in value $1,000, except as authorized by a previous resolution of the board of directors, was designed to protect the corporation against the acts of its agents and officers, and is for the benefit of the corporation and its stockholders and creditors. So long as the corporation nor any one claiming under it, or as a creditor having a claim against it at the time of the transfer, who might be injured by it, do not repudiate the transaction, and seek to reclaim or reach the note, the debtor cannot attack the title of the holder, under this statute. The transfer is not void but simply voidable, at the suit of the corporation or other party in interest. The statute saves the rights of a purchaser for a valuable consideration, and the plaintiffs were such purchasers of the note in suit, before its maturity. There was no conflict of evidence, nothing to be submitted to a jury upon this point, and there was no request to submit any question of fact to the jury. Indeed it was not suggested upon the trial, that the plaintiffs were not purchasers for value and no pretense, that they had any notice of any want of authority in the officers making the transfer. The president, vice president and secretary were all parties to the transfer taking part in the transaction. The secretary delivered the note to the vice president to be negotiated after it had been endorsed by the president, and the transfer was in the usual manner, and by the executive and financial officers of the company. 3d, It does not appear that there was not a previous resolution authorizing this transaction. All that was proved was that there was no resolution authorizing the particular transfer. But a resolution general in its terms, and sufficiently broad to cover the transaction would answer the requirements of the statute.

It is now urged that the endorsement of "L Gregory, President," was not the endorsement of the Globe Mutual Insurance Company so as to pass title to the note. This point was not taken at the trial. But treated as taken it is not tenable. This case is distinguished from that relied on by the defendant's counsel. (Marine Bank *vs.* Clements.) The fact was proved in this case, the absence of which is commented upon by the learned judge in that case, and for want of which the judgment in that case was given. It was proved here that the company had been accustomed to endorse its commercial paper in this manner, and it did not appear that endorsements in any other form had ever been made by it. It was then the endorsement of the company and not of the president individually, and so the jury must have found, had the counsel for the defendant desired that question to be submitted to them, and so in effect found by the general verdict rendered by the jury under the direction of the court.

In *Marine Bank vs. Clements* stress is laid upon the omission of the referee to find that the note was "endorsed by the company." The only other question arises upon the offer of the defendants to prove the defense as stated under the second head of their answer and the exclusion of the evidence by the court. The fair construction of this offer would limit it to evidence of the facts alleged in the paragraph or clause of the answer preceded by the word "Second" and such I doubt not was the understanding of the judge at the trial.

The following paragraphs of the answer purport to be statements of other and distinct defenses having no connection with the fact alleged in the "Second" paragraph or with each other. Had the defendants intended anything else, their counsel should have stated the specific facts designed to be proved that the court might understandingly pass upon the admissibility of the offered evidence. The second clause of the answer alleges an agreement cotemporaneous with the note, varying its effect, which was clearly inadmissible in evidence. But the defendants are no better off if the offer is held to embrace all the facts alleged is new matter in the answer. The note was transferred before due, and the only facts alleged which are now claimed to have been admissible under the answer are that the plaintiffs parted with no value for the note but took the same as security for a pre-existing debt and that the defendants "have sustained losses on property insured in such company to the amount of $799.82, which said company has become and is liable to pay to these defendants, and which sum they will set off against any claim on the note set forth in plaintiff's complaint." To make this demand a set off or counter-claim against the note in the hands of the plaintiffs, it must have existed at the time of the transfer of the note by the company. So far as appears from the answer, the claim had an existence for the first day on the day of making of the answer. It does not even appear to have existed at the commencement of the action. The endorsee of negotiable paper does not take it subject to equities that may thereafter arise between the payee and maker, but only to such as exist at the time of the transfer. No defense is set up in the answer; and the judge at the circuit properly excluded all evidence under it. The judgment must be affirmed.

RAILROAD SHARE LIST, including Mileage, Rolling Stock, etc., etc.

An *asterick* (*) occurring in the column headed "Rolling-Stock," signifies that the cost is included in that of "Railroad and Appurtenances." A *dash* (—) signifies "nil." Running *dots* (.....) signify "not ascertained." Land-Grant Railroads are in *"italics."*

American Railroad Journal.

Saturday, January 18, 1862.

Share and Money Market.

The Share Market the past week has been buoyant, under favorable advices from all quarters. There has not for some time past been a more confident state of feeling. The activity in the market has been aided by the probable passage of the treasury note bill, which promises to add very largely to our circulating medium. This, however, is to be followed, with as little delay as possible, with an adequate system of taxation to produce some $200,000,000, or $250,000,000 annually. The effect upon the Share Market has been very decided. Money daily grows more abundant. Exchange is very dull at large reduction of price. Gold is also easier. Should Congress enact without more delay a suitable tax bill, we shall see a very decided advance of United States securities, which will solve all the financial difficulties of government.

The New Jersey Railroad and Transportation Company has declared a semi-annual dividend of five per cent., payable February 1.

The Milwaukee and Prairie du Chien Railway Company have declared a dividend of eight per cent. on the first class preferred, and a dividend of seven per cent. on the second class preferred stocks of this company, payable at the company's office in this city on and after the 22d inst.

The Central Railroad Company of New Jersey has declared a quarterly dividend of two and a half per cent., payable on the 15th inst., at its office, No. 69 Wall st.

The Cleveland, Columbus and Cincinnati Railroad Company has declared a dividend of five per cent. out of the earnings of the six months ending December 31, 1861, payable at the United States Trust Company to stockholders registered here. All others will be paid at the office of the Treasurer, in Cleveland, Ohio.

Earnings and Expenses of English Railroads.

We give elsewhere a full tabular statement of the earnings and expenses, in detail, of all the Railroads in the United Kingdom. The tables possess great interest as standards of comparison with similar figures deduced from the operations of the railroads of the United States.

New Jersey Railroad and Transp. Co.

F. Walcott Jackson, Esq., has been appointed Superintendent of this road in place of his father John P. Jackson, Esq., recently deceased, who for many years was the manager, and in fact, the life and soul of the road. Under his superintendence the road was rendered a model of good management and financial success. We have no doubt that his place will be equally well filled by the son, who appears to combine every quality that rendered the father equally distinguished as a thorough man of business and a gentleman, and one of the most valued citizens of his town and State.

☞ Messrs. Williams & Page, Boston, Mass., have for sale a small second hand Locomotive of the ordinary gauge. Also a second hand Snow Plow, for sale low. See advertisement.

☞ Geo. T. M. Davis, Esq., 47 Exchange Place, N. Y., has for sale 5 locomotives of the usual gauge, and 50 house freight cars, all of which are at Chicago, Ills. Mr. D. is sole agent for the sale of *Reverse Acting Tumbler Locks*, for Railroad and other purposes. The advertisements appear elsewhere.

☞ The Bedford Lubricating Oil Co. have for sale *Lubricating Oils* of their own manufacture. They are also dealers in Sperm, Whale, Elephant, Lard, Kerosene and Coal Oils, etc. The Lubricating Oil is expressly adapted for railroad purposes, etc., and is warranted not to gum. Address Wm. F. Clark, Jr., Gen'l Agent 56 Courtlandt st., New York.

Rates of Foreign Exchange.

The rates of Foreign Exchange, as quoted by N. Brandt, Broker, No. 39 Exchange-place, for the steamer of January 18, were as follows:

London—60 days' sight	113½ per cent.
London—3 days' sight	114 "
Paris—60 days' sight, per dollar	4f. 95c.
Paris—3 days' sight, per dollar	4f. 91¼c.
Amsterdam—60 days' sight, per guilder	43¼c.
Hamburg—60 days' sight, per marc banco	38¼c.
Frankfort—60 days' sight, per florin	43½c.
Bremen—60 days' sight, per rix dollar	83½c.

Railroad Earnings—Weekly.

The earnings of the Michigan Central Railroad, for the 1st week of Jan., 1862, were .. $51,568 91
Do. 1861 ..... 31,178 51

Increase $20,390 40

The earnings of the Galena and Chicago Railroad the 1st week in Jan., 1862, were. $21,957 97
Do., 1861 ..... 25,509 93

Decrease $3,651 96

The earnings of the Cleveland and Toledo Railroad for the week ending January 7th, 1862, were $24,067
Do., 1861 19,467

Increase $4,600

The Chicago and Northwestern Railroad earned in the 1st week of January, 1862 ..... $10,434 09
Do., 1861 ..... 11,836 29

Decrease $1,402 20

The Chicago and Rock Island Railroad earned the 1st week in January, 1862 ..... $29,380
Do., 1861 21,800

Increase $7,576

The receipts of the Grand Trunk Railway of Canada for the week ending Jan. 4, were $88,695 07
Corresponding week, 1861..... 59,588 37

Increase..... $29,106 70
Total traffic from July 1st, 1861 ...$2,011,463 87
Corresponding period previous year. 1,798,086 95

Increase..... $213,376 92

The traffic of the Great Western Railway of Canada for the week ending Jan. 10, 1862, was as follows:

Passenger	$13,159 91
Freight and live stock	47,362 64
Mails and sundries	1,599 34
Total	$62,121 89
Corresponding week of last year	42,040 07
Increase	$20,081 82

New York State Banks.

The following statement from the Report of the Superintendent of the Bank Department, exhibits the amount of outstanding circulation issued to banking associations and individual bankers; and the amount and character of the securities deposited and held in trust for its redemption, on the 30th day of the September, 1861:

Outstanding circulation		$28,360,482 00
SECURITIES.		
Bonds and mortgages		$5,386,802 47
New York State Stock—		
4½ per cent.	$133,400 00

Aggregate of the securities held in trust for banking associations and individual bankers, Sept. 30, 1860	$30,195,462 13	
Increase during the year 1861	18,318 47	
		$30,213,780 59
Amount of circulation outstanding Sept. 30, 1860		28,841,416 00
Amount of circulation outstanding Sept. 30, 1861		28,360,482 00
Decrease for the year ending Sept. 30, 1861		$480,934 00

Increase and decrease in the several kinds of securities during the past year:

Increase in U. S. stock		$1,968,700 00
Increase in cash		62,995 80
		$1,031,695 80
Decrease in New York State stock	$130,716 01	
Decrease in Arkansas State stocks	118,000 00	
Decrease in bonds and mortgages	464,661 32	
		$1,013,377 33
Total		$18,318 47

Of securities held in trust by the Superintendent of the Banking Department, of the circulating notes issued to banks, banking associations, individual bankers, and outstanding Sept. 30, 1861:

For banking associations and individual bankers	$30,213,780 59
For incorporated banks	66,071 39
For trust companies	200,000 00
Total	$30,479,851 98
To banking associations and individual bankers	$28,360,482 00
To incorporated banks	8,245,658 00
Total	$36,606,140 00

The total number of banks, banking associations, individual bankers, and closing and insolvent banks, is 449, viz:

Incorporated banks	26
Banking associations	239
Individual bankers	36
Closing and insolvent banks	48
Total	349

Cleveland, Columbus and Cincinnati R. R.

The annual meeting of the Cleveland, Columbus and Cincinnati R.R. Co. was held at Cleveland on the 8th inst., when the purchase of the Springfield, Mt. Vernon and Pittsburg Railroad (Delaware Cut-off) by the Directors was reported and confirmed by the stockholders. The directors of the last year were re-elected. The business of the past year was thus reported.

Earnings for eleven months ending Nov. 30, 1861.

Total	$8,627 61	$8,106 35

The earnings of the Erie Railroad for the month of December, 1861, were $708,136 29
Do. 1860 ..... 404,276 30

Increase..... $308,859 99

Cleveland and Pittsburg Railroad.

The annual meeting of the stockholders of this company was held in Cleveland on the 1st inst. The following gentlemen were elected directors for the ensuing year: J. N. McCullough, Wellsville; James Farmer, James F. Clark, H. W. Clark, Cleveland; B. P. Drennan, Steubenville; W. W. Holloway, Bridgeport, O.; H. A. Johnson, New York; H. C. Kingsley, New Haven, Conn.; D. C. List, Wheeling; J. Pennock, Pittsburg, B. Preston, Pittsburg; J. H. Schoenberger, Pittsburg.

The only change from the Board of last year is the name of H. A. Johnson, of New York, to represent the foreign interest, instead of Joshua Atwater, of Cattskill, N. Y.

The Board subsequently met and elected the old staff of officers.

The report presented showed a highly satisfactory condition in both the financial and operative departments.

Finances of Pennsylvania.

EXTRACTS FROM THE MESSAGE OF THE GOVERNOR.

The balance in the Treasury on the 30th Nov., 1860, was		$681,433 08
The receipts during the fiscal year ending Nov. 30, 1861, were as follows:		
From ordinary resources		3,017,645 57
From temporary loan under act of April 12, 1861, at 6 per cent. interest, and negotiated at par		475,000 00
From 6 per cent. loan under act of May 15, 1861, also negotiated at par		2,612,150 00
From Society of Cincinnati		500 00
From United States, on account of military expenses		606,000 00
From paymasters and others, refun'd.		82,229 45
Total into Treasury for fiscal year ending November 30, 1861		$7,424,958 10
And the payments as follows:		
For ordinary purposes.	$3,144,480 34	
For military expenses, under act April 12, 1861	474,873 85	
Ditto. act May 15, '61.	1,708,462 68	
Ditto. act May 16, '61.	170,535 51	
Amount loan under act April 12, 1861, repaid	375,000 00	
		5,873,352 38
Leaving balance in Treasury, Nov. 30, 1861		$1,551,605 72

PUBLIC DEBT—FUNDED AND UNFUNDED.

Received from temporary loan, under act of April 12, 1861		$475 000 00
Repaid as above		375,000 00
Outstanding Nov. 30, 1861		$100,000 00
Received from loan under act of May 15, 1861		2,612,150 00
Amount of public debt, funded and unfunded, Nov. 30, 1860	$37,969,847 50	
Paid during fiscal year	101,331 42	
Remaining unpaid, (exclusive of military loans above mentioned) Nov. 30, 1861		$37,868,516 08

RECEIPTS AND EXPENDITURES OF MILITARY LOANS.

Receipts under the act of April 12, 1861	$475,000 00	
Receipts under the act of April 15, 1861	2,612,150 00	
From paymasters and others, refunded	32,229 45	
		$3,119,379 45
Paid for military expenses as above	2,353,872 04	
Paid for redeeming loan, act April 12	375,000 00	
		2,728,872 04
Unexpended of military loans		$390,507 41

RECEIPTS AND EXPENDITURES OF ORDINARY REVENUES.

Balance in Treasury, from ordinary sources, Nov. 30, 1860		$681,433 08
Received from ordinary sources during fiscal year		3,017,645 57
		$3,699,078 65
Paid for ordinary expenses, as above		3,144,480 34
Unexpended of ordinary revenue		$554,598 31
Received from United States on account of military expenses		606,000 00
Received from Soc. of Cincinnati		500 00
Balance in Treasury, as above		$1,551,605 72

The operations of the sinking fund during the last year, have been as follows:

Debt redeemed from 4th September, 1860, to 1st September, 1861		$303,801 01
Of stock loans	$300,050 00	
Of interest certificates	3,330 01	
Of relief notes	421 00	
		$303,801 01

The Commissioners of the sinking fund during the last spring received from the Philadelphia and Erie (late Sunbury and Erie) Railroad Company, forty bonds of that company for $100,000 each, and a mortgage to secure the same, executed in conformity with the third section of the act of March the 7th, 1861. That company has also deposited in the State Treasury its bonds to the amount of $5,000,000, in accordance with the sixth section of the same act. On the 9th of May last, I granted my warrant authorizing the State Treasurer to deliver to the said company one thousand of said bonds, being to the amount of $1,000,000. This warrant was issued in conformity with the law, the five per cent. bonds mentioned in the fifth section of the act (except those belonging to the State and now in the sinking fund) having been previously surrendered, and cancelled, and satisfaction entered on the record of the mortgage mentioned in said fifth section. Having received notice from the company that the bonds so delivered to the company or their proceeds had been appropriated, in accordance with the provisions of the law, on the 21st of June last I appointed John A Wright as Commissioner to examine and to report to me whether said bonds or their proceeds had been appropriated to the purposes required by the act. His report has not yet been received by me.

It is understood that arrangements have at last been made under which the direct railroad connection between Philadelphia and Erie will be completed within a short time. It is impossible to estimate too highly the importance of this great work to the Commonwealth, and especially to Philadelphia and Erie and the hitherto neglected counties near its route west of the Susquehanna.

By the act of the 21st April, 1858, for the sale of the State canals to the Sunbury and Erie Railroad Company, it was provided that if that company should sell said canals for a greater sum in the aggregate than three and a half millions of dollars, seventy-five per centum of such excess should be paid to the Commonwealth by a transfer of so much of such bonds and securities as said company should receive for the same and payable in like manner.

The company sold the canals and reported that the share of the profit on such sale, due to the Commonwealth was $281,250, of which $250 was paid in cash, and for the remaining $281,000 the Commonwealth received coupon bonds of the Wyoming canal company to that amount, being a portion of bonds for $900,000 issued by that company, and secured by a mortgage of the Wyoming canal, formerly called the Lower North Branch canal. These bonds bear an interest of six per cent. per annum, payable semi-annually on the 15th of January and July, and the interest was paid by the company to January last inclusive. The interest due in July last has not been paid. Judgments having been obtained against the company on some of the coupons for the unpaid July interest, a bill in equity was filed in the Supreme Court by a bond and stockholder in which such proceedings were had that by a decree made on the 2d September last the property and affairs of the company were placed in the hands of a receiver.

A plan has been suggested for the assent of the stock and bondholders which contemplates a sale of the canal under lawful process and a purchase of the same for the purpose of forming a new company, of which the capital stock shall be one million of dollars, divided into twenty thousand shares of fifty dollars each, of which each assenting holder of a mortgage bond for one thousand dollars shall be entitled to eighteen shares, and each assenting holder of fifty shares of stock of the Wyoming Canal Company shall be entitled to nine shares. Of course no officer of the Commonwealth had authority to assent to the proposal or in any way to affect her position. It is believed also that the plan is not one that ought to be assented to by the Commonwealth, and that under all the circumstances if the convenience of individual parties requires a change such as proposed, the debt due to the Commonwealth ought to be the first paid or fully secured.

I suggest that the act, passed 8th of April, 1861, entitled "An Act concerning the sale of railroads, canals," &c., should be modified so that in all cases in which a debt may be due to the Commonwealth by the company as whose property a public work may be sold, the purchasers thereof shall not be entitled to the benefits and privileges conferred by the act unless they shall have first paid the debt due to the State, or secured the same by their bonds to the Commonwealth secured by a first mortgage on the work itself.

I commend the subject to the immediate consideration of the Legislature, as an effort may be made at an early day to enforce a sale of the canal and some provision by law to protect the interests of the State would in that case be necessary.

Norwich and Worcester Railroad.

The annual report of the Norwich and Worcester road for the year ending Nov. 30, will show a net earning of about 3¼ per cent. on the capital stock. The road at present is earning at the rate of 6 per cent. per annum, and the new propeller line, it is estimated, will largely increase the business of the road. Their large and elegant passenger steamers run crowded with freight.

Old Colony and Fall River Railroad.

The construction of the extension of the Old Colony and Fall River Railroad from Fall River to Newport, was begun on Monday by the breaking of ground near the Stone Bridge.

Railways in Great Britain.

EARNINGS, WORKING EXPENDITURE, ETC.

From Bradshaw's Manual for 1862.

The following is a return of the working expenditure of each company in England and Wales, Scotland and Ireland, respectively, during the year ending the 31st day of December, 1860, divided under the several heads of—Maintenance and Renewal of Way; Locomotive Power; Repairs and Renewal of Carriages and Wagons; Traffic Charges (Coaching and Merchandise); Rates and Taxes; Government Duty; Compensation for Accidents and Losses; and Miscellaneous, not included in the foregoing.

	Length in miles.	Maintenance of way.	Maintenance of motive power.	Repairs and renewals.	Traffic charges.	Rates and Taxes.	Government duty.	Compensation for accidents.	Miscellaneous expenses.	Total expenses.	Gross receipts.	Net earnings.	Per cent.

Cleveland and Mahoning Railroad.

The earnings of this road for the year ending

December 31, 1860, were	$369,848 97
Operating expenses for same time	131,845 49
Net earnings	$238,003 48
Earnings for eleven months ending Nov. 30, 1861	$359 559 47
Operating expenses for same time	132,841 44
Net earnings	$226,718 03

A comparison with the report of 1860 will show that, in addition to paying expenses and interest, extending the main line 1½ miles to reach a new coal field, and building 15 coal and 2 caboose cars, the floating debt of the company has been reduced some $80,000.

BEDFORD
Lubricating Oil Company,
Office, No. 56 Courtlandt St., New York,
MANUFACTURERS OF
LUBRICATING OILS
Expressly adapted for Railroad purposes and the wants of Heavy Machinery,
ALSO, DEALERS IN
Sperm, Whale, Elephant, Lard, Kerosene & Coal Oils.
Adamantine Candles for Railroad use.
WM. CLARK, Jr., Gen'l Agent.

RENSSELAER
POLYTECHNIC INSTITUTE,
TROY, N. Y.

THE seventy-sixth semi-annual session of this well-known Institution for instruction in the Mathematical, Physical and Natural Sciences, will commence on Wednesday, Feb. 19th, 1862. A full course in Military Science is now in progress. Graduates of the Institute find no difficulty in obtaining very desirable positions as Civil, Naval and Topographical Engineers. The Annual Register, giving full particulars, can be obtained of Prof. CHARLES DROWNE, Director.
612 N. S. S. BEMAN, *President.*

Reverse Acting Tumbler
LOCKS
For Railroad and other Purpose,

MADE to order and with different keys if desired. **One Thousand Dollars** has been offered by the inventor to any person who will pick one of their locks or get it out of order by any ordinary usage.
Orders filled, samples and prices furnished by application to the **Sole Agent** *of the Manufacturer.*
New York, January 4, 1862
GEO. T. M. DAVIS,
3m2 47 Exchange Place.

FOR SALE.
5 Locomotives, 4 ft. 8½ in. gauge.
50 House Freight Cars, that have had but slight use.
The above are at Chicago, Ill.
January 4, 1862.
Apply to GEO. T. M. DAVIS,
3m2 47 Exchange Place.

PASCAL IRON WORKS,
ESTABLISHED 1821.
MORRIS, TASKER & CO.,
MANUFACTURERS OF
Lap-Welded American Charcoal Iron Boiler Flues—from 1¼ to 10 inches outside diameter, cut to definite lengths.
Wrought Iron Welded Tubes—from ⅛ inch to 8 inches inside diameter, with screw and socket connections, for Steam, Gas, Water or other purposes; also, fittings of every kind to suit the same.
Wrought Iron Galvanized Tube—strong and durable, designed especially for water purposes.
Cast Iron Gas or Water Pipe—1½ to 24 inches in diameter, and branches for same, etc.
Gas Works Castings, etc., etc.
PHILADELPHIA.

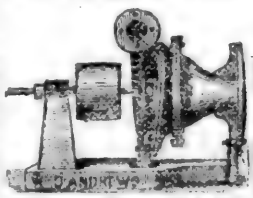
LOCOMOTIVE FOR SALE.
SMALL second hand Locomotive, usual gauge (4ft. 8½ in.) Weight, 10 tons—Drivers, 4ft. 6 in.—Cylinders 10x18 in. Fire-box, Crank and Tires nearly new, and the whole engine in excellent condition.
Also a second hand "Bradly" Snow Plow.
For sale low by
WILLIAMS & PAGE,
51 Boston.

OFFICE OF THE ILLINOIS CENTRAL R. R. Co.,
New York, Dec. 5, 1861.

AT a meeting of the Board of Directors of the ILLINOIS CENTRAL RAILROAD COMPANY, held at their office in New York this day, it was

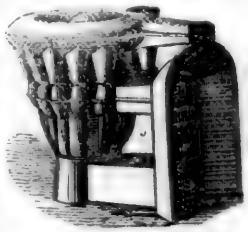
Resolved, That an assessment of FIVE DOLLARS per share upon the Scrip Shares of the Capital Stock of the Company, be and the same is hereby called payable on the twentieth of January, 1862; and that the same be payable on the Stock registered in the City of New York at the office of the Company in that city; and on the Stock registered in London at the office of Messrs. ROBERT BENSON & Co., London; and that parties desiring to pay their assessment in London, may pay the same at a rate of exchange sufficient to produce five dollars per share to the Company in the City of New York.

Resolved, That the transfer books be closed on the afternoon of the 15th January next, and re-opened on the 20th day of the same month; and that no transfer be permitted, on or after that day, of shares upon which the foregoing assessment shall not have been paid.



THOMAS E. WALKER, Treasurer.

The eighty-dollar certificates to be returned on payment of the above.



OFFICE OF THE ILLINOIS CENTRAL R. R. Co.,
New York, Oct. 29, 1861.

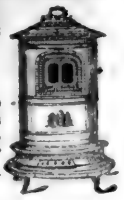
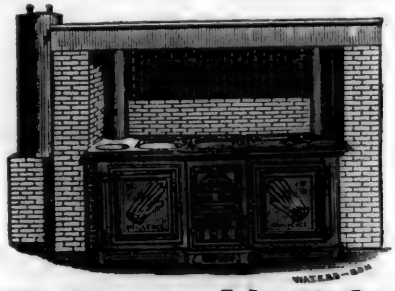
Iron, Metals, new and second hand **Machinery.**



Sanford's
CHALLENGE
HEATERS
SET IN BRICK,
PORTABLE
OR AS
FIRE PLACE
HEATERS,



FOR WARMING BY ONE FIRE WITH PURE, SOFT AIR
Dwellings, Churches, Hotels, Public Halls, Railroad Depots, Vessels, etc.,
WITH AND WITHOUT REGISTERS.
THE MOST POWERFUL HEATERS AND THE
Greatest Fuel Savers in the World:
With an unparalleled mass of unimpeachable testimony of well-known Citizens, Ministers, Doctors, Lawyers, Merchants, Mechanics and others.

Send for pamphlet containing full description and testimonials.
SANFORD, TRUSLOW & CO.,
Nos. 239 and 241 Water st., N. Y.

The COSMOPOLITE
PARLOR RADIATOR, &
GAS BURNER,

Introduced one year ago, already ranks as the **LEADING STOVE** for PARLORS, SITTING ROOMS, and all places where a soft, pleasant heat is desired.
Fire may be kept all winter with an astonishingly small supply of coal.
Send for description and testimonials.
SANFORD, TRUSLOW & CO.,
Nos. 239 and 241 Water st., N. Y.

Challenge Air-tight
KITCHEN RANGES,
May be placed in a fire-place without masonry, and with or without water-back; or may be set out on feet, as an ordinary stove.
This range, already very popular, has the **LARGEST OVENS** of any in the market; BAKES PERFECTLY, never burning to brown at the bottom; BOILS, ROASTS and BROILS with unequalled facility and dispatch, and with extraordinary **ECONOMY OF FUEL,** which may be either coal or wood. Flues large and easily cleaned. A child can manage it, so simple is its construction. Castings extra heavy, and design plain and chaste.
Four sizes, adapted to families and hotels.

Beacon Light
SUMMER AND WINTER
PORTABLE RANGE,

Is a very popular range, having six boiler holes, one large oven that bakes perfectly, with an arrangement for roasting, or heating irons at the end. It is very economical of fuel. For a FEW DOLLARS a family may be supplied with a PERFECT COOKING APPARATUS, equal to the highest price stove in the market.
Three sizes, adapted to coal, or wood.
SANFORD, TRUSLOW & CO.,
239 and 241 Water st., N. Y

SANFORD'S
MAMMOTH
OR
GLOBE
HEATERS.
The best stoves for RAILROAD DEPOTS and SHOPS, and all places where a great heat is required. They are very durable, and very economical of coal.
Beware of imitations that are inferior in strength and in other respects.

TESTIMONIALS.
HUDSON RIVER RAILROAD OFFICE, N. Y
This Company have now in use, over two hundred of Sanford's Mammoth Heaters, in Station Houses, Work Shops, and Engine Houses; we commenced using them in 1853, and some of the first stoves put up are still good and in use. We consider them the best Heaters now in use.
J. M. HEBARD, Supply Agent.
UNION FERRY COMPANY.
The Mammoth Heaters have been used by this Company in their waiting rooms at the several ferries and found to be very excellent stoves and more durable and valuable than any heretofore used. CYRUS P. SMITH, Managing Director.

American Railroad Journal.

New York, Saturday, January 25, 1862.

Terre Haute and Richmond Railroad.

The gross earnings of this company during the fiscal year ending November 30, 1861, were:

From passengers	$139,677 62
" troops	26,428 46
" freight	175,115 02
" coal	13,863 50
" mail, express, etc.	22,597 77
	$377,692 37

And the expenses were:

Train expenses	$32,142 71	
Fuel	15,549 53	
Repairs of road	26,855 63	
" buildings, etc.	6,867 04	
" rolling stock	42,503 10	
Depot expenses	17,174 52	
Salaries of officers	6,085 40	
Foreign agencies	3,068 56	
Miscellaneous	10,022 58	
Total operating expenses	$158,779 07	
Additional expenditures	1,729 35	
		161,508 42
Net earnings		$216,183 95

Compared with the previous year the gross earnings show a decrease of $26,907 24
With a decrease in expenses of 25,700 64

Making the decrease in net earnings... $1,197 60

The number of through passengers carried was 42,099; way passengers, 62,593; soldiers, 19,721—total, 124,413.

The account with the stockholders is as follows:

Balance Nov. 30, 1860	$239,499 84
Profit and loss	426 25
Interest on E. & C. extension bonds..	7,367 50
Net earnings as above	216,183 95
	$463,477 54
Passenger station, Terre Haute	$8,969 77
Interest and exchange	20,321 53
Taxes	5,452 66
June dividend	69,072 50
Dividend payable Jan., 1862	69,072 50
Balance	290,588 58
	$463,477 54

The company have 18 locomotives; 17 passenger, 6 baggage, 103 freight, 30 stock, 71 coal 48 platform, 37 gravel and 13 hand cars.

The receipts from all sources during the year (including $96,849 62 in treasurer's hands,) were $500,949 56; and the disbursements $394,152 28—leaving a balance, (including $99,076 99 in treasurer's hands) of $106,797 28.

The road-bed, track, structures, and equipments have been kept in good condition. The track room at Indianapolis has been enlarged, and an additional siding added for the accommodation of business at that point. Additional coal mines of a superior quality have been opened at Brazil. A new siding has been put in at Brazil Station, furnishing additional facilities to the shippers of coal, lumber, etc., at that point. Extensive alterations have also been made in the tracks connecting the several depots at Terre Haute, in order to facilitate the movements of trains.

GENERAL STATEMENT.

The office of the company is at Terre Haute, Ind. The officers and directors of the company, for 1861-62, are as follows:

President and Sup't—E. J. PECK.

Directors—Chauncey Rose, James Farrington, Demas Deming, H. Ross, Chas. Wood, William K. Edwards, F. Nippert, Terre Haute; W. H. Thornburgh, Greencastle; E. J. Peck, Indianapolis.

Secretary—CHAS. WOOD.

Treasurer—JOHN SCOTT.

Finances of New Jersey.

We extract from the message of the Governor the following statement of the financial condition of this State:

The receipts for the ordinary State account, from all sources, since the date of the last statement laid before the Legislature, have been:

From all sources	$246,169 59
Cash on hand January 1, 1861	25,228 58
	$271,398 17
Disbursements	253,304 40
Balance on hand January 2, 1862	$18,093 77

On the first instant there was due:

To the Bank of Savings, New York		$95,000 00
To Trenton Banking Company, for warrant given for appropriation to Lunatic Asylum		9,000 00
Due several counties, balance school appropriation for 1861		27,069 12
Annual State tax received in advance	$24,517 05	
Deduct cash on hand	18,093 77	
		6,423 28
Total		$137,492 40

On the first of January, 1861, the indebtedness of the State was $164,752 88, having decreased during the past year the sum of $27,260 48.

On the 25th of May last bids were invited for $500,000 of State bonds at par. Offers from the Banks of the State were received for $455,000, and from individuals for $76,800. Bonds amounting to $531,800 were accordingly issued, bearing six per cent. interest, payable semi-annually on the first days of January and July, the principal being payable as follows, viz:

On the first of January, 1865	$92,600
" " " 1866	94,600
" " " 1867	94,600
" " " 1868	94,500
" " " 1869	94,500
" " " 1870	43,000
" " " 1871	18,000
	$531,800

These bonds realized a fraction over par, and produced the sum of $531,820, which was paid to the Treasurer.

There has been paid by the State for account of the United States	$897,993 66
Received by State on account of above	650,707 17
Balance due State from U. S.	$247,286 49

The indebtedness of the State on the "war account" is for—

Bonds issued	$531,820 00
On sundry accounts	59,039 01
	$590,859 01
Deduct due from U. S. $247,286 49	
Cash on hand 199,488 74	
	446,725 23
Balance	$144,133 78

The expenditures on State account have been as follows:

Paid volunteers and families of volunteers under act of May 11, 1861		$102,416 74
Arms, accoutrements and repairs of arsenal		27,198 42
Printing and publishing		3,362 77
Enrolling militia		2,892 25
Interesting on loans		3,893 25
Miscellaneous		4,459 85
Total		$144,133 78

Oswego and Syracuse Railroad.

The gross earnings of this road for the fiscal year ending Sept. 30, 1861, were:

From passengers	$58,250 42
From freight	54,454 98
Mail transportation	3,043 00
Miscellaneous receipts	257 21
Land	300 00
Total	$116,305 61
Total operating expenses	53,748 84
Net earnings	$62,556 77

The bonded and funded debt of the company is as follows:

Due in 1862	$7,000
" 1863	8,000
" 1864	9,500
" 1870	86,500
" 1875	50,000
" 1880	52,500
	$213,500

Annexed is the balance sheet of the company:

Balance on hand, Oct. 1, 1860	$13,499 20
Receipts from passengers	58,250 52
Receipts from freight	54,454 98
Receipts from United States mails	3,043 00
Receipts from land	300 00
Miscellaneous receipts	257 21
	$129,804 81
Paid on construction	$9,912 96
Paid transportation expenses	53,748 84
Paid interest on bonds	14,945 00
Paid interest on floating debts	2,278 93
Paid dividends	30,378 00
Paid floating debts	2,243 73
Paid for material for 1861 and 1862	2,259 82
Amount to surplus fund	14,037 53
	$129,804 81

Philadelphia, Wilmington and Baltimore Railroad.

The annual meeting of this company was held at Wilmington, Del., on the 13th inst. The Twenty-fourth Annual Report of the President and Directors was submitted. From this we learn that the gross earnings of the road for the fiscal year ending October 31, 1861, were:

From passengers		$1,023,655 44
" freight		383,610 23
" rents		16,950 25
" mails and miscellaneous		46,847 73
		$1,471,063 65
To which add earnings of Newcastle and Frenchtown line		22,808 43
Total for both roads		$1,493,872 08

The expenditures were:

Interest on bonded debt, ground rents, etc., less interest received	$150,000 00	
Operating expenses	424,711 39	
New work and improvements	154,950 22	
Guard'g bridge (special guard) repairing burned bridges, etc.	27,452 08	
	$757,113 69	
Operating Newcastle and Frenchtown line	14,481 99	
Taxes and bonus to the State of Delaware	11,000 00	
Add loss in operating Delaware road	52,598 82	
		835,194 50
Leaving net earnings for the year		$658,177 58
Dividend 3 per cent. April 1.	$168,000	
" 3½ " Oct. 1.	196,000	
		364,000 00
		$294,177 58
Appropriation to sinking fund		41,666 66
Surplus		$252,510 92

The expenditures on the road for new work have been as follows: For new track, 20 miles, including that taken up and relaid, $45,896 48; new buildings, etc., $10,968 20; for eighty new freight cars, $40,887 50; for seventeen new passenger cars, $26,266 20; for three new locomotives, $27,931 84. The company are now building three new locomotives and thirty new freight cars. All the foregoing items are charged to current expenses and nothing to new construction.

The number of miles run on the Philadelphia, Wilmington and Baltimore Railroad by locomotives carrying passenger trains during the year was 275,032; by freight trains, 159,668 miles; by gravel, repair and wood trains, 5,080 miles, making a total of 439,780 miles, at a cost of $1 38 per mile.

During the year an apparatus has been put up for Burnetizing timber to be used on the road.—The timber is placed in a cylinder after the air is exhausted, and then injected with chloride of zinc weakened with water. The liquid penetrates the pores of the timber, and it is said doubles the life of timber thus prepared. During the year 30,978 cross-ties, 480,320 square feet bridge timber-planks for crossing, and 18,408 joint blocks have been prepared by the above means, at a cost of $5,325 80.

Census of British North America.

Grand Total	2,476,460	3,271,570	795,110	32.10

* The details by counties for New Brunswick and Newfoundland according to the census of 1861 have not been officially published. The totals, however, are probably sufficiently accurate and are here given as found in the "*Canadian News.*"

Rates of Foreign Exchange.

The rates of Foreign Exchange, as quoted by N. BRANDT, Broker, No. 39 Exchange-place, for the steamer of January 25, were as follows:

London—60 days' sight ..... 114 per cent.
London—3 days' sight ..... 114½ "
Paris—60 days' sight, per dollar ..... 5f. 95c.
Paris—3 days' sight, per dollar ..... 4f. 90c.
Amsterdam—60 days' sight, per guilder ..... 48½c.
Hamburg—60 days' sight, per marc banco ..... 38½c.
Frankfort—60 days' sight, per florin ..... 43½c.
Bremen—60 days' sight, per rix dollar ..... 84c.

Railroad Earnings—Monthly.

The earnings of the Milwaukee and Prairie du Chien Railroad, for December, 1861, were:

Passengers	$19,319 74
Freight	44,134 46
Mails and rents	4,234 17
Ferry	301 95
Total	$67,990 32
Corresponding month, 1860	44,894 59
Increase	$23,095 73

The December earnings of the Norwich and Worcester Railroad are as follows:

	1860.	1861.
Passengers	$6,136 82	$8,724 68
Freight	14,976 43	20,741 76
Total	$21,113 25	$29,466 44
Increase		$8,353 19

Connecticut River Railroad.

By the report of the Connecticut River Railroad, it appears that the year's income was $250,836—expenditures $127,880. Net earnings $122,956. After payment of interest, instalment of $8,000 to sinking fund, and 6 per cent. in dividends, the year's surplus was $2,996. The road owes a funded debt of $300,000.

North Pennsylvania Railroad.

The business of this road for the year ending November 30, 1861, was as follows:

The total gross earnings for the year were	$364,225 46
Total expenses, including all renewals and repairs	162,101 63
Net earnings for the year	$202,123 83
As compared with the fiscal year ending November 30, 1860, the gross earnings have decreased	25,396 77
Expenses have decreased	14,566 68
Decrease in net earnings	$10,830 09

The interest chargeable to the business of the year is:—

Six per cent. coupons	$150,000 00
Ten " "	35,450 00
Ground rents and interest on mortgages	5,384 00
Interest on floating debt	10,127 88
Total	$200,961 88

The construction account has been increased $4,450 33, the equipment account has been increased $12,210 by the addition of the rolling stock of a first-class passenger locomotive, and a first-class passenger car.

The falling off in the receipts in the first half year, ending May 31st, consequent upon the political troubles of the country, convinced the Board of the propriety of asking the six per cent. mortgage bondholders to fund three sets of their coupons, in order that the net earnings of the Company might be applied to the liquidation of the floating debt. The Board issued a circular to the bondholders, and the latter held a meeting on the 1st of July. At this meeting a Committee was appointed to examine the affairs of the Company and report thereon. This report recommended the bondholders to fund in a manner somewhat similar to that proposed by the Board of Directors, the unpaid balance of the coupons due January 1, 1861, those of July 1, 1861, and those maturing January 1st, 1862, amounting to $212,500, provided that the chattel mortgage bondholders would agree to fund their coupons maturing October 1st, 1861, and April 1, 1862. The report was adopted by the bondholders.

Committees of Conference from the Directors and bondholders were appointed, and agreed upon the details of the agreement. A large portion of both the six per cent. and ten per cent. coupons have been deposited, and the scrip issued therefor.

Since the first of July, the net earnings have been applied to the liquidation of the floating debt. The following statement exhibits the financial condition of the Company as per Treasurer's statement on the last day of the fiscal year:

Cash on hand		$20,795 62
Sundry accounts		18,489 97
Total cash assets		$39,285 59
Liabilities—		
Bills payable	$22,820 00	
Sundry accounts	14,678 13	
Balance of coupons	1,052 50	
		38,550 63
Balance of cash assets		$734 96

Thus commencing the present fiscal year practically clear of floating debt.

The interest account for the fiscal year just commenced will be

Six per cent. coupons, July 1, 1862	$75,000
Ten " " October 1, 1862	18,000
Six " " January 1, 1863	75,000
Ground rents and mortgages (say)	5,500
Interest on $248,500 of scrip	14,910
Total	$188,410 00

Finances of Massachusetts.

ABSTRACT OF THE REPORT OF THE AUDITOR.

The total amount received into the treasury during the year, on account of ordinary revenue, was $1,133,985 58, and the total amount paid therefrom on the same account was $1,163,742 56. The ordinary expenses of the year 1861, already ascertained, amount to $1,026,388 56; but as the bills are not all in the actual expense will probably amount to $1,100,000. In addition to these expenditures there has been paid from the treasury, for military expenses, the sum of $3,420,797 06. Of this sum there has been received from the United States and other sources $984,376 15, leaving the State in debt for the balance, $2,436,420 91, which it is expected will be ultimately refunded by the general government.

Attention is called to the necessity of providing for the payment of the interest on the bonds of the State loaned to the Troy and Greenfield Railroad Company. The amount thus loaned is nearly $800,000, the interest on which, at 5 per cent, amounts to $40,000. This company now neglects to pay this interest, and the amount is therefore estimated among the expenses for the year.

There has been one new bank organized under the general banking law during the year, making seven in all, with an aggregate capital amounting to $3,900,000, and outstanding circulation received from this department of $1,107,482, secured by stocks amounting to $1,493,200.

The exposes of the year are estimated as follows:

For ordinary expenses	$1,000,000 00
Aid to families of volunteers	475,000 00
Interest on military exp. for U. S.	120,000 00
Interest on scrip loaned Troy and Greenfield Railroad Co	40,000 00
Tax of the U. S. after deducting 15 per cent	700,894 13
Making a total of	$2,435,894 13
From this deduct ordinary revenue.	762,000 00
And it leaves	$1,673,894 13

for which provision must be made.

In this estimate no account is made of military expenses, as it is presumed that as much will be received from the United States.

Resources and Liabilities.

RESOURCES.

Real estate, unproductive	$3,205,744 98
Bonds and montgages of sundry railroads, for scrip loaned	5,824,435 56
Railroad stock, Mass. School and other funds, productive	5,804,980 28
Total	$14,835,160 77

LIABILITIES.

Scrip issued on account of the State Prison, Taunton & Northampton Lunatic Hospitals, State House, State Alms Houses, loan of 1856, and consolidation of the Statutes	1,289,000 00
Scrip issued in 1861 for funding the public debt	300,000 00
Scrip issued for the Union Fund Loan of 1861	2,217,500 00
Scrip loaned sundry railroad corporations, payable by them	5,824,435 56
Military Emergency Fund, for money borrowed in anticipation of the sale of scrip in the Union Fund Loan	1,195,547 15
Temporary Loan in anticipation of revenue; also of the avails of the Western Railroad stock Sinking and Debt Extinguishment Funds.	85,000 00
Amount due from the Treasurer, and uncalled for Dec. 31, 1861	77,436 94
Surplus	3,846,241 12
Total	$14,835,160 77

Receipts and Payments.

RECEIPTS.

The receipts into the Treasury during the year 1861 were—

On account of the ordinary revenue		$1,133,985 58
On account of sundry Funds, viz:		
Union Fund Loan		2,217,500 00
Six per cent. Scrip		247,000 00
Five per cent Scrip		53,000 00
Union Loan Sinking Fund		984,376 15
Military Emergency Fund		3,201,547 15
Also sundry other Funds		524,395 54
Interest on Railroad Scrip		72,578 94
Temporary Loans		544,000 00
		$8,978,383 86
Cash on hand January 1, 1861—		
On account of School and other Funds	$117,060 30	
Sale of House	11,840 00	
Interest on R.R. Scrip.	24,625 00	
Temporary Loan	1,316 18	
		154,841 48
Total		$9,133,224 84

PAYMENTS.

The payments from the Treasury for the year 1861 were—

From the ordinary Revenue	$1,163,742 56
On account of sundry Funds	3,630,067 13
Interest on Railroad scrip	90,672 28
Military Sinking Fund	3,344,694 41
State Prison Scrip	1,000 00
Temporary Loan repaid	774,500 00
Total	$8,903,676 38
Cash on hand January 1, 1862—	
On account of School and other Funds	$193,083 46
Sale of House	11,840 00
Interest on R. R. Scrip.	24,625 00
	229,548 46
Total	$9,133,224 84

The ordinary revenue for the year 1862 is estimated at $762,000. The resources of the Commonwealth, including the public buildings, hospitals, almshouses, bridges, Back Bay lands, sundry securities, bills receivable, &c., except funds the income of which are specifically appropriated, are estimated at $7,249,215 88; while the total debt, not including liabilities on account of script loaned sundry railroads, is $5,164,484 09. This leaves a surplus of resonrces of $7,084,731 24. Of the items which make up the resources, the public buildings and institutions of various kinds are estimated at $3,205,744 98, and the Back Bay lands filled and unsold—about 750,000 feet, at $1 87½ per foot—at $1,031,250, and the lands unfilled, comprising 1,000,000 feet, at $660,000. The Commonwealth holds as security for the final payment of scrip loaned to railroads, mortgages on those roads to the amount of $5,824,435 56. Funds, the income of which is specifically appropriated amount to $5,804,980 28. The various descriptions of scrip issued in 1861 fall due as follows:

Five Per Cent. Scrip.

Due June 1, 1861	$15,000
Due June 1, 1870	21,000
Due June 1, 1872	17,000
Total	$53,000

Six Per Cent. Scrip.

Due June 1, 1868	$75,000
Due June 1, 1870	89,000
Due June 1, 1872	83,000
Total	$247,000

Union Fund Loan.

Due July 1, 1871	$203,000
Due July 1, 1872	315,500
Due July 1, 1873	304,000
Due July 1, 1874	300,000
Due July 1, 1875	420,000
Due July 1, 1876	675,000
Total	$2,217,500

The entire debt and liabilities of the Commonwealth, including railroad, hospital and other scrip, war loan, &c., amount to $10,988,919 65. The receipts into the Treasury during the year 1861, were $9,133,224 84. These included loans and moneys reimbursed by the United States Government, and other parties for military expenses.

Philadelphia and Reading Railroad.

The managers submit the following report of the receipts and expenditures for the year ending November 30, 1861, with the Treasurer's general balance sheet exhibiting the financial condition of the Company at that date. (Here is given a long statement, in great detail, which we condense as follows:—)

RECEIPTS.

From travel, 368,551, equal to 141,451 through passengers		$338,904 69
From merchandise, 324,959 tons		406,321 22
From coal, 1,639,535 tons		2,111,023 39
From U. S. mail and other sources		49,589 43
Total		$2,905,838 73

EXPENSES.

Transportation	$844,563 96	
Roadway	246,473 85	
Drawbacks, allowances, and other charges	191,095 62	
		1,282,133 43
Net profit for the year		$1,623,705 30
Interest on bonded debt	$704,834 00	
Bonds and mortgages, real estate	35,532 00	
Total	$740,366 00	
Renewal Fund: 5 cents per 100 tons on 421,599,695 t'ns transported one mile during twelve months ending Nov. 30, 1861.	210,799 84	
		951,165 84
Balance		$672,539 46

Dividend fund for the year, which been disposed of as follows:

Sinking funds	$150,000 00	
State tax on capital for 1861	15,928 25	
Dividend on preferred stock for 1861	108,626 00	
Accrued interest for 1861 on reserved dividends, preferred stock	24,065 43	
		298,619 68
Balance of dividend fund, 1861		$373,919 78
Add balance of reserved fund, 1861.		406,822 62
Total reserved fund		$780,742 40

At the commencement of the season it was hoped to maintain the same arrangements and prices as had been secured for the previous year.

The great development of the civil war caused such disturbance in all business arrangements that a loss in tonnage, both in coal and merchandise, necessarily ensued. This was the inevitable consequence of the disturbed state of our country, and its extent will be seen in the following statement of the comparative results of this and the preceding yea r.

Tabular statement in detail for each branch of traffic, show the comparative results of the preceding year:

	1860—Passengers.		1861—Passengers.		Increase.
Travel	129,978	$333,359	140,451	$388,905	$55,546—1.6
	Tons.		Tons.		Decrease.
Merchandise	499,727		324,958	406,821	193,299—32.2
Coal	1,878,156	2,328,158	1,639,535	2,111,023	217,135— 9.3
Mail	19,618	.....	19,618	.....	
Miscellaneous	31,791		29,971		1,820— 5.7
Gross receipts		$3,812,546		$2,905,838	406,708—12.3
Gross expenses		1,686,562		1,492,933	

The receipts and expenses for each, per passenger and per ton, have been as follows, viz:

	1860.		1861.		
	Cost.	Received.	Cost.	Received.	
Per passenger	$1 38	$2 57.5	$1 34.5	$2 41.3	Increase 0.50
Merchandise, per ton	53	1 19.9	70.2	1 25.4	
Coal	40.8	1 24.9	41	1 28.2	

Net profit $1,625,984 — Gross expenses including renewal fund, in 1860 were 50.88 of gross receipts. — Net profit $1,412,905 — Gross expenses including renewal fund, in 1861 " 51.38 " " " 213,709

The gain in the number of passengers carried arises chiefly from the transportation of soldiers.

The expenses of transporting miscellaneous merchandise per ton, for each of the last ten years has been as follows:—

Year embraced in report of January,	1853	cents 109.52	per ton.
"	1854	" 105.50	"
"	1855	" 105.61	"
"	1856	" 108.00	"
"	1857	" 95.09	"
"	1858	" 99.13	"
"	1859	" 95.31	"
"	1860	" 74.78	"
"	1861	" 53.06	"
"	1862	" 70.28	"

The small cost of 53 cents per ton set down for the year embraced in the report of January, 1861, arises from the fact that Broad Top coal in the commencement of that trade was classed with merchandise. It is now placed with the other coal.

From this cause, viewing the year embraced in the report of January, 1861, as unsuitable for comparison, it will be seen that the present year exhibits a reduction in cost of this item of 6½ per cent. as compared to the year embraced in the report of January, 1860, and a reduction of 40 per cent. as compared to the cost of the eight preceding years.

The result of the year's business as condensed from transportation and income account, may be stated thus:—

Gross receipts		$2,905,838 73
Deduct working expenses, including renewal fund		1,492,933 27
Profits or receipts over cost of working the road		$1,412,905 46
From which deduct interest on Bonded debt	$704,834 00	
Bonds and mortgages	35,532 00	
		740,366 00
Leaving for net profit or dividend fund		$672,539 46
This has been credited as follows:		
Sinking funds	$150,000 00	
State tax on capital	15,928 25	
Dividend on preferred stock	108,626 00	
Accrued interest on previous preferred stock, dividends not paid	24,065 43	
		298,619 68
Balance carried to reserved fund, '61		$373,919 78
Amount to credit of reserved fund, 1860, per report November 30th, 1860	$425,904 86	
Out of which has been paid sundry drawbacks on traffic for 1860	19,082 24	
		406,822 62
Total reserved fund		$780,842 40

After deducting all expenses, including renewal fund and interest on the bonds, the net profits are $672,539 46, which is equal to 5.82 per cent. on all the outstanding stock, common and preferred, or to 7 per cent. on the preferred and 5.64 per cent. on the common stock.

The operations of the transportation department are stated in detail in the annexed report of the General Superintendent and the tabular statements which accompany it. The report of the Engineer fully exhibits the condition of the roadway department.

The charges to construction or capital account during the year have been:—

For real estate at Willow street wharf and at Broad and Callowhill streets		$104,750 00
For locomotive engines and cars on the payment of sums due according to the leases of—		
710 coal cars	$149,250 00	
126 merchandise cars	68,100 00	
200 coal cars for Broad Top trade	87,014 50	
2 cars built	1,564 76	
12 truck cars bought	1,350 00	
1,050 cars	Total cost,	807,279 26
For Lebanon Valley Branch, land damages and second track		84,606 32
For Schuylkill and Susquehanna and Allentown Railroad stock		517,865 33
		$964,500 91

By these payments the rolling stock of the company has been increased 1,050 cars. This subject was referred to in the last report, but the payments have been made during the past fiscal year. There remained on this account to be paid $31,800, on the settlement of which the company will receive 53 additional cars. This will fulfil all the obligations of the company under the car leases.

The merchandise cars that have been acquired by the company were those included in an arrangement made in 1856 with the Catawissa and Williamsport and Elmira Railroad Companies for the lease of 179 merchandise cars, valued at $99,900, for five years. Previous to the termination of the lease, notice was given to the other companies interested of our desire to pay off the principal at its maturity, and become owners of the cars. $73,500 has been paid, and the title acquired to this company exclusively to 135 of them. The remainder will be paid as it becomes due, and the cars become the property of the company.

The demand for Broad Top coal having largely increased during the year, one hundred eight-wheeled coal cars, in addition to the three hundred referred to in the last annual report, have been added to the number exclusively devoted to that trade—the cost of which was defrayed jointly by the Pennsylvania Railroad and by this company.

The lessees of the old depot building, at the corner of Broad and Cherry streets, not being able to comply with the terms of their lease, surrendered the premises, and they have been let to the United States, for a military hospital, for one year or the war, at their option.

The transportation of live stock, chiefly for the New York market, via Allentown and Easton, has reached 35,411 tons—an increase of 264 per cent. over last year.

The net profits on the Lebanon Valley Branch during the past year have been equal to the interest (7 per cent.) on the bonds issued for its construction, and 5 per cent. on the remainder of its cost.

During the past year the Board of Managers decided that the true interest of the company, and that of the miners in Schuylkill county, would be promoted by securing, by lease or purchase, the control of some of the lateral railroads, leading from the main line of the road to the coal mines. The effect of this, it was believed, would be to introduce a more efficient administration, and to reduce the charges for toll and transportation, and thus effect a reduction in the cost of placing coal at tidewater at Philadelphia.

For this purpose leases have been concluded with the roads leading by Mill creek, over the Broad mountain into the second coal field at Ashland, with some branches in the Schuylkill and Mahanoy valleys.

The only portion of the line which is unfinished is about three miles, near Ashland, upon which the grading is completed, and the rails are now being laid. It will all be ready for traffic on the opening of navigation next spring. In the exercise of the general authority given to the Board of Managers, at the last annual meeting, a majority of stock has been purchased in the Allentown Railroad, and in the Schuylkill and Susquehanna Railroad. The road of the latter company leads from Auburn, on the line of the Reading Railroad, 83 miles from Philadelphia, to Rockville, at the east end of the Pennsylvania Railroad Company's bridge across the Susquehanna river, a distance of 54 miles. The road is entirely free from floating debt, and is subject to one mortgage of $97,000, at 6 per cent. interest.

This purchase entirely obviates the necessity of the construction of an extension of the Lebanon Valley road to Dauphin, estimated to cost about $200,000, and which was authorized to be made by the stockholders at their annual meeting in January, 1860. The cost of these purchases was $517,865 33, of which $81,865 33 was paid in cash, and the bonds of the company dated July 1, 1861, have been issued for the balance, $436,000, bearing 6 per cent. interest, redeemable in ten years with a sinking fund attached of 10 per cent. per annum. It is believed that these purchases and arrangements will prove most advantageous to the interests of the Company.

The dividend earned of 7 per cent. on the preferred stock for the past year has been declared payable in cash on the 15th instant.

$113,300 of the bonds of the company have been purchased during the year. Of these, $53,800 have been charged to the sinking fund and cancelled; the remainder, $59,500, being a part of the bonds due in 1860, had been so endorsed or defaced that the holders objected on that account to extending them. They were, therefore, purchased by the company, and the bonded debt to that extent diminished.

For the arrears of dividends due upon the preferred stock, scrip was issued payable December 31, 1862, amounting to $372,432, with accrued interest.

It may be advisable, if the revenues of the company during the current year permit it, to anticipate the payment of this scrip on favorable terms.

The policy indicateg in the last annual report, of issuing no more bills payable, and confining the transactions of the company to cash payments, has been strictly adhered to during the past year.

The net income has been applied to the redemption of its debt and strengthening its position.

Some further payments of this character remain to be made before a return to cash dividends on the common stock can be determined on with an assurance of safety and permanence.

On the 15th of July Mr. Whitney felt is his duty to withdraw from the Presidency of the Company, to give his attention to private affairs.

He consented to remain in the Board, and has given to the Company the benefit of his assistance.

Mr. Charles E. Smith, previously one of the managers, was elected in his stead. Mr. J. D. Steele resigned the office of Vice President, and became the Chief Engineer of the Company. It has not been thought necessary to fill the office of Vice President.

Although their positions have been changed, the Company has had the benefit of the assistance of both these gentlemen.

By order of the Board of Managers.

CHARLES E. SMITH, President.

Philadelphia, January 11, 1862.

The Government Finances.

The following extract from the circular of Messrs. Samuel Hallett & Co., presents a comprehensive view of the financial necessities of government, and the means by which they are to be met. The issue of treasury notes is to commence in a few days. We learn that Congress is busily occupied in devising a system of taxation which will speedily follow the Treasury Note Bill.

The problem now before the country is the re-organization of the finances of the government; for upon these hinge all other questions that can arise. That the credit of the government under the circumstances, is so well sustained, shows the entire confidence of the people in their ability, and their willingness, to meet all the burdens necessary to be imposed upon them to maintain this credit untarnished; and their conviction that when this is done, the whole financial problem is solved. Capital was never more abundant. The war has not yet interfered with the industries of 20,000,000 people in the loyal States. We boast, and not without reason, of our bountiful harvest, and of the favorable condition of our foreign and internal commerce. Our public highways were never so crowded with freight. We show to a demonstration, that there are at least

Every element of prosperity is present. The people well know that their means are only to be drawn upon to meet every reasonable demand. That Congress has not yet acted is no reason for an unfavorable inference, because this body is expected to accept with some degree of confidence the recommendations submitted to it. The heads of the Departments are presumed to know the probable extent of their wants, and the sufficiency of the sources by which they are to be supplied. The subject of internal taxation was new to it. It could hardly be expected, in its first experience, that Congress should assume the office of censor over the Departments. At the extraordinary session it confirmed all Mr. Chase's recommendations. It is unquestionably prepared to second any plan he may now propose at all adequate to the crisis. But unfortunately, he has submitted no such plan. It must consequently first inform itself as to the wants of the Treasury, and then set about providing for them. It has no indisposition to engage in such a work, as the country is unanimous in its wish to put in operation at the earliest moment practicable, a system of taxation, which, by the money directly contributed, and the credit secured thereby, shall place in the hands of government whatever it needs. The credit of government now rests upon this universal willingness which prevails to be taxed, and to tax. The mistakes of an individual, or even of Congress, in the past, amount to nothing. They are properly regarded as mere accidents that do not exercise an appreciable influence upon the final result.

But how shall the strength of the people be utilized, so as to make the latter that of the former? How shall government be made as strong as the people? By transferring, by taxattion, a portion of the means of the latter to the former. The customs revenue can be made to produce at least $60,000,000 without bearing injuriously upon our industries. We can raise $75,000,000 by excise and licenses, and a much larger sum, if we put an excise tax upon the production of sugar, cotton and tobacco. England raises $75,000,000 from excise on the manufacture and sale of wine, spirits and beer. Stamps produce $40,000,000 annually in that country. They would, at similar rates, produce a larger sum in this, where there are a vastly greater number of transactions, to which this tax would apply. England derives some $60,000,000 annually from tax upon the incomes of the country, which equal about $1,500,000,000 annually. A similar tax would produce certainly one-half as much with us. The sources named, with such as could be added, would produce, without being unreasonably oppressive, at least $200,000,000, as a permanent revenue in a peace footing—a sum fully adequate to all the wants of government. The moment such a system is inaugurated, government bonds become the most desirable of all securities, and be soon sought for at a premium, enabling it at once to avail itself, if need be, of the entire capital of the country.

But Congress cannot act immediately. The inauguration of an elaborate system of internal taxation over such a widely extended country as our own, requires a great deal of deliberation and time. But the necessities of the Treasury admit of no delay. The period which must intervene before the action of Congress must be bridged over someway or another. The tax it will levy, consequently, must be anticipated. This can be done in no way so advantageous, both to the government and the people, as by an issue of exchequer bills, or demand Treasury notes, based upon such tax, and $250,000,000 in gold in the Northern States, payable out of it. Such is the faith of the public in the favorable disposition of Congress, that upon a declaration by that body of its determination to raisé $200,000,000 upon permanent sources of revenue, as soon as the necessary machinery can be put in motion, notes or bills to an equal amount might be put immediately into circulation, or sold at their *par* value. They would always remain at *par*, provided the amount outstanding at any one time did not exceed the amount of taxes uncollected; as the security for their payment, at an early day, would be the collective means of the whole people.

Such are the measures that government must come to at last, no matter how long the Treasury deludes itself with chimerical or inadequate schemes. That department is now no place for such experiments; nor are the people in any temper for such exhibitions. They believe in nothing less than the good old way of paying as they go; nor do they look for or expect success from any other. But while the Treasury is doing really nothing for the future, the temporary expedients it is proposing to resort to, threaten seriously to embarrass any judicious plan that may be adopted for the future. It proposes, we understand, to pay out its 7 3-10 bonds in small denominations, direct to its contractors. As most of the contractors would gladly sell their audited accounts at a discount, they will be equally anxious to sell at a similar loss, whatever they may get for them, provided it be not money. This class of men are not capitalists, or holders of government bonds. They will sell according to their necessities; so that if the government freely puts out its bonds to them, it will not be long before they will be hawked about the street, at a heavy decline from present prices, affecting the market value of the whole issue of $150,000,000. Such is the inevitable result of the payment, by government, of its own paper upon its contracts. Congress should at once arrest all such proceedings. The convertibility of all demand issues into the long bonds of government should never be lost sight of; but this can only be effected by a system which shall advance these bonds to *par*, instead of an improvident expedient that shall send them to 85 or 90 cents on the dollar.

Commerce of the Port of New York, for 1861:

The principal increase has been in Coffee, on account of the closing of Southern ports. The decrease is chiefly in Sugar, Leather, Tin and Iron. The decrease in total imports is chiefly in dry goods, caused by the high Tariff.

English Cotton Trade.

From a statistical report of the English Cotton Trade, published by Maurice Williams, Esq., Cotton Broker, of Liverpool, we learn that the total import of the past year of all kinds, amounted to 2,036,930 bales, against 3,366,686 bales in 1860—being a falling off in the year of 329,756 bales.

The export had been very large, showing an increase over last year, and including the cotton exported to the Northern States of America.

The stock of cotton actually on hand at Liverpool on the last day of the old year, was 622,560 bales, consisting of 279,310 American, 9,490 Egyptian, 27,250 Brazil, 370 West India, &c., and 306,140 East India, which, compared with the previous estimates, shows an increase of 71,800 in American, 210 in Brazil and 21,450 in Surats, and a decrease of 3,680 in Egyptians, and 40 in West India—making a total increase of 89,790 bales.

The speculation in cotton during the year was greater than ever before, amounting to purchases of 1,242,440 bales, the largest amount ever known. The stock held in London is 72,260 bales, consisting of 20 American, 72,100 East India, and 140 West India. The stock in Glasgow and other ports is 8,010, consisting of 7,500 American, 100 Egyptian, and 410 East India—these, added to the stock held in Liverpool, viz., 622,560 bales, will make a total on hand of 702,830 bales, which, added to the estimated amount in the hands of spinners, about 80,000 bales, will give about seventeen weeks' supply, at the average consumption of the past year.

The consumption of cotton, owing to its dear price, and the consequent reduction of working looms in the factories, shows a decrease during the year with that of the previous one, of 111,411 bales, being only 2,391,290 bales or 45,986 bales per week, against 2,502,801 bales, or 48,136 bales per week in 1860.

The stock of cotton held by spinners is estimated at only 80,000 bales, or fully 140,000 below the amount held at the same period last year, whilst there is no American cotton at sea on its way, and but 89,000 bales from the East Indies to arrive the next two months. So far, no cotton of the last crop has reached the shipping ports, nor has any cotton been shipped to any country, or been obtainable for consumption.

The writer of the circular proceeds to argue that if there should be war between the federal government and England cotton could quickly be obtained by breaking the southern blockade; but if peace continues there is no early prospect of England's obtaining cotton, and concludes as follows:

"All, therefore, being so uncertain, no correct estimate can now be formed as to what may be the future course of consumption or prices. Enumerating the various manufacturing counties, we find the consumption of Great Britain the past year has been 2,390,000 bales, of France 630,000, of Prussia 450,000, of Germany 500,000, of the remainder of the continent 450,000, and that of the Northern States of America, 650,000 bales, making a total consumption during the year of about 5,070,000 bales. With a further suspension or even a serious curtailment or delay in the coming forward of a crop which supplies four-fifths of this consumption, what mischief may not be inflicted upon the manufacturers of this and other countries, and already is there not evidence of this fact when middling boweds, quoted here to day at 11½d. per pound, were selling at New York at 38 cents per pound at the latest dates. The supply this year

(1861) of East India cotton, as usual with high prices current here, has been large, but a deal of this has been diverted from China, and should prices rule even much higher than at present, it is scarcely possible that any important increase in the imports thence can take place next year (1862) over and above the 987,580 bales, which we have this year received."

Milwaukee and Prairie du Chien Railroad.

The following is a comparative statement of the earnings of this road for the years ending 1860 and 1861:

	1861.	1860.	Increase.
Passengers..	$217,441.36	$174,216.43	$43,224.93
Freight	870,600.92	582,784.96	287,815.96
Mails, &c...	49,027.19	42,840.06	6,187.13
Ferry	16,337.20	.....	16,337.20
Total.	$1,153,406.67	$799.841.45	$353,565.22

The Lateral Railroad Act of Pennsylvania.

PROCEEDINGS UNDER: WHO SHOULD BE MADE PARTIES: THE GRADE NOT NECESSARY TO BE STATED. EFFECT WHEN THERE ARE TWO ROUTES TO THE MINES: RIGHT OF PARTIES TO CARRY NEIGHBOR'S COAL.

On the 30th of June, 1860, one F. C. Negley, having give due notice to the defendants, Boyd and others, filed his petition in the District Court of Allegheny County, Pennsylvania, with the view of constructing a lateral railroad, for the purpose of conveying the products of his mines to the main line of railroad and thus to market. On the presentation of the petition, the defendants filed exceptions thereto, and objected to viewers being appointed—setting forth, first, that Mary Paden was represented in the petition as joint owner with Boyd and wife, whereas she was but a mere annuitant; second, that Wm. Richey who was a tenant of Boyd and wife was not named; third, that the petitioner already had in actual operation a lateral railroad from his mines to the Allegheny river, with the privilege of connecting on certain terms with the Allegheny Valley Railroad; fourth, that the petition was for a road to carry petitioner's coal, or coal of other parties; and fifth, that neither petition or plot gave the grades of the proposed road. These exceptions were all over-ruled by the court, and reviewers having been appointed they reported that the road was "necessary and useful for private purposes." Negley appealed from the report of the viewers, and subsequently filed petitions, supplemental to the original petition, setting forth additional purchase of coal lands adjoining that described in the original petition. On the trial, the jury rendered a verdict in favor of the petitioner, assessing the damages at a less amount than the viewers had reported; the court refusing to submit the question of necessity of the road to the jury.

The defendants Boyd and wife and Baum moved to quash the petition, and all proceedings thereon, which motion was overruled; they also appealed from the report. The case was then appealed to the Supreme Court, and amoung other exceptions, it was urged that the court erred in charging the jury as follows, to wit: "Nor is it a subject of damage for which an allowance can be made that the defendant Baum, will be put to expense and inconvenience when he begins to work his unopened mine of coal, in consequence of the construction of plaintiff's road along the brow of the hill where the vein of coal crops out, or within a short distance of it." And also, that the court erred in refusing the point submitted by defendant Baum, to wit: "If the jury believe from the evidence that the natural outlet for the Baum Coal is at the out crop, along and around which the plaintiff has located his road, and that in consequence of such location the mining of said coal will be attended with increased expenses, this is a legitimate subject for damages, notwithstanding said Baum has no mines yet opened at said point.

The following is the opinion of the court delivered at Pittsburg, Oct. 31, 1861, affirming the judgment of the court below.

STRONG J. No less than fourteen errors have been assigned in this case, not one of which in our judgment has any existence. It is urged that the petition was so defective as to require the court to refuse to order a view, and to quash the entire proceeding even after the viewers had reported. The first alleged defect in the petition which is insisted on, is that Mary Paden is named as a reputed joint owner, with the plaintiffs in error, of one of the tracts over which the proposed railroad was located, when in truth she was not a joint owner. We are unable to perceive that this was any sufficient reason for refusing the view or quashing the petition, or that the plaintiffs in error could in any manner have been injured by the averment. The mistake did not appear on the face of the petition, and it was, therefore, no reason for refusing the view. Besides the Act of Assembly does not in terms require that the names of the intervening land owners should be set out in the petition, though it is quite proper that they should be. Notice must be given if the owners are known and resident in the Commonwealth, yet it is supposed they may be unknown. But Boyd and wife were named as owners in the petition. This at most was all that they had a right to ask. It gave them an opportunity to show that the proposed road was not necessary, and failing in that, to have their damages assessed, and Mary Paden's name was stricken from the record, by leave of the court, after the report of viewers, and before the final assessment of damages. There is nothing in the argument that in consequence of a joint assessment by the viewers, the plaintiffs in error were compelled to appeal, in order to prevent the participation of Mary Paden. The assessment was not an adjudication between them, and if it had been, it would not justify us in reversing the action of the court now, when the damages have been assessed in favor of the rightful owners.

That William Richey, the alleged tenant of Boyd and wife, was not named in the petition, is no ground of complaint by them, and he cannot be hurt by a proceeding to which he was not a party.

Another objection to the petition is that it represented a desire of the petitioner to make, construct and use his proposed railroad, with double or single track, as may be found most suitable for the purpose of carrying his coal or *coal of other parties thereon.* It is said the law authorizes no such petition. But it does. The owner of a lateral railroad is required to carry the coal of other parties thereon. The lateral railroad provided for in the Act of Assembly is one upon which not only the coal of the petitioner, but that of other parties may be carried.

Again, it is insisted that the petition does not set out the grades of the proposed road. It is a sufficient answer to this to say that the law does not require such a description; Hays *vs.* Risher, 8 Casey, 174.

Yet another objection is urged. It is that the petitioner had a right of way to the Allegheny river, with a right to connect with the Allegheny Valley Railroad, upon abandoning his wharf on the river. This was, however, no reason for denying a view, or quashing the report of viewers and the petition. It may have had some bearing upon the question whether the proposed road was necessary—nothing more—but that was a question for the viewers, and afterwards for the discretion of the court. It was not necessarily fatal to the petitioner's claim for a road.

The 3d, 4th and 5th assignments are that the court allowed amendments to the petition after the report of viewers had been made, averring additional purchases of coal lands by the applicant, upon the line of the proposed road and adjoining his lands, first described. How the plaintiffs in error were injured by these amendments has not been made plain to us. The petitioner had a case without them according to his showing, and in no respect can they be said to have changed the matter in controversy between the parties.

The 6th and 7th assignments are disposed of by what we said in Horner & Roberts' lateral railroad, 1 Wright, 333, and in Browd *vs.* Peterson, decided at this term. The court was right in refusing to submit to the jury the necessity of the proposed road.

The 8th assignment is shown to be without merit by what we have said respecting the 4th and 5th.

The 9th, 10th and 11th have not been pressed in the argument, and they are not sustained. The testimony offered and rejected was wholly irrelevant to the issues before the jury.

The 12th and 13th are also not sustained. The charge of the court was in entire accordance with the doctrine of Searle *vs.* The Lackawanna and Bloomsburg Railroad Company, 9 Casey, 57.

No attempt has been made to vindicate the remaining assignment of error, and none could be with success. The judgment is, therefore, to be affirmed.

We deem it proper to remark, though not required to do so by any of the assignments of error, that before an appeal from the report of viewers of a proposed lateral railroad, be sent to an appellate jury for trial, the court should approve or disapprove the finding of the viewers respecting its necessity. There is nothing to be tried if the court does not concur in opinion with the viewers. In the present case, sending the issues to a jury, and entering judgment upon their verdict, was perhaps in effect a decision that in the opinion of the court the road was necessary, but we think it better that the action of the court upon that subject should directly appear. Judgment affirmed.

Mississippi and Missouri Railroad.

In spite of the unfavorable times, the directors of the Mississippi and Missouri Railroad are pushing their line toward the Missouri. The progress is slow, it is true, but when the central division is once completed, the momentum of the business that will press upon it will force an early completion. The line is now finished three miles west of Victor, and within three miles of Brooklyn, which place the tracklayers are expected very soon to reach. Brooklyn is about fifty miles west of Iowa City, and a hundred and five west of Davenport, on the Mississippi.—*Chicago Tribune.*

RAILROAD SHARE LIST, including Mileage, Rolling Stock, etc., etc.

An *asterick* (*) occurring in the column headed "Rolling-Stock," signifies that the cost is included in that of "Railroad and Appurtenances." A dash (—) signifies "nil." Running dots (.....) signify "not ascertained." Land-Grant Railroads are in "*italics.*"

American Railroad Journal.

Saturday, January 25, 1862.

Share and Money Market.

The share market the past week has been buoyant, with a very active movement at the close. The early passage of the Treasury Note Bill is now regarded as certain, the inevitable effect of which, for the present, must be to stimulate prices, whatever may be the final result for good or evil. It seems probable that they may be made legal tender, though we trust that such may not be the case. Such a declaration will, in the end, be found to be wholly inoperative, as values depend upon qualities very different from legal enactments, which can no more sustain Treasury Notes at *par* than they can the bonds of government now selling at 90. In other respects, affairs have a cheerful look. Exchange has fallen nearly to *par*. Gold is only at a slight premium, although the issue of Treasury notes may increase the price. It is now selling at about 2 per cent. premium.

The Morris Canal and Banking Company has declared a semi-annual dividend of 5 per cent. on the Preferred Stock, payable February 4th, at the office of the company in Jersey City.

The interest on the 1st mortgage bonds of the Hudson River Railroad Company, due Feb. 1, will be paid at the Treasurer's office.

The joint Boards of the Delaware and Raritan Canal and the Camden and Amboy Railroad and Transportation Companies, have declared a dividend of 5 per cent. payable on the 21st inst.

Providence and Worcester Railroad.

This company is a consolidation of two companies of the same name chartered in 1844 by the Legislatures of Massachusetts and Rhode Island with authority to construct a line between Providence and Worcester and to consolidate themselves into one corporation, which was effected November 25, 1845. The company was also authorized to purchase the Blackstone Canal, between Providence and Worcester, and the road is located on the bank of that work as far as practicable. The construction of the road was commenced in 1845, and the southern portion of the line opened for business Sept. 27, and the northern portion Oct. 20, 1847. The line for about 4½ miles out of Providence is common to this and the Boston and Providence railroads. The two companies own one-half each of the passenger station at Providence. The length of the road is 43.41 miles. Cost of road and equipment, $1,698,991. Capital stock, $1,600,000. Bonds outstanding, $147,000.

The receipts of this road for the fiscal year ending Nov. 30, 1861, (the details of which were given in a previous number,) were ... $308,228 03
And the expenses were ... 168,781 13

Earnings after deducting expenses		$139,446 90
Deduct interest paid on bonds during the year	$10,880 92	
Less interest, dividends, etc. received	5,652 83	
		5,158 09
Net income for the year		$134,288 81
Cash received from sales of stock		39,800 00
" " " land		6 25
Dividends unpaid		541 00
Materials on hand November 30, 1860		33,461 07
Notes on hand " "		5,746 00
Cash " " "		88,745 80
Total		$302,588 93

Accounted for as follows, viz:

Dividends paid Jan. and July, 1861	$128,000 00
Bonds paid	53 000 00
One new locomotive	8,260 00
Materials on hand Nov. 30, 1861	41,948 88
Notes	5,746 00
Cash and cash items	65,644 05
	$302,588 93

Compared with the previous year, the gross receipts show a decrease of ... $85,360 85
With a decrease in expenses of ... 27,034 03

Making the decrease in net earnings ... $58,326 82

The directors are happy to be able to show that notwithstanding the reduction in the business of the road, both in its passenger and freight departments, consequent upon the stoppage in part, and for a portion of the time in full, of many of the mills on its line; also a considerable reduction in the freight tariff which it was thought advisable to make, and which has been in operation since April 1st, still the earnings of the road, after paying its current expenses, have been sufficient to give liberal dividends to its stockholders. During the same time the road and equipment has been fully maintained. More than five miles of new track have been laid; 8,000 new sleepers put in; 2 locomotives rebuilt; a new bridge over Roger's pond, and a new turn-table at Worcester, have been constructed; and to the equipment of the road have been added a new locomotive and 10 new merchandise cars: also 40 additional coal cars are in a condition to be finished at short notice whenever the business of the road calls for them.

General Statement, Nov. 30, 1861.

Construction	$1,436,175 53
Cars	148,923 08
Locomotives	118,892 46
Materials on hand	41,948 88
Notes	5,746 00
Cash	65,644 05
	$1,812,330 00
Capital stock	$1,600,000 00
Bonds outstanding	147,000 00
Dividends	65,330 00
	$1,812,330 00

The equipment of the road consists of 13 locomotives; 14 first class and 4 second class passen-

ger cars; 69 eight wheel and 46 four wheel merchandise cars, 58 lumber and 145 coal cars.

The following statement will show the cost, earnings, expenses, etc., yearly since the opening of the road.

	Cost of Road and Equipment.	Gross Earnings.	Operating Expenses.	Net Earnings.	Dividend.	Per cent.
1847	$1,756,755	$32,033	$9,841	$22,192	$.....	*

* Interest on assessment of share capital paid up to Oct. 20, 1847, amounting to $6 per share, or $66,000 in all. † Also a stock dividend of 40 per cent. ‡ Eleven months' operations. § Including $44,468 paid for accident which occurred in August, 1853.

The office of the company is at Providence, R.I. The officers are:

President—Earl P. Mason.
Treasurer—John R. Balch.
Superintendent—Stephen H. Tabor.

Railroad Earnings--Weekly.

The earnings of the Galena and Chicago Railroad the 2d week in Jan., 1862, were.....$26,731
Do., 1861..... 26,277

Increase.....$454

The earnings of the Cleveland and Toledo Railroad for the 2d week in Jan., 1862, were..$25,187
Do., 1861..... 18,082

Increase.....$7,105

The Milwaukee and Prairie du Chien Railroad earned for the 2d week in Jan., 1862.$19,719 86
Do., 1861..... 15,214 72

Increase.....$4,505 08

The earnings of the St. Louis, Alton and Chicago Railroad for the 1st week in Jan., were:

	1862.	1861.
Passengers	$5,673 62	$6,344 85
Freight	9,063 61	11,989 14
Sundries	815 33	855 83
Total	$15,552 56	$19,189 82
Total this month to date	$15,552 56	$19,189 82
Total since Jan., 1st..	15,552 56	19,189 82

The earnings of the Toledo and Wabash Railroad for 2d week of Jan., 1862, were .$20,460 61
Do., 1861..... 12,166 19

Increase.....$8,294 42

The earnings of the Toledo, Wabash and Western Railroad the 1st week in January, 1862, were.....$21,700 84
Do., 1861..... 13,022 72

Increase.....$8,678 12

The receipts of the Grand Trunk Railway of Canada for the week ending Jan. 11, were.....$84,940 22
Corresponding week, 1861..... 59,874 98

Increase.....$25,065 25

Total traffic from July 1st, 1861 ...$2,132,267 40
Corresponding period previous year. 2,107,557 08

Increase.....$24,710 82

The traffic of the Great Western Railway of Canada for the week ending Jan. 17, 1862, was as follows:

Passenger.....$10,680 26
Freight and live stock..... 45,189 59
Mails and sundries..... 1,283 03

Total.....$57,152 88
Corresponding week of last year..... 43,679 03

Increase.....$13,473 80

The National Finances.

The question that engrosses public attention at this time, almost to the exclusion of all other matters, is the Finances of the United States. Pamphlets, public speeches and newspaper paragraphs are scattered broadcast before Congress and the public upon this vitally important question. Among these, the letter addressed to Congress, which we publish below, deserves especial attention from the mass of valuable information it embodies, and the boldness of its propositions. It is understood that this letter was published at the suggestion of the Committee of Ways and Means in Congress as an expose of their proposed policy:

To the Congress of the United States:

The undersigned respectfully appeals to Congress to inaugurate a financial policy, equal to the present and future wants of the Government. The failure to realize, in full measure, the true necessities of the Government, and to comprehend the nature of the contest with the rebellion, coupled with a natural dread of meeting a popular prejudice, against high taxes, has produced commercial distrust, ending in the suspension of specie payments. Statesmanship must meet this uncalled-for emergency, by proper measures of relief.

The country is full of wealth, and the resources of the loyal States are equal to the task of putting down the rebellion, without any diminution of material prosperity. The puerile and slovenly policy of the past, must give way to bold and comprehensive measures. Confidence will only be inspired, by the certainty of a steady, and reliable annual revenue, and the assurance, that the folly of a direct tax, is fully admitted.

Revenue is the foundation of public credit; and this revenue may be always certain, and uniform in amount, when raised upon the vices, the follies, the extravagances, and the luxuries of society. A revenue of $220,000,000, annually, will cause a rise in the price of property, by adding to the volume of the currency, and make money plenty. Money is now really plenty, from the lack of demand for the purposes of investment, and would at once go into active circulation, if Congress will only establish *confidence*, by a sound revenue policy. With $220,000,000 of actual annual income, our Government securities would at once float, and this Government find a ready market for its bonds. An amount equal to one thousand millions, or two thousand millions, could be raised, if wanted, within the next two years.

We base all our estimates on the population and wealth of the loyal States. The twenty-three loyal States have a free population of 22,881,746 persons, and an actual property $12,000,000,000,000, or more than $500 to each person.*

The first point to be secured in the raising of revenue, is *simplicity* in the mode of taxation, and in the method of its collection. These two modes are *excise* duties, and *impost* duties. Excises may all be collected through the United States marshals, without calling any new agencies into the field. The present system of custom-houses may be retained, but the expenses largely reduced.

The United States can raise annually, by *excise* duties, on the articles named below, the sums following, viz:

Malt Liquors	$20,000,000
Spirits	50,000,000
Tobacco	10,000,000
Stamps	10,000,000
Duty on Bank Bills	10,000,000
Hotel Licences	5,000,000
Railway, Engines and Cars	5,000,000
Hacks and Carriages	5,000,000
	$115,000,000

Other sources of income may be readily suggested, but the above serve as an indication of the chief sources of revenue by *excise*.

By duties on imposts, the following sums may be raised on the articles named below:

Tea	$6,000,000
Coffee	15,000,000
Sugar and Molasses	20,000,000
Wine	8,000,000
Tobacco	14,000,000
Spirits	7,000,000
On other imports	35,000,000
	$105,000,000
Total	$220,000,000

The income from a tax on bank circulation will be temporary, as this will gradually disappear as the national currency takes its place. But it can easily be supplied by a duty on newspapers, and an additional tax on railway passengers.

In 1860, the quantity of malt liquors, produced in this country, was equal to 3.28 gallons to each person, free and slave, or 103,244,075 gallons. Add to this 3,345,031 gallons of bear and ale imported in 1860, after deducting the exports of 200,016 gallons, and the consumption of malt liquors, was 106,389,090 gallons, or 3.39 gallons to each man, women, and child, free and slave, in the United States in 1860. Allowing a consumption of only 3.28 gallons each, to the population of the loyal States, and the consumption will be 75,087,079 gallons. The slaves consumed but little in comparison with the free whites; and the actual consumption, in the loyal States, was more than that above supposed, probably four gallons, to each person. An excise duty of thirty cents a gallon will yield a revenue of more than $20,000,000 annually.

The production of distilled spirits in the United States, in 1860, was 85,861,412 gallons, of which 22-27th parts, or 69,969,284 gallons was consumed in the loyal States. An *excise* duty of eighty cents per gallon will yield a revenue of more than $50,000,000 annually.

Some may exclaim, this duty will check consumption by raising the price. So far from this being an evil, it will, on the contrary, if such shall

* The population of the twenty-three loyal States, in 1860, was 22,328,136 persons, including in this number 432,685 slaves, leaving 21,895,451 free persons in 1860. This number has since increased to 22,881,746 persons as the free population of the loyal States. The valuation of these loyal States, in 1860, was $10,900,758,009. The rebel States had only 5,581,639 free persons in 1860, with 3,520,116 slaves, and a valuation less than half that of the loyal States, including the high valuation fixed to slaves as property. The material resources of the loyal and rebel States, are in the proportion of 22 to 5.

be its effect, be a vast public benefit. But we have no belief that the price will sensibly effect the consumption of liquors, or of tobacco. In the British Isles in 1860 the duty on liquors was raised, and yet with an excise duty of $2.42, per gallon, in that year, there was a falling off of production of only two and one-half millions of gallons, and a loss of revenue of only £297,384.

War duties on tea, coffee, and sugar, will probable diminish consumption at first, but with the increase of currency, will follow an enlarged demand for all articles of luxury. The following table gives the quantities imported of certain articles named in 1860:

Tea	25,223,277 lbs.
Coffee	180,903,555 "
Sugar	685 879,795 "
Molasses	31,000,000 gals.
Wine in casks	7,620,010 "
Wine in bottles	2,505,942 "
Brandy	2,616,555 "
Other spirits	3,683,341 "
Cordials	148,466 "

In 1861 there was an increase in the quantities imported, over those of 1860, of all the above named articles.

In England tea pays a duty of thirty-four cents per pound, and yet the quantity used in 1860 was 76,816,394 lbs., three times as great as that consumed in the United States, though our population was 31,429,891 persons, while that of the British Islands, including soldiers and sailors, was but 29,334,788. A tav of thirty cents per pound on tea, ten cents per pound on coffee, four cents per pound as an average on sugar, will yield a revenue equal to that estimated above, allowing for a falling off of 5-27ths on account of the rebellion.

We are not without examples to guide us in this particular. The British Government collects annually, from a population of 29,429,891 persons, a revenue varying from $260,000,000 to $360,000,000. The following table, shows the revenue of the United Kingdom for 12 years, from 1849 to 1860 inclusive:

1849	£52,951,748
1850	52,800,880
1851	52,233,006
1852	53,820,071
1853	54,430,344
1854	56,637,132
1855	63,764,605
1856	72,218,988
1857	70,390,343
1858	67,286,995
1859	68,090,053
1860	71,967,494

The chief sources of income of the Brisish Exchequer are custom dues on a few leading articles of luxury, excise duties on spirits and malt liquors, stamp duties, and income tax. To encourage manufactures, raw material that enters into production comes in free, or nearly so. Cotton, in a raw state, was formerly taxed, coming from foreign countries, with the design of stimulating its production in the British West Indies, but this policy was finally abandoned.

The following table shows the chief sources of revenue to the British Government for the last 12 years:

	Customs.	Excise.	Prop. tax.	Stamp.
	£	£	£	£
1849.	20,636,921	18,985,363	5,408,159	6,867,548
1850.	20,442,170	14,316,083	5,388,036	6,558,332
1851.	20,615,330	14,442,081	5,304,928	6,385,652
1852.	20,551,542	14,885,072	5,509,637	6,761,634
1853.	20,902,734	15,537,724	5,588,171	6,975,416
1854.	20,777,814	16,129,843	8,656,025	7,078,604
1855.	20,987,752	16,389,486	13,718,185	6,805,604
1856.	23,618,374	18,673,777	16,028,421	7,268,271
1857.	22,464,353	17,472,000	15,137,996	7,643,092
1858.	24,091,999	18,480,672	7,591,187	7,996,342
1859.	24,824,578	20,823,727	6,077,105	7,976,981
1860.	23,032,894	19,069,000	13,901,816	8,285,257

The following table gives the sources from which the excise duties were derived in Great Britain in 1858, 1859 and 1860:

	1858.	1859.	1860.
	£	£	£
Spirits	9,188,842	10,000,191	9,702,807
Malt liquors	5,292,642	6,852,458	6,383,147
Licenses	1,436,892	1,464,575	1,462,821
Paper	1,281,023	1,451,254	.....
Hops	416,478	462,881	.....
Railways	339,596	359,912	.....
Stage carriages	125,016	127,673	.....
Hackney coaches	82,129	86,203	.....
Game certificates	12,228	13,047	.....
Race courses	5,771	6,233	.....

The table below gives the leading articles on which custom duties were collected, and the amount of revenue received therefor:

	1858. Duty coll'd.	1859. Duty coll'd.	1860. Duty coll'd.
Tea	£5,186,171	£5,408,924	£5,444,157
Sugar	6,223,433	6,271,103	6,094,073
Tobacco	5,331,521	5,433,463	5,529,399

Allowing the same ratio of consumption of luxuries to each person, in the United States, as in the British Isles, and the estimates of income given in the preceding pages, will be found short of the actual facts—the population of the loyal States being estimated at 22 881,746, that of the British Isles 29,334,788 according to their census of 1861. A stamp duty of five cents on each bank note put in circulation, will give $10,000,000 annually. The bank circulation has averaged about $200,000,000 for the last seven years. Of this amount, about one-fourth has been in rebel States. Of the $150,000,000 of bank circulation in the loyal States, the amount is redeemed every three months in the Northern States, and the number of bills required by the banks, to maintain this $150,000,000 circulation, is equal to twice that sum, or $300,000,000. But if we estimate the amount at $200,000,000 in the loyal States, and the average value of each bank note, of the denomination of $5, $10,000,000 of revenue may be derived therefrom.

A doubt has been raised, as to the right to tax incomes, except on the basis of direct taxation, as provided in the Constitution of the United States, on white population, with the three-fifth rule, as to other persons. We think any attempt to raise an income tax in the United States would be both unwise and unnecessary, and that it would involve the complicated and burdensome system of assessments and collection, in each State and Territory.

Our people must bear in mind, that taxation for the purposes of domestic war, does not exhaust the country like a foreign conflict, where the expenses must be paid in coin, and there is a constant outgo of funds, such as England felt in the Crimean war, and in the late struggle in India. A debt of $2,000,000,000 created to suppress the present rebellion, expended in the equipment and pay of men and the supply of munitions, would not be so exhausting to the country, as one-fourth of this sum, spent in a foreign war, like that of the Mexican war of 1847.

A revenue once secured to meet the interest on our debt, Congress should at once retire all the mixed and complex securities, such as the 7.30 loan notes, and notes on short terms, and provide for only two classes of government securities. First, Demand notes, and Second, Bonds at six per cent. redeemable at the pleasure of the government after twenty years.

Of the demand notes $300,000,000 should be at once issued, receivable for all government dues and convertible into the 6 *per cent.* bonds, at the pleasure of the holder. In 1860, the average bank circulation was $150,000,000 in the loyal States, and the deposits were $100,000,000 more. These items, with the coin in daily use, equal this sum of $300,000,000. The demand notes will take the place of bank circulation, coin and bank deposits. The increased demand for currency consequent on the war, will require at least $300,000,000 of demand notes in constant use, and these demand notes will be converted into 6 per cent. bonds, as fast as they come into the hand of capitalists. In this way the floating national debt will be rapidly absorbed into long securities.

The effect of this policy on the banks, it is not necessary to discuss. The bank managers look simply to the profits of their investments, and would gladly retain the vast advantage of their present circulation, which gives almost the exclusive right to borrow money of the public. A man who takes a bank note practically lends that amount to the bank, whose note he takes, and to which he gives credit and circulation.

The government may fairly ask at this juncture, that the people of the whole country shall share the benefit of this circulation, with the banks, to the extent at least of the demand notes of the government.

The banking institutions of the country as far as we can judge, are not disposed to divide their profit with the Government, but insist on the exclusive right to furnish a currency; a demand not founded in reason or justice, and in their attempts to coerce the government, have thrown away their opportunity. The managers of the banks, from the nature of their employments, are as a general thing, selected from that class, least capable of estimating public questions. Bent solely on the purpose of realizing the largest possible profit from their investments, bank directors are only required to know the present value of a security, and the mode of getting the highest rate of interest. Hence banks thrive, by creating constant fluctuations in the prices of property, and are interested to enlarge and curtail the volume of the currency, as often and as suddenly as possible. The history of banking in the United States abundantly proves this.

The Government might safely transfer specie for the people without charge, receiving it on deposit, issuing certificates therefor, payable at any of the public depositories. This system of exchange would aid the government in another method. It would draw specie from the pockets and hiding places of individuals into the subtreasury, where it would safely await the call of the owner. These certificates would be readily transferred, while the specie remained untouched, and in this way $100,000,000 of gold would soon find its way, in the form of specie deposits, into the public strong box, and the certificates sold in the market as specie.

Mr. Secretary Chase endeavored to bring about harmony of action between the banks and the Government, and to allow the banks the chief control of the circulation if they would base their circulation on *security*, and that security the bonds of the Government. But the banks frankly said, we have no capital equal to this undertaking. Our capital is our circulation, which we borrow directly from the people, and the interference of the government with this circulation, by the issue of their own demand notes, without interest, will force the banks to retire from the field.

The adoption by Congress, of Mr. Secretary Chase's plan of currency, allowing private Bankers and the incorporated banks, to issue registered notes, on the deposit of government bonds, might aid the public finances if the banks would pay specie for their bonds. But during the suspension of specie payments this plan of the Secretary, cannot aid the government to the amount of a dollar.

Congress, as the representative of the national sovereignty, has only to look at the true interests of the whole people, and by giving to the people a currency, based on the public credit, relieve at once the national treasury. The volume of the currency cannot be permanently increased by legislation. That depends on the laws of trade, of demand and supply. Currency is the medium by which exchanges are made; and these depend on the amount of transactions which take place in society. As capital will readily seize upon these demand notes for funding, in order to secure a regular income by the receipt of interest, the duty of Congress is a plain one, and their patriotism will be found equal to the present emergency.

WASHINGTON CITY, *January* 15, 1862.

AMERICAN RAILROAD BOND LIST.

(*) signifies that the road is in the hands of receivers. (†) that the company is in default in its interest. S. F.," Sinking Fund. "var," that the bonds fall due at different periods.

Finances of the State of New York.

ANNUAL REPORT OF THE COMPTROLLER.

The report sets out by observing that, while our people will always submit cheerfully to taxation for the simple purpose of Government, "taxation to pay the expenses of profligate legislation will always cause discontent." The condition of our State Treasury is healthy, in view of the novel situation of public affairs.

Reference is made to our growth in population, wealth and prosperity as a nation, before the rebellion broke out, and the uses which the present affliction may subserve. Our financial affairs could not have been in better condition to meet the test. In the patriotic zeal shown to sustain the standard of our country, New York exhibited an ardor that was without a rival in the history of the world. At the same time her credit was so sound that no difficulty was shown in raising, by loan, the three millions appropriated for that purpose.

The Comptroller then glances at the several funds of the State, wherein he takes occasion to express his approval of the present method of keeping the canal accounts. By the antiquated fiction of what is termed the General Fund, the canal revenues are already anticipated to the extent of $4,455,130, including expenses of collection, the discharge of old debts, interest, sinking funds of $540,130, and $200,000 for the support of the State Government. Were the canals actually to yield such an amount, the total State Debt would soon be paid, and no taxes would be needed during the process, but seven-eighths of a mill to keep up the General Fund, and three-fourths of a mill for the School Fund. Should the Sinking Fund be provided for as required, the old canal debt will have been met by the 1st of October, 1867. After the discharge of that class of obligations, there is to be an annual appropriation of one million and a half to Sinking Fund No. 2, which will provide for the payment of the General Fund debt by the 1st of Janurry, 1873. The whole revenues of the canals will then pour into Sinking Fund No. 3, to liquidate a debt of only four and a half millions, if held rigidly to their work in the meantime; thus discharging the last dollar of State indebtedness by the 1st of January, 1875.

If the annual revenues of the canals could be made to reach $4,000,000, with the additional aid of two-fifths of a mill tax, the same result would be reached in the same time, leaving a surplus of $100,000 in the treasury.

A valuable table is annexed showing the growth during the past 20 years, of aggregate valuations, State taxes, and town, county, and school taxes. While the first has advanced, since 1842, from $620,676,346 to $1,441,767,480, the second has gone up from $619,684 to $4,505,523, and the third class from $3,626,794 to $15,000,000 in round numbers. It will thus be seen that the greatest advance has been made in the last; while private expenditures have doubtless risen in a still greater ratio.

Reference is made to the increased taxation caused last year by the omission of former Legislatures to provide rigidly for public demands as they fall due. But the supply bills, so called, have grown to be too formidable, as shown by the following statement:

Amount paid for the expenses of the Government proper during the last fiscal year, was		$1,391,155 98
Amount paid for intr'st on the general fund debt, being the deficiency in the general fund debt (sinking fund) to meet the payment	$330,964 47	
Amount paid for intr'st on Canal and other debts, chargeable on the general fund revenue	34,289 28	365,253 75
Total		$1,756,409 73

The moneys applicable to the payment of the above expenditures were the receipts into the Treasury on account of the proceeds of the 1⅛ mill tax, ($1,581,388 25); the receipts for permanent revenue, $144,420 71; the State Prison earnings, $92,939 11; the balance in the Treasury on the 30th September, 1860, $82,968 90, and other miscellaneous items; leaving a balance of revenue in the Treasury on the 30th September, 1861, of $53,750 51.

GENERAL FUND—REVENUE.

Balance in the Treasury Sept. 30,'60		$82,968 90
Amount of receipts into the Treasury during the year ending Sept. 30, 1861		5,346,066 72
Amount transferred from the School Fund for bonds for lands		141 00
Amount of warrants drawn on the Treasury, remaining unpaid Sept. 30, 1861		458 69
		$5,429,635 81
Amount of warrants drawn on Treas'ry on acc't of general fund during year	$5,344,479 07	
Amount transferred to School, Literature and [other funds	31,035 52	
Amount of warrants drawn, but unpaid	370 21	$5,375,884 80
Balance Sept. 30, 1861		$53,750 51

STATE OF THE TREASURY.

Balance on hand Sept. 30, 1860		$989,319 54
Amount received for the last year from the several funds		10,183,024 70

		$11,172,802 93
Am't of war'ts drawn during the year	10,567,808 94	
Am't of wart's unpaid	370 21	10,538,179 15
Balance in Treasury Sept. 30, 1861		$634,623 78

The balances due *from* the Treasury at that date were as follows: To the School Fund, $301,735 44; to the Literature Fund, $39,587 50; to the United States Deposit Fund, $802 49; to the Mariners' Fund, $1,334 57; to the General Fund Debt Sinking Fund, $251,000 02; to the General Fund Revenue, $53,750 51, with some other sums, the whole amounting to $657,785. *Per contra*, there is due to the Treasury from the United States Deposit Fund, $23,161 35, the difference between these being equal to the balance on hand at the 30th of September last.

The estimated revenues for the current fiscal year are as follows:

Three and one-eighth mill State tax, viz.: for support of Government, ⅞ mill; for canals, ¾ mill; and for public defence, 1⅛ mill	$4,389,000
Balance due from County Treasurers on account of the State tax levied in '60	1,000,000
Auction duty	75,000
Salt duty	65,000
State Prison earnings	100,000
Arrears and interest on the non-resident tax	80,000
Fees of the public offices	2,000
Pedler's licenses	650
Tolls on Cayuga Lake Inlet	70
Interest on Treasury deposits	20,000
Interest on Comptroller's bonds of the City of New York	21,000
Amount to be repaid for advances to the United States Government	1,118,000
Balance in Treasury, Sept. 30, 1861	53,750
Total	$6,969,470

The estimated expenses are $6,775,838, including $1,070,512 for completion of the canals and payment of the last canal loan; $1,699,111 balance of the same from 1860; $1,250,000 for redemption of Comptroller's bonds; $300,000 for payment of temporary loan; $500,000 for arms and equipments appropriated by the last Legislature; $559,058, balance of appropriation for expenses of volunteers; and $254,856 for various charitable institutions.

The condition of the General Fund Debt Sinking Fund on the 30th September was:

Balance from previous year		$10,0 00
Amount received from Treasury		2,312,1 26
		2,322,126
Am't paid from Treas'ry during the year		2,071,126
Leaving a balance of		$251,000

Which was applicable to the redemption of stocks loaned to the New York and Erie Railroad Company falling due during the year 1861, and supposed to be discharged.

GENERAL FUND DEBT.

The principal of the General Fund Debt is payable as follows:

1861—(Stock due prior to 30th Sept., not presented)	$51,000		
Due Oct. 1	100,000		$151,000
1862	$900,000	1870	700,000
1864	287,700	1875	900,000
1865	178,000	At pleasure	2,258,082
1866	885,000	On demand	53,910
1868	942,961		
Total			$6,756,654
Less amount provided for			251,000
Total General Fund Debt			$6,505,654

The contingent State debt amounts to $339,000 and consists of stocks loaned to railroad companies, falling due, $170,000 in 1865, $100,000 in 1867, $6,000 in 1876, and $1,000 already due, but unredeemed.

The total canal indebtedness amounts to $9,730,024, created under article 7, section 1 of the Constitution; $13,200,000, created under article 7, section 3; $642,585, otherwise provided for; and $2,500,000, created under article 7, section 12, for the payment of floating debt. The canal receipts for the year were as follows:

From Canal tolls	$3,353,169
From rent of surplus waters	4,865
Interest on current Canal revenues, etc.	44,594
Total	$3,402,628

Payments during the year.

To Superintendents for rep'rs	$106,612	
To Contractors for repairs	260,995	
To Canal Commissioners for repairs, etc.	224,957	
To Collectors, for salaries, etc.	62,346	
To Weighmasters	8,111	
To Auditor, State Engineer, Clerks, Printing, etc.	48,765	706,786
Surplus revenue		$2,695,842

The following is a

RECAPITULATION OF THE STATE INDEPTEDNESS.

		Annual int't.
General fund debt	$6,505,654	$352,500
CANAL DEBT.		
No. 1, under art. 7, sec. 1, of the Constitution	9,739,025	582,841
No. 2, under art. 7, sec. 3, of the Constitution	13,200,000	782,000
No. 3, under art. 7, sec. 10, of the Constitution	642,585	34,629
No. 4, under art. 7, sec. 12, of the Constitution	2,500,000	150,000
Contingent debt	339,000	
Total debt	$32,926,264	

The surplus revenues of the canals have been apportioned, as directed by the constitution, thus:

Section 1	$1,700,000
Section 2	350,000
And the balance under section 3	645,842
Total	$2,695,842

SCHOOL FUND.

The School Fund consists of $1,135,057 of State stocks; $356,300 of State bonds, and various other sums, as Bank stocks, bonds, etc., the whole amounting to $2,675,477. The receipts during the last year, including a balance of $127,488 from the previous year, were $445,495, and the disbursements $347,508, leaving a balance at the 30th September, of $97,987. The revenue for the current year is estimated to be $327,181, and the payments $350,000.

LITERATURE FUND.

The capital of the Literature Fund amounts to $269,952, the greater part in State stocks. Estimated revenue for 1860–1 (including balance of $15,775) $58,990. Payments for ditto $42,124, leaving a balance to the present year of $16,866. Estimated revenue for 1861–2, (including $28,000 appropriation) $43,799; payments, $42,500.

UNITED STATES DEPOST FUND.

The capital of this fund amounts to $4,014,520, mostly loans on mortgage. Payments for 1860–1 (including balance), $371,953; revenue, $248,792; balance of indeptedness, Sept. 30, 1861, $23,161, which is a considerable reduction. Eestimated revenue for 1861–2, $251,603; estimated payments, $230,000, leaving a balance due the Treasury about equal to that from last year.

OTHER FUNDS.

The Tonawanda Railroad Company Sinking Fund amounts to $61,446; the Long Island Railroad Sinking Fund to $3,411; the Mariners' Fund to $11,335. The amount of the annuities payable to the Indians is $7,362.

THE SALT SPRINGS AND AUCTION DUTIES.

The receipts on account of the Onondage Salt Springs last fiscal year amounted to $66,290, which is a little in excess of the average for the last six years. The total payments were $63,500, also in excess. The auction duties amounted to $75,319.

The Comptroller calls attention to the evil practice of County Treasurers retaining taxes in their possession long after they have been collected. More than a million of dollars were due from these men on the 1st of October. It will cost the State fifty thousand dollars if this abuse is suffered to continue another year. To anticipate these taxes by temporary loans is expensive and inconvenient. He recommends the imposition of 10 or 12 per cent. interest on all funds thus kept back.

The one per cent. allowed to the Chamberlain of this City as commission is, he thinks, too large ($17,846), and should be reduced. Attention is called to the difficulty of collecting taxes from Treasurers who become bankrupt; also to the outlay for prosecuting the geological survey of the State, which amounted last year to $13,703. Since 1847 the survey has cost $603,565 in all, returning as sales only $52,916.

The claims of the militia of 1812 will be settled in the course of the month.

Of the $50,000 authorized for the relief to the people of Kansas, $38,756 have been expended. The Commissions have declined to make any application of the balance. The Comptroller questions the expediency of making such appropriations, though the present afforded some valuable relief.

The new law respecting printing works well. In 1858 the State paid $120,423 for printing; it is now done for $38,000 per annum.

WAYS AND MEANS FOR THE FUTURE.

Though the debt of the State has within two years been reduced from $34,140,238 to $31,726,264, the sum of $1,770,000 is needed to meet the interest, toward which there is available from miscellaneous sources, $195,000, and from canal revenues, $350,000, leaving $1,261,566 still to be provided for. This would require a seven-eighths of one mill tax. To provide for the Canal Debt and interest, and to fill up the Sinking Funds, there must be raised $4,455,130. What the canals fail to yield toward this must come from taxation.

The Comptroller thinks it unjust to tax the people for any portion of the canal debt or its interest, and gives elaborate tables of earnings, etc., of the canals against the policy of letting these great works run down or pass into the hands of private interests. He also calls attention to the provisions of the law passed last Congress, providing a direct tax of 20 millions on real estate, and recommends the Legislature to assume the collection of the quota falling upon this State.

The estimates for next year are prepared with a view to economy in every department. The taxes will amount to 2⅓ mills, independent of war expenses. Those will be one-third lower than in 1860. The sum of $522,496 will be required to meet land damages and deficiencies in the Canal Department for last year and the present. Estimated tolls for the present fiscal year, $3,781,540, which will meet sinking funds Nos. 1 and 2, and pay one year's interest on No. 3, leaving a balance in its sinking fund of $221,540.

The taxes for the next fiscal year, then, will be as follows:

For the General Fund, ⅞ of a mill yielding, say	$1,248,980
*For the School Fund, ¼ of a mill yielding, say	1,071,511
For deficiency under sec. 8, art. 7, and to pay land damages, ⅜ of a mill yielding, say	535,254
*For interest and Sinking Fund on the $2,500,000 debt under sec. 12, art. 7, ⅓ of a mill yielding, say	475,782
Total 2⅓ mills	$3,331,477

* These two items are provided for by existing laws.

Removing Ice and Snow.

By law the steam railroad companies of Massachusetts are required to keep distinct accounts of the expenses incurred in clearing their tracks of snow and ice each year. The Worcester directors keep no such account, but include the charge in their "road and engine repairs," while the Providence Company apparently lay aside $1,500 annually for a "fund for removing snow," be the outlay more or less. The Western road has been put to great expense, some winters, in keeping its track open. In 1852 the cost was $2.848; 1853, $1,196; 1854, $1,910; 1855, $1,372; 1856, $16,260; 1857, $16,040: 1858, $7,205; 1859, $9,809; 1860, $3,935; 1861, $10,362. Total cost in ten years, $70.927.

The expense to the Lowell road for three winters past, in removing snow and ice, has been $4,705; Maine, $5,220; Eastern, $991; Fitchburg $7,883; Norwich and Worcester, $2,937; Worcester and Nashua, $6,067; Connecticut River, $5,008; Nashua and Lowell, $2,113.

The winter of 1857–58 was a good one for the railroads, as far as the obstructions of snow and ice were concerned; the Norwich and Worcester, that season, reporting an outlay of only three dollars to keep its line free.

The horse railroad companies are not required to keep any separate account of the cost of clearing their tracks, but the Metropolitan directors state that they expended last winter $4,548 in removing snow from the streets.

Salting Railway Tracks.

On Monday evening, the 13th instant, a committee of five members of the Select Council of Philadelphia, met for the purpose of considering the subject of Sprinkling Salt on the streets by the different Passenger Railway Companies. The following evidence was taken:

Professor Rogers, Professor of Chemistry in the Medical Department of the University of Pennsylvania, said that common salt was not a volatile. It would have a salubrious effect on the streets and the atmosphere rather than otherwise. Salt and snow were apt to cool the air and render it more dry by condensing it and absorbing gases. A large amount of fluid matter might lie in the streets, through a mixture of salt and snow, but more moisture would not necessarily exist in the atmosphere, although salt and snow are colder than snow alone. The temperatere of snow is 32. Salt and snow are more fluid than snow would be when softening, but the fluid is not in the least degree more penetrating. Salt and snow when melted, does not freeze again, whereas the latter, in an unmixed state, does. If we walk in water formed by salt and snow, there is no more chance of catching cold than by walking in pure water. Moisture from salt and snow is not likely to be retained longer than the moisture from snow itself. A person's feet would remain moist a longer time, after being wet with snow water, than with the water of snow and salt, although the slush of the latter is colder. He did not think vegetable colors would be changed in a greater degree by an admixture of salt, than by pure water alone—it is perfectly neutral. The Professor was not positive whether it would affect leather more than mere snow water. He decidedly recommended melting snow by salt, and thus rapidly banish its damp and penetrating vapor from the atmosphere. He considered that its effect on the feet of horses was not injurious, and that it was far better for them to travel through salt and snow for a short time, than through snow slush for a longer period.

Mr. Whitall, a school teacher, said that, from his experience, feet would dry slower after being wet with salt and snow than with snow water alone. He has taught children for twenty years, and finds they now complain more of cold feet in school than formerly, before salt was used in the streets. Could give no positive statistics. Mr. Whitall argued much from his own constitutional peculiarity. He finds that the air of the sea shore gives him cold, and thinks that the salted air of the streets also has that effect on him.

Dr. Malone agreed entirely with Professor Rogers. He had been a medical man thirty years, and thought that salting the streets was rather a healthful advantage than otherwise, inasmuch as it shortens the time of bad walking and of damp atmosphere. Considers also that salt improves street mud as manure.

Mr. Robert S. Taylor, President of the Second and Third Streets Railway, stated that his road, with its branches, was twenty miles long, fifteen miles of which is paved. It uses four hundred bushels of salt in going round the track twice, each bushel 80 pounds. Last winter only eleven hundred bushels in all were used, and this winter less salt will be used than ever before. By employing workmen it might take two or three days to shovel snow from the rails of his road. His cars average sixteen thousand passengers a day, and on all the roads of this city a hundred thousand persons, or about one-sixth of the population of Philadelphia.

Mr. George M. Williams, President of the Tenth and Eleventh streets Railways, only used 400 bushels of salt last winter, and never has used more than 900 bushels in one season. He has employed thus far but sixty bushels. His track is seven miles long, and the tracks of all the railways within the paved limits of the city aggregate seventy-five miles. On a track of seventy-five miles, after a fall of snow one foot in depth, there would be 11,800,000 cubic feet of snow. Estimating fifty cubic feet to a cart load, and eight cart loads to a day's work, it would require 5,940 carts, ($2 a day), for five days, making a cost of $59,400, without

considering the price of scraping the track. The entire number of carts in this city is only about 3,900, and but few of them could be hired when needed. Among 800 employes on this road, not one has had diphtheria during the past week, although drivers and conductors are occupied sixteen hours a day. The deaths from diphtheria during the same period, in the entire city, have been only seven. The horses on the Tenth and Eleventh Streets Railroad have never been healthier than at present, and no noticeable effect has been perceived by splashing on harness leather or the paint of the cars.

Mr. Scout, one of the Directors of the Fourth and Eighth Streets Railway testified substantially the same as Mr. Williams in regard to the expense and inconvenience which would attend the adoption of a new mode of clearing snow from the tracks, and the absence of deleterious effects by the old method.

The Committee then adjourned to Friday evening, 17th instant.

THE NEW YORK CENTRAL RAILROAD COMPANY.—TREASURER'S OFFICE—ALBANY, Jan. 20th, 1862.—The Transfer Books of this Company will be closed at the close of business on Saturday, the first day of February next, and will be re-opened on the morning of Monday, the twenty-fourth day of February next.

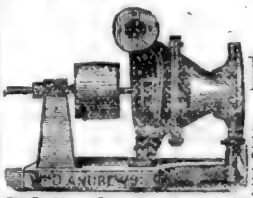
OFFICE OF THE ILLINOIS CENTRAL R. R. Co.,
New York, Dec. 5, 1861.

AT a meeting of the Board of Directors of the ILLINOIS CENTRAL RAILROAD COMPANY, held at their office in New York this day, it was

Resolved, That an assessment of FIVE DOLLARS per share, upon the Scrip Shares of the Capital Stock of the Company, be and the same is hereby called payable on the twentieth of January, 1862; and that the same be payable on the Stock registered in the City of New York at the office of the Company in that city; and on the Stock registered in London at the office of Messrs. ROBERT BENSON & Co., London; and that parties desiring to pay their assessment in London, may pay the same at a rate of exchange sufficient to produce five dollars per share to the Company in the City of New York.

Resolved, That the transfer books be closed on the afternoon of the 15th January next, and re-opened on the 20th day of the same month; and that no transfer be permitted, on or after that day, of shares upon which the foregoing assessment shall not have been paid.



THOMAS E. WALKER, Treasurer.

The eighty-dollar certificates to be returned on payment of the above.

OFFICE OF THE ILLINOIS CENTRAL R. R. Co.,
New York, Oct. 29, 1861.

HOLDERS of the stock of this Company, as registered upon the books of the company at the close of business on the 15th day of January, 1862, will be entitled to Canceled Bonds Scrip for five dollars upon each share of stock held by them deliverable on or after the 1st day of February next; and parties holding certificates are hereby notified to have the same registered in their own names on or before the said 15th day of January. 4t3

ANDREWS' PATENT
Centrifugal PUMPS

ARE the best and cheapest Pumps made for **RAILROAD STATIONS, MINES, FACTORIES, TANNERIES, PLANTATIONS, DRAINAGE, IRRIGATION, WRECKING,** and general use.

Made entirely of metal, without working valves or rubbing surfaces, they pass sand, fine ore and gravel, without injury. Capacity from 20 Gallons to 1,000 Bbls. per minute.

Sanford's CHALLENGE HEATERS SET IN BRICK, PORTABLE OR AS

FIRE PLACE HEATERS,

FOR WARMING BY ONE FIRE WITH PURE, SOFT AIR Dwellings, Churches, Hotels, Public Halls, Railroad Depots, Vessels, etc.,

WITH AND WITHOUT REGISTERS.

THE MOST POWERFUL HEATERS AND THE

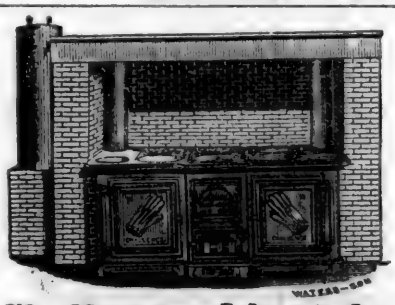
Greatest Fuel Savers in the World:

With an unparalleled mass of unimpeachable testimony of well-known Citizens, Ministers, Doctors, Lawyers, Merchants, Mechanics and others.

Send for pamphlet containing full description and testimonials.

SANFORD, TRUSLOW & CO.,
Nos. 239 and 241 Water st., N. Y.

The COSMOPOLITE
PARLOR RADIATOR, &
GAS BURNER,

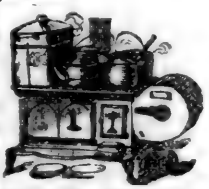


Introduced one year ago, already ranks as the **LEADING STOVE** for PARLORS, SITTING ROOMS, and all places where a soft, pleasant heat is desired.

Fire may be kept all winter with an astonishingly small supply of coal.

Send for description and testimonials.

SANFORD, TRUSLOW & CO.,
Nos. 239 and 241 Water st., N. Y.



Challenge Air-tight KITCHEN RANGES,

May be placed in a fire-place without masonry, and with or without water-back; or may be set out on feet, as an ordinary stove.

This range, already very popular, has the **LARGEST OVENS** of any in the market; BAKES PERFECTLY, never burning to brown at the bottom; BOILS, ROASTS and and BROILS with unequalled facility and dispatch, and with extraordinary **ECONOMY OF FUEL,** which may be either coal or wood. Flues large and easily cleaned. A child can manage it, so simple is its construction. Castings extra heavy, and design plain and chaste.

Four sizes, adapted to families and hotels.

Beacon Light
SUMMER AND WINTER
PORTABLE RANGE,

Is a very popular range, having six boiler holes, one large oven that bakes perfectly, with an arrangement for roasting, or heating irons at the end. It is very economical of fuel. For a FEW DOLLARS a family may be supplied with a PERFECT COOKING APPARATUS, equal to the highest price stove in the market.

Three sizes, adapted to coal, or wood.

SANFORD, TRUSLOW & CO.,
239 and 241 Water st., N. Y

SANFORD'S
MAMMOTH
OR
GLOBE HEATERS.

The best stoves for RAILROAD DEPOTS and SHOPS, and all places where a great heat is required. They are very durable, and very economical of coal.

Beware of imitations that are inferior in strength and in other respects.

TESTIMONIALS.

HUDSON RIVER RAILROAD OFFICE, N. Y

This Company have now in use, over two hundred of Sanford's Mammoth Heaters, in Station Houses, Work Shops, and Engine Houses; we commenced using them in 1853, and some of the first stoves put up are still good and in use. We consider them the best Heaters now in use.

J. M. HEBARD, Supply Agent.

UNION FERRY COMPANY.

The Mammoth Heaters have been used by this Company in their waiting rooms at the several ferries and found to be very excellent stoves and more durable and valuable than any heretofore used. CYRUS P. SMITH, Managing Director.

American Railroad Journal.

New York, Saturday, February 1, 1862.

Little Schuylkill Railroad.

The report of this company states that the amount of coal transported in 1861 was 166,632 tons, against 317,906 in 1860. The road is in good conditon, having been greatly improved during the year, and is well supplied with rolling stock. The trains have been run with great regularity and without the slightest interference with the passenger transportation which is conducted by the Catawissa Railroad Company. The East Mahonoy road, which is to be an important feeder to the Little Schuylkill road is announced as nearly completed. The receipts from all sources were as follows:

From coal rents	$4,566 60
Railroad toll	49,033 61
Coal transportation	39,971 46
Freight on merchandise	16,059 26
Passenger and mail transportation	8,026 68
House rents	1,222 10
	$118,879 71

The expenses during the same period were $70,362 94, the principal items of which were transportation, $17,397 90; coal dirt transportation, $10,442 34, and railroad repairs, $9,391 43.

Cleveland and Mahoning Railroad.

The earnings of this road for the fiscal years ending December 31, 1860 and 1861, were as follows:

	1860.	1861.
From passengers	$54,765 01	$56,643 90
" freight	146,118 39	84,157 30
" ore		34,206 26
" coal	158,713 99	194,907 79
" mails, etc.	5,020 96	5,876 19
	$364,618 35	$375,791 44

The expenses in 1861 were:

Repairs of track	$44,673 15	
" engines	13,136 18	
" cars	11,170 29	
" bridges, buildings, etc.	6,655 37	
Running expenses	16,701 18	
Damages	315 73	
Station expenses	15,246 26	
Fuel	12,940 84	
All other expenses	21,778 57	
		142,617 57
Net earnings		$233,173 87
Interest and exchange	$147,144 03	
Taxes	6,539 74	
		153,683 77
Net profit		$79,490 10

Compared with the previous year the gross earnings show an increase of $11,173 09
With an increase in expenses of 16,002 70

Making the decrease in net earnings $4,829 61

The following is a comparative statement of the passenger and principal freight carried in 1860 and 1861:

	1860.	1861.
Number of passengers	68,072	69,124
Tons of coal	168,770	205,969
Tons of ore	58,216	42,547
Pig and bar iron	12,859	13,248
Other articles	13,315	8,182
Mineral oil, bbls.	1,705	9,572

New rails, chairs, spikes and ties have been used, costing, after deducting old rails sold, $17,691 82. A new and substantial bridge has been built across the Chagrin river in Aurora. Both track and machinery are in as good condition as they were at the commencement of the year. The report says:

The rebellion of the past year has affected the business of the road to a considerable extent, by crippling the iron trade, and closing the Southern markets for the dairy products of the reserve, but the increase in the coal trade has nearly compensated for the loss thus sustained.

The balance sheets from the books of the company herewith submitted, gives full information upon the several matters of interest to you: and that you may see at a glance the changes made within the year, the several balances of last year are given in a separate column. The increase of $19,245 83 in construction account is principally for extension of the main line of the road from Crab Creek to a point near Powers' Coal Bank, a distance of about one and a half mile. The traffic secured by this extension will soon re-imburse this outlay.

The item of "Real Estate Bills" is for the land near the mouth of the Cuyahoga River, contracted soon after the organization of the company, but not fully settled and adjusted until February last.

After paying current expenses, interest and taxes, the reports show a net profit of $79,490 10, which has been devoted to the extension of the main line as above stated, the building of additional cars, and the reduction of the floating debt unavoidably incurred in completing and equipping the road.

The pressing necessities of the National and State Governments, and the consequent favorable rates at which Government securities could be obtained, put it out of our power to realize anything from the sale of third mortgage bonds towards the liquidation of this debt, which must therefore be carried for the present, devoting the surplus earnings only to its payment. From the prompt manner in which all the financial affairs of the company have been conducted, its credit is good, and hence the future managers will have but little difficulty in carrying this debt at moderate rates of interest, until it is paid off, either by the sale of bonds, or the surplus earnings of the road.

As yet no means have been devised for completing Section One, other than resorting to an increase of the floating debt, and highly important as the work is, the present managers are unwilling to resort to this.

A call will be made upon this company during the current year, for aid in building a branch road from its main line to the Hubbard and Brookfield Coal field, a distance of some ten miles; and in view of the fact that a large basin of this mineral of the quality known as Brier Hill Coal, is known to exist in that vicinity, the importance of the work, to this company, cannot be two highly appreciated. It is hoped therefore that our successors will lend the enterprise every aid in their power consistent with the interests of the stockholders.

The equipment of the road consists of 12 locomotives; 6 first class passenger cars, 5 baggage

and mail cars, and 280 freight, coal, iron and construction cars. The number of miles run by all the trains was 246,620. Number of cars hauled one mile 3,461,832. The gross earnings per mile was $1.52.37. The working expenses per mile run $0.59.97. Cost of fuel per mile run 4.8 cents. The operating expenses were 37.95 per cent. of the earnings, against 35.65 in 1860.

" " 3d "		123,235 00
" general interest and exchange		6,780 89
" for new engines and cars		18,041 21
" for new bridges		27,531 51
" for other expenses, not properly belonging to operating expenses		4,258 15
Assets in hands of receiver, Nov. 30, 1861		45,585 16
		$1,121,822 33

The earnings of the past year have increased over the previous year $94,303 58, while the expenses have not increased in the same ratio.

The total number of miles run by all trains has been 800,525, showing an increase of 54,013 miles over that of 1860.

The financial condition of the company at the close of the year was as follows:

	Dr.
Construction account	$8,172,189 97
Telegraph line	16,918 72
Personal property	29,318 58
Balance of personal accounts	22,777 82
Assets in hands of receiver	171,764 80
	$8,412,914 39
	Cr.
Capital stock	$3,846,324 11
1st mortgage bonds	800,000 00
2d "	1,189,000 00
3d "	1,166,000 00
Funded debt bonds	798,120 43
River Line "	145,000 00
Income "	15,500 00
Dividend "	123,017 27
Bills payable	334,952 58
	$8,412,914 39

The company still propose to secure 40 per cent. of the principal and interest of the bills payable, and 80 per cent. of the principal and interest of the Income and Dividend bonds still outstanding.

Of the indebtedness of the classes named, and which was embraced in the proposition made a year since, amounting at that time to $3,050,189 39, there has been taken up by the company $2,220,315 27, and $793,120 43 new bonds and certificates issued therefor.

Molasses and Coffee Trade of the U. S.

Total consumption of Molasses in the United States during each of the last twelve years.

Steam Forge.

The extensive steam forge of FORD & PHILBRICK is located on the river side, above the Marine Hospital, in the immediate vicinity of Ganson's Stove Factory and the Iron Smelting Works. This forge contains two steam hammers and one stationary engine. The largest hammer weighs 2,500 pounds, and will forge a shaft 20 inches in diameter; the small hammer weighs 1,000 pounds, and is principally used for forging railroad car axles and small shipwork, locomotive frames, piston and connecting rods, &c. Shafting of every length and size, and all kinds of hammered shapes are made in these works. Lake Superior iron and a mixture of scrap iron are used in this forge. This is one of the most complete establishments of the kind on the Lakes, and it is alike creditable to its enterprising proprietors and to the city of Detroit. During the past year it has been principally employed on ship-work. — *Detroit Tribune.*

Finances of Ohio.

EXTRACTS FROM THE MESSAGE OF THE GOVERNOR.

The following statement exhibits, in a condensed form, the gross amount of the revenues of the State, with the chief sources whence they were derived, and also the disbursements from the several funds respectively:

RECEIPTS.

Balance in Treasury, Nov. 15, 1860.		$66,209 15
General revenue—		
From taxes	$685,029 16	
" canal	143,767 13	
" other sources	113,940 18	
		942,736 47
Military Fund—		
From loans	$1,212,134 45	
" United States	345,000 00	
" other sources	1,110 53	
		1,558,244 98
Sinking fund—		
From taxes	$1,493,618 07	
" school lands	84,276 47	
" other sources	48,103 83	
		1,625,992 92
Common school fund from taxes		1,204,889 83
School library fund from taxes (delinquent)		1,690 57
National road fund from tolls		21,492 41
Bank redemption fund from sale of stocks		2,000 00
Total receipts		$5,423,206 33

DISBURSEMENTS.

From general revenue proper	$728,776 78	
From canals	208,129 77	
Military fund	1,496,025 51	
Sinking fund	1,630,840 12	
Railroad coupons withdrawn	1,290 00	
Common school fund	1,205,107 20	
School library fund	5,088 82	
National road fund	19,524 45	
Bank redemption fund.	752 25	
Total disbursements		5,294,029 90
Balance in Treasury, Nov. 15, 1861		$129,176 43

Of the foregoing receipts, it will be seen that $3,385,181 63 were derived from taxes; $327,302 06 from canal and other source of general revenue, and from tolls of National Road, from the disbursement of which no money return will be made to the State; $1,558,244 98 from Military Fund, which will be re-imbursed by the United States, and $86,277 47 from School Lands and Bank Redemption Fund, which constitute debt rather than revenue. Deducting the amount of revenue from the Military Fund and the balance in the Treasury from the gross receipts, leaves $3,735,784 92 as the sum expended during the fiscal year, for the support of the State government in all its departments, executive, legislative and judicial—the common schools, the payment of the interest and $582 000 of the principal of public debt, and all the other expenses attending the administration of the State government. The disbursements proper for the support of the State government during the year, including the expenses and salaries of the Benevolent Institutions, the Penitentiary, with the repairs and enlargement of the building, and all other expenditures, ordinary and extraordinary, were $787,890 34 which is little more than one-half the disbursements for the support of the common schools, and about $100,000 less than the payments on the interest of the foreign and domestic debt.

The following schedule will exhibit the taxable property of the State as valued for taxation; the respective amounts of State, county and local taxes, and the total amount of taxes levied in each of the last four years.

V. RECAPITULATION.

	Taxes for all purposes.
1858	$9,756,650 30
1859	10,045,330 22
1860	10,817,676 84
1861	11,071,127 89

It will be seen that the taxable valuation of the State increased $51,770,407, from 1858 to 1861, an annual average of nearly thirteen millions of dollars. The total taxes on the duplicate for 1861 exceed those for 1858, $1,814,477 59. Of this increase, $655,011 are for county and other local taxes. This class of burdens should be materially lessened. The authority of the Legislature is ample for that purpose. The act of the last Legislature, limiting the levy of local taxes for 1861, was in the right direction. It is to be hoped you may feel authorized to further relieve the people in that respect. Especially do the property holders of our cities feel these burdens.

I append a statement of the public debt:

Statement of the Issues and Redemptions of the State Debt.

	Amount issued.	Amount canceled and redeemed.	Amount outstanding Nov. 15, 1861.
Issued prior to Jan. 1, 1845	$17,895,482 50	$10,528,927 45	$6,866,555 05
Issued to redeem loan of 1850.	4,141,468 48	.....	4,141,468 48
Issued to redeem loan of 1856.	2,400,000 00	.....	2,400,000 00

" redeemed		5,009,766 98	
" by re-issues		6,541,468 48	
" outstanding Nov. 15, 1861		14,897,273 34	
		$26,798,367 56	

St. Louis and Iron Mountain Railroad.

The gross earnings of this road for the fiscal year ending October 1, 1851, were...$212,945 69
And the expenses 145,922 11

Leaving as net earnings $67,023 58
Last years liabilties paid...$16,601 25
Paid for new work 12,133 45
28,734 70

$38,288 88
Received from stock subscriptions 590 00

Balance carried to assets $38,878 88

The gross earnings of the previous year were $235,291 33, and the expenses $175,853 55—making the net earnings $59,437 78, an increase of $7,585 80. The report says:

The assets, when converted into money, will enable the company to pay off all liabilities except for interest on State and county bonds. These liabilities, on the 1st October, are shown to be $27,387 88 by the financial tables hereinto appended.

The road and bridges (except Big river bridge) are in good condition throughout. On the morning of the 15th of October Big river bridge was burnt by incendiaries, which has caused great interruption in our business; but the bridge is being rapidly though temporarily rebuilt. We expect the cars will be running over it the present week. We have constructed two bridges this year. One, of wood, over Sandy Creek, which cost at the rate of twenty-two dollars per lineal foot. One of iron, over the Joachim Creek, which cost at the rate of fifty dollars per lineal foot. The iron bridge is constructed after a model patented by Mr. J. L. Jones, a resident of St. Louis, combining the principles of the Howe truss bridge. It has been examined by practical iron men, and thoroughly tested as to strength, and by every one is regarded a success. This is the first bridge built after this model; the first iron bridge West of the Mississippi river, and is constructed wholly of Iron Mountain iron.

The rolling stock has the past year been neither increased nor diminished, and is generally in good condition for service. At the beginning of the year, the board appropriated ten thousand dollars for the purchase of a *steam or locomotive car* to ply between St. Louis and Carondelet. Our Master Machinist, Mr. Hewitt, visited the shops where this kind of work is constructed in Ohio, and obtained proposals for such a car, but before the arrangements were closed, our business and earnings were so diminished in consequence of the troubles in the country, it was thought advisable to construct an engine of proper dimensions in our own shops and place it on one of our passenger cars for this service. This has been done under the direction of Mr. Hewitt. This steam car has been run several trips very successfully, and bids fair, in ordinary times, to answer all the purposes desired, the cost for construction being less than thirty-seven hundred dollars.

The arrangement heretofore made with the city of St. Louis for filling in Main street between Miller and Lesperance streets, is being carried out as rapidly as possible. We have constantly engaged in this work one locomotive and thirty dirt cars, an engineer and four men; the workhouse hands load the cars. Dirt has been filled in to the top of the trestling all along. Should nothing prevent, not many months will be required to open Main street between Miller and Lesperance streets to all kinds of vehicles.

Under the direction and patronage of the United States authorities, the Western Telegraph Company have this summer erected a telegraph line throughout the length of your road, which very much facilitates our own convenience, as well as that of the public authorities and the community. These authorities have also constructed a connection between the Pacific and North Missouri Railroads and the Iron Mountain Railroad, at the Plum street depot.

It is worthy of remark that our outlays this year for damages to stock and property are only $1,694; that of last year for the same account was $3,200. Our expenses for extraordinary repairs for locomotives and cars, for injuries received on the road this year, is $1,788 04, against $6,216 24 of last year. These favorable differences, we believe, are largely due to the wise policy which the Board a year ago adopted in rewarding engine men and firemen for avoiding, for stated periods, accidents by collisions, running off the track, killing stock, &c. If this policy is valuable as promoting economy, how much more valuable is it as furnishing additional security of life to passengers! About one thousand dollars have this year been appropriated in this manner, in which nearly all our enginemen participate.

The hopes that were, twelve months ago, entertained by the Directors and friends of this road of material improvement in the business the past year, and for active operations by this time in extending the road south of Pilot Knob, have not been realized, for reasons familiar to every one. Every reasonable effort was made last winter to procure from the Legislature further aid for this extension: but they were unavailing.

I. TAXABLE PROPERTY VALUATION.

	1858.	1859.	1860.	1861.

Sec. and Auditor—ADDISON WARE.

Mandamus Against the City of Pittsburg.

LIABILITIES OF CITIES—HOW JUDGMENTS AGAINST THEM ARE COLLECTED IN PENNSYLVANIA.

The case of Evans *vs.* The City of Pittsburg was an application for a mandamus to compel the city to pay the plaintiff the amount of his demand, and has been recently determined by the Supreme Court of that State. The plaintiff had obtained a judgment against the city, and the question considered was, what was his appropriate method of compelling payment.

One section of a statute of Pennsylvania enacts, that when any person has obtained a judgment against a *county*, he may have execution therefor as follows, and not otherwise—that is to say: "The court in which the judgment is, may issue a writ commanding the *commissioners* of the *county* to cause the amount thereof, with interest and costs, to be paid out of any money's unappropriated of such *county*, or if there be no such moneys, out of the first moneys that shall be received for the use of such *county*." Another section enacts that if judgment be obtained against a *township*, the like proceedings may be had. The act does not touch upon cities further than to say, in one section, that every city shall be deemed and taken to form part of the county in which it is, saving however, to such city, the right, privileges, and immunities, &c., granted by its charter and the laws.

The city of Pittsburg occupies a small portion of Allegheny County; the county having *its* county and township officers, such as the act prescribes; and the city having *its* officers, according to its charter: but not after the county names or models, or in any such form as the act contemplated for counties and townships.

There is also an act of the Legislature of Pennsylvania forming a part of what is termed the "Revise Code," which regulates the whole subject of ordinary executions. One of its heads is "Of executions against corporations." It proceeds to order and regulate, by detailed provisions, the whole subject of executions against corporations generally; but it excepts from these provisions "any corporations being a county, township or other public corporate body." The Legislature seemed to have considered that the ordinary execution, attachment for debt, or other like process, was hardly to be given against *municipal* corporations, as if so allowed, the wheels of government might be stopped, and the whole municipality be thrown into complete disorder. The creditor who dealt with a city was perhaps expected to trust largely to public faith.

The question then before the court, was whether Evans was entitled to a mandamus or order upon the *comptroller* of the *city*, to deliver to him an order on the treasurer (these, and not commissioners being its fiscal officers), for the amount of his judgment to be paid out of the first moneys, which should come into his, the treasurer's hands; in other words, to have a mandamus execution.

The following is the opinion of the court, delivered at the decision of the case, after it had been thoroughly and ably argued both for and against the city.

GRIER J. The writ of mandamus, though originally treated as a prerogative writ has in modern times been used as a remedical process, and has been literally interposed for the benefit of the citizen and the advancement of justice. Whenever a party had a legal right and no other specific legal remedy this will not be denied—nor will it be a ground of refusal that the party might have a remedy in equity, or even in that there may be another remedy if such remedy be absolute. The great multiplication of corporations both municipal and private of modern times, the readiness of Legislatures in conferring on them most extensive and dangerous powers, demand of the courts the most liberal application of this remedy to prevent a failure of justice.

The Act of Assembly of this State passed on the 15th of April, 1834, relating to counties and townships, presents a method by which those having judgments against these quasi corporations, may have a remedy by means of the remedical writ of mandamus, and as these corporations have no property which should be properly made subject to levy and sale, it restrains the use of other process.

It is but the legislative extension of the common law remedy of mandamus, and a modification of the process, to suit the peculiar functions and officers of these anomolous corporations, and make it more simple in practice, as it issues only where a court of justice has given a judgment which makes it the duty of the officers of the corporation to pay a certain sum of money, it dispenses with the form of an alternative mandamus. It assumes that the officers whose duty it was to lay and collect taxes sufficient to pay all just demands against the corporations have done so, and gives the party aggrieved a right to satisfaction out of the moneys in the treasury unappropriated, and if there be no such moneys, then out of the first moneys that shall be received. Now it is true, that the peculiar form of process is presented in an act relating to these *quasi* corporations, and in its letter refers only to counties and their peculiar officers called "Commissioners," and that cities which are public chartered corporations, having much more enlarged powers, privileges and duties, are not specifically named. Cities often are possessed of stocks and other property not devoted to special public use which might well be levied on to satisfy a judgment against it.

But where a city has no such property (as in this case) and its officers obstinately refuse to satisfy a claim which courts of justice have pronounced to be legal and just, there will be an entire failure of justice unless this remedical writ of mandamus be issued and enforced by the court whose judgment is publicly set at defiance.

States claiming sovereign or *quasi* sovereign powers may repudiate their contracts if they are content to abide the scorn of the civilized world, because there is no superior with power to compel obedience. But this sovereign right to defraud makes no part of the privileges or immunities granted by the charters of city corporations. They are subject to the laws as much as private corporations or individuals, and when the courts have adjudged that they shall pay a sum of money due on their contracts it is bound to find a remedy for the party aggrieved by their refusal.

This modification of the mandamus process by the Legislature has the merit of simplicity in form, while it is effective for the purposes intended, and accordingly the Supreme Court of the State, in the case of Monaghan *vs.* The City of Philadelphia have unanimously decided that "although cities are not expressly named yet they are clearly within the spirit of the act." Besides, by the act of 16th June, 1836, sec. 3, "relative to the jurisdiction and power of courts," it is made the duty of the Supreme Court to devise and establish such new writs and forms of proceedings as in their opinion shall be necessary and convenient, &c. That court had, therefore, full power and authority to adopt this remedical writ, devised by the Legislature in the act regulating counties, and apply it to the case of cities—and by this decision they have done so, *sic volo sic jubeo* would have been a sufficient reason. The suggestion that the city af Philadelphia embraces the whole counties like many other cumulative reasons add nothing to the heap. This court has by rules adopted the form of State process as construed and confirmed by the Supreme Court. In a former case in this court decided by my Brother McCandless, the motion was to set aside an execution levied on stocks belonging to the city.

The counsel for the city then contended that the only remedy which the court had an authority to give, was this writ of mandamus. But the court refused to set aside the execution and levy, because the prohibition of other process in the act would only apply to the case of a county, and was very properly intended to prohibit the levy and sale of the Court House, jail and other property held for public use, and that the process of mandamus adopted by the court need not be resorted to in this court where the plaintiff had another sufficient remedy by levy and sale of stocks and other property not so used.

The question as to the power of this court to issue a mandamus in such case is decided in the case of Knox County *vs.* Aspinwall, 24 Howard, 383. Mandamus issued.

New Jersey Railroad and Transp. Co.

The accounts of this company present a favorable condition of the road, especially for a year during which the cities on the line of its route have suffered a great reduction in their business:

The receipts for the year are	$991,829
Expenses	$491,994
Two dividends of five per cent. each, including the one now declared	439,670
	931,664
Leaving to be passed to surplus account	$60,165

RAILROAD SHARE LIST, including Mileage, Rolling Stock, etc., etc.

An *asterick* (*) occurring in the column headed "Rolling Stock," signifies that the cost is included in that of "Railroad and Appurtenances." A *dash* (—) signifies "nil." Running *dots* (.....) signify "not ascertained." Land-Grant Railroads are in "*italics.*"

American Railroad Journal.

Saturday, February 1, 1862.

Share and Money Market.

The buoyancy of the Stock Market at the commencement of the week, caused in a measure by the favorable news from Europe, responsive to the release of the rebel commissions, was slightly checked on Tuesday by rumors that the Burnside Expedition had resulted disastrously. But the publication of the official report on Wednesday had a favorable influence on the market, gave renewed confidence to operators, and prices were firm in consequence, nearly all the leading railway shares advancing from ½ to 2 per cent. over the quotations of the previous day. The most marked change was in Cleveland and Toledo, which, after varying from 35 to 38 for several weeks' past, rose to 42⅛ under a rumor that a dividend was impending. We learn that the floating debt of this company has been reduced to $130,000, with a largely increasing traffic. A meeting of the directors has just been held in this city, at which an agreement for the final settlement of the suits pending in the Supreme Court of Ohio against it, to compel it to maintain and run that portion of the Northern Division of the road west of Sandusky (which had been recently negotiated by the officers of the company), was approved. The terms of the adjustment provide for running a portion of its trains by way of Sandusky and Clyde, thus relieving the company from the maintenance of the road west of Sandusky, by way of Port Clinton. This arrangement harmonizes the interests of the towns on each division, and satisfies local interests and feelings, and removes an incubus which has hitherto been hanging over the company.

Gold is quoted at 103 and 103½, with moderate transactions. The foreign exchanges closed weak for Wednesday's Steamer—large sales of banker's sterling having been made at 113¼ and 113½. The rates for money in what are called current funds, including U. S. notes of circulation, have fallen to 5 and 6 per cent. per annum.

The chief points of financial interest relate to the Tax and Treasury bills before Congress. At the instance of the Ways and Means Committee of the House of Representatives, both branches of Congress have almost unanimously adopted a Joint Resolution pledging the Government to a comprehensive system of taxation, to be immediately framed and carefully adjusted in its details, which shall produce an annual sum equal to the ordinary expenses of the Government, to the prompt payment of the interest on the entire Public Debt, and to the support of a liberal Sinking Fund for the gradual liquidation of the principal of the debt. Our information from Washington, which is direct and reliable, is to the effect that the object of this Resolution will soon be embodied into a Tax Law. It affords us satisfaction to add that no party at the seat of government, and no department of our executive, is disposed to avoid or qualify the responsibility of this great and all important measure.

Our information is also derived in favor o the early passage of the Loan and Treasury Currency Bill, which contemplates all the authority asked for by the Secretary, in raising loans for the service of the present and succeeding fiscal years, and the employment of a popular circulation of United States Notes, which will be made a legal tender, convertible during the war into the 6 per cents. of the Government, and after the peace, made redeemable in gold. This issue will not exceed the sum of annual taxation levied under the system just referred to.

The following is a comparative statement of the earnings of a number of our leading railroads for December. They comprise most of the roads quoted at our Stock Exchange, Though the Mason and Slidell affair, and the success or failure of the Burnside Expedition, may cause slight fluctuations in the quotations of their shares at the Stock Exchange, other and more potent influences are at work, having a tendency to greatly increase their real value.

Roads.	1860.	1861.	Increase.	* Decrease.
Erie	$404,276 30	$708,136 29	$303,859 99

Norwich and Worcester	21,113 25	29,466 44	8,353 19	
Lacrosse and Milwaukee	50,866 04	69,276 45	18,410 41	
	$1,624,807.86	$2,327,844.65	$707,162.05	

Rate of Increase, 30 per cent.

The accumulation of private and country bank balances in our banks is the incident of the heavy export trade, which has been going on since, and in spite of, our war troubles, for the past months without anything like a corres

ponding import movement. The surplus means thus accumulated are shared, in a large measure, by our railway and other transportation companies; our ship-owners, grain factors, &c. The movement through the Erie Canal alone has placed the Treasury of the State of New York, by the tolls derived from the Canal, in a condition of independence and prosperity seldom before equalled.

The transfer books of the New York Central Railroad Company will be closed from the 1st to the 24th inst.

The coupons of the first mortgage bonds of the Central Railroad Company of New Jersey due Feb. 1, will be paid on presentation at the office of the company.

The Michigan Central Railroad Company have declared a dividend of three dollars per share payable February 5th. Payment to be made to stockholders residing in Michigan and registered at Boston, at the office of the General Receiver in Detroit; to holders of stock registered in the City of New York, at the Farmers' Loan and Trust Company; and to all others at the Treasurer's office, Boston.

The interest due February 1st on the 1st mortgage bonds of the Cleveland and Pittsburg Company will be paid at No. 25 William st., by H. C. Kingsley.

The Bellefontaine and Indiana Railroad Company's Real Estate Bonds due Jan. 1, 1861, will be paid on presentation, at the office of Messrs. Winslow, Lanier & Co., No. 52 Wall st., New York.

The interest on the second mortgage and other bonds of the Harlem road, due Feb. 1, will be paid at the Twenty-sixth st. depot.

The earning of the Eaton and Hamilton Railroad for the year 1861 were $128,000
Expenses 92,000

Net earnings $36,000

The earnings of the 138 miles of the Chicago, Burlington and Quincy Railroad proper were:

From January 1, 1860, to Jan. 1, 1861. $1,510,423
" 1, 1861, " 1, 1862. 1,523,978

Increase for the 12 months of 1861 ..... $13,555

The earnings of the La Crosse and Milwaukee Railroad for the year 1861 were $1,070,821 86
Total earnings, 1860 ..... 756,475 75

Increase for 1861 ..... $314,346 11

The Watertown and Rome Railroad Company, owning the Potsdam and Watertown Railroad, are building a connection between the latter place and Ogdensburg, which they expect to have completed by the 1st of July.

A company, principally of English capitalists, is organized for the purpose of constructing a railroad from Saratoga to Ogdensburg and await only a favorable issue of our political difficulties to commence its construction.

The contract between Newport, R. I., and the Newport and Fall River R. R. Co., was signed last week, and the contractors were ordered to commence operations at once, near Seaconnet river.

Railroad Earnings--Weekly.

The earnings of the Michigan Central Railroad, for the 2d week of Jan., 1862, were .. $57,886 66
Do. 1861 ..... 32,497 93

Increase $24,388 72

The Chicago and Rock Island Railroad earned the 2d week in January, 1862 ..... $24,744
Do., 1861 18,160

Increase $4,574

The earnings of the St. Louis, Alton and Chicago Railroad for the 2d week in Jan., were:

	1862.	1861.
Passengers	$6,341 06	$6,986 15
Freight	10,057 83	11,271 14
Sundries	855 73	855 83
Total	$17,254 62	$19,113 12
Total since Jan., 1st..	32,807 18	38,306 94

The Michigan Central earned in the 3rd week in January, 1862 ..... $47,730 24
Do., 1861 ..... 32,123 87

Increase $15,606 37

The earnings of the Cleveland and Toledo Railroad for the 3d week in Jan., 1862, were.. $23,834
Do., 1861 18,346

Increase $5,488

The earnings of the Galena and Chicago Railroad the 3d week in Jan., 1862, were.... $24,147
Do., 1861 21,902

Increase $2,245

The traffic of the Great Western Railway of Canada for the week ending Jan. 24, 1862, was as follows:

Passenger $10,142 82
Freight and live stock 39,952 46
Mails and sundries 1,656 24

Total $51,751 53
Corresponding week of last year..... 43,760 08

Increase $7,991 44

The receipts of the Grand Trunk Railway of Canada for the week ending Jan. 18, were $72,128 20
Corresponding week, 1861..... 55,549 20

Increase $16,579 00
Total traffic from Jan'y 1st, 1862.... $204,895 60
Corresponding period previous year . 136,106 28

Increase $68,289 32

The Buffalo, New York and Erie Railroad Company earned for 21 days of Jan., 1862. $42,840 71
Do., 1861 ..... 22,837 47

Increase $20,003 24

The Chicago and Northwestern Railroad earned in the 3d week of January, 1862..... $11,242 94
Do., 1861 ..... 12,243 32

Decrease $1,000 38

Albany and Susquehanna Railroad.

In the State Senate on the 20th ult., Mr. Ramsey presented a bill granting aid to the Albany and Susquehanna Railroad Company, the provisions of which are, that when the road shall have been completed from Albany to Schoharie, a distance of 34 miles, and when the company shall have spent not less than $1,000,000, they shall receive from the State $250,000, for which a tax, 8-16 of a mill to the dollar, is to be levied; the State to receive the stock of the company to the amount of its appropriation, and not to be responsible beyond that amount. The bill also extends the time for completing the road five years.

In presenting the bill Senator Ramsey stated that the first 50 miles of the road was mostly graded and would be ready for the rails as far as Schoharie in the Spring. It was now proposed to ask the State for a small appropriation to put this part of the road in operation, and then wait till the close of the war to complete it to Binghamton. The road in operation to that point would accommodate Schoharie and parts of Otsego County and prevent loss and injury to valuable work already done with the hard earned contributions of inhabitants along the line. The people along the line of that road expected and were prepared cheerfully to pay their proportion of the war tax —the finances of the State were in prosperous condition, the canal revenues having increased three millions within the past two years. The small amount asked for would largely increase the value of the taxable property of the State and scarcely be felt on the tax levy. The bill, he said, avoided the Constitutional objections raised by the Governor, and should it become a law, would, to a certain extent, equalize the taxes which the "sequestered regions" have, in common with the rest of the State, to bear. The bill was referred to a special Committee composed of Messrs. Ramsey, Connolly and Angle.

Railroad Earnings--Monthly.

The December earnings of the Chicago, Burlington and Quincy Railroad were as follows:

	1860.	1861.
Freight	$61,308 57	$92,833 05
Passengers	25,622 16	21,458 52
Mails	2,559 45	5,042 48
Total	$89,490 18	$119,334 05

Between Chicago and Burlington—210 miles:

	1860.	1861.
Freight	$74,613 52	$114,487 93
Passengers	31,013 85	25,245 31
Mails and miscellan's.	2,925 09	5,899 56
Total	$108,542 46	$145,132 80

Between Quincy and Galesburg—100 miles:

	1860.	1861.
Passengers	$8,947 91	$5,663 24
Freight	14,016 88	14,565 50
Mails	1,823 22	850 07
Total	$24,288 01	$21,058 81
	1860.	1861.
Aggregate, 310 miles.	$132,840 47	$166,191 61

The earnings of the La Crosse and Milwaukee Railroad in December, 1861, were.... $63,276 45
Do., 1860 ..... 50,866 04

Increase $18,410 41

Franklin Railroad.

The road is 22.50 miles in length, extending from Chambersburg, Pa., to Hagarstown, Md. The company was chartered in Pennsylvania in March, 1832, and in Maryland in the same year, with authority to construct a road in continuation of the Cumberland Valley Railroad from Chambersburg to the Maryland line, 16 miles, and thence to Hagerstown, 6½ miles. The road was built in 1838, and ironed with a light flat bar rail. Upon the completion of the road, the Company found itself so embarrassed that shortly after the rolling stock was sold by the sheriff, and the road placed in the hands of a sequestrator, who continued to operate it with horse power till 1852, when it became unsafe and unprofitable for any use, and, by authority of law, it was sold by commissioners appointed for the purpose for $18,000, with the stipulation that it should be rebuilt with T rail within one year thereafter. The time was extended more than once, and ultimately the purchasers resold it to others, who have re-built it in a substantial manner. It was opened for business from Chambersburg to Greencastle on the 6th of February, and to Hagarstown on the 29th of February, 1860. It is operated by the Cumberland Valley Railroad Company under contract

dated January 26, 1860, the contract to terminate at any time at the option of either party upon one month's notice by the other. The tolls collected on the Franklin Railroad from Feb. 6, to Sept. 30, 1860, and from Oct. 1, 1860 to Sept. 30, 1861, were as follows:

	To Sept. 30, 1860.	To Sept. 30, 1861.	Total.
Passengers	$8,190 64	$25,254 46	$33,445 10
Freight	4,311 04	16,780 52	21,091 56
	$12,501 68	$42,034 98	$54,536 66

—of which the Cumberland Valley Company received in 1860, $6,250 88—netting, after paying share expenses of operating, $3,131 75. In 1861, the share of the Cumberland Valley was $16,816 34. The expenses of operating were $12,366 09—leaving a profit of $4,450 25.

The capital stock of the Franklin Railroad Co., subscribed and paid in, is $360,000. The funded debt consists af $165,000 first mortgage 7 per cent. coupon bonds, dated Feb. 1, 1859, and payable Feb. 1, 1884, and coupons semi-annually in Philadelphia. Cost of road and equipment, $525,000.

Trade of Havana.

The importations of home productions for 1861, compared with those of 1860 were as follows:

	1860.	1861.
Sugar in boxes	770,344	759,332
Sugar in bags	4,186	2,326
Coffee in bags	11,931	20,662
Molasses, hhds.	11,423	7,477
Leaf tobacco	39,848	40,075

Comparative Exportation to the U. S.:—

	1860.	1861.
Sugar, boxes of	286,789	155,380
Coffee, arrobas of 25 lbs.	490	7,432
Molasses, hhds.	19,008	10,128
Tobacco, leaf, lbs.	1,648,942	1,262,785
Segars, 1,000	51,373	32,026
Beeswax, arrobas	1,207	170
Aguardiente (whiskey), pipes	716	12

Vessels arrived 1861—Spanish 638

" " " " 1861 7,219

Boston and Providence Railroad.

This company was chartered June 22, 1831. The construction of the first section, between Boston and Sharon, was commenced in the fall of 1832; the second section, between Sharon and Attleboro', a distance of 14 miles, in 1833, and the section between Attleboro' and Providence, 12 miles, in 1834. The road was opened from Boston to Canton, 14 miles, in 1834, and for its whole length, in June, 1835. When first constructed, the road entered the City of Providence on the eastern side. This terminus was changed in 1847 to the one occupied on the western side. The 5½ miles of the road between Providence and Pawtucket were constructed and are jointly owned with the Providence and Worcester Railroad Company—the track for this distance being used in common by both roads. The total length of the Main line from Boston to Providence, is 43.50 miles; Dedham Branch, 2.97 miles; Seekonk Branch, 1 mile—making the total length of road owned by the company 47.47 miles. The company also operated, under lease, the Stoughton Branch road, 4.04 miles, and the Easton Branch, 3.78 miles—making the total length of road operated by the company, 55.29 miles. The length of second track and sidings on the Main line and branches is 32.70 miles; on the Stoughton and Easton Branches, 0.67—making the total equivalent single track 88.66 miles. The Stoughton Branch was opened for business early in 1845; the Easton Branch in the Spring of 1855. They have both been operated since commencement by the Boston and Providence Railroad Company.

The capital stock of the company is $3,160,000, all paid in. The funded debt of the Company, which was created in 1856, for the payment of its floating debt, amounted in the aggregate to $174,220. Of this, $10,000 was paid in 1860, and $30,000 in 1861—leaving to be paid $132,720. This is payable in instalments as follows: $10,000 in 1862; $30.000 in 1863; $30,000 in 1864; $25,000 in 1865; $16,500 in 1866; $6,220 in 1867; and $15,000 in 1868. The interest is papable half-yearly in Boston.

The cost of road and equipment has been as follows, viz:

New track India st., Providence	$13,190 28
Graduation and masonry	775,000 00
Bridges	110,840 00
Stations, buildings and fixtures	497,000 00
Land and land damages	477,939 52
Engineering	95,000 00
Seekonk Branch and Wharf	31,655 70
Prov. and Wor. R. R. on joint account	399,904 90
Boston & Prov. R. R. in Rhode Island	150,000 00
Iron account	335,064 00
Sleeper account	43,850 40
Fence account	23,155 20
Equipment	207,400 00
	$3,160,000 00

The earnings of this road for the fiscal year ending November 30, 1861, were:

From passengers		$297,473 95
" freight		252,830 92

Synopsis of the Report of the Secretary of the Interior.

GENERAL LAND OFFICE.

On September 30, 1861, there were 55,555,595 25 acres of the public lands which had been surveyed, but not proclaimed for public sale. The kinds surveyed and offered at public sale previous to that time, and then subject to private entry, amounted to 78,662,785 64 acres, making an aggregate of public lands surveyed and ready for sale of 134,218,330 89 acres.

During the fiscal year ending June 30, 1861, and the first quarter of the current year, ending September 30, 1861, 5,289,852 31 acres have been disposed of. Of this amount, 1,021,493 77 acres have been certified to the State of Minnesota, Michigan and Louisiana, under railroad grants made by Congress; 606,094 47 acres have been certified to the States as swamp lands; 2,153,940 acres have been located with bounty land warrants, and 1,508,004 07 acres have been sold for cash, producing $925,299 42.

It will be seen from this statement that the public lands have ceased substantially for the present, at least, to be a source of revenue to the government. The liberal manner in which the Acts of Congress, granting swamp and overflowed lands to the States, have been construed and executed, the grants of large quantities to aid in the construction of railroads and the quantity required to locate bounty land warrants for military services, have combined to reduce the cash sales to an amount but little more than sufficient to meet the expenses of our land system. The net income from sales during the last fiscal year will hardly reach the sum of $200,000. During the last fiscal year there were certified to the States for railroad construction, under the several acts of Congress making grants for such purposes: To Minnesota, 308,871 90 acres; to Michigan, 636,061 82 acres; and to Louisiana, 76,560 45 acres. The whole amount certified to all the States, under such grants, is 9,998,497 77 acres.

The grants of swamp and overflowed lands to the States have absorbed a large amount of valuable lands, and have caused a heavy drain upon the treasury. The claims of the several States cover an aggregate of 57,895,577 40 acres.

The United States have also paid to the several States, in cash, under the indemnity act of March 2, 1855, on account of lands claimed as swamp lands, and which were sold to the United States subsequent to the date of the grant, $276,126 50. Certificates have been issued for location upon any of the public lands subject to entry, to indemnify the States for lands claimed as swamp lands, but which had been located by bounty land warrants after the date of the grant, amounting to 145,595 92 acres. Additional claims are pending, yet undecided, for cash, $142,435, and for lands, 301,429 acres.

The bounty land warrants and scrip issued under different acts of Congress, previous to Sept. 30, 1861, embraces an aggregate of 71,717,172 acres of land. Of this amount there have been located: For revolutionary services, 8,200,612 acres; for services in the war with Great Britain, 4,850,120 acres; for Canadian volunteers, 72,750 acres; for services in the Mexican war and other services, under the acts of 1847, 1850, 1852, and 1855, in all 51,138,970 acres, leaving yet to be located on warrants and scrip, already issued, 7,454,720 acres.

Unless Congress shall authorize the issue of additional warrants, this drain upon the public lands will soon cease.

The propriety of issuing bounty land warrants to the volunteers who have been called into service to suppress the existing insurrection, is already a subject of discussion, and must be determined by Congress. A warrant for 160 acres to each volunteer engaged in the service, would absorb over one hundred millions of acres—a much larger amount than has been issued under all previous laws. It is evident that the issue of such an amount of warrants would destroy all hope of deriving any revenue from the public lands, at least for many years. And while such a measure would deprive the government of all income from this source, it would afford but little benefit to the volunteers. These warrants are now sold in the market at about 50 cents per acre. An addition of the large amount necessary to supply volunteers would necessarily reduce the price of them to a merely nominal sum.

The expenses of surveying private land claims in the territory acquired from Mexico, based upon grants of the Mexican Government, have heretofore been paid by the United States. These surveys have cost the government large sums. The cost of surveying one claim amounted to $2,200; another cost the government $1,400. The aggregate cost of surveying them has taken from the treasury a large amount of the public funds.

The valuable and extensive mineral lands owned by the government in California and New Mexico have hitherto produced no revenue. All who chose to do so have been permitted to work them without limitation.

The Territorial Governments of Colorado, Dakotah, and Nevada have been successfully organized since the adjournment of the last Congress. The surveys of the public lands in the territories have already been commenced, and the lands are now open for settlement.

Congress, by an act passed May 26, 1860, authorized the appointment by the President "of a suitable person or persons" who should, in conjunction with persons to be appointed on behalf of the State of California, "run and mark the boundary lines between the Territories of the United States and the State of California." Fifty-five thousand dollars was appropriated for the performance of the work. Sylvester Mowry was appointed a commissioner on the part of the United States, and the sum of $37,551 19 was placed at his disposal for the prosecution of the work.

Very soon after taking charge of the Department, I ascertained that the whole sum which had been placed in the hands of the Commissioner had been disposed of by him, and a large amount of drafts for additional sums had been drawn upon the department, while no progress had been made in the work beyond the fixing of one of the three initial points, viz: the intersection of the 35th parallel of north latitude with the Colorado River. The whole appropriation had been squandered while the work had been only commenced. Under these circumstances I deemed it my duty to arrest the creation of further claims against the government without authority of law, and accordingly directed the suspension of the work and a discontinuance of the services of the Commissioner. It is believed that the whole work might have been completed for the sum appropriated by Congress; but while only a small part of the work has been accomplished, the claims presented amount to nearly $20,000 beyond the appropriation. It remains for Congress to determine whether further appropriations shall be made for the continuance of the work.

The running of the boundary lines between the Territories of the United States and the State of Texas, authorized by the act of Congress of June 5, 1858, has been completed in the field, and the office details will in a short time be finished. For this work, $80,000 was appropriated. Of this sum $73,250 81 had been expended on the 30th of September, 1861, leaving an unexpended balance of $6,749 19. This balance is estimated to be sufficient for the completion of the entire work.

PATENT OFFICE.

No branch of the public service connected with this department has been so much affected by the insurrection of the Southern States as that of the Patent Office.

The receipts of the office from January 1, to September 30, 1861, were $102,808 18; and the expenditures were $185,294 05, showing an excess of expenditures over receipts of $82,785 87.

During the corresponding period of the last year the receipts were $197,348 40, being $94,840 22 more than the receipts for the same part of this year. During the same period 3,514 applications for patents and 519 caveats have been filed, 2,581 patents have been issued, and 15 patents have been extended.

PENSION OFFICE.

The report of the Commissioner of Pensions furnishes, in detail, the operations of this bureau during the past year. The number of pensions has diminished, during the year, 575, and the amount required to pay them was $48,246 87 less than the previous year.

The whole number of pensioners of all classes, on the rolls on the 30th of June, 1861, was 10,709, requiring for their payments an aggregate of $957,772 08.

They were classified as follows: 4,725 invalid pensioners, receiving $425,256 02; 68 revolutionary pensioners, receiving $3,690 85; 2,728 widows of revolutionary soldiers, receiving $212,548 36; 2,236 widows and orphans, half pay, receiving $178,672; 937 navy pensioners, receiving $137,604 85.

Schuylkill Navigation Company.

The Annual Meeting of the Stockholders of this company was recently held in Philadelphia, at which the report of the Managers for the fiscal year, ending December 31, 1861, was presented. The following is an abstract:

The trade of this Company for the year amounted to 1,385,377 tons, of which 1,183,570 were anthracite coal, and 201,807 miscellaneous articles. This exhibits a total decrease of 265,839 tons, of which 172,608 were anthracite coal, and 93,231 of miscellaneous articles. Of the whole tonnage 50,133 tons were carried on the Union Canal. The business of that Canal for the year 1860 was 46,289 tons, and it will therefore be seen that our trade has sympathized, to some extent, with the general depression of business. The income for the Company during the past year has been $954,633 33, and is credited to the following accounts:

On anthracite coal $842,891, and on miscellaneous articles, $51,881 48; from the Union Canal trade, $27,826 55; rents of real estate and water power, $27,128 19; rents of office, $3,164 44; interest on discounts received, $117,142 91. The charges against the income are as follows: Cost of improvements as specified in the report of the Engineer, $149,278 28; car and landing expenses, $82,214 16; drawbacks allowed on anthracite coal, $71,652 74; drawbacks allowed to boatmen, $42,243 70; for boats and vessels, $22,523 62; salaries of officers, clerks and collectors, $20,010; also, $14,267 74 and $895 40 for damages, rents, taxes and repairs. Other current incidental charges, $44,184 79; interest on loans, bonds, mortgages and other obligations of the Company, $366,185 66. The result is an income of $174,602 15—$5,548 77 less than in the year 1860.

During the past year it was thought advisable to use steam on the barges of this Company, but after a thorough trial it did not prove economical. Animal power is therefore deemed by the managers better suited to the purpose. The tonnage in anthracite coal was about the same this year as the last. Several important improvements have been made during the past year, among which was a car lock at the head of Fairmount canal, by which the security of the canal is much increased and the passage of the boats during the high stages of the water is much facilitated; the partial removal of the widening approach to it; an improvement near the head of Manayunk canal, and strengthening the banks of that gate; the erection of a dam on the Little Schuylkill.

The expenditures have been charged to the income. The repairs and improvements on the works of this Company are such as have been pointed out as necessary or expedient, and is believed by the Managers, in their wisdom, that economy has been displayed in the expenditures. At the opening of the year it was decided that the charges on anthracite coal should be same as the previous year, (1860) until July, when additions

re to be made. The great falling off in tonnage by railroad and canal, and the general depression in the coal business, caused the managers to make no increase on the charges until September, thus causing a loss of revenue and a large falling off in the income. They feel that they have been able to render the loan and Stockholders of the Company a good report of the business during the past year, notwithstanding it has been so unpropitious to trade of every kind.

The following gentlemen were elected directors for the ensuing year:

President—FREDERICK FRALEY.

Managers—John R. Worrel, Eli K. Price, Thos. T. Lea, Richard D. Wood, Thomas Williamson, William Harmer, Joseph B. Townsend, Richard Randolph, Samuel V. Merrick, Samuel Bisham, John C. Cresson, Joshua W. Ash.

Treasurer—CHARLES W. BACON.

Secretary—WILLIAM M. TILGHMAN.

Comparative Value of Gold and Silver.

Ex-Gov. Pollock, Director of the Mint in Philadelphia, has published a circular giving the regulations of the Mint in relation to the purchase of silver bullion for coinage, the receipt of copper coins of the United States (O. S.) in exchange for cents of the new issue, and the exchange of new cents for the gold and silver coins of the United States:

The Mint price of silver, heretofore 121 cents, is now raised to 122½ cents per ounce of standard fineness. The silver offered for purchase will be weighed, melted and assayed as usual, and the standard weight determined therefrom in ounces troy to the one-hundredth part of an ounce. The receipt given at the weighing must be presented by the seller or his order. This direction will apply to the Mint at Philadelphia and the Assay Office at New York. The silver purchased for coinage will be paid for in the silver coins of the United States of less denominations than the dollar.

For the information of the public it may be stated that according to the above rate of purchase, the yield of various classes of coin or bullion will be about as follows:

Five-franc pieces	98.0	cents each.
Mexican and South American dollars	106.3	"
Old Spanish dollars	105.1	"
Revolutionary or "hammered" dollars, (often mistaken for the true Spanish dollar,)	101.2	"
Half-dollar of the United States coined before 1837	52.2	"
The same since 1837 to the last change of standard in 1853	52.5	"
Spanish Quarters	23.5	"
Spanish Eighths	10.9	"
Spanish Sixteenths	5.0	"
Mexican Quarters	25.3	"

Quarter dollars are proportionately less productive of premium, while dimes and half-dimes, coined before 1837, have lost rather more by wear, on an average, than the premium would make up; those coined since 1835 to 1853 will average a premium of five per cent. on their nominal value.

German Crowns	112.6	cents each.
Swedish, Danish and Norwegian Crowns	111.4	"
Old French Crowns	113.9	"
German Florins	41.8	"
Prussian and Hanoverian Thalers	71.9	"

Fine silver 136 1-6th cents per ounce.

American plate, usual manufacture, 120 to 122 cents per ounce.

Genuine British plate, 125.8 cents per ounce.

The old copper cents of the United States are received at their nominal values, in even sums of five dollars and upwards, and cents of new issue given in exchange therefor; but no fractional part of that amount will be taken.

Cents of the new issue will be given in exchange for any of the gold or silver coin of the United States.

The reasonable expenses of transportation of the new cents, in sums of twenty dollars and upwards, to any point accessible by railroad and steamboat, will be paid by the Mint.

Norwich and Worcester Railroad.

The earnings of this road for the year ending November 30, 1861, was as follows:

Freight	$166,044 54
Passengers	108,899 60
Mail, etc.	13,568 08
Total	$288,512 22
Expenses	179,886 71
	$108,625 51
Interest	40,712 14
Net earnings	$67,913 87

The gross earnings of the previous year were $358,000. The net earnings fall off about $35,000.

The debts of the Company are as follows:

Massachusetts loan, due July 1, 1867, at six per cent.	$400,000 00	
Less sinking fund, securely invested.	80,000 00	
		$320,000 00
Bonds for dividend scrip at 7 per cent., due 1864 and 1874		100,000 00
Steamboat bonds		200,000 00
Loan from Norwich Savings Society, $5,000 to be paid annually		90,000 00
Note to Jedediah Huntington		13,300 00
Bills payable		36,271 74
Accrued interest, not due		16,753 31
Dividend scrip outstanding, including interest		6,158 56
Unpaid dividends not called for		3,460 00
Balance due to companies and individuals		5,833 60
Total debt of the company		$791,777 21

The assets of the company are as follows:

Cash, notes and balances due the company	$35,703 20	
Steamboat stock and interest	220,100 26	
Inventory of wood, iron rails out of track, and other materials paid for.	33,457 81	
Surplus real estate, not needed for the company's use, cash value	19,674 38	
		308,935 65
Balance		$482,841 56

The engines, cars and machinery, owned by the Company, are valued at this time at $255,915 32.

There has been added during the year to this class of property two new first class passenger cars, and fifty freight cars, of 4 wheels.

Broad Top Improvement Company.

The annual meeting of this company was held in Philadelphia on the 8th ult. The following is an abstract of the report presented:

A marked improvement has taken place in the coal trade of the Broad Top Improvement Company during the year 1861. The commencement of civil war last spring paralyzed the business for some time. It was found, however, that though it had been suddenly stopped by the war, it was not destroyed.

On the contrary, it revived to such an extent that the demand for Broad Top coal became greater during the summer and fall than could be supplied. The consequence has been an increase of price. The amount of coal taken out last year would have more than doubled that removed the previous year, if cars could have been obtained to take it away. There has been, therefore, a large increase in the receipts of this company. It is proposed to open another colliery near the Broad Top site. It is hoped this colliery can be worked to advantage, and that it will greatly increase shipments and revenue.

During the past year 17,550 tons were sent from the mines. This quantity would have been greatly added to had the demand commenced earlier in the year, and had a sufficient number of cars been furnished. A much better supply will be obtained during the present year, in consequence of the cars which the Pennsylvania and Reading roads are building for the purpose. The war having cut off the supplies of the Cumberland Valley coal, the Broad Top coal has entire possession of the market, being found equal to, or better, than the Cumberland coal.

A constant demand may therefore be expected for it. The lands of the company have increased in value, and could the necessary railroads be constructed, such a revenue would flow in as would promptly pay the interest and gradually decrease the company's debt. There are now about ten hundred thousand acres of land belonging to this company, situated in Bedford and Fulton counties. The income during the past year amounted to $16,093 03, from rents $8,956 66—making a total of $25,049 69. There has been paid on interest of the debt $4,243 75. The income from the mines ought to be from ten to twelve thousand dollars. The indebtedness of the company has been $10,600. The assets besides the coal lands are $43,062 71.

Managers—Henry D. Moore, Josh. B. Myers, D. Haddock, Jr., S. J. Christian, Jno. McCanles, B. W. Tingley, Thos. Caldwell, Wm. C. Flanigen, James W. Paul.

Emigration from Liverpool in 1861.

The returns of the emigration trade of this port for the past year are now completed, under the direction of the government agent, Lieutenant Prior. As usual, these documents embody a large amount of highly useful and interesting information. It appears that the total number of emigrants that left this port for the United States, British North America, the Australian colonies, Cape of Good Hope, &c., during the year just ended, was 55,029. In the previous year there was 83,774, being a decrease of 28,745. Of these there were under the act 38,879, and not under the act 16,150. From the following tabulated statements it will be seen that the numbers despatched each month during the year were:

	1860.	1861.	Decrease.	Inc.
January	2,746	2,173	573	—
February	3,316	2,588	—	272
March	7,750	5,266	2,484	—
April	11,982	11,387	595	—
May	12,621	8,379	4,242	—
June	9,247	3,757	5,490	—
July	7,006	3,403	3,603	—
August	7,359	4,430	3,429	—
September	6,670	3,400	3,270	—
October	7,029	4,036	2,993	—
November	4,339	2,625	1,714	—
December	3,209	2,576	633	—

The places to which the emigrants proceeded were as follows:—United States, 139 ships, 1,365 cabin and 26,212 steerage passengers: Canada, 7 ships, 124 cabin and 1,005 steerage; New South Wales, 2 ships, 526 steerage; Victoria, 30 ships, 1,868 cabin and 9,000 steerage; South America, 1 ship, 8 cabin and 81 steerage passengers. Total cabin passengers, 1,965; steerage, 36,914. The present state of affairs in the United States has necessarily exercised an important influence on the emigration trade. This year we find that only 26,212 steerage and 1,365 cabin passengers, under the act, embarked for the United States, while in the previous year the numbers were 53,765 steerage and 2,115 cabin passengers. The June quarter this year—a period when the emigration trade, more especially with the United States, is most active—includes a return of only 16,019 passengers. The decrease on the March quarter, as compared with the corresponding period of the

previous year, was 2,785; on the June quarter, 10,327; September quarter, 10,293; December quarter, 5,340.—*Liverpool Mercury.*

Atlantic and Great Western Railway.

Mr. Reynolds, the President of the Atlantic and Great Western Railroad, has recently returned from a two months' stay at Paris, Madrid, and London, and we learn that the conferences held by him with the capitalists in those places, connected with this line of railway, have been of the most satisfactory character. Perfect cordiality and much enthusiasm are exhibited by those money-kings toward the enterprise. The shade of war in the Trent affair alone prevented an immediate advance of means and recommencement of the enterprise. As the result is, no donbt now exists of a speedy embarkation of the work, with all the appliances necessary, and the completion of the road to Ackron next Fall.—*Jamestown Journal.*

Railroad Iron.

1,200 TONS BEST QUALITY WELSH RAILS—T pattern—53 lbs. per lineal yard, for sale by

CHAS. L. PERKINS, or
E. LIVINGSTON,
2m5 54 Exchange Place.

THE NEW YORK CENTRAL RAILROAD COMPANY.—TREASURER'S OFFICE—ALBANY, Jan. 20th, 1862.—The Transfer Books of this Company will be closed at the close of business on Saturday, the first day of February next, and will be re-opened on the morning of Monday, the twenty-fourth day of February next.

3m2 47 Exchange Place.

FOR SALE.

5 Locomotives, 4 ft. 8½ in. gauge.
50 House Freight Cars, that have had but slight use.
The above are at Chicago, Ill.
January 4, 1862.

Apply to GEO. T. M. DAVIS,
3m2 47 Exchange Place.

PASCAL IRON WORKS,

ESTABLISHED 1821.

MORRIS, TASKER & CO.,

MANUFACTURERS OF

Lap-Welded American Charcoal Iron Boiler Flues—from 1½ to 10 inches outside diameter, cut to definite lengths.

Wrought Iron Welded Tubes—from ¼ inch to 8 inches inside diameter, with screw and socket connections, for Steam, Gas, Water or other purposes; also, fittings of every kind to suit the same.

Wrought Iron Galvanized Tube—strong and durable, designed especially for water purposes.

Cast Iron Gas or Water Pipe—1½ to 24 inches in diameter, and branches for same, etc.

Gas Works Castings, etc., etc.

PHILADELPHIA.

LOCOMOTIVE FOR SALE.

SMALL second hand Locomotive, usual gauge (4ft. 8½ in.) Weight, 10 tons—Drivers, 4ft. 6 in.—Cylinders 10x18 in. Fire-box, Crank and Tires nearly new, and the whole engine in excellent condition.

Also a second hand "Bradly" Snow Plow.

For sale low by

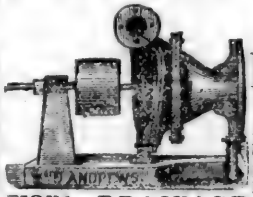
WILLIAMS & PAGE,
51 Boston.

OFFICE OF THE ILLINOIS CENTRAL R. R. Co., New York, Dec. 5, 1861.

AT a meeting of the Board of Directors of the ILLINOIS CENTRAL RAILROAD COMPANY, held at their office in New York this day, it was

Resolved, That an assessment of FIVE DOLLARS per share upon the Scrip Shares of the Capital Stock of the Company, be and the same is hereby called payable on the twentieth of January, 1862; and that the same be payable on the Stock registered in the City of New York at the office of the Company in that city; and on the Stock registered in London at the office of Messrs. ROBERT BENSON & Co., London; and that parties desiring to pay their assessment in London, may pay the same at a rate of exchange sufficient to produce five dollars per share to the Company in the City of New York.

Resolved, That the transfer books be closed on the afternoon of the 15th January next, and re-opened on the 20th day of the same month; and that no transfer be permitted, on or after that day, of shares upon which the foregoing assessment shall not have been paid.



THOMAS E. WALKER, Treasurer.

The eighty-dollar certificates to be returned on payment of the above.

OFFICE OF THE ILLINOIS CENTRAL R. R. Co., New York, Oct. 29, 1861.

HOLDERS of the stock of this Company, as registered upon the books of the company at the close of business on the 15th day of January, 1862, will be entitled to Canceled Bonds Scrip for five dollars upon each share of stock held by them deliverable on or after the 1st day of February next; and parties holding certificates are hereby notified to have the same registered in their own names on or before the said 15th day of January. 4t8

ANDREWS' PATENT Centrifugal PUMPS

ARE the best and cheapest Pumps made for **RAILROAD STATIONS, MINES, FACTORIES, TANNERIES, PLANTATIONS, DRAINAGE, IRRIGATION, WRECKING,** and general use.

Made entirely of metal, without working valves or rubbing surfaces, they pass sand, fine ore and gravel, without injury. Capacity from 20 Galls. to 1,000 Bbls. per minute.

For descriptive pamphlet and Price List address

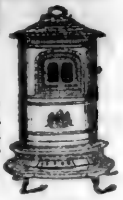
GENERAL DEALERS IN
Iron, Metals, new and second hand **Machinery.**

Sanford's CHALLENGE HEATERS SET IN BRICK, PORTABLE OR AS FIRE PLACE HEATERS,

FOR WARMING BY ONE FIRE WITH PURE, SOFT AIR Dwellings, Churches, Hotels, Public Halls, Railroad Depots, Vessels, etc., WITH AND WITHOUT REGISTERS.

THE MOST POWERFUL HEATERS AND THE



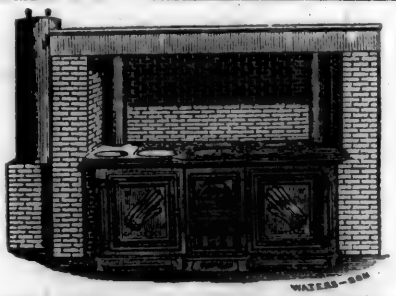
Greatest Fuel Savers in the World:

With an unparalleled mass of unimpeachable testimony of well-known Citizens, Ministers, Doctors, Lawyers, Merchants, Mechanics and others.

Send for pamphlet containing full description and testimonials.

SANFORD, TRUSLOW & CO.,
Nos. 239 and 241 Water st., N. Y.

The COSMOPOLITE PARLOR RADIATOR, & GAS BURNER,

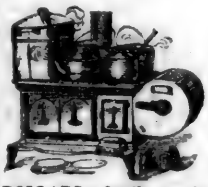


Introduced one year ago, already ranks as the **LEADING STOVE** for PARLORS, SITTING ROOMS, and all places where a soft, pleasant heat is desired.

Fire may be kept all winter with an astonishingly small supply of coal.

Send for description and testimonials.

SANFORD, TRUSLOW & CO.,
Nos. 239 and 241 Water st., N. Y.



Challenge Air-tight KITCHEN RANGES,

May be placed in a fire-place without masonry, and with or without water-back; or may be set out on feet, as an ordinary stove.

This range, already very popular, has the **LARGEST OVENS** of any in the market; BAKES PERFECTLY, never failing to brown at the bottom; BOILS, ROASTS and BROILS with unequalled facility and dispatch, and with extraordinary **ECONOMY OF FUEL,** which may be either coal or wood. Flues large and easily cleaned. A child can manage it, so simple is its construction. Castings extra heavy, and design plain and chaste.

Four sizes, adapted to families and hotels.

Beacon Light SUMMER AND WINTER PORTABLE RANGE,

Is a very popular range, having six boiler holes, one large oven that bakes perfectly, with an arrangement for roasting, or heating irons at the end. It is very economical of fuel. For a FEW DOLLARS a family may be supplied with a PERFECT COOKING APPARATUS, equal to the highest price stove in the market.

Three sizes, adapted to coal, or wood.

SANFORD, TRUSLOW & CO.,
239 and 241 Water st., N. Y

SANFORD'S MAMMOTH OR GLOBE HEATERS.

The best stoves for RAILROAD DEPOTS and SHOPS, and all places where a great heat is required. They are very durable, and very economical of coal.

Beware of imitations that are inferior in strength and in other respects.

TESTIMONIALS.

HUDSON RIVER RAILROAD OFFICE, N. Y

This Company have now in use, over two hundred of Sanford's Mammoth Heaters, in Station Houses, Work Shops, and Engine Houses; we commenced using them in 1853, and some of the first stoves put up are still good and in use. We consider them the best Heaters now in use.

J. M. HEBARD, Supply Agent.

UNION FERRY COMPANY.

The Mammoth Heaters have been used by this Company in their waiting rooms at the several ferries and found to be very excellent stoves and more durable and valuable than any heretofore used. CYRUS P. SMITH, Managing Director.

American Railroad Journal.

New York, Saturday, February 8, 1862.

What Government Pays for Railroad Transportation?

The Government pays for railroad transportation according to the following rates:—

Per passenger per mile, 2 cents for distance moved.

Equipments, munitions, and supplies accompanying regiments:

30 miles or less, 10 cents per				100	pounds.
50	"	15 cents per		100	"
100	"	25	" "	100	"
150	"	40	" "	100	"
200	"	50	" "	100	"
300	"	75	" "	100	"
350 to 400 miles, not exceeding 90 cts. per				100	"
Special express trains				$1	per mile.

For horses, etc.:

1 animal counts			8,000	pounds.
2 animals count as			4,000	"
3	"	"	5,000	"
4	"	"	6,500	"
5	"	"	8,000	"
6	"	"	9,000	"
7	"	"	10,000	"
8	"	"	11,000	"
9	"	"	12,000	"

14 animals, 18,000 pounds, count as a full car load.

Provisions and heavy freights, 2 to 3 cents per ton of 2,000 pounds per mile. Dry goods, clothing and light goods, 3 to 5 cents per ton of 2,000 pounds per mile. One large car-load is reckoned as nine tons.

Western (Mass.) Railroad.

The receipts from operations of this road for the fiscal year ending November 30, 1861, were:

From passengers		$ 613,365 08
" freight		1,164,320 23
" mails and other sources		116,882 65
		$1,894,567 96
And the expenses were:		
Repairs of roadway	$244,617 16	
" engines	82,075 69	
" cars	126,914 44	
" buildings, ferry, etc.	84,878 48	
Transportation expenses	523,637 50	
General expenses	20,447 90	
		1,081,571 17
Net balance of income		$812,996 79
From this deduct—		
Interest on State loans and exchanges	$338,952 43	
One per cent. to sinking fund	50,000 00	
Eight per cent. dividends	412,000 00	
		800,952 43
Surplus carried to contingent fund		$12,044 36
Add balance of do., Nov. 30, 1860		400,644 33
		$412,688 69
Loss on Pittsfield and N. Adams R.R.		7,939 81
Total contingent fund Nov. 30, 1861		$404,748 88

Included in the above expenses are $92,127 75 paid on account of loss by fire at East Albany, July 5, 1861, whereby the entire station buildings were consumed, also one of the bridges leading from the island to the main land, a large amount of merchandise, and 67 freight cars, all so far destroyed as to require rebuilding. Several canal boats lying in the canal were also with their contents destroyed. The work of rebuilding was immediately commenced, and at the date of the report the buildings were nearly complete. Of the amount paid, as above, and charged to current expenses, $31,058 10 was for merchandise destroyed, and the balance, $61,069 65, for materials and labor in rebuilding. To complete the contracts the further sum of $16,507 22 will be required; and to pay the unsettled losses on goods $4,580 79—thus making the total loss, exclusive of freight cars $113,143 76, of which $21,016 01 will be a charge upon the income of the current year. During the past year 60 new freight cars have been added, making the car account but 7 short of what it was at the commencement of the year. From 6 to 8 a month were being built in the company's shops, so that by the 1st of January last the whole number was probably made good.

The road and rolling stock have been thoroughly cared for, and are in good condition. About 11 miles of second track have been built during the year—leaving less than 48 miles to complete the whole second track between Worcester and Albany.

The earnings of the Pittsfield and North Adams Railroad were $36,538 37, and the expenses $17,478 18—leaving net earnings $19,060 19. Two dividends of 3 per cent. each, amounting to $27,000, were paid—the deficiency $7,939 81, being supplied by the Western Railroad Company.

A comparison of the earnings and expenses of the past with those of the previous year show an increase in the former of $13,217 24, and in the latter of $88,474 87.

The equipment of the road consists of 18 passenger and 54 freight locomotives; 39 first class and 8 second class passenger, 12 baggage, 790 box, 261 platform, 80 gravel and 46 hand cars. Also 54 236ths of 24 passenger and 7 baggage cars of the New York and Boston Express Line.

The number of miles run by passenger trains was 382,845, by freight trains 804,136, by all other trains, 47,036—total miles run 1,234,018.

The number of passengers carried in the cars was 563,540; number carried one mile 23,009,035; number carried one mile to and from other roads, 15,411,171. The number of tons of merchandise carried in the cars was 508,179; number carried one mile, 47,924,408; number carried one mile to and from other roads, 35,607,511. An aggregate of 70,933,443 passengers or tons of freight carried one mile in 1861, against 69,168,676 in 1860.

The cost of transportation for each passenger and each ton of freight one mile in 1861 was 1.525 cent, against 1.436 cent in 1860, or assuming the cost of transporting each ton of freight to equal the cost of two passengers the same distance, we find

the cost in 1861 to be .910 cent per passenger, and 1.820 cent per ton for freight, against .888 cent per passenger and 1.766 cent per ton for freight per mile in 1860.

The cost of the Western, Albany and West Stockbridge, and Hudson and Boston Railroads to November 30, 1861, has been as follows:

Western Railroad	$7,454,187 40
Albany and West Stockbridge R.R.	2,388,359 22
Hudson and Boston Railroad	183,838 98
West Stockbridge Railroad	13,000 00
Equipment	1,095,712 97
Total	$11,135,098 57

The means provided for the construction and equipment of the same has been as follows:

Capital stock	$5,150,000 00
Sterling bonds	5,319,520 00
Albany city bonds	1,000,000 00
Total means	$10,469,520 00
Am't paid sinking funds	459,578 62
	$10,009,941 38
Dollar bonds and Hudson loan	954,000 00
	10,961,941 38
Balance expended more than realized from construction funds	$173,157 19

It will be seen by reference to the annexed balance sheet, that the present total value of the sinking fund is $2,500,292 49; of this sum the above amount of $459,578 62 was derived from construction funds, and from the proceeds of shares, leaving as actual profits $2,040,713 87—equal to $39 62 to each share of stock. Add to this the undivided earnings or contingent fund, $404,802 04, and it will be seen that the proportion of profits undivided to each share of stock on the 30th of November last was about $47 48. The report says:

These rapidly accumulating funds, now making certain the easy extinguishment of the debts for which they were created, may well command the attention of the stockholders, and in order that all may understand the direct interest that each share of stock has in these funds, it may be proper to state their nature and origin, and the proportion of them that are profits. Of the amount now composing these funds, $459,598 60 was originally paid to the commissioners from funds provided for the construction of the road; the balance has been derived from contributions out of the earnings of the road, and from the accumulation of interest, and consequently so much is added to the direct value of the shares, and although not now available as affording a direct annual income to the stockholders, these accumulations of interest together with the fifty thousand dollars annually paid from the earnings of the road are now adding yearly to the value of each share of stock about four dollars, a sum which will annually increase with the increase of interest upon the funds, and it is safe to say in ten years will liquidate the debt.

Balance Sheet.

Cost of road and equipment		$11,135,152 57

Grain Trade of Chicago.

The total receipts of flour and grain in Chicago during 1859, 1860 and 1861, compares as follows:

	1861.	1860.	1859.
Flour, bbls	1,583,087	700,006	742,012
Wheat, bush	18,147,181	14,568,429	8,184,746
Corn, bush	26,668,580	15,487,966	5,410,003
Oats, bush	1,438,444	2,029,906	1,813,048
Rye, bush	533,869	295,436	228,179
Barley, bush	461,647	623,005	662,197

From the above it will be seen that the receipts of flour are more than double those of 1860; while those of corn are nearly double, and of wheat an increase of nearly four million bushels.

The total receipts of flour and grain during the past eight years compare as follows—the whole reduced to bushels.

Year.	Bushels.	Year.	Bushels.
1861	55,175,106	1857	21,856,206
1860	86,504,772	1856	24,674,824
1859	20,008,223	1855	16,633,813
1858	23,422,708	1854	15,804,423

In perusing the figures for the year just closed, it must be borne in mind that, had the capacity for storage and shipping been greater, the receipts would in all probability have reached 70,000,000 bushels.

Grain Trade of Baltimore.

Comparative receipts of grain at Baltimore for four years:

	1858.	1859.	1860.	1861.
Wheat	2,716,781	3,064,000	2,839,977	2,635,865
Corn	4,046,745	3,620,900	3,044,361	2,490,874
Oats	1,115,194	950,476	1,086,750	1,353,101
Rye	108,378	140,970	101,971	76,383
Peas	7,000	6,400	10,000	10,000
Beans	1,000	3,260	2,500	7,000
Total	7,995,048	7,786,006	7,085,559	6,572,723

Value of Foreign Imports and Exports at the District of Baltimore for the last 15 years:

	Imports.	Exports.
1847	$4,146,748	$9,826,479
1848	5,245,894	7,209,609
1849	5,291,566	8,660,982
1850	5,417,113	8,530,971
1851	7,243,963	6,466,160
1852	5,978,021	7,549,768
1853	6,331,671	9,086,910
1854	7,750,387	11,306,012
1855	7,772,591	11,675,996
1856	10,140,838	13,362,252
1857	11,054,676	11,398,940
1858	7,954,422	10,235,890
1859	10,408,993	8,724,261
1860	9,879,121	10,913,170
1861	5,534,411	11,471,798

Grain Trade of Oswego.

The total exports by canal from Oswego since the opening of navigation, to the 1st of December, were as follows:

Flour, barrels	438,078
Wheat, bushels	7,553,571
Corn, bushels	5,284,511
Oats, bushels	98,704
Barley, bushels	1,070,134
Rye, bushels	358,150
Peas, bushels	152,991

The aggregate receipts of grain at Oswego (flour reduced to bushels) for five years past have been as follows:

	Grain, bush.
1857	7,640,200
1858	11,826,162
1859	7,127,880
1860	17,063,592
1861	17,709,082

Statement of breadstuffs sent East from Buffalo *via* Erie Canal in 1851:

Flour, bushels	806,236
Wheat, bushels	23,713,713
Rye, bushels	282,724
Corn, bushels	19,112,125
Corn meal, barrels	200
Barley, bushels	184,341
Oats, bushels	1,705,395
Bran and ship stuffs, lbs	5,195,149
Peas and beans, bushels	69,974
Potatoes, bushels	19,601
Dried fruits, lbs	602,966

Grain Trade of Philadelphia.

The following comparative table will show the foreign exports of flour and grain from January 1st to December 31st, in each of the years indicated:

Year.	Flour, barrels.	Wheat, bushels.	Corn, bushels.	Corn Meal, barrels.
1861.	362,552	2,064,988	803,235	31,672
1860.	295,137	811,961	390,369	49,857
1859.	172,944	54,434	50,115	44,464
1858.	219,871	83,199	468,881	39,773
1857.	198,867	190,400	625,526	48,572
1856.	342,035	684,092	1,657,238	92,603

National Debt of England.

We copy from the *London Money Market Review* the following statement in reference to the National Debt of England. It may well be studied as representing the future of this country. If we go on for the future, as we have for the past year, we shall soon rival our parent country in the vastness and oppressiveness of our national debt:

Year.	War or Peace.	National Debt.	Interest.
1691	War with France	£ 3,130,000	£ 232,000
1697	Peace of Ryswick	14,522,925	1,322,519
1702	War of the Spanish succession	12,767,225	1,215,324
1713	Peace of Utrecht	34,699,847	3,004,287
1718	War with Spain	40,379,684	2,965,889
1721	Peace	54,405,106	2,855,380
1739	War of right of search with Spain	46,613,883	2,030,884
1742	War of the Austrian succession	51,847,323	2,157,136
1748	Peace of Aix la Chapelle	75,812,132	3,165,765
1756	Commencement of the 7 year's war	74,575,025	2,763,566
1763	Termination of do	132,716,049	5,032,733
1775	Commencement of War with Amer	126,842,811	4,703,619
1783	Termination of do	231,843,631	9,065,585
1793	Commencement of first revolutionary war with France	247,874,434	9,711,238
1802	Peace of Amiens	537,653,008	20,268,561
1803	Second revoln. war with France	547,732,796	20,812,962
1815	Termination of the French war	861,039,049	32,646,618
1854	War with Russia	775,215,519	27,363,869
1856	Termination of do	808,108,722	28,550,039
1859	Peace	806,078,564	28,204,299

These figures speak for themselves. It is war, and war alone, that has left us saddled with this mountain of debt.

The following are the particulars of the component parts of the existing National Debt.

GREAT BRITAIN.		
New Annuities at 2½ per cent		£2,965,980 13 3
Exchequer Bonds at 2½ per cent		418,300 0 0
Debt due Bank of England at 3 per cent.		11,015,100 0 0
Three per cent. Consols		400,363,107 19 9
Reduced Three per cents		114,661,163 7 1
New Three per Cents		213,072,180 8 4
New Annuities at 3½ per cent		240,746 6 4
Do at 5 do		430,603 15 11
Total in Gt. Britain	£743,167,182 10 8	
IRELAND.		
New Annuities at 2½ per cent		3,080 0 0
Three per cent Consols		6,261,494 2 4
Reduced Three per cents		125,645 0 3
New Three per cents		32,929,438 9 8
Debt due Bank of Ireland at 3½ per cent		2,630,769 4 8
New Annuities, at 5 per cent		2,000 0 0
Total in Ireland	£41,952,426 16 11	
Total fixed debt of the United Kingdom on the 31st March, 1861		£785,119,609 7 7

The interest paid during the last financial year was as follows:

GREAT BRITAIN.			
Three per cent. Consols	£12,059,599	12	4
Three per cents Reduced	3,498,840	13	11
New Three per cents	6,377,067	15	8
New Three-and-a-half per cents	8,426	2	4
New Five per Cents	21,587	9	8
New Two-and-a-half per cts.	74,812	4	2
Sinking Fund Two and-a-half per cent	6,906	14	7
Exchequer Bonds for 1853	11,503	5	0
Total in Gt. Britain	£22,058,743	17	5
IRELAND.			
Three per cent. Consols	£187,324	17	0
Three per cents. Reduced	3,756	5	0
New Three per Cents	1,023,982	16	11
New Five per cents	100	0	0
New Two-and-a-half per cents	77	0	0
Total	£1,215,240	18	11
Interest on debt of Bank of England	330,453	0	0
Do. Bank of Ireland	85,500	0	0
English Life Annuities	1,021,605	13	2
Irish do. do.	23,352	19	0
Exchequer Annuities	13,646	0	0
Annuities for terms of years	302,288	2	0
Naval and Military Pension Annuities	585,740	0	0
Unclaimed dividends	142,114	3	5
Interest on Exchequer Bonds	100,000	0	0
Interest on Exchequer Bills:			
Deficiency	1,856	5	0
Supply	298,230	18	9
	£26,178,771	17	8
Net charge of management of Funded Debt	75,610	9	6
	£26,254,382	7	2
Deduct interest on stock purchased on account of donations and bequests	23,363	17	4
Total charge for Interest	£26,231,018	9	10

The total amount of unfunded debt on the 31st March, 1861, was £16,689,000: being £13,089,000 Exchequer Bills, and £3,600,000 Exchequer Bonds. The Exchequer Bonds fall due as follows: One million on the 8th of May, 1862; another million on the 8th of May, 1863; a third million on the 8th of May, 1864; and the remaining six hundred thousand pounds on the 8th of May, 1865.

Liability of Common Carriers.

WHEN A CONSIGNEE REFUSES TO RECEIVE GOODS, THEIR STORAGE BY THE CARRIER WITH A RESPONSIBLE WAREHOUSEMAN DISCHARGES HIM FROM LIABILITY. THE WAREHOUSEMAN THEN BECOMES THE AGENT OF THE OWNER.

On the 8th of April, 1858, there was delivered to the American Express Company, a box of goods for transportation, marked "J. H. Scott, Lyons, Iowa," for which the company gave a receipt, expressing their undertaking to forward and deliver the articles. The receipt did not disclose the name of the shipper or owner of the package. There was a charge upon the package of $1.67, which was to be paid by the consignee on the delivery of the box to him. The package was duly forwarded by the Express Company to Lyons, the place of its destination, and was there tendered to the consignee, in good order, who refused to receive the box or pay the charges. Whereupon the box was stored in the care of responsible parties at Lyons, with whom the company was in the habit of storing goods. Within a short time after such storage, the premises upon which the box was stored were entered by robbers, and the box and contents *feloniously* taken away. The action was brought by the plaintiff on the ground of the alleged neglect and refusal of the company to deliver the box or to return the same to the plaintiff.

At the trial of the action in the Common Pleas of the City and County of New York, a judgment was rendered for the defendant, who then appealed to the General Term of the same Court. The appellant argued that the business of the American Express Company is that of common carrier, that "they forward goods subject to purchase or other charges, and collect the same on delivery," throughout the different States, including the State of Iowa, the place where the goods in question were sent. Being common carriers they were liable as such until the full and complete performance of their contract. They could not limit their responsibility by notice, a special agreement to that effect between the parties being necessary. And even though the company could limit their responsibility to that of warehouseman, and supposing they had done so by their bill of lading or receipt, still they were responsible in this case, on the ground of negligence.

The defendants contended in opposition, that the company discharged its whole duty to the plaintiff, when they conveyed the box safely to its place of destination, and there tendered it in good order to the consignee; the consignee refusing to receive it, the box was then stored in the care of "*good and responsible* parties." Where goods are safely conveyed to the place of destination and the consignee is dead, absent, or refuses to receive them, the carrier may discharge himself from further responsibility by placing the goods in store in the care of responsible parties. Then the risk of the carrier ceases, and the liability of the warehouseman commences. That common carriers who pursue also the business of warehousemen, are subject to the strict responsibility of carriers, only, when the goods conveyed by them are *in transitu*. When the goods are placed in their warehouse, they are simply liable as as warehousemen. A warehouseman is not liable for losses by fire or burglars in cases where no gross negligence, fraud or connivance can be imputed to him or his servants. He is liable only for ordinary diligence.

The court held, that the liability of the company was discharged by placing the box in question upon storage with a responsible warehouseman. And under such circumstances the warehouseman becomes the bailee or agent of the owner in respect to it. That where the premises in which such goods are stored are broken into by robbers, and the box and its contents feloneously taken, the warehouseman is not liable for the loss. And when the owner does not, at the time a package is left with the carrier for transportation, disclose his name and residence, there is no negligence on the part of the carrier in not giving notice of the storage.

The following is the opinion of the General Term of the Court delivered at the decision of the case.

DALY, J.—The defendants carried the box to the place of destination and tendered it to the

consignee who refused to receive it. It was then safely stored by the defendants in the premises in which they were accustomed to store merchandise in the care of good and responsible parties, and while thus upon storage the premises were broken into by robbers and the box and its contents feloniously taken.

The consignee having refused to receive the box the defendants discharged their contract as carriers by placing it upon storage and the warehouseman became thereafter the bailee and agent of the plaintiff in respect to it (Fisk agt. Newton, 1 Denio 45, Ostrander agt. Brown 15, John 39, Cairnto agt. Robinson, 8 Wells & Webs., 258).

As the property was taken feloniously, the warehouseman was answerable for the loss (Schmidt agt. Blood, 9 Wend. 268).

But it is claimed that the defendants are liable because they did not notify the plaintiff within a reasonable time of the refusal of the consignee, and that they had stored the box with a warehouseman. But it did not appear from anything in the case that the defendants knew who was the owner and unless they did, they could not be expected to notify him of what they had done, or if they did know it may have been for all that appears in the case that he was duly notified.

The name of the owner was not inserted in the printed receipt given by the defendant. The space in which the consignor's name is usually inserted was left blank and the address of the consignee or person to whom the box was to be delivered, was the only thing contained in the receipt to indicate to whom the property belonged, under such circumstances there could be no presumption that the defendants knew that the box belonged to the plaintiff and that they failed to notify him. It rested with the plaintiff to make out a case of negligence and all that was necessary to show it was incumbent upon him to prove. He was himself examined as a witness, and if he had communicated his name and address to the defendants when the box was left with them for transportation he could have proved it. He did not do so, and if any conclusion is to be drawn, it is that the defendant had no knowledge of the owner until after the box was feloniously taken from the warehouse.

It is sufficient in conclusion to say that the onus of showing that the box was lost by the defendant's negligence was upon the plaintiff, and that he failed to show anything of the kind.

The judgment should be affirmed.

Lake Superior Copper Mines.

Messrs. Dupee, Beck & Sayles, of Boston, give the following annual review of the copper trade in 1861:

"In relation to the Mining interests of Lake Superior the year just now closed, will be long remembered as having witnessed the most extraordinary fluctuations in the prices of Ingot Copper, producing thereby the extremes of adversity and prosperity. This metal was sold in July at 17c. per pound, cash, the lowest price in the market since 1850. To-day holders refuse 27c cash. Before the present stock has passed into the hands of manufacturers, and consequently, before the profits of mining in 1861, can be accurately ascertained, the prices may have advanced to figures exceeding the maximum of 1857, or 30 cents per pound, four months. These fluctuations in prices have not been the result of speculation, but have been caused by the disturbances of trade all over the world. The ordinary consumption of copper in the United States has usually been estimated at twelve thousand tons per annum. Lake Superion produced in 1860 six thousand tons. The remainder was obtained principally from Tennessee, Canada and Chili. The opening of Lake navigation in May last brought upon the market already, in consequence of the civil war, overstocked with foreign copper, the accumulated product of the previous six months. The necessities of several companies required immediate sales, reducing the price in one instance to the low rate named above. But the disastrous prices were, after all, followed by positively beneficial results to the mining interests. A most rigid system of economical management has been inaugurated, so that every manager can give an estimate closely approximating to the truth of the cost per pound of Ingot Copper produced by his mine. A new impulse has been given to the study of machinery for profitably reducing the lower grades of stampwork, and to the substitution of railways, in the mines, for hand barrows and heavy chainwork. On the other hand, the low prices of copper in the American markets induced enormous shipments to the markets of Europe, especially to those of the continent, where its peculiar qualities of ductility and toughness procured for it the preference in the finer manufactures. In Rotterdam, Antwerp, Havre and Paris, the brands of the several American smelting works are as well known as in Boston and New York. The exportation of copper continued until the price rose to 21 or 22 cents (November.) Large purchases by the federal government caused a rapid advanced to 25 cents (December), and American copper was actually reshipped from Havre to New York.

Since the tariff of August last, importations from Chili, the main source of the supply of copper from abroad, have gradually declined, and such is the derangement of foreign commerce, that the supplies from that country must be comparatively small for many months hence. From all these surmises there will be a short supply, unless considerable lots can be returned from abroad free of duty, till the opening of navigation in May, 1862.

Estimate of Ingot of refined Copper, in tons of two thousand pounds, from the mines of Lake Superior, from 1845 to the close of navigation in 1861:

	Tons.	Average per ton.	Valued.
From 1845, to 1854 inclusively (Mr J. D. Whitney's figures).	7,642		
From 1855 to 1857, inclusively	11,312		
Total	18,954	$500	$9,477,000
Shipments of 1858, 4,100 tons, less 600 ton included in 1857	3,500	460	1,610,000
Shipments of 1859	4,200	460	1,932,000
" 1860	6,000	420	2,520,000
" 1861	7,400	420	3,180,000
Total	40,054		$18,719,000

Statement of cash prices of Lake Superior ingot Copper, in each month, from January, 1857, to December, 1861. The prices are substantially the average of each month.

	1857.	1858.	1859.	1860.	1861.
January	28¼	19½	24	24½	19½
February	29	24	25	24	19½
March	27¾	24	24	24	19½
April	27¾	22½	23½	23½	19½

November	21½	23	22	20½	22½
December	20	23½	23	20	25

Synopsis of the Postmaster General's Report.

It appears that the whole number of post offices in the United States on the 30th of June 1861, was 28,586; and that the entire number of cases acted upon during the same period was 10,638, including appointments made by the President of the United States. The whole number of appointments made by the Postmaster General, 9,235, and the number by the President during the same period, 337.

The aggregate earnings of the different transatlantic steamship lines during the year ending June 30, 1861, were $392,887 63.

The expenditures of the department in the fiscal year ending June 30, 1861, amounted to $13,606,759 11.

The expenditures in 1860 were $14,874,772 89, showing a decrease in 1861 of $1,268,013 78.

The gross revenue for the year 1861, including receipts from letter carriers, and from foreign postages, amounted to $8,349,296 40.

The estimated deficiency of means for 1861, as presented in the annual report from this department December 3, 1859, was $5,983,424 04. Deducting the actual deficiency, $4,651,966 98, and there is an excess of estimated deficiency over actual deficiency of $1,436,457 06.

The revenue from all sources during the year 1860 amounted to	$9,218,067 49
The revenue from all sources during the year 1861 amounted to	9,049,296 49
Decrease of revenue for 1861	$168,771 00

The net proceeds from post offices in the loyal States for the fiscal years ending June 30, 1860, were $2,688,690 56, and in 1861, $3,801,487 08, showing an increase in 1861 of $112,796 52, and in the disloyal States, in 1860, $820,546 67, and in 1861, $677,706 70, showing a decrease in 1861 of $142,839 81.

The decrease in 1861 from the net proceeds of 1860 in all the States appears to be $30,043 29.

Statement of the receipts and expenditures of the disloyal States, and amount alleged to be due to contractors; also, the amount paid to contractors from July 1, 1860, to May 31, 1861:

Total expenditures	$3,699,150 47
Total gross receipts	1,241,220 05
Excess of expenditures over receipts.	$2,457,930 42
Amount alleged to be due to contractors for transportation	$3,135,637 12
Amount actually paid for transportation	2,323,061 63
Leaving amount alleged to be due and unpaid	$812,575 49

The estimate of the total expenditures for 1863 is somewhat less than those of previous years heretofore submitted. This difference arises from the fact that only partial estimates are made for the cost of postal service in States where it is now suspended.

The appropriation for deficiencies in 1861 was $5,391,350 63, while the amount estimated to be required from the Treasury for 1862 is $3,145,000.

The whole number of ordinary dead letters received and examined during the year was about 2,550,000.

The number of these letters containing money, which were registered and sent out during the year ending June 30, 1861, was 10,580.

The number of dead letters returned unopened to foreign countries during the fiscal year was 111,147, which added to the number of domestic letters (103,880) sent out as above, gives the whole number sent out from the dead letter office for the year 215,033.

The result of successful investigation in 7,560 cases confirms the past experience of the department that the failure of a letter to reach its destination is, in the vast majority of instances, the fault alone of the writer or sender. Out of the above 7,560 valuable dead letters 3,095 were directed to the wrong office, 467 were imperfectly addressed, 612 were directed to transient persons,

257 to parties who had changed their residences, 821 were addressed to fictitious persons or firms, 88 were uncalled for, 10 without any directions, 2,136 were not mailed for want of postage stamps, 79 were missent, and for the failure of postmasters to deliver 133 no satisfactory reason was assigned. The department, therefore, can justly be held responsible for the non-delivery of but 212 of these letters.

Much other valuable data is given on this subject, and it is worthy of remark that of 76,769 letters before alluded to, originating in the loyal States and addressed to residents of disloyal States, 40,000 could not be returned, either because the signature of the writer was incomplete or because the letter contained no clue to his residence. The experience of the department shows that a large proportion of domestic letters written by educated persons, and particularly women, are deficient in one or both of these respects.

In view of these and other facts, the Postmaster General suggests that valuable dead letters, when returned to their owners, should be charged with treble the ordinary rate of postage, comprising one rate for return transportation to the dead letter office, one rate for registration there, and one rate for return transportation to the writers or owners.

A treaty with Mexico has been concluded, awaiting the ratification by Mexico, establishing a common international rate of twenty-five cents on letters, with other useful provisions.

The Postmaster General has accepted the offer made in 1857 by Great Britain for a reduction of the international rate between the two countries on letters, from 24 to 12 cents, which, however, has not yet gone into operation, as it awaits the response of the British office.

Isle Royale Mining Company.

The following is an official statement of the business of this company for the fiscal year ending Nov. 30, 1861:

Total shipments of ingot copper for the season ending Nov. 30, 1861		889,394 lbs.
Of this amount there has been sold at 20.4c	$125,170	
Of this amount there is now on hand at 27c	71,446	$196,616
Expenses at the mine from Dec. 1, 1860, to Nov. 30, 1861—12 months—taken from the cost sheets	122,000	
All other expenses are covered by a charge of 3½c per lb. on the product of 889,394 lbs. of ingot copper	31,000	
		153,000
Profit for the year 1861		$43,616

Had the copper been worth 25c. per lb., the product of the year would have been $222,348, and the profit $69,000, instead of $43,616.

The prod. of ingot copper in 1861 was		889,394 lbs.
" " " 1860		620,437 lbs.
Increase of product in 1861		268,957 lbs.
The cost at mine in 1861 was	$122,000	
Other cost at 3½c. per lb. on ingot copper produced	31,000	$153,000
The cost at mine in 1860 was	130,750	
Other cost at 3½c. per lb. on ingot	21,715	152,465
Increase of cost in 1861		$535

It will be seen that the cost of working the mine in 1861 was only $535 more than for 1860, while the product shows an increase of 268,957 pounds of ingot copper, showing a marked reduction in the expenses in proportion to the product of copper.

The financial condition of the company Jan. 1, 1862, presents an actual cash surplus of $35,000 over all indebtedness. There is due at the mine $15,000 to $20,000, and as about this amount is always outstanding due miners the company has now a working capital of $50,000. The mine is fully equipped and more extensively opened than ever before. The lowest estimate for the year 1862 is 600 tons ingot copper, which at 25 cents would be worth $300,000, and all expenses cannot exceed $200,000, allowing liberally for contingencies.

New Jersey Railroad and Transp. Co.

The following is an abstract of the report of this company for the fiscal year ending December 31, 1861:

RECEIPTS:		
From passengers		$714,305 75
" freight		81,097 31
" mail, rents, express, etc.		197,364 28
		$992,767 34
EXPENSES:		
Maintaining railroad, bridges and buildings	$64,812 10	
Repairs of locomotives, cars and machinery	49,412 49	
Fuel—cost and labor in preparing	70,400 85	
Operating road, and transporting passengers and freight	215,892 78	
Office expenses, salaries, etc.	12,268 01	
		412,786 23
		$577,981 11
Disbursed as follows, viz:		
Interest on bonds		$41,050 00
Transit duty on passengers and freight		16,669 14
Tax on capital stock		21,489 25
Dividends in cash, August and Febr'y		439,670 00
Profit and loss to surplus earnings		61,102 72
		$579,981 11

The number of passengers transported over the road during the year was as follows:

Over the whole line of the road		341,860
Between Jersey City and Newark		1,167,615
" " " Elizabeth		211,101
" " " Rahway		65,565½
" " " N.Br'swick.		75,702½
All intermediate places		460,754½
Total		2,322,598½

The number of miles run by passenger, freight and other trains was 487,894.

The number of tons of goods, wares and merchandise transported over the road during the year was as follows:

Over the whole line of the road	1,506½
Between Jersey City and Newark	41,419
" " Elizabeth	3,058
" " Rahway	8,496
" " N. Brunswick	8,529
All intermediate places	41,542½
Total	99,550

GENERAL STATEMENT.

Capital stock		$4,397,800 00
Funded debt (including $485,000 the cost of the property and privileges purchased of the Jersey Associates)		688,000 00
Profit and loss, being surplus earnings represented by the permanent improvements, property and cash stated below	$349,084 55	
Less amount paid for relaying road with new rails and other improvements	25,826 17	
		323,258 88
Dividend 1st January payable 1st February, 1862		219,872 50
		$5,628,930 88
Cost of railroad and equipments:		
For graduation, masonry, bridges, superstructure, iron, passenger and freight stations, buildings and fixtures, engineering, land and land damages		$3,609,089 19
Locomotives, tenders and snow plows		165,175 09
Cars—passenger, freight and baggage		235,203 36
Property, viz:		
Bridge, ferry, turnpike and other stocks, real estate, ferry boats, privileges and fixtures (including the property and privileges purchased of the Jersey Associates for $485,000)		1,249,621 07
Cash in bank, and cash items receivable on demand		369,842 17
		$5,628,930 88

President—JOHN S. DARCY.
Treasurer—H. J. SOUTHMAYD.
Sec'y and Gen'l Sup't—F. WOLCOTT JACKSON.

The population of the towns of the Papago Indians, viz. Cumara, Tecolote, Charco, Parigua, Ocaloe, Cojate, Coca, Santa Rosa, Cahuave and Llano, was enumerated by the Marshall because of an unprecedented drought that caused them to abandon their homes and disperse over the country at the time the census was taken in that region. It is estimated that they number 8,500 souls.

Housatonic Railroad.

American Railroad Journal.

Saturday, February 8, 1862.

Share and Money Market.

The hesitancy in Congress upon financial affairs has caused a more active demand for money, and upon call, all new business is done at 6 and 7 per cent., with more scrutiny of collaterals. From New England there is more demand for paper, at 6 and 7 per cent. for short dated bills. The banks of this city are by no means rich, and are inclined to contract their operations and wait for Congress. The currency of business men is now mainly in demand notes, which cannot be used freely at bank, and are finding their way to brokers for sale at ⅛ and ½ per cent. discount.

The 7.30 per cents. are offered freely at 2 and 2¼ per cent. discount for large and 1¾ per cent. for small notes.

Gold closes at 3⅜ premium selling, and 3⅛ buying in small parcels by brokers.

Stocks are barely steady, and the market is supported mainly by the constant purchases of brokers, whose only hope of profit is in keeping prices firm, until some fortunate turn of affairs brings the public in to relieve them of their daily increasing burden.

The feeling in regard to the European news is that of gloom and uncertainty, nor is the aspect of affairs at Washington more satisfactory.

The Lykens Valley Railroad and Coal Company have declared a dividend of 7 per cent. out of the earnings of the year 1861, payable Feb. 3.

The interest coupons on the bonds of the New Jersey Railroad and Transportation Company due Feb. 1, will be paid at the Bank of Commerce.

The interest due February 1st on the first mortgage bonds of the Cleveland and Mahoning Railroad Company will be paid at the office of Messrs. Ward, Campbell & Co., No. 56 Wall st.

The Morris and Essex Railroad Company has declared a semi-annual dividend of three and a-quarter per cent. The late dividend of the Bloomfield Railroad Company was also three and a-quarter per cent. Both payable February 1.

The sale of the Terre Haute, Alton and St. Louis Railroad, which was to have taken place on the 7th of March, has been postponed to the 21st of the same month.

The Delaware Division Canal Company have declared a dividend of three per cent. on their capital stock, payable on and after the 15th of February.

The Chicago, Burlington and Quincy Railroad have commenced the construction of a branch road, which is intended to connect with the Peoria and Oquawka road at Yates City, thence by way of Farmington and Canton to Lewiston. The grading is progressing, and the road expected to be in running order by the 1st of May next.

The Receiver of the Central Ohio Railroad has issued the following notice:

In obedience to a late order of the Circuit Court for the Southern District of Ohio, I will pay on presentation at my office in Zanesville, Ohio, the coupons on the first mortgage bonds of this company, maturing May 1, 1858, and August 1, 1858, in current funds, or in exchange on New York, payable in current funds as the holders thereof may require.

Railroad Earnings--Monthly.

The earnings of the Hudson River Railroad for

January, 1862, were	$307,330 18
" 1861	223,157 87
Increase	$84,172 81

The following statement shows the business of the Philadelphia and Reading Railroad Company for December, 1861, compared with that of 1860:

	1861.	1860.
Rec'd from coal	$202,693 70	$183,607 89
" " merch'dise	44,468 12	32,859 84
" " travel, etc.	31,057 59	26,564 82
Total	$278,219 41	$249,032 05
Transportation, roadway, dumpage, renewal fund, and all charges	122,785 85	120,619 49
Net profit for the m'th,	$155,433 56	$128,412 56

The earnings of the Chicago and Rock Island Railroad for January, 1862, were $97,253

Do., 1861	106,180
Increase	$8,927

The earnings of the Cleveland and Pittsburg Railroad for the months of December and January have been as follows:

December, 1861		$105,120
" 1860		63,980
Increase		$41,140
January, 1862	$84,858	
" 1861	62,208	
		22,650
Increase		$63,790

The earnings of the Galena and Chicago Railroad for January, 1861, were $106,180

January, 1861	97,253
Increase	$8,927

Railroad Earnings--Weekly.

The traffic of the Great Western Railway of Canada for the week ending Jan. 31, 1862, was as follows:

Passenger	$10,835 32
Freight and live stock	39,241 65
Mails and sundries	1,686 05
Total	$51,268 02
Corresponding week of last year	39,278 00
Increase	$11,985 02

The receipts of the Grand Trunk Railway of Canada for the week ending Jan. 25, 1862, were:

9,272⅕ passengers	$16,303 04
Mails and sundries	3,094 28
18,884 tons of freight and live stock	60,876 32
Total	$80,273 64
Corresponding week, 1861	47,092 48
Increase	$33,181 16

The Whale Fishery for 1861.

The Newbedford *Standard* publishes the annual review of the Whale Fishery for the past year, from which we extract the following particulars:

"The year has been characterized by a large diminution in the whaling fleet, the decrease having been larger than in any year since 1858. On the first of January, 1862, the number of vessels engaged in the business will be but 422, with a tonage of 127,608 tons, a decrease, in four years, of two hundred and thirty-two vessels, and twenty-five thousand five hundred and forty tons. The decrease for the past year has been ninety vessels and thirty one thousand one hundred and thirty-eight tons.

The ships fitted previous to 1858 having sailed at high cost, returning many of them with poor success, although many have brought in large cargoes, have, owing to the low prices, and in a great many instances the unwillingness to dispose of the batch at the ruling rates, proved ruinous to the owners. Ships fitted since that period have sailed at a greatly reduced cost, economy having been exercised both in the outfit and fitting of the vessel, so that the business has become more adapted to the price of our great staples. Still the price of Whale Oil is not high enough to pay for the expense of catching it, although Whalebone is greatly in excess of the price a dozen years since. Owing to the numerous substitutes for oil as an illuminating substance, Whale Oil has been driven pretty much from the market for that special purpose.

Sperm Oil, owing to the depression in the manufacturing interest, both in this country and Great Britain, is held at rather a low figure, but we think with the revival of business, which will surely ensue, it will rise to a profitable price, which should be about $1 50 per gallon, to make the business a healthy one.

The vessels in port, an unusually large number, at this port alone there being 24 ships and 24 barques, and at all other ports 39 vessels—a total of 87—are for the most part good vessels, the purchases made by the government of old vessels to be sunk for the blockade of Southern ports having pruned out those needing heavy repairs.

During the year six of the fleet have been lost at sea, six have been condemned in foreign ports, and three have been taken by privateers in the Gulf of Mexico.

There have been added to the service eight ships and barques and one schooner, with a tonnage of 2,840 tons—all having been engaged in the whale fishery at other ports. At present this city has in the whale fishing business 257 ships and barques and 1 schooner, with a tonnage of 87,128 tons—a decrease during the year of 31 vessels and 11,532 tons.

The imports of Sperm Oil for the year amount to 69,411 brls.; Whale Oil 136,297 brls.; and 1,125,874 lbs. of Whalebone. A decrease for the year of 3,825 brls. Sperm; 3,879 brls. Whale Oil: and 237,344 lbs. Whalebone.

The exports for the year have been 37,547 brls. Sperm Oil; 48,525 brls. Whale Oil; and 1,075,000 lbs Bone; showing a decrease over last year of 5 762 brls. Sperm Oil, 35,525 brls. Whale Oil, and 248,770 lbs. Bone.

The stock of Oil and Bone in importers and speculators hands is as follows: 18,000 brls. Sperm Oil, 80,000 brls. Whale Oil, and 600,000 lbs. Bone

The price of both Sperm and Whale Oil, and Bone have been lower than in 1860. The average prices during the year have been for the Sperm Oil $1 81⅓ per gallon; Whale Oil 44⅞c per gal. and Whalebone 72⅞c per lb. for Artic, 68¾c per lb. for Ochotsk, and 62¾c per lb. for South Sea.

The Railroad System of Ohio.

The Cincinnati *Gazette* of 28th ult. contains a lengthy article upon the railroads of Ohio. It embraces the early history of the internal improvements of the State; their annual progress; a list of the roads now completed and in progress; those in the hands of receivers; and those that have been sold and re-organized. Tables are also given showing the capital stock, bonded and other indebtedness, cost, earnings, expenses, etc., etc.

We make the following extracts, reserving the tabular statements for a future occasion:

RAILROADS IN THE STATE.

The following is a list of the roads in Ohio, with the total length of the lines, miles in operation, miles in Ohio when all the proposed lines are completed, and number of miles now in opetion within the State:

Name of Road.	Total length of line.	Miles now in operation.	Miles in Ohio—when completed.	Miles in Ohio now in operation.
Atlantic & Great Western	243	..	243	..

Total miles	5,094	4,088	3,993	3,024

ROADS PROJECTED AND IN PROGRESS.

The railroad system of Ohio is by no means complete yet, as will be seen from the following table of roads projected, and on many of which large amounts of work have already been done. There can be no doubt but that the next five, or at furthest ten years, will see some of these lines in operation.

These lines are as follows:

	Miles.
Marietta to Wheeling (extension M. & C. R.R.)	75
Loveland to Cincinnati (" ")	25
Vienna to Dayton (branch M. & C. R. R.)	42
Cincinnati and Dayton (short line)	53
Glendale extension (Cincinnati, Wilmington & Zanesville)	31
Findlay to Union (extension Fremont & Indiana)	82
Youngstown to Newcastle (extension Cleveland and Mahoning)	20
Youngstown to Brooklyn (extension Cleveland and Mahoning)	12
Indianapolis & Cincinnati (independent exten.)	20
Eaton & Hamilton (exten. to Ham.)	2
Twin Creek (Carlisle to Miamisburg)	6
Hamden to Newark (extension Scioto & Hocking Valley	80
Millersburg to Zanesville (extension Cleveland, Zanesville and Cincinnati)	38
Atlantic & Great Western (Dayton to Penn. State Line)	243
Covington to Richmond (extension Columbus, Piqua and Indiana)	25
Ashtabula and New Lisbon	84
Total miles	838

There are perhaps half a dozen other lines projected or talked about, but as there is no prospect of any of them ever being built, it is unnecessary to refer to them here.

The completion of the above lines is indispensably necessary to secure the full advantages contemplated in the construction of the roads of which they form parts.

For instance, the Marietta and Cincinnati Railroad will never be independent and in a position to demand and obtain its rights of the Baltimore and Ohio Railroad, until it has its line extended from Marietta to Wheeling, which would give it an outlet by either the Baltimore and Ohio Railroad or the Pennsylvania Central, and enable it to choose whichever connection should prove most advantageous for it. Upon this line a large amount of work had been done when its further prosecution was suspended in 1854.

Again, without a line of its own from its western terminus at Loveland to Cincinnati, it must always be dependent upon and at the mercy of the Little Miami Company, besides having to pay a heavy rent to that road for the use of its track between Loveland and Cincinnati, and of its depots at both those points. The proposed extension of its road from Vienna to Dayton, would give it a direct connection with the roads leading into Indiana and the other Western States, and would bring to its main line a considerable amount of business, as this would then be the shortest route from Indianapolis to Baltimore and Washington.

The completion of the Cincinnati and Dayton Short Line is only a question of time. The rapidly increasing business of the Cincinnati, Hamilton and Dayton Railroad, and of the lines leading from Dayton to the Lake and the Northwest, will compel the building of this line at no distant day. We should not be at all surprised to see this project again taken hold of, as soon as our political troubles are over, and prosecuted to an early completion. Several hundred thousand dollars have already been expended upon this road and upon the tunnel through which it is to gain access to the city.

The Fremont and Indiana Railroad is now open from Fremont to Findlay, and a large amount of work has been done on the balance of the road. This road must be completed to Lima, the intersection of the Dayton & Michigan and Pittsburg, Fort Wayne and Chicago Railroads, to render that portion already built of any value. Its further extension to the State line is a matter of doubt. This road has changed hands within a few weeks past, and is now known as the Fremont, Lima and Minnesota Railroad.

The completion of the Cleveland and Mahoning Railroad from its present eastern terminus at Youngstown to Newcastle, will also be carried forward as soon as times improve. A proposition has been made by this Company to construct a branch road from Youngstown to the coal fields of Hubbard and Brookfield, a distance of some twelve miles. The Railroad Company propose to iron and equip the road, provided the necessary stock can be raised to grade and make the road ready for laying the track. This proposition has, we believe, been acceded to, and arrangements are now being made to survey and locate the line.

The construction of an independent entrance into Cincinnati, for the Indianapolis and Cincinnati Railroad, along the line of the Whitewater Canal, is in contemplation, and we expect to see this work prosecuted at some future day.

It will give Cincinnati the advantage of an additional through line to St. Louis, for by the terms of the agreement by which the Indianapolis and Cincinnati Railroad uses the third rail on the Ohio and Mississippi track from Lawrenceburg to Cincinnati, the forming of such a line is prohibited.

The construction of this line would be of great importance to that road, enabling it to reach the heart of the business portion of the city and would tend to the increased prosperity of Cincinnati.

The Eaton and Hamilton Railroad now uses two miles of the track of the Cincinnati, Hamilton & Dayton Railroad in reaching Hamilton, on which it pays a rental of $10,000 per annum. This road has long had in contemplation the building of these two miles, so as to enable it to reach Hamilton independent of the Hamilton and Dayton road. Should this road, which is seriously embarrassed, be re-organized upon a new basis, of which there is some talk, this link would undoubtedly be built. Until it can reach Hamilton on its own rails and connect with the canal at that point, it must always remain dependent upon the Hamilton and Dayton managers.

The completion of the Scioto & Hocking Valley Railroad from Hamden to Newark is doubtful while that road remains in its present embarrassed condition and under its present organization. When the road shall have passed into the hands of the first mortgage bondholders, which it is destined to do, there will then be some prospect of its being finished.

A large amount of work has been done upon the Atlantic & Great Western road, and it has been progressing slowly with the intention of completing the line to Akron by another summer.

The President of this road, in his annual report to the stockholders in 1861 says: "The death of Mr. Doolittle, the contractor, in August, 1860, was a serious obstacle to the prosecution of the work. A new contract was, however, entered into with James McHenry of Liverpool, England, by the terms of which contract the company agree to pay him a stated sum per mile for the construction and equipment of the entire road to Dayton, making a reduction as per estimate provided for work already done. Two-thirds of this to be paid in first mortgage and one-third in second mortgage bonds or stock at the option of the contractor. The contractor is bound to proceed with diligence to complete the work, and provision is made for its completion to Akron, Galion and Dayton successively."

The work under the new arrangement was entered upon on the 1st of June, 1861. The President expresses confidence that the contracts will be performed according to their tenor, and the entire work completed within a reasonable time.

The Cincinnati and Indianapolis Junction Railroad from Hamilton, Ohio, to Connersville, Indiana, is being rapidly rushed forward. The road is now running to Liberty, 30 miles from Hamilton. The balance of the road is graded and ready for the iron, and about 800 tons of rails are now on the ground ready to be laid, and sufficient iron to complete the road to Connersville is on the way from the East. The track-layers are at work, and it is expected to have the road running by next April.

FINANCIAL CONDITION OF OHIO ROADS.

While Ohio has thirty-four railroads in operation, representing a capital of one hundred and fifty millions of dollars, there are nevertheless only four that pay dividends on their capital stock, and but eight that pay interest on their bonded and little or nothing on their floating debt.

Three roads, the Marietta and Cincinnati, Pittsburgh, Fort Wayne and Chicago, and the Springfield, Mount Vernon and Pittsburg, have passed through the hands of receivers during 1860 and 1861, and have been sold by order of Court. The first two were bought in by trustees representing the bondholders, stockholders and other creditors, and have been reorganized upon a new basis, and the latter road, which was also bought in by a trustee for the first bondholders, has since been sold at a private sale to the Cleveland, Columbus and Cincinnati Railroad, and will hereafter be operated by that road as a feeder to its main line.

Nine other roads are now in the hands of receivers appointed by States or Federal Courts, upon the application of bondholders or other creditors. Several other roads are in no better financial condition, and will ere long have to pass into the hands of those having the first liens upon them. Shareholders have little or nothing to hope for from their investments in some of these roads, and they might as well yield now as at any future time. Many of these roads are so loaded down with debts, that there is no hope for their recovery. Those operated by receivers are, as a general thing, indifferently managed. Many of them are also becoming dangers as public thoroughfares, and as a matter of public policy it is important that they should be reorganized.

ROADS OPERATED BY RECEIVERS.

The following are the roads now operated by receivers, appointed by State or Federal Courts, with their capital, cost of road, and equipment, floating and bonded debts:

	Capital Stock.	Cost Road. & Equipt.
Cleveland & Pittsburg	$8,845,436	$9,003,809
Central Ohio	1,627,907	6,687,287
Steubenville & Indiana	1,906,736	4,772,951
Ohio & Mississippi	6,584,681	17,870,346
Columbus, Piqua & India.	750,000	2,555,000
Eaton & Hamilton	453,450	1,403,020
Scioto & Hocking Valley.	403,975	1,003,975
Cincinnati, Wilmington & Zanesville	2,441,176	6,250,841
Cleveland, Zanesvile & Cin	369,673	1,574,693
Total	$18,383,034	$51,121,922

	Float'g Debt.	Bonded Debts.
Cleveland & Pittsburg	$653,821	4,307,000
Central Ohio	1,126,458	4,365,800
Steubenville & Indiana	466,215	3,600,000
Ohio & Mississippi	2,330,030	9,870,000
Columbus, Piqua & Indiana	205,000	1,600,000
Eaton & Hamilton	152,694	757,734
Scioto & Hocking Valley	50,000	550,000
Cincinnati, Wilmington & Zanesville	228,973	2,241,000
Cleveland, Zanesville & Cin.	630,562	575,500
Total	$5,843,753	$27,867,034

PLANS FOR THEIR REORGANIZATION.

All of these roads have plans or schemes for reorganization and capitalization, but owing to the many conflicting interests, none of them have so far availed themselves of the law passed at the last session of the Legislature for the relief of embarrassed and bankrupt roads, and for the sale and reorganization of the same.

We are aware that it is a complicated piece of work to unite upon a plan that will satisfy the conflicting interests of creditors and proprietors, and this is in a great measure the cause of the apathy on the part of stockholders in not looking to their interests in season. In most cases the work of reorganization is delayed until the courts force the managers to move for their preservation. It is, however, generally too late, for the embarrassments are such that they are left without resources or credit.

To render these transformations permanent, a different system of reorganization is necessary. There are too many claims of creditors, involving too many interests. It would be preferrable that only two should exist, and this can only be done by capitalizing, or in other words, putting the old and preferred stock, the floating debt as far as practicable, and all mortgages and unsound bonds, beyond the first lien, into a common stock, upon an equitable basis. This is the only safe plan, in our opinion, and the only reason why it has not been adopted is because it inolves more trouble and labor to perfect it, but when once done the property is not only safe from litigation, but is a better security, and will be more productive, because it is more available than in the form of second, third and fourth mortgage bonds.

The share capital of our Ohio roads amounts to some $75,000,000, over half of which will be wiped out within the next ten years, unless a seasonable effort is made to save it. The owners of these shares, especially those that have been unproductive from the start, should look to this important subject in time. There are many ways in which bankruptcy can be arrested, and the vast sums expended in their construction saved. This can only be done by keeping clear of floating debts, and retaining a surplus in cash from the income of the road, to form the nucleus of a fund that will sink the debt at or before maturity.

ROADS THAT HAVE RE-ORGANIZED.

The Marietta and Cincinnati Railroad which was the first road, we believe, to pass through the hands of a receiver appointed by Court, has reorganized upon somewhat such a plan as we have indicated above.

This road was placed in the hands of a receiver in December, 1858, and so continued until February, 1860, when it was sold by order of Court and was bought in by trustees representing the foreign bondholders who had agreed upon a plan of capitalization.

The old company had an outstanding debt secured by mortgage of

First mortgage bonds	$2,500,000
Second do	2,000,000
Third do	1,500,000
Unsecured debts	2,500,000
Stock	3,500,000
	$12,000,000

which with interest over due made about $13,000,000. To save the road and insure means to complete it, a scheme was devised to which all creditors assented. This scheme proposed the appointment of trustees to buy the road, who should issue new stock to the parties in interest, as follows:

Preferred 6 per cent. stock to the first and second mortgagees for the full amount of their 7 per cent. bonds, and for the money necessary to finish the road, which they were to advance; preferred 6 per cent. stock to the third mortgagees to half the amount of their claims and common stock to the general creditors and stockholders to the amount of $1,500,000 to be apportioned so as to give to the creditors double the per centage given to the stockholders.

The first and second mortgagees to advance the money to finish the road and to pay certain claims of employees and others ordered by Court to be paid out of the purchase money. By the sale the debt was reduced from $13,000,000 to a little over $8,000,000, all the stock, bonds and mortgages were wiped out, and the value of the property is represented entirely by capital stock, as follows:

First preferred stock	$3,632,600
Second do	2,816,450
Common or deferred stock	1,850,000
	$8,299,050

A special law was passed by the Legislature at its session in 1860, which provided that, in case the road was sold and the sale confirmed, all the privileges and franchises of the old company should pass to and be vested in the purchasers, legalizing the transfer of the charter to the new company, and authorizing the re-organization of the same, and, in order to guard against further embarrassments, the same law prohibited the directors from incurring any debt or loan without the concurrence of two-thirds in value of the stock, represented at a meeting convened for that purpose.

The Pittsburg, Fort Wayne and Chicago Railroad was placed in the hands of a receiver during 1859, and was continued under such management until October, 1861, when the road was sold by order of Court, and was bought in by trustees appointed to carry out a plan of re-organization, which had been previously agreed upon by the different classes of creditors. The re organization was effected under special enactment of the State Legislatures of Pennsylvania, Ohio, Indiana and Illinois. Under this plan the Ohio and Pennsylvania, Ohio and Indiana and the Fort Wayne and Chicago Railroads, first mortgage bonds and secured interest became merged in a new issue of $5,350,000, seven per cent. sinking fund bonds, secured by a first mortgage over the whole road, equal to $11,000 per mile.

A second mortgage of like amount secures bonds to be awarded to the holders of the present second mortgage bonds of the old companies, and a third mortgage of $2,000,000 will secure the interest on bonds to be given to the holders of the old real estate bonds, and other classes of old indebtedness. The interest on the bonds to be issued under this third mortgage, will only be paid in case the earnings of the road prove sufficient for the interest and sinking fund for the first and second issues. Stock for $6,000,000 will only draw six per cent. dividends, the balance of the net earnings going to reduce the first issue of the bonds. This re-organization is just now being perfected.

The Springfield, Mt. Vernon and Pittsburg Railroad, has also passed through the hands of a Receiver, and was sold by order of Court in June, 1861. The shareholders paid $1,000,000, the bondholders were creditors to the amount of $1,050,000, and the floating debt was $400,000. At the sale this road was bid in by a trustee for the first mortgage bondholders, and brought $125,000. This, of course, paid but a small dividend to the bondholders, while the stockholders and floating debt creditors were wiped out.

The road has subsequently been sold to the Cleveland, Columbus and Cincinnati Railroad for $140,000, of which $100,000 was to be paid January 20th, 1862, and the balance in bonds having fifteen years to run, with interest at 7 per cent., secured by a mortgage on the said road.

These are the only three roads among the list of embarrassed ones in this State that have been sold, and re-organized, the first two by capitalization, and the latter by an outright sale to third parties. Other roads in the State must soon follow their example.

SUMMARY OF BUSINESS OPERATIONS.

The following summary is made up from the tables which follow. It is impossible to present the exact figures of the roads in Ohio, without including those portions of Ohio lines which extend into adjoining States. Of these the following are partly in and partly out of the State, so that a fair view of them cannot be presented without including the whole; viz:

Cleveland, Painesville and Ashtabula 20 miles in Pennsylvania; Indianapolis and Cincinnati, 90 miles in Indiana; Pittsburg, Fort Wayne and Chicago, 173 miles in Indiana, Illinois and Pennsylvania; Michigan Southern, 464 miles in Indiana, Michigan and Illinois; Toledo and Wabash, 174 miles in Indiana; Ohio and Mississippi, 172 miles in Indiana; Cincinnati and Indianapolis Junction, 20 miles in Indiana; Dayton and Western, and Indiana Central, 67 miles in Indiana.

These lines have 576 miles within the limits of the State.

The summary of the tables is as follows:

Total length of miles	4,088
Number of miles in the State	3,034
Capital	$77,807,608
Cost of road and equipment	153,000,491
Bonded debt	78,949,943
Floating debt	10,515,722
Number of locomotives	759
" baggage cars	182
" passenger cars	594
" freight cars	9,754
" passengers carried, 1860 61.	4,684,673
" tons freight	4,235,360
GROSS EARNINGS.	
Passengers	$5,368,136 21
Freight	9,472,174 86
Mail	593,224 27
Express	217,174 73
Other sources	521,575 76
Total earnings	$17,172,285 83
Operating expenses	10,040,717 48
Net earnings	$7,131,567 85

—or 41½ per cent of gross earnings.

The gross earnings were equal to $4,121 02 per mile, which would make the earning of the miles within the State about as follows..$12,474,327 54
Operating expenses..... 7,293,769 39

Net earnings..... $5,180,558 15

The following is a comparative statement of the gross earnings, expenses, and net earnings of Ohio railroads for the past four years:

	Gross earnings.	Expenses.	Net earnings.
1860–61	$17,172,285	$10,040,717	$7,131,568
1859–60	15,324,231	9,246,457	6,087,774
1858–59	14,441,709	8,292,328	6,149,381
1857–58	15,048,903	7,881,520	7,167,383

Increase of Bank Capital in Massachusetts.

In the year 1851, the banking capital of Massachusetts amounted to thirty-eight million two hundred and sixty-four thousand dollars. The number of banks in Boston at that time was thirty; out of Boston one hundred. Since that time fifty additional banks have been chartered by especial enactment of the Legislature, and seven have been incorporated under general banking laws. Sixteen were incorporated at a single session in 1853, and twenty at the next session in 1854. Of the banks which were in operation in 1851, four have been discontinued, viz: the Manufacturers Bank, in Georgetown, by expiration of charter; the Cochituate Bank and the Grocers' Bank, in Boston; and the Western Bank, in Springfield, by injunction. So that the actual increase in the number of banks for the ten years, from May, 1851, to May, 1861, has been 51—14 in Boston, 37 out of Boston. The increase of capital during the same period has been $29,054,200.

Besides the addition of fifty-one banks to the number in operation in May, 1851, there are also forty-eight more savings banks than were then in existence (as the whole number is now ninety-three), making in all ninety-nine more institutions than in 1851. The increase of deposits in savings banks since 1851 has been more than twenty-nine million dollars.

The gross amount of capital, held both by the banks and the savings banks, at the present time, is upwards of one hundred and twelve millions of dollars—being more than twice as large as it was in 1851.—*Boston Transcript.*

RENSSELAER
POLYTECHNIC INSTITUTE,
TROY, N. Y.

THE seventy-sixth semi-annual session of this well-known Institution for instruction in the Mathematical, Physical and Natural Sciences, will commence on Wednesday, Feb. 19th, 1862. A full course in Military Science is now in progress. Graduates of the Institute find no difficulty in obtaining very desirable positions as Civil, Naval and Topographical Engineers. The Annual Register, giving full particulars, can be obtained of Prof. CHARLES DROWNE, Director.

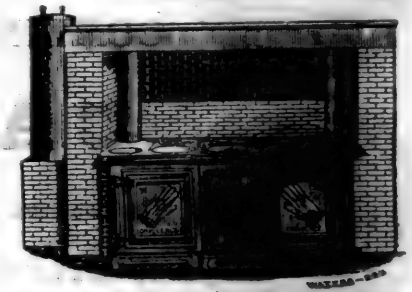
The COSMOPOLITE
PARLOR RADIATOR, &
GAS BURNER,



Introduced one year ago, already ranks as the **LEADING STOVE** for PARLORS, SITTING ROOMS, and all places where a soft, pleasant heat is desired.

Fire may be kept all winter with an astonishingly small supply of coal.

Send for description and testimonials.

SANFORD, TRUSLOW & CO.,
Nos. 239 and 241 Water st., N. Y.

Challenge Air-tight
KITCHEN RANGES,

May be placed in a fire-place without masonry, and with or without water-back; or may be set out on feet, as an ordinary stove.

This range, already very popular, has the **LARGEST OVENS** of any in the market; **BAKES PERFECTLY,** never failing to brown at the bottom; **BOILS, ROASTS** and **BROILS** with unequalled facility and dispatch, and with extraordinary **ECONOMY OF FUEL,** which may be either coal or wood. Flues large and easily cleaned. A child can manage it, so simple is its construction. Castings extra heavy, and design plain and chaste.

Four sizes, adapted to families and hotels.

Beacon Light
SUMMER AND WINTER
PORTABLE RANGE,

Is a very popular range, having six boiler holes, one large oven that bakes perfectly, with an arrangement for roasting, or heating irons at the end. It is very economical of fuel. For a FEW DOLLARS a family may be supplied with a PERFECT COOKING APPARATUS, equal to the highest price stove in the market.

Three sizes, adapted to coal, or wood.

SANFORD, TRUSLOW & CO.,
239 and 241 Water st., N. Y

SANFORD'S
MAMMOTH
OR
GLOBE
HEATERS.

The best stoves for **RAILROAD DEPOTS** and **SHOPS,** and all places where a great heat is required. They are very durable, and very economical of coal.

Beware of imitations that are inferior in strength and in other respects.

TESTIMONIALS.

HUDSON RIVER RAILROAD OFFICE, N. Y

This Company have now in use, over two hundred of Sanford's Mammoth Heaters, in Station Houses, Work Shops, and Engine Houses; we commenced using them in 1853, and some of the first stoves put up are still good and in use. We consider them the best Heaters now in use.

J. M. HEBARD, Supply Agent.

UNION FERRY COMPANY.

The Mammoth Heaters have been used by this Company in their waiting rooms at the several ferries and found to be very excellent stoves and more durable and valuable than any heretofore used. CYRUS P. SMITH, Managing Director.

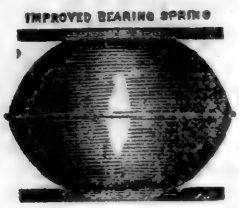
The Tables are printed in clear, bold type on tinted paper; sheets 25x16 inches. They may be used by candle-light without injuring the eye-sight. Each sheet is complete in itself, and embraces all that is wanted in connection with the Base or Slope designated, whether on level or side hill cross section.

Sent, **free by mail,** in separate sheets, at **25c.** each; or the whole, handsomely bound in cloth, in one volume, for **$7.50.**



ENGINEER'S FIELD BOOK,

By **C. S. CROSS, Civil Engineer.**

THIS work is designed as a pocket companion, and embraces, in the most compact form, all the necessary tables for prosecuting railroad surveys. It is subdivided as follows:—

1st. The method of staking out railroad curves and keeping field notes.
2d. Railroad curve tables for expeditiously determining the points at which commences the curving.
3d. Application of the Prismoidal formula in determining the quantities of excavation and embankment of canals and railroads from transverse sections.
4th. Excavation and embankment tables for expeditiously determining the cubic yards from mean area.

It is a plain, clear and most valuable book for practical Railroad Engineers. Sent, **free by mail,** upon receipt of the price. For sale at this office. Price **$1.**

HUDSON RIVER CEMENT COMPANY.

THIS Company is now prepared to furnish at the shortest notice, on the most favorable terms, **HYDRAULIC ROSENDALE CEMENT, NOVA SCOTIA CALCINED PLASTER, FARMERS' PLASTER,** and **MARBLE DUST,** all of full weight, and of a fine and superior quality.

This Cement is manufactured by the Company from a superior selected quality of Cement Stone, from its extensive Quarries at Rosendale, Ulster Co., N. Y., and has been very extensively used during the past eight years in the construction of RESERVOIRS, CISTERNS, TANKS, BATHS, CELLARS, VAULTS, etc., and for a variety of purposes "under water," such as DOCKS, BRIDGES, MILL-DAMS, FOUNDATIONS and BREAKWATERS. It is largely used for any sort of **dry concrete** and **Underwater Works.** Where strong work is needed, or dampness to be excluded, this Cement is unrivalled. It has the unqualified approbation of the most eminent ARCHITECTS, ENGINEERS, CONTRACTORS and BUILDERS in AMERICA, being used in most every department of the **Works under Government.**

It is put up, for shipping purposes, in tight, well-made, and thoroughly papered barrels—each barrel containing **300 lbs.** of Cement—and shipped direct from the works at JERSEY CITY, N. J., (opposite the City of New York), **at all seasons** of the year, thus avoiding all unnecessary handling.

The better condition, therefore, in which its articles are received by purchasers makes it an object for them to purchase its Hydraulic Rosendale Cement, Calcined Plaster, Farmers' Plaster, and Marble Dust; and which, if used by persons of experience, never fail to give entire satisfaction. Orders, however extensive they may be, are respectfully solicited from Dealers, Contractors, Railroad Companies, Masons and others.

Please address, **Hudson River Cement Company, Jersey City, N. J.,** or **J. H. BUTTS, Secretary.**

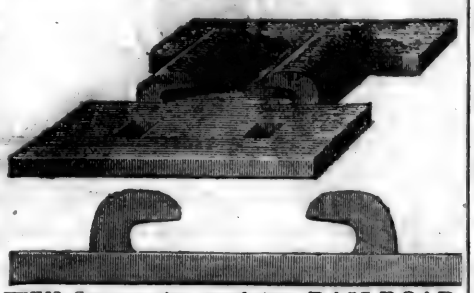
N. B.—Freights obtained by good vessels on the best terms, and Insurance when required.

RAILROAD IRON.

THE UNDERSIGNED are prepared to contract for the sale of

RAILROAD IRON

on advantageous terms, delivered at ports of England, Wales, or the United States.



MEAD & BELL,
13 Cliff Street, N. Y.

NEW YORK Railroad Chair Works,

J. S. BRESSE, *Pres't.* J. S. DAVENPORT, *Sec'y and Treas.*

Office, No. 89 Maiden Lane, cor. Gold St., NEW YORK.

JOSIAH S. LEVERETT & CO.,
SOLE AGENTS.

THIS Company also manufacture **RAILROAD, SHIP AND BOAT SPIKES** of a superior quality, which they are prepared to supply at the shortest notice.

JAMES H. DOBBS,
No. 92 JOHN STREET,
NEW YORK.

WROUGHT IRON RAILWAY CHAIRS,
With **Single** or **Double Continuous Lips,** weighing from eight pounds each, to any size required. Also,
FOLDED LIP CHAIRS,
Weighing from seven to eighteen pounds each.
BRAD AND COUNTERSUNK
RAILWAY SPIKES.

PHŒNIX IRON COMPANY'S

SUPERIOR WROUGHT IRON
RAILWAY CHAIRS,
With continuous lips, made to fit exactly the flanges of the rails.

New York, Saturday, February 15, 1862.

British Mining, 1860.

Coal.—English colleries 2,024—products 50,297,115 tons; Welsh 443—products 11,262,850 tons; Scotch 413—products 10,300,000 tons; and Irish 73—products 120,300 tons. Total, 2,949 colleries—71,979,765 tons. Estimated value at the Pits £17,226,526, or $86,132,630. Of the total products London took 5,073,276 tons, of which 3,573,377 tons were carried by sea in 11,226 vessels, and 1,499,899 tons by railroad, canal, etc.

Iron Ore Raised.—In England 4,910.469 tons; in Wales 736,880 tons; in the Isle of Man 1,282 tons; in Scotland 2,225,000 tons; and in Ireland 3,000 tons—total 7,896,581 tons, valued at £2,507,860, or $12,539,300.

Pig Iron Made.—In England 1,740,084 tons; in Wales 1,012,270 tons; and in Scotland 960,550 tons—total 3,712,904 tons, valued at £11,138,712, or $55,693,560.

COPPER MINES AND ORE RAISED.—In England 151 mines, 211,504 tons of ore; in Wales 9 mines, 10,673 tons; in Isle of Man 1 mine, 354 tons; and in Ireland 10 mines, 14,258. Total 171 mines—236,789 tons, valued at £1,506,535, or $7,534,175.

Fine Copper from above Ores.—In England 13,946 tons; in Wales 550 tons; in Isle of Man 26 tons; and in Ireland 1,248 tons—total 15,775 tons, valued at £1,734,700, or $8,673,500.

LEAD MINES AND ORES RAISED.—In England 161 mines, 63,858 tons of ore; in Wales 82 mines, 20,656 tons; in Isle of Man 3 mines, 2,464 tons; in Scotland 7 mines, 1,946 tons; and in Ireland 11 mines, 2,457 tons. Total 264 mines, 91,381 tons, valued at £1,256,641, or $6,383,205.

Metallic Lead from Ore Raised.—In England 42,762 tons; in Wales 15,620 tons; in Isle of Man 1,880 tons; in Scotland 1,347 tons; and in Ireland 1,624 tons—total 63,233 tons, valued at £1,405,925, or $7,029,625.

Silver Extracted from Lead Ores.—In England 402,176 ounces; in Wales 84,101 ounces; in Isle of Man 56,974 ounces; in Scotland 4,022 ounces; in Ireland 13,898; and in places not accounted for 346 ounces—total 561,617 ounces. To which add silver from British silver ores 16,660. Total silver produced in 1860, 578,277 ounces, valued at £159,026, or $795,130.

Tin Mines, Ore and Metal.—In Cornwall and Devonshire 128 mines, 10,180 tons of ore, valued at £738,488, or $3,692,440. From this 6,497 tons of metal were produced, valued at £850,452, or $4,252,260.

Pennsylvania Railroad.

FIFTEENTH ANNUAL REPORT.

The annual meeting of the stockholders of this company was held in Philadelphia on the 3d inst., at which the following report of the directors for the fiscal year ending December 31, 1861, was submitted:

OFFICE PENNSYLVANIA RAILROAD COMPANY,
Philadelphia, Feb. 3, 1862.

To the Stockholders of the Pennsylvania Railroad Company:

Your Board of Directors, in conformity with the requirements of the charter of the company, submit a statement of its affairs for the year 1861, accompanied by the usual annual reports and statements of the several officers in the immediate charge of the Company's Railway and Canals.

The following condensed statement exhibits the earnings and expenses of operating your road during the year 1861:

EARNINGS.

From passengers.	$1,406,018 41
" government troops	145,158 14
" United States mails	74,398 62
" expresses	75,120 00
" freight	5.398,025 56
" miscellaneous sources	201,280 22
	$7.300,000 95

EXPENSES.

Conducting transport.	$1,199,131 24	
Motive power	1,102,406 36	
Maintenance of road..	1,011,677 14	
Maintenance of cars..	270.825 00	
General expenses....	69,023 02	
		$3,653,062 76
Leaving net earnings from road		$3,646,938 19

Exhibiting an increase in gross revenue over that of 1860, amounting to $1,367,299 47, and in net receipts of $1,350,535 79.

Omitting receipts from transportation of Government troops, $145,158 14, the income from passenger travel is $47,974 36 less than last year. The total number of passengers carried over the road during the year was 1,059,088, each passenger traveling an average distance of nearly 58 2-10 miles.

The earnings from freight exhibited an increase over those of 1860 of $1,206,241 59. The whole movement of freight on the road during the year, exclusive of 138,499 tons of coal, wood, lumber, iron, &c., for the use of the company, was 1,620,586 tons. Of this amount there was transported in the cars of the company 276,861 tons of coal, and in the cars of individuals 437,893 tons, making the whole amount of coal transported 704,754 tons

showing an increase over 1860 of 181,531 tons. The amount of coal delivered at Pittsburg from mines on the line of the road during the year was 131,309 tons; a decrease of 7,680 tons as compared with last year. The aggregate tonnage of the line exceeds that of last year 274,061 tons.

It will be seen that nearly the whole of the increase in the revenues of the company during the past year was derived from the transportation of eastward bound freight to meet the European demand for our breadstuffs. The large increase in this traffic during the latter part of the year was due in a great measure to the closing of the Mississippi River as a commercial avenue. The additional rates obtained, in consequence of the supply of freight seeking the seaboard markets being in excess of the facilities of the east and west lines for its transportation, has doubtless affected our revenues beneficially, but the reduced rates upon the local traffic required by the "commutation bill" of the last session of the Legislature has to some extent neutralized this advantage.

As the Mississippi River cannot long continue closed to commerce, it would not be prudent to treat revenues thus temporarily acquired as a legitimate source of dividend by a company whose line is unfinished. Such a course would tend to give the shares of the company a fictitious value. The Board has, therefore, preferred to invest the surplus net revenues, after declaring the usual dividends, in the extension of your road to the Delaware river, the erection of an elevator, wharves and depots at that terminus, and to increase the equipment of the line. The propriety of incurring so heavy an investment in additional rolling stock, to meet a seemingly temporary demand for transportation facilities, was and might have continued to be a question for serious deflection if you had not authorized the Board to lease the Philadelphia and Erie Railroad, and equip it with the requisite cars and locomotives. Since this arranaement has been concluded we have proceeded without hestitation to enlarge our transportation facilities, confident that when this extra demand for their use ceases upon the Pennsylvania Railroad, ample employment will be found for the surplus stock that we may have upon the Erie line in developing its traffic.

The large increase in the business of the company occurring subsequently to the declaration of the last dividend, it was not deemed advisable to advance the rate. The financial position of the company, however, is now such that it is believed a semi-annual dividend of four per centum may be paid in May next, and its continuance thereafter at the same rate confidently expected.

It is gratifying to your Board to be able to state that this company has not only paid to its shareholders from the *net revenues* of the road six per centum per annum from the date of the payment of the first instalment upon their stock, but it had also accumulated in addition, at the completion of a single track from Harrisburg to Pittsburg, in 1853, surplus net profits amounting to $589,185 79, which amount was carried to the credit of construction account, in conformity with the provisions of the company's charter. In addition to this appropriation of the net profits of the road, the Board, in 1858, directed the amounts subscribed under your instructions to the Marietta and Cincinnati and to the Springfield, Mount Vernon and Pittsburg Railroads, which were never finished, together with some small accounts, amounting in all to $958,500, to profit and loss. The company has also had levied upon its traffic tonnage duties, not exacted from other railways, amounting to $1,661,912.

Notwithstanding these heavy drafts upon the company's revenues, amounting in the aggregate to $2,471,804, after deducting the amount still due to the commutation roads, we find, from a careful estimate of its assets, that they still exceed the amount actually expended upon the road, shops, equipment, &c., of the company, $3,020,603 69, which, with the exception of the amounts charged in 1858 to profit and loss, will be found represented in the Treasurer's statement by a sinking fund, the extension of the road to the Delaware river, new locomotives, cars, Pittsburg, Fort Wayne and Chicago Railroad bonds and stocks, &c., &c.

A bill was passed at the last session of the Legislature, commuting the duty levied upon tonnage passing over the Pennsylvania Railroad. Among its provisions was an obligation upon the part of this company to purchase the first mortgage six per cent. bonds of several railway companies at par to the extent of $850,000. Although none of these companies have fully complied with the conditions of the act, which required a specific amount of work to be done before they could demand its fulfilment, yet the Board has agreed to pay as the work progresses, the following amounts to the several roads named:

The Bald Eagle Valley Railroad Co.....	$200,000
The Tyrone and Clearfield Railroad Co..	75,000
The Ebensburg and Cresson Railroad Co.	66,500
The Bedford Railroad Company.....	100,000
The West Pennsylvania Railroad Co.....	250,000
	$691,500

The only other line that can be placed in a condition to participate in the advantages of the commutation bill, is that between Pittsburg and Steubenville, to which compahy the remainder of the fund, $158,500 will be paid. The bonds of these companies will not, sor some years at least, be considered of much value, except those of the Pittsburg and Steubenville Railroad Company. The indirect advantages, however, to be derived from the completion of these roads, will be the chief benefit that this company can expect to receive for the expenditure of the large sum required by the commutation bill, which amount in good faith belonged to this company and the citizens along the line of the Pennsylvania Railroad, whose products, to the extent of the tonnage they sent to market, bore the burden of the impost.

In accordance with the authority given to the Board at your special meeting on the 12th of November last, a contract and lease has been entered into between this company and the Philadelphia and Erie Railroad Company, under which we have taken possession of that work for the teem of nine hundred and ninety-nine years. The completion of that road, under this contract, is now fully assured, and the advantages to be derived from it, both to the State, the citizens along the line of the road, and to this company, will fully vindicate the wisdom of the policy that led to its adoption.

The report of the General Superintendent will show that the cost of motive power, with the addition of six new locomotives, to supply the places of those unfit for regular service, has exceeded during the past year that of the year previous $131,916 04, which is less than is due to the increased tonnage of the road.

The cost of maintaining the road has also increased $228,513 33, which is attributed chiefly to the additional amount of new iron (6,493 tons) used during the last and previous year, in consequence of the length of time it had been in service and the large traffic of the year, which while it caused additional wear and tear to the railway, also interrupted the forces engaged in the repairs to a greater extent, thereby increasing the amount of labor in renewing and adjusting the track.

The amount of new iron used during the year was 14,863 tons, which is considerably in excess of the average number of tons that will be required to maintain the road for a series of years.

The cost of the additional guards to the bridges, etc., in consequence of the civil war has been $28,797 18.

The increase in the repairs of cars is wholly due to the increased tonnage of the line.

The large decrease (340,229 84) in the expenditures in conducting transportation is mainly the result of the commutation of the tonnage tax since the seventh day of March, 1861, and the lease of the Harrisburg and Lancaster Railway, under which, instead of tolls, (heretofore embraced in this account,) the Company is paid the interest on their debt of $700,000, at six per cent. and seven per cent. upon their share capital of $1,182,550.

In the General Expense account there is a saving of $13,808 41 compared with the previous year.

The extension of your road from West Philadelphia to the Delaware River is completed, and is now in successful operation. Its construction was not undertaken a day too soon, as the tonnage of the line deliverable in the city had become limited by the want of capacity of the city tracks, under the slow movement by horse power, to pass the traffic as fast as it reached here, thus detaining rolling stock that would otherwise have been profitably employed in relieving the pressure for transportation at Pittsburg. These tracks will now be relieved from the through freight passing over them, and the passenger travel also, as soon as the Company shall erect their new passenger station west of the Schuylkill. A proposition to lease the City Railroad on Market street, for a nominal sum, to transport the reduced business that will then pass over it, has been under consideration by the City Councils, but not as yet acted upon. Such a lease would involve the company in an annual loss in maintaining said road, which could only be justified by the importance of keeping the line in such repair as will not damage the Company's rolling stock as heretofore.

The earnings and expenses of the canals owned by the Company for the past year were as follows:

Earnings of the Eastern or Susquehanna Division		$136,698 28
Earnings of the Juniata Division		25,132 98
" " Western Divisions....		9,551 16
" " Miscellaneous sources		4,726 62
Total earnings.....		$176,109 04
Expenses of the Eastern or Susquehanna Division	$68,544 03	
Expenses of the Juniata Division	40,261 63	
Expenses of the Western Divisions (chiefly caused by freshets).....	39,066 53	
		147,872 59
Leaving net revenues.....		$28,236 45

The decrease in the revenues of the Canals, compared with those of the previous year, is $33,256 79, which is due to the paralysis that pervaded all business interests of the country, from the uncertainty that enveloped the future, until August. After that period the traffic revived, and during the autumn was quite equal to the boat capacity upon these improvements.

The Canal upon the upper Juniata has but very little business upon it, and has not been much improved since it was purchased by the Company. The freshets that occurred during the past season were quite destructive on this part of the work and upon the Divisions west of the Allegheny Mountains. The expenditure for repairs caused by these freshets amounted to $30,271, chiefly disbursed off the Western Divisions; otherwise the net receipts of the canals would have been equal to those of the previous season. The damages sustained from the freshets, however, are but partially mended. From a close inspection of the work, the Engineer is of the opinion that it will require, during the next three years, for the renewal of the mechanical structures, fully $80,000 to place the line in complete order, and capable of resisting freshets, after which but little work will be required upon it for many years. The repairs upon the Western Divisions are of a more temporary character, as it is presumed that the West Pennsylvania Railroad will in a short time be completed to the Allegheny river, when this portion of the Canal may be abandoned.

Instructions have been given to the Engineer Department to provide materials to complete the double track, during the ensuing summer, upon that portion of the line between the bridge over

the Susquehanna river and the aqueduct at Duncan's Island, across the Juniata river, 11½ miles' and between Mill Creek and Huntingdon, 5 miles, also from Nineveh, 9½ miles—in all 26 miles—and to prepare the grading for laying a double track in 1863, between McVeytown and the Juniata crossing below Newton Hamilton, during which year the double track between Huntingdon and Petersburg, 6½ miles, and between Nineveh and Florence, 4 miles, in all a distance of 10½ miles, should also be laid, which will complete the double track continuously from Mill Creek to Pittsburg. There are 10 miles of single track between Newport and the Juniata Aqueduct, at Duncan's Island, which when closed, will complete all the double track that it is important should be laid.

On the 28th of October last the Pittsburgh, Fort Wayne and Chicago Railroad was sold by the United States Marshal, at the city of Cleveland, to J. F. D. Lanier, S. J. Tilden, J. Edgar Thomson, Louis H. Meyer, and Samuel Hanna, Esqs., a committee appointed at a meeting of the creditors and shareholders of that Company. The road is now worked under the direction of this committee, but it will be transferred to the new corporation under the style of the Pittsburg, Fort Wayne and Chicago Railway Company, on or before the first of March next. In this new corporation the Pennsylvania Railroad Company holds over one million of dollars of its mortgage bonds, and $816,050 of its stock. The readjustment of the debts of the Company is substantially the same as proposed by the President of this Company while acting in the same capacity for the other company, but in consequence of the impossibility of securing a full acquiescence of all the interests to the plan, it became necessary to place the work under the auctioneer's hammer, which, after the expenditure of much labor, time and money, that might have been avoided, has secured the same results.

The reorganization of the debt of the Company upon a basis of entire equity to all the interests, seems to have acted like magic upon its securities; the first mortgages having been sold at ninety-five per centum, which a short time since could have been obtained at fifty per centum, and the second mortgages can now be sold for much more than they cost this company; they are, however, worth more than their present market value. In carrying out the measures that secured this favorable result, and saved the stock investment of this company in that road, the President met with the cordial and valuable assistance of the Chairman of the Finance Committee, and also of the Road Committee.

The Pittsburg, Fort Wayne and Chicago Railroad Company has, during the past year, done a large and profitable business, fully sustaining the policy which dictated its completion as an independent line to Chicago, and at the same time demonstrating its ability to meet the interest upon all its bonds, while the shareholders will ere long begin to receive regular dividends.

The completion of the Pittsburg and Steubenville Railroad is the only other Western line the construction of which it is very important for this company to secure. Arrangements can be made to carry the work through upon favorable terms, as soon as legislation is obtained.

At the Delaware terminus the company has process of erection a fire-proof elevator for the storage of grain, capable of holding 475,000 bushels. This improvement, in connection with a covered wharf extending from it, 80 feet in width by 515 feet in length, will afford facilities for the shipment of Western products, much needed in this city, which will, by the saving effected, cause largely increased shipments from this port to Europe and coastwise. This elevator is so constructed that its capacity can readily be doubled, while the cost of attendance will remain nearly the same.

The Philadelphia, Wilmington and Baltimore Railroad Company, the Philadelphia and Reading Railroad Company, and the Pennsylvania Railroad Company have organized the Junction Railroad Company, under the charter procured from the Legislature of 1860, and amended at the last session. The object of this line is to connect these three railways by a continuous line along the west bank of the Schuylkill river from the Reading Railroad, near Peters' Island bridge, to the Philadelphia, Wilmington and Baltimore Railroad, at Gray's Ferry, intersecting the Pennsylvania Railroad near the Wire bridge, at Fairmount, so that an interchange of freights between these lines may be effected without passing through the populous portions of the city.

The deficiency of our line in the proper accommodations for passengers at its Pittsburg and Philadelphia termini, referred to in our last report, has not been supplied. At this point the location of this station has been delayed that it might conform to the changes that time must evidently effect in the policy of the Camden and Amboy Railroad Company in relation to its entrance into this city. At Pittsburg, the recent action of the city Councils, and the movement of the lines terminating there, has enabled this company to decide upon the proper location of the station at that point, and its erection, we think, will be effected this year.

The Directors again feel much gratified in being able to acknowledge the very efficient service of the employees of the company during the past year. The circumstances attending the business of the year has taxed to its utmost the capacity and powers of endurance of the employees generally, who have cheerfully met the demands upon them.

By order of the Board,

J. Edgar Thomson, President.

Thomas A. Scott, Vice President.

Allegheny Valley Railroad.

The annual meeting of the stockholders of this company was held in Pittsburg on the 7th inst., at which the following gentlemen were elected directors for the ensuing year: James B. Murray, James Park, Jr., Geo. Black, N. Holmes, B. F. Jones and W. Reynolds. The annual report of the retiring president, R. F. Morley, was submitted. The earnings of the road for the fiscal year ending January 31, 1862, was as follows:

From passengers		$61,330 98
" freight		42,443 98
" mails, etc.		3,150 00
		$106,924 96

The expenses were:

Conducting transportation	$16,635 16	
Maintenance of way	17,160 81	
" cars	3,870 81	
" mot. power	8,676 26	
All other expenses	5,552 76	
		51,895 80
Net earnings		$55,029 16

The floating debt of the company is as follows:

Bills payable	$22,679 16
Book accounts, Dr.	4,587 37
July, 1861, unpaid	3,745 00
January, 1862, unpaid	13,300 00
Due employees, etc.	14,499 58
Total	$58,811 11

The comparative statement of the earnings and expenses for 1860 and 1861 is as follows:

	1860.	1861.
Passengers	$50,850 44	$60,694 10
Freight	38,103 28	42,443 98
Total	$92,103 72	$106,288 08
Expenses	49,180 78	51,895 80

The excess of gross earnings in 1861, over 1860, is $14,184 36. The excess of net earnings, for the same period, is $11,469 34. The expenses of operation were 48.53 per cent. of earnings.

The total earnings from the oil trade were $8,057 64. 12,604 bbls. crude oil were carried through; 2,762 bbls. way, South, and 4,627 bbls., way, North, and 20,351 bbls. refined oil to the city from way stations.

Philadelphia and Erie Railroad.

The annual meeting of the Stockholders of this Company was in Philadelphia on the 10th inst., at which the following report of the directors for the fiscal year, ending December 31, 1861, was presented:

Office of the Philadelphia and Erie Railroad Company.
Philadelphia, Feb. 10th, 1862.

In our last Annual Report it was stated that application had been made to the Legislature of Pennsylvania for the passage of an act authorizing the mortgage on our road for seven millions of dollars to be satisfied, and a new one for five millions of dollars to be executed; the bonds under which should have precedence over the debt due to the State.

In accordance with this application, an act was passed by the Legislature, and approved by the Governor on the 8th day of March, 1861, entitled "An Act to change the name of the Sunbury and Erie Railroad Company, and to facilitate the completion of a road from Sunbury to Erie."

By this act the corporate name of the Company was changed to "The Philadelphia and Erie Railroad Company," and the Company was authorized to issue five thousand bonds of one thousand dollars, or of two hundred pounds sterling each, bearing an interest of six per centum per annum, to be secured by a mortgage upon the whole line of the road, which should be the first lien upon the property described therein, except as to that part of the road which extends from Sunbury to Williamsport, upon which a mortgage for one million of dollars was, and still is, in existence.

The Company was also authorized to execute, forty bonds for one hundred thousand dollars, each payable in forty years from the date thereof, bearing interest at the rate of six per centum per annum, from and after the first day of January, 1872, the same to be secured by a mortgage to the Commonwealth of all the property of the Company, which mortgage should be subject to both the two above mentioned mortgages for five millions of dollars, and for one million of dollars, respectively; the said forty bonds to be delivered to the Commissioners of the Sinking Fund, to be held by them as collateral security for the payment of the five per cent. bonds for three millions five hundred thousand dollars, then in the sinking fund, the time for the payment of which was extended till the maturity of the bonds for four millions of dollars thus to be given as collateral security therefor.

On the surrender and cancellation of all the five per cent. bonds of the Company, made by authority of the act for the sale of the State canals, pproved the 21st day of April, 1858, except those above mentioned belonging to the State for three millions five hundred thousand dollars, it was made the duty of the Trustees of the mortgage for seven millions of dollars, forthwith to enter satisfaction of the record thereof.

The mortgage for five millions of dollars, and the bonds to be secured thereby, were duly executed, bearing date the 30th day of March last, and the mortgage for four millions of dollars to the Commonwealth, with the accompanying bonds, were executed on the first day of April last.

The passage of the act above recited, it was believed by the Company and by the Legislature, would secure the speedy completion of the road, through a sale of the bonds, for five millions of dollars, thus having precedence of the debt to the State; and, in any ordinary state of the money market, such bonds so secured would undoubtedly have commanded a ready sale at a fair price.

By the time, however, the preliminary arrange-

ments required by the act were completed, and the seven millions mortgage was satisfied, the country had become involved in the fearful struggle for its very existence, occasioned by the great rebellion still raging in one-third of the States of the Union, and taxing to the utmost the resources of the loyal States for its suppression. Under the great depression produced by this condition of the country, it was found impossible to negotiate a sale of these bonds at any price that would provide for the liabilities of the Company, and complete the unfinished portion of the road.

The only party disposed to entertain any feasible proposition that would accomplish these all-important objects, was the Pennsylvania Railroad Company; a company having, to a large extent, common shareholders with our own, and a like interest with us in developing the resources and trade of our State and its principal City. The proposal of aid from that company was connected with a proposition for a practically permanent lease to them of our whole line of road. After a very protracted negotiation, the terms of such a lease, and an accompanying contract, were finally agreed upon, as ratified by you at a special meeting held for that purpose on the 13th of November last; but from delays incident to the adjustment of many practical details, the same were not executed until the 6th of January of the present year.

By the conditions of this lease, the Pennsylvania Railroad Company have entered into possession of our entire road and its appurtenances, for a term of 999 years from the first day of the present year; and they are bound at all times during said term, to work, use, maintain and efficiently operate and keep the same in public use at their own cost and risk, with such locomotives and cars, to be furnished and owned by them, as shall be required by the business thereof, and to furnish all such facilities and perform all such acts and things as may be lawfully and properly required to facilitate the business of the road.

For these expenses, risks and services, the Pennsylvania Railroad Company are to retain seventy per centum of the gross receipts of the road, from all sources; the other thirty per centum thereof to belong to the Philadelphia and Erie Railroad Company, to be appropriated to the payment of its necessary expenses, and of the interest and sinking fund to become due under the several mortgages, and any surplus to form a dividend fund for the benefit of the stockholders.

By the provisions of the accompanying contract the Pennsylvania Railroad Company have agreed to purchase three millions eight hundred thousand dollars of our six per cent. mortgage bonds, at the rate of 85 per cent. of their par value, the whole of the proceeds thereof to be paid on the drafts of our company, as the work proceeds, under contracts to be approved by both parties, for the construction and completion of the railroad from Sunbury to the Harbor of Erie, with the necessary sidings, depots, station houses, machine shops and other buildings and improvements, and for such extensions thereof as the business of the road may require.

The remaining twelve hundred thousand dollars of the said bonds, the said Pennsylvania Railroad Company have agreed, by endorsements on said bonds, to purchase at par, as the interest and principal shall become due; the said bonds to be applied by our company towards the payment of its outstanding debts.

These twelve hundred thousand dollars of bonds, with the other assets of the company, do not afford sufficient means entirely to discharge these debts; but a large proportion of the creditors of the company have already consented to meet its necessities by accepting seventy per centum of the amount of their respective claims in the said guarantied bonds at par, and the other thirty per centum thereof in the stock of the company. It is confidently expected that the remaining demands of the same class will be settled on the same terms, so as to enable the company to discharge all its present liabilities, except the mortgage debts, and thus free its affairs from the embarrassments under which they have so long labored, and secure the speedy completion of our too long delayed enterprise.

Independently of the accomplishment of these most desirable objects, worthy in themselves of a great sacrifice, it is believed by intelligent parties, familiar with railroad management, that seventy per cent. of the gross receipts of the line is not an unreasonable proportion to be retained by the company which is to be at all the cost and risk of operating and maintaining the road and its appurtenances, and of providing and keeping up the rolling stock therefor.

The amount of interest to be paid annually by the company on its mortgage debt, after the completion of the road, will be $370,000, until the year 1872, when interest will commence on the mortgage to the State for $4,000,000.

The Board confidently believe that the gross earnings of our road, which is to connect Philadelphia with the most important harbor on Lake Erie, cannot be less than $1,250,000 per annum from the first year that it is put into efficient operation throughout its whole length, with a steady annual increase of such receipts. Thirty per cent. of that sum will pay the annual interest for which the company will then, and for ten years from this time, be liable. Whenever the gross receipts shall amount to $3,000,000 per annum, the proportion thereof belonging to this company will be sufficient not only to pay the interest on *all* the mortgages of the company, but also six per cent. on its capital stock.

In view of the large and increasing gross receipts of all the other through lines of East and West roads, and of the peculiar advantages which our line possesses for both through and local business, it cannot be reasonably doubted that in the course of a very few years our road must yield to its stockholders a fair return for their investment; a return which must increase from year to year for a long period, as the resources of the large region of our State, for which it will be the sole outlet, shall become more and more developed.

No extension of the two detached portions of the road have been made for the two past years, so that for the years 1860 and 1861, there have been the same number of miles in operation. The receipts for these two years, from the business of the road, and the expenses of operating the same are shown by the following table:

1860.	Receipts.	Expenses.	Net Inc'e
Eastern division...	$186,864	$115,397	$71,467
Western " ...	82,554	56,031	26,523
Total.....	$269,418	$171,428	$97,990
Eastern division...	$209 498	$118,409	$91,089
Westere " ...	140,932	74,327	66,605
Total	$350,430	$192,736	$157,694

This table exhibits an increase of net income for 1861, over the previous year, of more than 60 per cent.; the larger portion of which is due to the Western Division. This has been in a great measure owing to the enormous increase of the oil production of Northwestern Pennsylvania, the first dawnings of which were pointed out in our last annual report. The business arising from this new source is at present confined to the Western Division of the road, but as soon as the connection between the Eastern and Western Divisions shall be effected, will pass over nearly the whole length of the line, and of course add greatly to its revenues.

The remarkable increase of this fresh article of production and commerce, and for which our road is to be the most important outlet, is shown by the number of barrels of oil transported over it for the last three years:

In 1859 there were	325	barrels.
In 1860 "	22,119	"
In 1861 "	134,927	"

The financial condition of the company on the 31st of December last, as shown by the Treasurer's account, was as follows, viz:

RECEIPTS AND LIABILITIES.

Capital stock paid in		$4,523,389 14
Seven per cent. bonds issued		644,000 00
Bills payable.....		747,467 31
Preferred debt (scrip) outstanding .		511,200 00
Bonds issued to State, in payment for canals.....		4,000,000 00
Due contractors.....		551,959 73
		$10,978,016 18
To which add net income from road.		446,988 51
		$11,425,004 69

EXPENDITURES.

Interest and commissions on loans..		369,148 03
Interest to stockholders		413,930 17
Interest on bonds, including interest to State, up to Jan. 1st, 1872....		630,785 84
Office expenses, salaries, printing and miscellaneous		253,540 42
		$10,873,956 29

ASSETS.

Cash	$1,080 86	
Bills receivable	8,854 50	
North Br. canal bonds .	323,000 00	
Wyoming canal bonds..	8,000 00	
Other bonds and stock.	67,000 00	
Due by companies.....	60,000 00	
Interest due.....	31,286 41	
In hands of agents.	51,826 53	
		551,048 40
		$11,425,004 69

Since the first of the present year the several items of the floating debt of the company have been much diminished, by payments and settlements, and they stand at the present date as follows, viz:

Bills payable	$367,674 69
Scrip outstanding	376,100 00
Due contractors, &c.....	250,414 00

A proposition has been recently made by Edward Miller & Co., and accepted by the Board, with the approval of the Pennsylvania Railroad Company, for the completion, on favorable terms, of the unfinished portion of the road, and the work will be prosecuted with the utmost vigor and despatch.

The details of the working of the road for the past year are shown in the intelligent and lucid report of Edward F. Gay, Esq., the Vice-President and General Superintendent, as herewith submitted.

Submitted by order of the Board,
WM. G. MOORHEAD, President.

The Albany Bridge Case.

It is known to our readers that the Passaic River Bridge Case has been for some time pending before the Supreme Court of the U. S. In 1858 Judge Grier decided that, on such a river as the Passaic, running entirely within a single state, the U. S. Courts had no power to interfere, and therefore the bridge could be built in accordance with the act of the Legislature. An appeal from this decision was taken to the Supreme Court, and on Monday, it was announced the Court was equally divided, and hence Judge Grier's decision stands.

The Newark *Advertiser*, commenting on this decision, says:

The Albany case is differently situated. In that case, Justice Nelson and his colleague in the Northern Circuit of New York, Judge Hall, differed in opinion; the former being in favor of interference and an injunction against the construction of a bridge, the latter opposed. The case was therefore certified to the Supreme Court for advisement. The supreme Court being divided,

no advice can be given, and therefore the bill for injunction will be dismissed in that case also.

Consequently in both cases, all legal obstacles to the construction of the bridges is removed.—*Albany Statesman.*

A Bill Against the Little Schuylkill Navigation Railroad and Coal Company.

ALLEGED FRAUD IN THE MANAGEMENT: UNEARNED DIVIDENDS ALLEGED TO HAVE BEEN PAID: AND UNAUTHORIZED PURCHASES OF LAND AND OF COMPANY'S STOCK ALLEGED TO HAVE BEEN MADE.

A bill in equity has been filed in the Supreme Court for the Eastern District of Pennsylvania against the President and Managers of the Little Schuylkill Navigation Railroad and Coal Company. Wm. Waln the Secretary of the company, Charles Henry Fisher, and many others.

The bill charges certain officers of the company in conjunction with other defendants, with using money, earned by the company, and which should have been applied to paying off a certain mortgage upon the stock of the corporation, for the payment of dividends; with raising money authorized to be raised by act of Legislature, and diverting it from the purposes for which alone they were authorized to raise it, to different purposes; and with having purchased stock and land from Charles Henry Fisher, who at the time was a director in the company, paying therefor more than it was worth, in violation of the rights of other stockholders.

We have before us a copy of the bill only, published in full, in the Philadelphia *Inquirer*, and we of course get but one side of the story. The other side will probably be forthcoming in process of time. The bill is quite lengthy and we can only publish the following synopsis:

The complainant James Milliken of the city of Philadelphia became the owner of certain shares of the company's stock in 1857, in iguorance of the transaction set forth in the bill; and is still such owner. The purposes for which the company was chartered were mining of coal, and the building of a canal, a slack water navigation, and a railroad for traffic. The company were authorized by its charter to hold 5,000 acres of land, and no more. In 1855, Fisher was elected one of the six managers, and he has continued to be elected a manager down to the present time. He was proprietor of a large amount of stock which he purchased at $45 per share, $5 less than the sum for which the company were authorized to issue it. In 1857, authority was given by the Legislature to raise a sum not exceeding $1,000,000 by mortgage of the corporate property and franchises.

No object to which the money was to be applied was mentioned in the statute, but the stockholders at the meeting convened August 1, 1857, to accept the Act of Assembly or supplement to the charter authorizing the loan, by the vote of acceptance authorized the Board of Managers to raise, by way of loan under the provisions of said act, such sum of money as might be necessary "for the extension of their railroad, and to supply such further depots, engines, cars and appliances as might be necessary for the increased business of the company, and for the payment of the obligations thereof falling due," and they further authorized a mortgage to be executed and bonds to be issued, not exceeding $1,000,000, as evidences of debt and to secure the loan.

In pursuance of the authority thus conferred by the act of Assembly, and the resolution of the stockholders, a mortgage was made by the corporation, bearing date on the 2d of September, 1857, whereby they mortgaged their corporate property and franchises, with certain exceptions therein specified, in trust, to secure the bonds to be issued for the money to be borrowed under the said authority.

The complainant then charges that in said mortgage it is inaccurately stated that the loan was authorized to be made for "other necessary purposes;" whereas the purposes for which it was authorized were specifically and particularly mentioned in the resolution of the stockholders authorizing the same, and were such as is stated above. Up to the time of the making of this mortgage, the Board of Managers of the company had been in the habit of presenting statements to the stockholders annually, showing the pecuniary condition of the company. In the statement made in January, 1857, it was set forth that the profits of the business for the preceding year had amounted to $217,225 70, and a dividend was declared of $109,456 20. And in the month of July, 1857, another dividend was declared of $82,092 15. These dividends were paid, except perhaps a small sum not called for.

These dividends, together with other dividends paid during previous years, as well whilst said Fisher was a manager as before he was elected, were paid to the stockholders in violation of an express covenant on the part of the company, in that about the year 1843, the corporation had obtained a loan on the mortgage of its property to the extent of $500,000, which loan was to become payable in 1860. In the mortgage there was an express stipulation that there should be semi-annually applied to the redemption of this particular loan, or to a sinking fund for the security thereof at maturity, the sum of $5,000, and that no dividends should be declared until this sum was entirely paid.

For many years before the said Fisher became a manager and stockholder, this was not done, or was but partially done. So that in November, 1858, there was a deficiency in applying the covenanted amount of these payments to the extent of $81,273 19, or thereabouts. This deficiency, or nearly all of it, existed when said Fisher was elected a manager, and the books of the company showed this to be the fact; and the duty to make the payment was set forth in the semi-annual appropriations, and in the accounts forming part of the said annual statements to the stockholders, and was well known to the said Fisher while he was a manager, and he also well knew that the payment was not in fact made.

With the knowledge of these facts, he continued while manager to assent to the making of dividends, and received them on his stock, thereby diminishing the ultimate resources of the Company, and keeping up the market value of the stock held by him.

Some time in the year 1855, at which time the corporation owned all the land they were entitled to hold by their charter, the said Chas. H. Fisher purchased from one Francis N. Buck, a track adjoining the lands of the corporation, containing, or supposed to contain, eight hundred acres of land and a large quantity of other land of little value, saving as furnishing a right of way to the former, or as being convenient to the use of the same.

The price agreed to be paid for this property was $84,000, or thereabouts, with interest from June, 1855, and upon a settlement for the same between said Fisher and Buck, a conveyance was made to said Fisher, by said Buck and wife for the said property by deed dated June 4th, 1855.

The complainant sets forth that he has since ascertained that there was a secret verbal contract between Fisher and the managers that the purchase from Buck should be made for the benefit of the corporation.

In September of the year 1857, when the community was suffering under extraordinary financial embarrassment, and when the said corporation was in great pecuniary distress, and its trade much diminished, and its stock depreciated, the said Fisher being a creditor of the Company to the extent of more than $181,000, a stockholder to the extent of over 7,000 shares, and the owner of the adjoining land just mentioned, he, the said Fisher, being then one of the managers of the Company, made an alleged contract with the managers, by which reciting that the said land had been purchased and paid for by him for the uses of the corporation, it was agreed that the Company should have the right to become the owners of the same on the payment of the amount of the price originally paid by said Fisher, at any time after Sept. 25, 1858, with interest from Sept. 25, 1857, at his option as to time; and upon payment so made to receive a conveyance thereof. The corporation on their part agreed to become liable on a bill of exchange for £20,000, drawn by said Fisher on Morrison, Dillon & Co., in London, on which there has been since a partial payment made of $30,311 11, and the balance still remains unpaid and is held as a claim against the corporation.

At the same time, and as a part of the same contract, it was agreed that said Fisher should surrender to the Corporation 7,000 shares of its capital stock, and the evidences of debt due by it to him, and should pay it a sum of $67,510 00, and in consideration of these things should receive from the corporation $600,000 of the bonds secured by the mortgage of Sept. 2, 1857, above mentioned which then remained unissued in the hands of the Company.

The complainant charges that the transaction was one not obligatory on the corporation or its stockholders, but voidable by them, inasmuch as the said Fisher, being a manager, could not lawfully so contract with the corporation.

The result of the transaction was in short thus:—In consideration of an indebtedness presently payable, and of $67,510 in money, making in all $250,000, the property of the corporation was mortgaged to secure $600,000. For until this time the bonds had never been issued and consequently to that extent constituted no charge or debt; while Fisher, as creditor, was permitted to withdraw from the risk of the business $350,000 of the capital which he held as a stockholder, and thus convert or turn it into a secured debt, for the balance of the amount of the mortgage loan received by him, the debts due by the corporation thus enormously increased without value received, and the deficiency in the sinking fund above mentioned, were thrown upon the remaining stockholders whose property continued to form the capital stock; and the capital authorized by law, and subscribed and paid to be applied to the joint undertaking, was illegally withdrawn from it; and also leaving to them (the remaining stockholders) to make good from their profits, the deficiency which amounted to the sum of $81,273 19, unpaid to the sinking fund for the benefit of the first mortgage bondholders as herein already recited and set forth.

The bill demands that the defendants may be compelled to respond to certain questions set forth in the bill, and prays that the court shall declare "that the exchange or transfer to Charles Henry Fisher, of the $600,000 of the bonds of the corporation was in part, and to what extent, or in the whole illegal and void, and that the holders thereof be compelled to surrender the same, and take back the stock and other evidences of debt surrendered in lieu thereof, and the corporation be compelled to do such things as in equity and justice ought to be done in such case, and that it be declared that the debt claimed against the Company by reason of the transfer of the said lands to them by the said Charles H. Fisher, may be declared inoperative against the general assets of the Corporation, and not be paid thereby, but only out of the said lands themselves, and that the corporation be directed to transfer said lands to the holder of the securities for said purchase money, and the holders thereof to surrender the said securities, and that the persons who have united in paying, or receiving any part of said purchase money, be required to restore the same, and in case any of the bonds or other evidences of debt mentioned in the bill, and acquired under the circumstances therein complained of have become vested in persons entitled to hold and retain the same discharged of the equities set forth on the bill that all persons who

have united or participated in the illegal acts and doings whereby the same passed from the corporation to such holders and owners, may be compelled to make good all loss and injury sustained in consequence thereof by the corporation, and that the said S. & W. Welsh, and the other defendants, holders of said bonds and evidences of debt, be restrained from transferring or parting with the same or any of them, and especially from permitting the same to go out of the jurisdiction of this honorable court, and that the Corporation be restrained from paying interest on the same, and the holders thereof, defendants herein, from sueing, or proceeding against the Company or its property upon the same, and that such further and other relief may be granted as the Court may seem meet.

Finances of California.

The finances of California are in a satisfactory condition. According to "Coleman's Circular," besides the payment of interest upon funded indebtedness, nearly $100,000 of the principal has been retired by appropriations from the Sinking Fund during the past year. The following is a statement of the operations of the State Treasury for the month of December, 1861, and shows its condition at the close of the year.

Balance on hand November 30, 1861.		$486,421 75
Received from all sources for the month of December		255,389 24
Total		$741,810 99
DISBURSED.		
Redeemed warrants as follows:		
General fund	$194,727 62	
Swamp land fund	6,627 12	
School fund	672 02	
Library fund	537 40	
		202,564 16
Balance on hand December 31, 1861.		$539,246 83
To the credit of the following funds, viz:		
General fund		$57,789 08
School fund		31,945 55
Hospital fund		4,815 28
Military fund		863 29
Library fund		2,354 38
Interest and sinking fund, 1857		185,136 66
" " " " 1860		3,631 78
Swamp land fund		233,823 74
State school fund		18,787 98
Estates of deceased persons		89 09
Total		$539,246 83

The financial affairs of the city and county of San Francisco continue to exhibit a healthful progress. The amount of the assessment roll for the current fiscal year is $41,845,119, against $35,809,639 for the year previous, and the rate of taxation is 2.87 per $100, against 2.85, a scarcely perceptible increase. The apportionment is as follows:

	Cents.
For State purposes	62
For bonded debts	100
For municipal purposes	75
For street lights	15
For school fund	35
	$2 87

Total bonded debt, $3,134,800—viz:

City Bonds, 1851, due 1871—10 per cent.—$1,354,300; sinking fund, $50,000.

School Bonds, 1854, due 1866—7 per cent.—$33,000; sinking fund, $5,000.

Fire Bonds, 1854, due 1866—10 per cent.—$178,500; sinking fund, $16,666.

City Bonds, 1855, due 1875—6 per ct.—$329,000.

City and County Bonds, 1858, due 1888—6 per cent.—$1,134,500.

School Bonds, 1860, due 1870—10 per cent.—$95,500; sinking fund, $7,500.

There has accumulated at the credit of the various sinking funds in the Treasury, and in the hands of the Commissioners, of the debt of 1851, about $425,000, which is either safely loaned on security of City Bonds, or invested by the said Commissioners, leaving $2,710,000 to be provided for in future years. The sinking funds for the debt of 1855 and 1858 will commence in 1865 and 1867 respectively. $92,000 in cash stands at the credit of the Corporation Debt Fund for the payment of the annual interest, of which only $45,000 is yet to fall due and be paid during the fiscal year.

Postage Earnings of the Steamship Lines.

The following official statement shows the postage earnings of the different trans-Atlantic steamship lines conveying United States mails during the year ended 30th June, 1861:

The New York and Havre Steamship Company, 13 round trips between New York, Southampton and Havre, at sea and U. S. inland postage	$87,104 12
Vanderbilt's European Line, 5 outward and 6 inward trips between New York, Southampton and Havre, at sea and U. S. inland postage	36,495 70
The North Atlantic Steamship Company, 4 outward and 5 inward trips between New York, Southampton and Havre, at sea and U. S. inland postage	33,574 27
The Montreal Ocean Steamship Company (Canadian mail packets), 52 outward and 51 inward trips between Portland and Liverpool, Quebec and Liverpool, at the sea postage only	100,676 48
The Liverpool and New York and Philadelphia Steamship Company (British steamers), 15 outward and 17 inward trips between New York, Queenstown, and Liverpool, at the sea postage only	75,143 38
The North German Lloyd's line of Bremen steamers, 12 round trips between New York and Southampton, at the sea postage only	41,540 26
The Hamburg American Packet Co. (Hamburg mail packets), 6 outward and 4 inward trips between New York and Southampton at the sea postages only	18,353 32
Total	$392,887 63

St. Louis, Alton and Chicago Railroad.

From the report of the Receiver of this road for the year ending December 31, 1861, we learn that the gross earnings during that time were $1,098,464 89, from which deduct for operating and repairs $646,372 27, leaving total net earnings $452,092 62, showing the cost of operating and maintaining the repairs of the road and its rolling stock to average 58 84-100 per cent. on its receipts for the year 1861.

The receipts of the road from the 5th of December, 1859, to the 31st of December, 1860, amounted to $994,559 40—a period of five days less than 13 months. During the same time the expenses of its operation and maintaining its ordinary repairs and rolling stock amounted to $768,783 20, or 77 52-100 per cent of its receipts—being an excess of 18 68-100 per cent. over the average expenses of 1862.

If the liabilities of all classes outstanding are fixed at $580,000—and there is $50,000 of assets on hand available in reducing them—about $530,000 will have to be met by the future profits of the road, or liquidated by arrangements between the trustees and the creditors, before redeeming the road from the jurisdiction of the United States Court.

Illinois Central Railroad.

At a meeting of the Board of Directors of the Illinois Central Railroad Company, held on 10th February, it was resolved to call another instalment of $5 per share, making 90 per cent. paid up. The resolutions are:

Resolved, That an assessment of $5 per share upon the scrip shares of the capital stock of the Company be and the same is hereby called, payable on the 10th day of March, 1862; and that the same be payable on the stock registered in the City of New York, at the office of the Company in that city; and on the stock registered in London at the office of Messrs. Robert Benson & Co., London; and that parties desiring to pay their assessment in London may pay the same at the rate of 4s. 2d. on the dollar.

Resolved, That the transfer books be closed on the afternoon of the 1st of March next, and reopened on the 10th day of the same month; and that no transfer be permitted on or after that day of shares upon which the foregoing assessment shall not have been paid.

The originator of the scheme, Mr. Robert Schuyler, did not anticipate that more than 5 per cent. would be called; the remainder of the cost of the road was to come from a mortgage on and sales of the lands donated by Congress. But for the rebellion, which cut off the southern business of this road, we have no doubt the traffic of 1861 would have yielded a small dividend on the stock. Since last Spring, however, Cairo has been closed as an outlet for produce and merchandise, and the road has been practically in the hands of the Government, for whom an immense amount of service has been done, for which no compensation has been received. The managers feel confident that sooner or later the Government will pay a fair price for this service, notwithstanding the charter requires the company to transport Government troops, stores, etc., without charge. They assume that that stipulation was never intended to apply to such an exceptional state of things as we have at present, when almost the whole road is used by Government, but only to ordinary transportation; and they argue with some force that they have fully compensated the Government for the land grant, by enabling it to sell the alternate sections of land at $2 50 per acre, which, but for the building of this road, could not much of it have been sold at 50c. per acre.

Debt of Pennsylvania.

The annexed is an official statement of the debt of the State of Pennsylvania:

American Railroad Journal.

Saturday, February 15, 1862.

Share and Money Market.

Since our last notice the prices on railway shares have fluctuated from 1½ to 2 per cent; the largest figures being made on Wednesday, 12th inst. on the good news from Roanoke Island of the success of the Union forces. On Thursday there was a reaction of ½ per cent from the extreme prices, the market exhibiting some stiffness. There it a free inquiry for nearly all the Railway mortgage bonds, and prices at the Stock Board and also by private sale are 2 and 2½ per cent higher than last week. Holders are generally firm as this class of security is rather the favorite investment while money is so cheap, as at present in the open market for mercantile bills. U. S. Stocks vary but slightly, operations being held in some suspense for the action of Congress on the Loan and Tax measures. Money is taken on temporary loan at the Sub Treasury at 5 per cent per annum, and the rates to Stock and Bill Brokers are from 5 to 7 per cent owing to the depreciation of security. Gold has advanced to 104⅜ per cent and Exchange to 115 *a* 115½ per cent.

The New York Central Railroad has declared the usual semi-annual dividend of three per cent., payable on the 20th inst., on the stock registered here, and on the 20th of March on that registered in London. Stockholders in this city will receive their dividends at the banking house of Messrs. Duncan, Sherman & Co.; in Boston of Messrs. J. E. Thayer & Brother; in Albany, at the Albany City Bank; and in London, at the Union Bank of London.

The Pennsylvania Coal Company has declared a dividend of 3½ per cent., payable 15th of Feb'y.

The Pacific Mail Steamship Company have declared their quarterly dividend of 5 per cent. to be paid to the shareholders on the 20th inst.

The Naugatuck Railroad Company have declared a dividend of five per cent., payable on the 15th inst.

The Cleveland, Painesville and Ashtabula Railroad Company will redeem its second mortgage bonds, which fall due Oct. 1, 1862, to the amount of $50,000 upon presentation at the Ocean Bank, New York.

An election was held in Brown County, Wisconsin, on the 30th ult., to aid the Chicago and Northwestern Railroad Company to extend their line from Appleton to Green Bay, by issuing to the Company $50,000 in county bonds, in exchange for a like amount of the stock of the Company. In case the proposition is accepted by the people of the county, the Company pledges itself to commence the work of extension by the 1st of May next, and to complete the same on or before the 1st day of December, 1862.

The New Haven and New London Railroad has been placed in the hands of trustees, for the benefit of bondholders, by order of the Superior Court. Henry Hotchkiss, of New Haven, and Charles Buckingham, of New York, are the trustees, and they are to take possession on the 1st of March, unless satisfactory arrangements can be made.

The Circuit Court for the County of Milwaukee has ordered an election for Directors of the Milwaukee and Minnesota Railroad (La Crosse and Milwaukee), on the second Monday in March.

☞ We invite attention to the advertisement of Messrs. LIVERMORE, CLEWS & Co., in another column. Having been long established, with abundant means, and an extensive business, they are enabled to offer inducements equal, if not superior, to others in the same line. Gold, Treasury Notes, and all first class securities bought and sold.

☞ Messrs. BOGERT, BOURNE & AUTIN, in the capacity of Printers, Engravers, Binders and General Stationers, are prepared to supply account books and papers of every variety: pens, inks, pencils, etc. Materials for artists, architects, draftsmen and engineers. Engraving on steel, copper, stone and wood. Lithographing and letter press printing. See *advertisement*.

Boston and Worcester Railroad.

We have received the report of this company for the fiscal year ending November 30, 1861, which was presented at the annual meeting of the stockholders held in Boston on the 5th inst. The income for the year was as follows:

From passengers	$472,729 41
" freight	414,683 98
" rents	15,597 70
" mails	161,838 12
" interest	9,083 58
	$928,932 79

And the expenses were:

Maintenance of way	$73,157 35	
" mot. power,	35,903 74	
" cars	30,393 67	
" b'ld'gs, etc.	13,198 69	
Fuel	58,573 24	
Oil and waste	7,885 70	
Passenger expenses	68,455 53	
Freight "	101,610 71	
Taxes and insurance	12,013 70	
Renewals of iron	31,146 85	
Gratuities and damages	1,572 33	
Rent of Agricultural Br.	11,895 10	
Salaries of officers, etc.	27,387 30	
Reduc'g curve at Brighton	3,273 69	
Western R. R. subsidy	12,000 00	
Credited to depreciation	31,870 80	
		520,338 40
Net income		$408,594 39
Deduct dividends—8 per cent.		360,000 00
Surplus from income undivided		$44,594 39

The total expenses for working the road were $473,193 91, or 50.9 per cent. of earnings.

The earnings have been $116,750 22, and the expenses $86,060 48 less than the preceding year—making the decrease in net income $30,689 74. The company has no funded debt. The floating debt is stated at $126,104 02, an increase of $78,519 55, and consists of—note payable, $9,000; balance to other roads, etc., $111,686 02; unclaimed dividends, $5,418.

As recommended in the last annual report, the construction account has been reduced $238,441 70, and the number of shares fixed at 45,000. The excess has been taken from reserved income, applying the reduction to the branches. This account, as revised, now stands as follows:

Main road	$3,708,911 05
Branches	353,672 63
Equipment	437,416 32
	$4,500,000 00

The amount of assets or property held by the company, in addition to the cost of the road, is $643,179 74; and the reserved income, exclusive of Grand Junction bonds, (which are of uncertain value) is $305,204 92.

The road-bed and rolling stock are in good condition. The company have put down during the year 807 tons of new iron; also 450 tons, repaired at the company's shop at Framingham; 30,146 chestnut sleepers have been used, and the company have on hand for repairs, etc., 50 tons new rails, 1,200 tons second hand rails, 42,665 lbs. new castings, 22,500 lbs. spike, 45,843 sleepers, 6,597 cords of wood, and 3,262 tons of coal.

The number of miles run by passenger trains has been 346,345; by freight trains, 173,265; by other trains, 9,341—total miles run, 528,951. The number of passengers carried in the cars has been 1,476,394; do., carried one mile, 23,239,178; do., carried one mile to and from other roads, 7,659,848. The number of tons of merchandise carried in the cars was 345,174; do., carried one mile, 13,403,609; do., carried one mile to and from other roads, 10,803,808. The estimated weight in tons of passenger cars, not including passengers, hauled one mile was 14,856,780. Do., freight trains, not including freight, 19,443,326.

The following statement will show the cost per mile run for fuel:

Wood—	1860.	1861.
Freight trains	21.72	17.08
Passenger "	13.50	12.28
Mixed "	14.18	12.08
Average	15.81	12.86
Coal—		
Freight trains	13.88	12.00
Passenger "	8.31	7.48
Average	10.67	9.81
Total average	13.37	11.07
Total miles run	525,954	528,951

The mileage has been increased 2,997 miles over last year. The saving in cost of fuel has been $16,379 76, or 21.8 per cent.

The equipment of the road consists of 30 locomotives; 49 eight and 1 four wheel passenger cars, and 44-236ths of the 18 eight wheel passenger cars running between Boston and New York; 9 baggage cars, also 44-236ths of 7 New York Line; 275 eight wheel and 13 four wheel merchandise cars; and 55 four wheel gravel cars.

The following is a statement of the financial condition of the Company November 30, 1861:

Construction	$4,500,000 00	
Fuel and materials for repairs	144,925 19	
Grand Junction bonds	100,000 00	
Balances due from other roads and individuals	79,273 16	
Land not in construction account	92,831 05	
Notes receivable	34,769 32	
Bills receivable for uncollected freight	156,129 61	
Notes on collaterals	115,071 92	
Cash	20,179 49	
		$5,243,179 74
Assessments for capital	$4,500,000 00	
Notes payable	9,000 00	
Balances due to other roads and individuals	111,686 02	
Unclaimed dividends	5,418 00	
Depreciation of engines, cars and buildings	31,870 80	
Reserved income	405,204 92	
Dividend payable Jan. 1, 1862	180,000 00	
		$5,243,179 74

President—GINERY TWICHELL.
Superintendent—E. B. PHILLIPS.
Treasurer—HORACE WILLIAMS.

Income, Expenses, Dividends and when paid, also Construction Account yearly since the opening of the road in 1834.

The Grain Business of Great Britain.

The average wants of the United Kingdom of Great Britain and Ireland are 25,500,000 quarters of wheat, 22,500,000 quarters being required for food and manufacturing purposes, and 3,000,000 quarters for seed; the production in years of plenty is 20,500,000 quarters, and the importation 5,000,000 quarters. In consequence of the extraordinary late harvest of 1860, and the bad weather which followed, only three-fourths of the customary quantity of seed was committed to the ground in the Autumn of that year and the Spring of 1861, t is estimated that over an eight of that which was sown did not germinate; that about one million quarters were "shed," and lost in the fields by becoming over-ripe; that there has been taken for seed 750,000 quarters above the usual average this season, in consequence of the fine autumn, all the unoccupied land of last year being now devoted to wheat, in addition to the usual rotation of crops; and that the exports to France sum up 1,000,000 quarters. Reducing this statement to a tabular form, it will be seen that there is only half a crop left for a year's consumption, or 10,250,000 quarters, making our necessities for foreign grain 15,250,000 quarters from harvest, a very small portion of which quantity has reached or is expected to arrive at our ports; and if there is not some alacrity in the corn trade we shall soon have prices as high as they have been at any time since the beginning of this century.

The small farmers are mostly out of stock, and the large agriculturists have very scanty supplies. The miserable yield of 1860 involved the producers in debt, and they, therefore, parted with the greater portion of the crop of 1861 the first four months, leaving very little in granary to send to market during the remaining eight months of the consuming year. As to the quality of the wheat crop of 1861, it is, no doubt, very fine in England; it is, however, very indifferent in Scotland and Wales and very inferior in Ireland. On the whole, it may come up to an average per bushel in flour-making properties.

	Qrs.
The regular crop of Great Britain & Ireland, is	20,500,000
Short planted for last crop, one-fourth, or	5,000,000
Short yield of that sown	2,500,000
Quantity "shed" from being over-ripe	1,000,000
Extra quantity taken for seed for crop of 1862	750,000
Exported to France from August to Dec. 31, 1861	1,000,000
	10,250,000
Deficiency	10,250,000
To which add the usual importation	5,000,000
Making our requirements	15,250,000

These figures, large as they may appear, do not include the five weeks earlier consumption or "run" on the crop of 1861, to patch out that of 1860, which may be computed at 2,000,000 quarters—in other words, the remarkably early crop of 1861 has to supply a year of over thirteen months; and that, with all the economy that can be practised, the importations of foreign grain into England will have to be greater than ever to carry us through until next harvest, be it ever so premature.—*London Economist, Jan.* 13.

New York Central Railroad.

This road measured by the extent of its traffic and earnings, is the first work of the kind in the United States. Its main line extends from Albany to Buffalo, a distance of 197.75 miles. It has 258.13 miles of side or parallel branch lines as follows:

	Miles.
Troy to Schenectady	21.00
Syracuse to Rochester, via Auburn	104.00
Batavia to Attica	11.00
Rochester to Suspension Bridge	74.75
Lockport Junction to Tonawanda	12.25
Rochester Junction to Charlotte	6.88
Buffalo to Lewiston	28.25
Total branch lines owned by the Co.	458.13
Second track on main line and branches	248.53
Add main line as above	297.75
Sidings, turn outs and switches	126.25
	925.66
Niagara Bridge and Canandaigua Railroad (leased)	98.46
Branch line to Elevator at Tonawanda	1.63
Sidings, turn outs and switches	3.42
	1,029.17

The New York Central Railroad Company was organized under a law of the State of New York,

passed April 2, 1853, whereby certain railroad companies were authorized to consolidate themselves into one company, to be called the New York Central Railroad Company—viz: the Albany and Schenectady; Schenectady and Troy; Utica and Schenectady; Syracuse and Utica; Syracuse and Utica Direct; Rochester and Syracuse; Buffalo and Lockport; Mohawk Valley; Rochester, Lockport and Niagara Falls, and Buffalo and Rochester. The articles of agreement required by the act of incorporation were entered into 17th of May, 1853. The first Board of Directors was chosen, and the company fully organized on the 6th of July, 1853. In addition to the roads named, the new company acquired, by consolidation, the line from Rochester to Charlotte, 7 miles. in 1853; the line from Buffalo to Lewiston, 28 miles, in 1855; and, by lease, in perpetuity, on the payment, annually, of $60,000, of the Canandaigua and Niagara Bridge Railroad, 91 miles, in July, 1858.

The share capital of the consolidated companies was as follows:

Albany and Schenectady	$1,535,800
Schenectady and Troy	650,000
Utica and Schenectady	4,500,000
Mohawk Valley	1,575,000
Syracuse and Utica	2,700,000
Syracuse and Utica Direct	600,000
Rochester to Syracuse	5,606,700
Rochester, Lockport and Niagara Falls	2,016,100
Buffalo and Rochester	3,000,000
Buffalo and Lockport	625,000
Total	$22,858,600

This amount has been increased to $24,000,000 by the conversion of bonds of old companies to the amount of $208,000; by the share capital of the Buffalo rnd Niagara Falls Railroad Company, $565,000; by the share capital of the Lewiston Railroad Company, $217,000, and by the share capital of the Rochester and Lake Ontario Railroad Company, $150,000.

Of the funded debt of the company, the certificates, as they are termed, were issued for the estimated value of the shares of the several companies above *par*. The original amount of this was $8,894,500. The following is a statement of the estimated value of the shares and the amount of certificates issued to the shareholders in the several companies.

	Stock & convertible bonds outstanding.	Est. value above par. per ct.	Amount for which certif. were issued.
Alb. & Schenectady	$1,621,800	17	$275,706
Utica & Schen'dy	4,500,000	55	2,475,000
Mohawk Valley	1,575,000	55	866,250
Syracuse & Utica	2,700,000	50	1,350,000
Syr. & Utica direct	600,000	50	300,000
Rochester & Syr.	5,608,700	30	1,682,610
Roch., Lock. & N. F.	2,155,100	25	538,684
Buffalo to Lockport.	675,000	25	168,750
Buffalo to Rochester.	3,000,000	40	1,200,000
Roch. & L. Ontario	150,000	25	37,500
Sch. and Troy	650,000	..	.....
Total	$23,285,600		$8,894,500

These certificates are six per cent. bonds, dated August 1, 1853, and payable 1st of May, 1853, with interest, at the rate of 6 per cent. The amount outstanding at the last report of the company was $7,552,000; $1,342,500 having been retired by the operations of a sinking fund, equal to one and a quarter per cent. annually on the amount issued.

The other indebtedness of the company is the $3,000,000 7 per cent. loan, contracted in 1854, and payable in 1864, and debts of the old companies not yet matured, and bonds issued in the place of those retired. The company has created no mortgage on its road.

The following comparative statement will show the amount of the funded debt, and capital stock of the company as they were on the 30th of September, 1853, 1854, 1855, 1856, 1857, 1858, 1859 1860 and 1861:

	1853.	1854.	1855.	1856.	1857.	1858.	1859.	1860.	1861.
Debt certificates less amount of sinking fund	$8,894,500	$8,769,900	$8,581,600	$8,422,600	$8,280,600	$8,100,000	$7,925,000	$7,745,000	$7,552,000
Seven per cent loan		360,691	3,000,000	3,000,000	3,000,000	3,000,000	3,000,000	3,000,000	3,000,000

Cost, earnings, expenses, etc., yearly, for eight years, commencing with 1854 and ending with 1861:—

La Cross and Milwaukee Railroad.

Judge Miller, of the United States District Court of Milwaukee, has decided in the La Crosse and Milwaukee Railroad suit that the eastern division or Palmer mortgage of $877,500 is a first lien on the eastern division of ninety-five miles from Milwaukee to Portage, and includes the franchise and machinery and equipments of the whole road. That next in order of priority of lien is the land grant mortgage on the western division, one hundred and five miles from Portage to La Crosse; and second to the Palmer mortgage on the franchise, equipments, machinery, &c.; the bonds No. 1 a 1,961 at par and interest; No. 1,992 a 3,950 of the $1,000 bonds, and No. 1 a 100 of the $500 at 40 cents and interest. That after the above two mortgages the second mortgage, eastern division, is a next lien on the ninety-five miles eastern division, and a third lien on the franchises, equipments, rolling stock, &c. He leaves Chamberlain's claims undecided, and gives A. Fleming, Esq., until February 1, 1862, to file a cross bill to attack Chamberlain and others. The Court rejects P. R. Dow's, (agent of the second mortgage, eastern division), claims for services and charges, thus requiring him to pay over the amount collected by him while in possession of the road to the second mortgage bondholders, as interest withheld by him from them. There being nothing due on the Palmer mortgage, the effect of this decision is to give the franchise, rolling stock, equipments, &c., to the land grant bondholders, so that they now have as security for their payment 105 miles of railroad, all the franchise, all the rolling stock, equipments, &c., and all the lands donated to aid in building the road.

Illinois Southern Railroad.

We learn from Mr. John Stanton, one of the contractors, that work on the Indiana side has been abandoned, and operations have been commenced at Lawrenceville with a force of seventy-five or eighty men. It is also stated that arrangements are completed by which the road will at once be graded to Grayville, and Mr. D. N. Stanton, another of the contractors, writes to a citizen of Mount Carmel that the iron is about ready for shipment. There is scarcely a railroad in this western country which is of more vital importance to the section which it is intended to benefit than this road to Southern Illinois. Now that locality is comparatively shut out from the world for a portion of the year. With this road, the

country would at once be opened up, and a home market provided.—*Mount Carmel Register.*

Railroad Earnings--Monthly.

The January earnings of the Chicago, Burlington and Quincy Railroad were as follows:

	1861.	1862.
Freight	$81,454 12	$89,158 05
Passengers	20,637 14	18,476 10
Mails	1,862 78	1,838 34
Total	$103,954 04	$109,472 49

Between Chicago and Burlington—210 miles:

	1861.	1862.
Freight	$93,059 11	$100,297 20
Passengers	25,454 66	21,736 59
Mails and miscellan's.	2,229 11	2,101 34
Total	$120,472 87	$133,225 13

Between Quincy and Galesburg—100 miles:

	1861.	1862.
Freight	$17,879 13	$12,853 80
Passengers	7,446 23	5,540 11
Mails and miscellan's.	2,940 25	840 33
Total	$28,265 61	$19,234 24
	1861.	1862.
Aggregate, 310 miles.	$149,068 49	$152,459 37

The receipts of the Chicago and Northwestern Railroad for January were:

	1862.	1861.
Passengers	$18,199 28	$13,656 02
Freight	25,857 53	32,360 58
Express	807 03	731 25
Mail	1,695 83	1,416 66
Miscellaneous	50 00	160 68
Total	$46,609 67	$48,325 19

The statement of the Illinois Central Railroad for January is as follows:

Land Department.

Acres Construction Lands sold	3,529.61 for	$11,564 74
Acres Interest Fund L'ds sold	240.00 "	2,680 00
Acres Free Lands sold	1,930.03 "	25,075 95

To which add Town Lot sales		408 00
Total of all		$69,728 69
Acres land sold since Jan'y 1, 1862	5,699.64 for	$69,728 69
Acres sold prev'sly (net sales)	1,236,450.18 for	16,096,215 34
Total	1,242,149.82 for	16,165,944 03
Construction bonds canceled previous to December 31		$2,086,500 00
Cash collected in January		12,637 31
205,000 bushels corn received in hand.		
Net collections to Dec. 31, 1861		4,129,675 98

Traffic Department.

Receipts from Passengers	$51,366 55
" Freight	106,933 45
" Mails	6,358 34
" Other sources	7,528 61
Total receipts for January, 1862	$172,186 95
Do. do. 1861	319,634 28

Original land grant, 2,595,000 acres; railway, 706 miles of main track, and 97 miles of sidings, 113 engines, 2,456 cars. Funded debt, $15,235,500.

The earnings of the Michigan Central Railroad for January, 1862, were $230,159 03
Do., 1861 142,333 70
Increase $87,825 33

The earnings of the Cleveland and Toledo Railroad in January, 1862, were $106,684
Do., 1861 84,996
Increase $21,688

The earnings of the Toledo and Wabash Railroad for January were:

	1861.	1860.
Passengers	$15,574 25	$12,107 16
Freight	42,765 08	70,127 65
Total	$58,339 33	$82,234 81
Increase		$23,895 48

The earnings of the St. Louis, Alton and Chicago Railroad for January, 1862, were $67,609 79
1861 81,531 47
Decrease $13,921 68

The receipts of the New York and Harlem Railroad for January, 1861, were $103,494 63
January, 1862 100,922 75
Decrease $2,571 88

The express passenger trains to Albany that were running last year are not now running.

The earnings of the Milwaukee and Prairie du Chien Railroad, for January, 1862, were:

For passengers	$15,126 35
For freight	64,478 03
For mails and rents	4,299 17
Total	$83,903 55
Corresponding month, 1861	54,245 81
Increase	$29,657 74

Railroad Earnings--Weekly.

The receipts of the Grand Trunk Railway of Canada for the week ending Feb. 1, 1862, were:

9,572 passengers	$17,212 97
Mails and sundries	3,680 28
12,491 tons of freight and live stock	58,172 15
Total	$79,065 40
Corresponding week, 1861	48,353 69
Increase	$30,711 71

The earnings of the Galena and Chicago Railroad the 1st week in Feb., 1862, were $27,128
Do., 1861 19,509
Increase $7,619

The earnings of the Cleveland and Toledo Railroad for the 1st week in Feb., 1862, were $24,620
Do., 1861 18,054
Increase $6,566

The Chicago and Rock Island Railroad earned the 1st week in February, 1862 $28,452
Do., 1861 19,175
Increase $9,277

Bald Eagle Valley Railroad.

This road, hitherto known as the Tyrone and Lock Haven Railroad, now bears the name of the Valley of Bald Eagle, which lies at the very foot and base of the Alleghany Mountain, and which is celebrated for its deposits of iron ores, its productive acres, and its proximity to coal and lumber. The route of the road is through this valley, bounded on the west by the towering Allegheny, and on the east by the Bald Eagle ridge. From Lock Haven on the West Branch river to Tyrone on the Juniata river, the rail distance is 55 miles. From the Junction of the Bald Eagle, with the Tyrone and Clerfield Railroad, three miles from Tyrone, to Lock Haven, fifty-two miles, the Bald Eagle Valley Railroad is under contract and will be urged forward to completion.

Wood, Morrell & Co., lessees of the Cambria Iron Works, have the contract for the rails, a considerable portion of which are already rolled, at those wide famed works. Next spring, track laying will be commenced, when the iron will be laid to Milesburg, 27 miles from the south end of the road, the graduation in that distance being more than two-thirds done at this time, leaving but 25 miles of railroad to grade between Milesburg and Lock Haven, through an open valley.

Philip M. Price, Esq., is President of the Bald Eagle Valley Railroad, and George W. Leufer, Esq., Chief Engineer. This road, in addition to the local resources of the region which it will traverse and drain, derives a general importance and significance from the fact that it will connect the Pennsylvania Railroad, and the Philadelphia and Erie Railroad, in the centre of the State, and will accommodate the travel, and traffic to be interchanged between those two great trunk routes. —*Philadelphia Railroad Register.*

Little Miami and Columbus and Xenia R. R.

The business of this road for the year ending November 30, 1861, was as follows:

Passenger earnings		$566,236 36
Freight earnings		612,174 72
Express and mail earnings		61,034 18
Rent of track and depot		59,057 76
		$1,298,503 02
Dividend Columbus and Xenia stock		38,488 00
Total		$1,336,991 02
Working expenses	$636,443 28	
Interest	94,095 54	
Taxes	24,779 41	
Lease of D., X. & B. R. R.	28,000 00	
Expenses previous year adjusted this year	21,558 10	
		804,876 33
Net income		$532,114 69
Little Miami Company's ⅔ of net income is		$354,743 13
From which they have declared:		
June dividend of 4 per ct.	$119,250 81	
December do. do.	119,250 69	
		238,501 50
Leaving undivided surplus of year		$116,241 63
Columbus and Xenia Company's ⅓ of net income is		$177,371 56
From which they have declared:		
June dividend of 4 per cent.	$59,632	
December do. do.	59,632	
		119,264 00
Leaving undivided surplus of year		$58,107 56

Eaton and Hamilton Railroad.

The earnings of this road for the fiscal year ending December 31, 1861, were as follows:

From freight	$71,168 49
" passengers	49,957 23
" mails	3,226 61
" express, etc.	3,817 96
	$128,170 29
Expenses	94,758 38
Net earnings	$33,411 91
Add balance from previous year	2,620 07
Drawbacks, interest, sales of wood, etc.	2,894 63
	$38,926 61

Disbursed as follows, viz:

One-seventh of net income to Indiana portion of the road	$4,916 54
On account of locomotive	6,175 00
Sundry liabilities	556 36
Six months' interest to City of Cincinnati	4,500 00
Six months' interest on 2d Mort. 1860	10,500 00
Six months' interest on 3d Mort, 1860	2,590 00
Cash on hand	9,688 71
	$38,926 61

OFFICE OF THE ILLINOIS CENTRAL R. R. Co., New York, Feb. 10, 1861.

AT a meeting of the Board of Directors of the ILLINOIS CENTRAL RAILROAD COMPANY, held at their office in New York, this day, it was

Resolved, That an assessment of FIVE DOLLARS per Share, upon the Scrip Shares of the Capital Stock of the Company, be, and the same is hereby called, payable on the 10th of March, 1862; and that the same be payable on the Stock registered in the City of New York at the office of the Company in that City; and on the Stock registered in London, at the office of Messrs. ROBERT BENSON & Co., London; and that parties desiring to pay their assessment in London, may pay the same at the rate of four shillings and two pence sterling to the dollar.

Resolved, That the transfer books be closed on the afternoon of the 1st March next, and re-opened on the 10th of the same month; and that no transfer be permitted on or after that day of Shares upon which the foregoing assessment shall not have been paid.

THOMAS E. WALKER, Treasurer.

NEW YORK CENTRAL RAILROAD COMPANY, TREASURER'S OFFICE, ALBANY, Feb. 5, 1862.

SEVENTEENTH SEMI-ANNUAL DIVIDEND.—The Directors of this Company have declared a Semi-Annual Dividend of Three per cent. on the capital stock thereof, payable on the 20th day of February inst. upon stock registered at New York, Boston, or Albany, and on the 20th day of March next, upon stock registered at London. Stockholders whose stock is registered at New York, will receive their dividends at the office of DUNCAN, SHERMAN & CO.; those whose stock is registered at Boston, at the office of J. E. THAYER & BROTHER; those whose stock is registered at Albany, at the ALBANY CITY BANK; those whose stock is registered at London, at the UNION BANK OF LONDON, the latter at the rate of 4s. 1d. to the dollar. The transfer books, which are now closed, will be re-opened at New York, Albany and Boston, on the morning of Monday, the 24th day of February instant.

FIRE PLACE

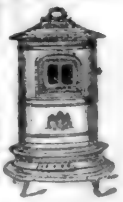
HEATERS,

FOR WARMING BY ONE FIRE WITH PURE, SOFT AIR

Dwellings, Churches, Hotels, Public Halls, Railroad Depots, Vessels, etc.,

WITH AND WITHOUT REGISTERS.

THE MOST POWERFUL HEATERS AND THE



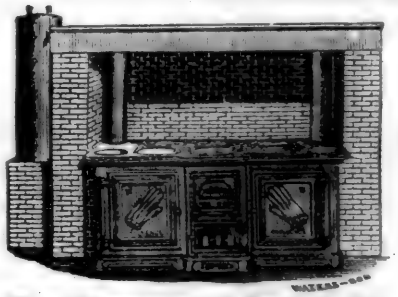
Greatest Fuel Savers in the World:

With an unparalleled mass of unimpeachable testimony of well-known Citizens, Ministers, Doctors, Lawyers, Merchants, Mechanics and others.

Send for pamphlet containing full description and testimonials.

SANFORD, TRUSLOW & CO., Nos. 239 and 241 Water st., N. Y.

The COSMOPOLITE PARLOR RADIATOR, & GAS BURNER,



Introduced one year ago, already ranks as the **LEADING STOVE** for PARLORS, SITTING ROOMS, and all places where a soft, pleasant heat is desired.

Fire may be kept all winter with an astonishingly small supply of coal.

Send for description and testimonials.

SANFORD, TRUSLOW & CO., Nos. 239 and 241 Water st., N. Y.

Challenge Air-tight KITCHEN RANGES,

May be placed in a fire-place without masonry, and with or without water-back; or may be set out on feet, as an ordinary stove.

This range, already very popular, has the **LARGEST OVEN** of any in the market; BAKES PERFECTLY, never burning to brown at the bottom; BOILS, ROASTS and and BROILS with unequalled facility and dispatch, and with extraordinary **ECONOMY OF FUEL,** which may be either coal or wood. Flues large and easily cleaned. A child can manage it, so simple is its construction. Castings extra heavy, and design plain and chaste.

Four sizes, adapted to families and hotels.

Beacon Light SUMMER AND WINTER PORTABLE RANGE,

Is a very popular range, having six boiler holes, one large oven that bakes perfectly, with an arrangement for roasting, or heating irons at the end. It is very economical of fuel. For a FEW DOLLARS a family may be supplied with a PERFECT COOKING APPARATUS, equal to the highest price stove in the market.

Three sizes, adapted to coal, or wood.

SANFORD, TRUSLOW & CO., 239 and 241 Water st., N. Y

SANFORD'S MAMMOTH OR GLOBE HEATERS.

The best stoves for RAILROAD DEPOTS and SHOPS, and all places where a great heat is required. They are very durable, and very economical of coal.

Beware of imitations that are inferior in strength and in other respects.

TESTIMONIALS.

HUDSON RIVER RAILROAD OFFICE, N. Y

This Company have now in use, over two hundred of Sanford's Mammoth Heaters, in Station Houses, Work Shops, and Engine Houses; we commenced using them in 1853, and some of the first stoves put up are still good and in use. We consider them the best Heaters now in use.

J. M. HEBARD, Supply Agent.

UNION FERRY COMPANY.

The Mammoth Heaters have been used by this Company in their waiting rooms at the several ferries and found to be very excellent stoves and more durable and valuable than any heretofore used. CYRUS P. SMITH, Managing Director.

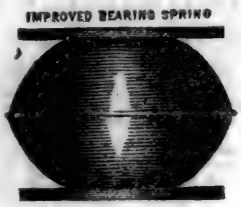
ENGINEERING WORKS.

LYONS' TABLES.
To Civil Engineers and Contractors.

FOR SALE AT THIS OFFICE—A set of Tables for finding at a glance, the true cubical contents of Excavation and Embankments for all Bases, and for every variety of Ground and Side Slopes.—By M. E. LYONS, C. E.

SHEET No.				SHEET No			
1.	General Table for all Bases and all Slopes.			13.	for Base 18 ft. Slop.		1½ to 1
2.	For Side Hill Cuts and Fills.			14.	" 20 "		1½ to 1
3.	Base 12 ft.	Slopes	1½ to 1	15.	" 21 "		¾ to 1
4.	" 14	"	1½ to 1	16.	" 24 "		1½ to 1
5.	" 15	"	¾ to 1	17.	" 25 "		1½ to 1
6.	" 15	"	1 to 1	18.	" 26 "		1½ to 1
7.	" 15	"	1½ to 1	19.	" 28 "		¾ to 1
8.	" 16	"	¾ to 1	20.	" 30 "		1 to 1
9	" 16	"	1 to 1	21.	" 30 "		1¼ to 1
10.	" 18	"	¾ to 1	22.	" 30 "		1½ to 1
11.	" 18	"	¾ to 1	23.	" 32 "		1 to 1
12.	" 18	"	1 to 1	24.	" 32 "		1½ to 1

The Tables are printed in clear, bold type on tinted paper; sheets 25x16 inches. They may be used by candle-light without injuring the eye-sight. Each sheet is complete in itself, and embraces all that is wanted in connection with the Base or Slope designated, whether on level or side hill cross section.

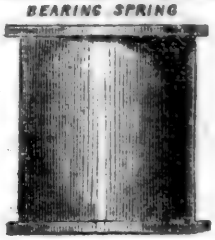


Sent, **free by mail,** in separate sheets, at 25c. each; or the whole, handsomely bound in cloth, in one volume, for **$7.50.**

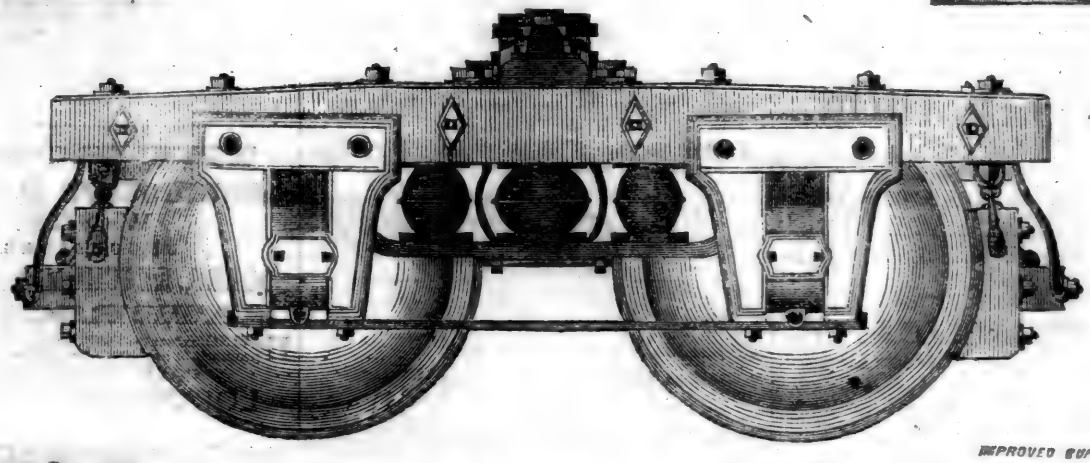
ENGINEER'S FIELD BOOK,
By **C. S. CROSS, Civil Engineer.**

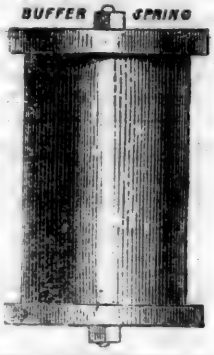
THIS work is designed as a pocket companion, and embraces, in the most compact form, all the necessary tables for prosecuting railroad surveys. It is subdivided as follows:—

1st. The method of staking out railroad curves and keeping field notes.
2d. Railroad curve tables for expeditiously determining the points at which commences the curving.
3d. Application of the Prismoidal formula in determining the quantities of excavation and embankment of canals and railroads from transverse sections.
4th. Excavation and embankment tables for expeditiously determining the cubic yards from mean area.



It is a plain, clear and most valuable book for practical Railroad Engineers. Sent, **free by mail,** upon receipt of the price. For sale at this office. Price **$1.**





New England Car Spring Co.

HUDSON RIVER CEMENT COMPANY.

THIS Company is now prepared to furnish at the shortest notice, on the most favorable terms, **HYDRAULIC ROSENDALE CEMENT, NOVA SCOTIA CALCINED PLASTER, FARMERS' PLASTER,** and **MARBLE DUST,** all of full weight, and of a fine and superior quality.

This Cement is manufactured by the Company from a superior selected quality of Cement Stone, from its extensive Quarries at Rosendale Ulster Co. N. Y., and has been very extensively used during the past eight years in the construction of RESERVOIRS, CISTERNS, TANKS, BATHS, CELLARS, VAULTS, etc., and for a variety of purposes "under water," such as DOCKS, BRIDGES, MILL-DAMS, FOUNDATIONS and BREAKWATERS. It is largely used for any sort of **dry concrete** and **Underwater Works.** Where strong work is needed, or dampness to be excluded, this Cement is unrivalled. It has the unqualified approbation of the most eminent ARCHITECTS, ENGINEERS, CONTRACTORS and BUILDERS in AMERICA, being used in most every department of the **Works under Government.**

It is put up, for shipping purposes, in tight, well-made, and thoroughly papered barrels—each barrel containing **300 lbs.** of Cement—and shipped direc from the works at JERSEY CITY, N. J., (opposite the City of New York), **at all seasons** of the year, thus avoiding all unnecessary handling.

The better condition, therefore in which its articles are received by purchasers makes it an object for them to purchase its Hydraulic Rosendale Cement, Calcined Plaster, Farmers' Plaster, and Marble Dust; and which if used by persons of experience, never fail to give entire satisfaction. Orders, however extensive they may be, are respectfully solicited from Dealers, Contractors, Railroad Companies, Masons and others.

Please address **Hudson River Cement Company, Jersey City, N. J.,** or **J. H. BUTTS, Secretary.**

N. B.—Freights obtained by good vessels on the best terms, and Insurance when required.

The Value of Mechanical Labor.—The Importation of Foreign Iron.

The wealth of the world seems to settle in manufacturing and commercial districts. Agriculture has always been the occupation of the humbler portion of the community, though at the present time the relative difference has greatly changed in favor of the husbandman. This is owing, among other reasons, to the fact, that the results of mechanical labor are permanent, while the fruits of agriculture are perishing. The mechanic labors the year round, the value of his time attaches to the article he produces, and when it comes forth from the shop it serves its purpose for a continued number of years. England is a nation of mechanics and traders, and these pursuits are the sources of her wealth and power. The article iron has been productive of greater wealth to the world than perhaps any other one article; and in 1855 Great Britain produced more than one-half of the whole amount of iron mined in the world. The following table exhibits the amount produced by the principle countries of the Globe in that year:

	Tons.		Tons.
Great Britain	3,585,906	Russia	200,000
France	750,000	Sweden	150,000
Prussia	800,000	German States	100,000
Austria	250,000	United States	750,000
Belgium	250,000	Other countries	300,000
Total			6,655,906

It is estimated that a bar of iron worth five dollars, when manufactured into horse shoes is worth $10 50, the same bar when manufactured into needles is worth $55; when made up into pen knife blades it is worth $3,285; when manufactured into shirt buttons it is worth $29,480; and the same bar manufactured into balance springs of watches becomes worth the sum of $250,000; a balance spring of a watch being worth more, weight for weight, than gold. We can thus form some faint idea of the value of the English iron mines to the people of that country. Possessing not only the mines of ore and coal favorably situated, but manufacturing the crude material into every variety of forms and articles of usefulness, the mechanics of that country have gone on reaping wealth on wealth, until now, with a debt upon them which they never can expect to extinguish, the English people can yet afford to spend twenty millions in demanding the surrender of four men whom they deemed to have been illegally taken from their custody, from a nation that never dreamed of denying justice to the humblest supplicant. The strength of the English Exchequer is due to the fact that it rests upon an *iron* basis.

For years past the American people have been large consumers of English iron. Our domestic production has been irregular, owing to changes in the tariff, and financial revulsions; besides these reasons, England has had, and still has, the advantage of capital which enables her to give long credits to her customers; her establishments are of long standing, and have reaped the fruit of a regular trade. All these obstacles the American iron manufacturers have had to overcome by dint of perseverance, and thus far Americans have had no reason to complain of the result. Time will probably reveal the truth that there are many qualities of iron, the production of which will be confined to particular localities; these qualities will always be the subject of export to foreign countries. America produces no iron as yet that will flow as readily as Scotch Pig; this and many other articles of foreign manufactured irons, as Russia sheet iron, &c., will be imported into the United States, for an indefinite period to come. The following table shows the extent, in value, of the importations of foreign iron into this country, during the years 1856, '57, '58, '59 and '60.

1856....	$24,580,262
1857....	25,954,111
1858....	16,328,039
1859....	17,048,596
1860....	21,526,594

During the year 1858 there was a falling off but during '59 and '60 there was a gradual increase in importations. We have now a specific tariff, and are employing all our energies in a domestic struggle at home; both of these facts have a great influence upon the future of our domestic manufactures, and our foreign importations. One thing however is certain, industry, wealth and civilization are not permanently retarded. This war is but an accident in the history of our progress; and the cheering news which we are now receiving gives us renewed assurances that the dawn of a new peace is already at hand.

Sandusky, Mansfield and Newark Railroad.

The earnings of this road for the fiscal year ending December 31, 1861, were:

From passengers		$75,584 31
" freight....		80,537 53
" mails, express, etc....		15,590 14
		$171,711 98

And the expenses were:

Repairs of engines....	$11,049 15	
" cars....	8,122 21	
" track	49,514 59	
Train expenses	20,661 67	
Station "	13,079 87	
Shop "	1,341 73	
Fuel	11,459 48	
Oil, waste, etc.	2,166 62	
Salaries, etc.	16,706 43	
		134,101 75
Net, less taxes		$37,610 23

A comparison of the earnings and expenses with those of the preceding year, exhibits a decrease in the former of $14,222 40, and in the latter of $17,665 49—the net increase being $3,443 09. The decrease in earnings has been almost wholly in freight. The expenses have been diminished in each department, but chiefly in the maintenance of track. The expenditures in that department in 1860 were swelled in consequence of repairing the damage to roadway, bridges and

culverts occasioned by the extraordinary flood in April of that year.

The roadway and track have been well sustained; 85 tons of new iron rails have been purchased and laid, 12 tons of chairs, 6 tons of spike, and 40,581 ties; 7½ miles of the road between Plymouth and Monroeville have been gravelled, and most of the track re-built. A new side track at Hunt's Mills, 400 feet in length, has been built mostly with defective T rail. The side tracks at Newark, Mt. Vernon and Independence have been improved by using about 2,000 feet of defective T rail, in place of the strap rail tracks. The company have now on hand 51 tons of T rail which cannot be repaired, and 45 tons of strap rail not in use.

During the year 677 perches of masonry, and 1,369 feet of bridging have been built. The masonry and bents to the bridges along the road have been well protected with heavy boulders, and will now withstand any ordinary flood. There will be required to keep the road in good running order during the current year, 350 feet of new bridging, 35,000 cross-ties, 140 tons of T rail, 16,500 chairs, and 7 tons of spike.

The receipts from all sources during the year have been $171,853 50, and the disbursements $162,409 38—leaving a balance in cash of $9,464 12. Included in these disbursements is $6,300 03 for taxes; $6,003 95 for interest on domestic bonds, and $9,850 in the redemption of overdue domestic bonds. Upon this subject the report says:

"The board instructed the treasurer to pay, on and after the 25th of December last, one-half the principal of the company's outstanding domestic bonds, due July 25, 1859; it is believed the other half of these bonds will be paid within the next six months. The directors have always been united in the expediency of retiring the domestic bond debt without improper delay; they believed that every implication of good faith bound them to this course. It is hoped that these bonds will all be retired within a reasonable time, and the entire net income of the company thereafter be applied to the payment of interest on our mortgage bonds."

The number of miles run by engines has been 215,280. Through passengers carried, 1,237; way do., 188,791. Total tonnage, 41,122.

GENERAL STATEMENT.

Capital stock issued	$806,520 19
Capital stock, due receiver	42,250 00
1st mortgage bonds	1,290,000 00

Sundry accounts	15,150 57
Cash on hand	9,464 12
	$2,603,112 02

The company have 10 locomotives; 10 passenger, 5 baggage, 199 freight and 38 construction cars. The machinery department is now in effective condition. Extensive repairs, alterations and renewals have been made in the locomotives during the year. The repairs and re-building of cars have kept pace with the business wants of the road; the number rebuilt has been 22.

The office of the company is at Sandusky, Ohio. The officers and directors for the ensuing year are:

President—WM. DURBIN.

Directors—Wm. Durbin, Wm. P. Chapman, John W. Sprague, Samuel M. Robinson, Robt. McComb, H. P. Warden, Jas. E. Woodbridge, Jerome Buchingham and Jas. Lyon.

Treasurer—W. P. CHAPMAN.

Assistant Superintendent—JAS. H. STEWART.

Secretary—JOHN W. SPRAGUE.

Trade of San Francisco for 1861.

We are indebted to Wm. T. Coleman & Co.'s Annual Circular, dated Jan. 10, 1862, for the following records of the trade of San Francisco in 1861:

Our exports of treasure may be classified as follows, (separating the American from the foreign coin and bullion):

Months.	American.	Foreign.	Total.
January	$3,846,620.63	$47,200.00	$3,893,820.63
Feb'y	2,980,171.42	130,312.00	3,110,483.42
March	2,935,594.02	30.80	2,935,624.82
April	2,640,854.54	119,057.70	2,759,912.24
May	1,772,890.27	90,015.00	1,862,905.27
June	3,815,368.32	188,031.02	4,003,399.34
July	3,903,433.18	224,086.88	4,127,520.06
August	4,783,872.09	33,970.67	4,817,832.76
Sept	2,472,454.58	468,055.92	2,940,510.50
Oct	3,305,132.87	11,579.00	3,316,711.87
Nov	4,490,729.18	204,382.84	4,695,112.02
Dec.	2,151,495.47	61,430.00	2,212,925.47
Total	$39,098,616.57	1,578,141.83	40,676,758.40

Including our exports of treasure, the entire exports of the production of the State during the year 1861 may be classified as follows:

Products of the mine	$42,103,193
Products of agriculture	3,265,471
Products of the herd	1,041,217
Products of the forest	69,931
Products of the sea	21,828
Products of manufacture	962,876
Products of the vine	8,000
Total	$47,472,516

The aggregate value of exports from the port of San Francisco, of all descriptions, for the past three years, was as follows:

	1859.	1860.	1861.
Treasure	$47,640,462	$42,325,916	$40,676,758
Mer'dise	5,533,411	8,532,439	9,888,071
Total	$53,173,873	$50,858,355	$50,564,831

We may remark that the foregoing aggregates do not comprise the sum total of our remittances abroad. To these must be added the transfer drafts of government, whaleman's bills and other exchanges not predicated upon export trade, which forms a large amount every year. The former of these during the last four years have been as follows:

1858	1859.	1860.	1891.
$2,600,000	$1,700,00	$1,700,000	$1,750,000

In the export of merchandise we derive a small benefit from adverse exchange, but in the export of our principal product, treasure, to the Atlantic ports, either in Europe or America, we at present suffer a loss of three to four per cent., or about one and a half million of dollars per annum. To inaugurate some change in the treasure current, that will save at least a considerable part of this important loss, is exceedingly desirable, and we doubt not it will be attained at a distant period by the opening of steam navigation with the Asiatic coast. Then our precious metals will pass directly, and for the most part at the expense of others, into markets, to which the commerce of the world ultimately sends a very large portion by circuitous and expensive routes, and we shall receive in exchange for them merchandise or bills, possibly at rates establishing a margin in our favor, or in other words, a premium on our gold and silver.

The following are the returns of the receipts of treasure at this point from the interior, and importations from abroad, for the past three years; also the exports for the same period:

	1859.	1860.	1861.
Rec'ts from interior	$46,873,159	$45,211,693	$41,639,077
Impt's. from abroad	2,516,152	1,809,061	1,702,683
Total	$49,388,311	$47,020,754	$43,391,760
Exports	47,640,462	42,325,916	40,676,758
Gain for the year	$1,748,849	$4,694,838	$2,715,002

The actual product of our mines is not indicated fully by the above table; the receipts coastwise are not included, and amount to nearly $5,000 000 per annum; besides which are the arrivals by private hands, estimated at much higher figures, but not attainable with any degree of accuracy. The rapid growth of our city, and of all the interior towns of the state, the expansion of agriculture, with its various improvements, the opening and preparations necessary for the working of new mines, involving great outlay of capital, and the active progress of other interests throughout the State, have absorbed a larger amount than usual of our staple product.

The operations of the branch mint in this city for the past year show a great excess over the year preceding. The comparison is as follows:

	Gold Deposits.	Total Coinage.
1860, oz	587,831.93	$11,442,000
1861, oz	820,512.04	16,126,000
Total gain, oz	232,680.11	$4,684,000

Large deposits are made at the mint by parties who bring their gold with them from the mining districts, or who purchase from those that do; and such transactions elude our attention. Though embraced in the aggregate of mint returns, we have been unable to separate them and learn their relative proportions. We cannot, however, attribute the greatly increased activity at the mint to this cause solely or chiefly; it is due for the most part, doubtless to the low price of bullion, a subject dwelt upon elsewhere.

It will be seen by the foregoing that the increased coinage of silver, of which we had occasion to speak in our last annual review, has been going on still more rapidly during the past year. The following figures will give the comparison.

Silver coinage in 1860	$264,000
Silver coinage in 1861	475,000
Gain in 1861	$211,000

Our imports of treasure from abroad for the past three years were as follows:

1859	$2,516,153
1860	1,801,061
1861	1,702,683

Of merchandise on the way from various supply ports, the subjoined comparative statement, embracing the last three years, with tables found elsewhere, will furnish all the information we have to afford; the account is made up to 31st December of each year, and we give only the number of vessels bringing cargoes, not being advised of the tonnage in all cases. The statement is as follows:

	1859.	1860.	1861.
From domestic to Atlantic ports, vessels	44	34	38
From foreign ports, vessels	23	13	20
Total cargoes advised on the way	67	47	58

We do not regard the above data as adapted to cause apprehension of excessive supplies. The difference of eleven cargoes, of which seven are from foreign ports, and probably of moderate ex-

tent, and to arrive at intervals during a period of four months, can hardly effect our market unfavorably.

Receipts of merchandise from the Atlantic ports via the Isthmus of Panama for the last three years, were as follows:

In 1859.	In 1860.	In 1861.
Tons, 5,917	Tons, 8,455	Tons, 11,300

NETT VALUE *per ounce* for CALIFORNIA GOLD BARS, *deposited for Coinage—after deducting Mint charges*—for *parting* 5 cents per oz. gross, for *Silver alloy* 1-100 of the Standard weight, for *coinage* 50 cents per $100 gross value; The *nett value* in coin *includes* 5¼ *per cent. premium* on value of *Silver* parted.

No allowance for *Silver* is made *unless* the bars deposited *yield* $5 *above* the *expense of parting.*

† 950 fine will not give sufficient silver for alloy—the difference is shown by lessened proceeds in column for coin.

Army Transportation.

The Board of Army Auditors of Illinois have sent to the Constitutional Convention, now in session at Springfield, Ill., the following statements of the amounts allowed to the different railroads in that State for the transportation of troops and munitions of war.

Terre Haute, Alton & St. Louis R.R.	$7,656 84
Illinois River	192 00
Chicago and Rock Island	3,520 76
Chicago and Northwestern	5 54
Hannibal and St. Joseph	20 40
Receivers of St. Louis, Alton & Chic.	52,777 08
Great Western Railroad of 1859	86,202 18
Quincy and Toledo	7,274 57
Galena and Chicago Union	2,407 00
Chicago, Burlington and Quincy	4,110 56
Tonica and Petersburg	93 11
Jacksonville, Alton and St. Louis	87 44
Ohio and Mississippi	10,039 98
Logansport, Peoria and Burlington	7,636 85
Chicago and Milwaukee	260 58
Illinois Central	100,433 84
	$232,718 24

Cleveland and Pittsburg Railroad.

We have been favored with a copy of the Fourteenth Annual Report of the President and Directors of this company, presented at the annual meeting of the stockholders held at Cleveland on the 1st ult. From this we learn that the gross earnings during the fiscal year ending November 30, 1861, were:

	Tuscarawas Branch.	River Division.	Main Line.
From pass.	$4,069 95	$208,376 11	$164,490 42
" freight	9,231 81	337,638 80	342,007 86
" mails, etc.	1,371 43	25,321 87	22,433 15
Total Main line			$528,931 43
" River division			571,336 78
" Tuscarawas branch			14,673 19

Total earnings—

From passengers	$376,936 48	
" freight	682,254 14	
" mail	21,585 48	
" express	22,572 82	
" other sources	11,592 48	
		$1,114,941 40

And the expenses were:

Road repairs	$67,536 18	
Building "	7,577 19	
Bridge "	3,307 94	
Renewals of track	75,472 12	
" bridges	5,175 02	
Joint track repairs, P.Ft. W. and C. R. R.	28,317 99	
Fuel	56,297 09	
Oil and waste	13,424 52	
Locomotive repairs	57,454 87	
Car "	44,765 35	
Machinery "	14,071 20	
Enginemen, firemen, etc.	47,824 39	
Salaries	23 039 66	
Station services	62,917 04	
Train "	31,523 09	
Taxes	10,266 94	
Loss and damage	7,743 25	
Pittsb., Col. & Cin. Line.	5,267 67	
Service on foreign cars	14,241 67	
All other expenses	40,132 23	
		616,335 41
Net earnings		$598,605 99
Cash on hand December 1, 1860		6,880 93
		$605,486 92

Disbursed as follows:

Pittsburg, Ft. Wayne & Chicago lease.	$85,000 00
Interest on 1st mortgage bonds	65,730 00
" 2d " "	129,325 00
" 3d " "	123,235 00
General interest and exchange	6,780 89
New engines and cars	18,041 21
" bridges	27,531 51
Other expenses	4.258 15
Assets in hands of Receiver Nov. 30, 1861	45,585 16
	$605,486 92

The increase of receipts from all sources over the previous year has been $94,303 58. The Report says:

In connection with the Annual Report made a year ago, the Directors offered to the unsecured creditors of the Company, (including the holders of the River Line Bonds, Income Bonds, Dividend Bonds, and Bills Payable,) a plan of compromise. This plan proposed to assume the business of the year 1860 as a fair standard for estimating the ability of the Company to pay its debts, and after making a proper allowance for the existing charges upon the road, viz: operating expenses, rent, and interest on mortgage bonds, to determine on what additional sum the Company might reasonably expect to be able to pay interest, and to apportion this sum, so ascertained, among the creditors, according to a scale of rates, which was deemed just and equitable. Upon making the calculation, it appeared that the Company might safely promise to pay the annual interest on $1,200,000, in addition to the interest on the then outstanding mortgage bonds. The holders of the various classes of claims above mentioned, were asked to reduce their claims in the aggregate to this amount, each holder receiving security from the Company for his proportionate share, in bonds secured by a new mortgage on the road, and surrendering to the Company the remainder of his claim.

From the year 1857 to the close of 1860, the Company had labored under very serious embarrassments with creditors having security, and those who had none. The first mortgage bonds fell due in 1860. The interest on all classes of mortgage bonds was in arrears, and the holders of some of these bonds commenced suit for foreclosure. No interest had been paid on any of the unsecured indebtedness for more than three years. The large claim of the Ohio Life Insurance and Trust Company, growing out of unsettled accounts covering the transactions of several years, embarrassed the action of the Directors, and the difference in views between the managers of that institution and the directors of this Company was so great, that it seemed almost in vain to attempt a settlement. An adjustment of accounts was, however, at length made, and during the past year the terms of a settlement, which had been previously agreed on, have been complied with. By this settlement the Railroad Company paid to the Trustee of the Ohio Life Insurance and Trust Company $270,000 in the River Line Bonds of this Company, and received from him claims against this Company, amounting in the aggregate to about $75,000.

Having at length fixed the amount of the liabilities of the Company, and removed out of the way some other embarrassments, the directors were prepared to look at the whole affairs of the Company and present a plan for relief. It was under these circumstances, and with the belief that the creditors were entitled to receive all that the Company were able to pay, and with the desire to give the creditors all this, that the directors presented their plan a year ago.

This plan, which was approved by the United States Court for the Northern District of Ohio, they are now happy to say, has met with the general acquiescence of the creditors. Those who were best acquainted with the financial condition of the Company, and with its prospects, were the most prompt and ready to avail themselves of its provisions. The substantial justice and equity of the offer made by the Company has been demonstrated by the success which has attended it, and the directors have confidence that those creditors who have not yet secured that portion of their claims, for which they are offered security, will soon avail themselves of the proposition made to them.

In adjusting the details of this plan, a slight change was found necessary in that part of the proposition made to the holders of the River Line Bonds. This alteration increases by a small amount the liability of the Railroad Company, beyond the original proposition, but it is so made as to prevent any holder of those bonds from gaining any advantage by declining to accede to the arrangement. The result is, that so far as is known to the directors, almost every holder who has acquainted himself with the proposition, has acceded to it. The offer which is now made to the holders of the River Line bonds, and which has been accepted by those representing nine-tenths of those bonds, is as follows: The Company engages to pay in two years from Sept. 15, 1861, $90,000 as the agreed value of the security covered by the mortgage, with semi-annual interest, the principal and interest to be divided pro rata among the holders of these bonds. As security for the payment of this sum of $90,000, the old bonds are placed in the hands of Trustees, to be enforced against the mortgaged property, if it should become necessary. For the general claim against the Company, which remains over and above the

value of the security, and which, as the parties realize their security, remains unsecured, the holders of those bonds receive one new bond of $500, secured by a mortgage on the road, for each one of their old bonds, with the coupons attached.

The Company still propose to secure 40 per cent. of the principal and interest of the bills payable, and 30 per cent. of the principal and interest of the Income and Dividend Bonds still outstanding.

Of the indebtedness of the classes named, and which was embraced in the proposition made a year since, amounting at that time to $3,050,189 39. there has been taken up by the Company $2,220,315 27, and $793,120 43 new bonds and certificates issued therefor.

It has been the policy of the directors, for the past four years, to create no new liabilities, but as rapidly as practicable to reduce those already existing. The large cost of the road, and the embarrassments of the Company for several years past, from which they are now striving to recover, have resulted from the fact that large items of indebtedness were recklessly incurred without the means of payment being provided, and when payment could be no longer deferred, new bonds were executed and thrown on the market, and sold at ruinous rates of depreciation. In this way the cost of the road has been very largely increased, and the liabilities reached a point beyond the ability of the Company to pay. The policy which has been pursued since 1857, should in the judgment of the directors, be steadily continued, and some portion at least of the heavy loss heretofore sustained be now recovered. The proposition of compromise, when fully complied with, will reduce the indebtedness of the Company $1,800,000, but the Company will regain in this way only a portion of what they have lost in the sale of their securities.

The estimate made a year ago was based upon a gross receipt of $1,000,000, and showed the ability of the Company to pay the interest upon all the bonds secured by the three mortgages, as well as that to accrue hereafter on the new funded debt mortgage bonds. It was also estimated that the Company would be able to pay $50,000 annually, in reduction of the indebtedness secured upon the road. The directors see no reason to change their estimate of the ability of the road to earn this amount of money, and to make the annual payments as estimated. The business of the road, for the year just closed, as stated hereafter, would perhaps justify a larger estimate, but the increased receipts for the year 1861 have been brought about by causes which may be only temporary. It certainly is not safe to base calculations for the future upon them. But whether the earnings of the road shall hereafter be larger than for the year 1860 or not, it is the opinion of the directors that the whole of the earnings of the road, after paying the expenses of operation and the charges for rent and mortgage interest, should be applied to the liquidation of those debts which have full security on the road and which are now due. Otherwise, there is no assurance that the mortgages will not be foreclosed, and the whole property of the Company sacrificed. It cannot be the policy of the Company to pay any portion of their earnings on unsecured claims, and justice to those who have surrendered a portion of their debts to secure a part, would not allow a different settlement to be made with others. The legality and propriety of paying those debts which have prior liens and are due, cannot be disputed, and those creditors who have no security cannot expect to gain precedence over those who already have security.

There is now due, of debts secured upon the Road, nearly one million of dollars, and the surplus earnings of the Company, even if they equal the most sanguine expectations, will be required for some years to come to pay off these prior claims which are already due. The whole amount of bonds secured by mortgage is now about four millions of dollars, and will fall due faster than the ability of the Company to pay. We think no new bonds should be issued to replace them, but that the holders will receive the interest on them, as over-due bonds, with such portion of the principal, from year to year, as the Company has the ability to pay. This course has been pursued with the first mortgage bondholders, and in this way, and in this only, can the property of the Company ever be made of value to the Stockholders.

So well satisfied are the mortgage creditors of the soundness of the policy thus indicated, and of the speedy success of the compromise proposed and so nearly completed, that the suit for foreclosure, which was in progress, has been withdrawn, and this cause of disquietude is removed.

It will be noticed that the receipts from the business of the Road are larger than they have ever before been in the history of the Company. For the last three months of the year the business was light. It has always been the case that the receipts of the winter months have been small, but at the commencement of the year just closed, there was a larger deficiency than usual, and a loss on the previous year of $12,746.24.

When the rebellion broke out, one of the consequences was the interruption of the communication between Baltimore and the Ohio River, by means of the Baltimore and Ohio Railroad. A large amount of freight and travel, which had formerly sought that outlet, was forced into new channels, and the River Division of our Road received its share of this unusual business. It is natural that the business which was prevented passing over one route, should seek that other route which is nearest to its old channel, especially when that route is shorter than any other. The advantage of the Cleveland and Pittsburgh Railroad as a means of communication between the great states of Ohio, Indiana, Illinois, Missouri and Kentucky, and the Eastern cities, have been more clearly seen and more fully appreciated than formerly. The government of the United States has found this the most available route for the transportation of troops and munitions, from the Northwestern states to the seat of government.

The repair of the track by supplying new crossties and iron rails, has been continued during the past year, but this item of expense has been largely increased, and must continue at about the same rate. As the road has become older, these repairs have necessarily become more extensive and may be considered as an annual charge upon the Road, of a larger amount than was at first estimated. The payments for these items during the year have amounted to $61,273 24.

On the 13th day of August, in consequence of an unprecedented storm of rain, the streams on the line of our road were unusually swollen, and two bridges, one across the Big Beaver at Rochester, and the other across the Little Beaver at Smith's Ferry were carried away, with the loss of three piers at Rochester, and of an abutment at Smith's Ferry. The cost of replacing these bridges has been very heavy, and although the strictest economy has been used, the whole expense will not fall short of $50,000.

There has been no collision upon the Road, no destruction of cars or locomotives, and no loss of life among passengers.

In consequence of the increase of the business of the Company, it has been found necessary to purchase two new locomotives. Some expenses on the machine shop at Cleveland, and for the accomodation of freight business at Pittsburgh, added to the new equipment, make the total amount of these expenses about $22,000, which are not expenses of operation, and may be considered in some sense extraordinary. But, as was remarked last year, something extraordinary occurs every year, and usually something like an average can be arrived at. The rate of expenses of the year does not vary essentially from what it was last year, and about 55 or 56 per cent. may be considered the average rate of operating expenses. If the expenses for extraordinary casualties and repairs are added, it appears from the experience of the past two years that from 58 to 59½ per cent. of the gross earnings will be required,

The River division of the road has naturally received the largest proportionate increase, and for the first time since its construction, the receipts upon that portion of the Road exceed those on the main line.

The receipts from passengers and freight on the Main line have been	$511,573 50
On the River Division	551,014 91
On the Tuscarawas Branch	13,307 76

The business on the Tuscarawas Division is so small as scarcely to cover expenses, and the great expense which was laid out in the construction of that division may be considered as entirely thrown away.

In the last Report the Directors estimated an arrearage of mortgage interest equal in amount to $100,000 while the current interest accruing during the year amounted to $220,850. It appears from the account stated above that there has been paid $318,290 of mortgage interest, and the amount still due and unpaid must be very trifling. The readiness of the Receiver to pay all mortgage interest past due, has been advertised in the newspapers of Cleveland and New York, and none remains unpaid which has been presented.

The Company then commences the new year with the interest on its mortgages paid in full, with the expectation that the interest on all its mortgage bonds can be met from the earnings of the Road. If the claims which have not received their share of security shall soon be arranged, they will receive their share of the interest, but if not, the whole of the earnings of the road that remains will be applied to paying those claims which have a priority.

The financial condition of the Company as it was at the close of the fiscal year, Nov. 30, 1861, appears from the following statement:

	Dr.
Construction account	$8,172,139 97
Telegraph line	16,913 72
Personal property	29,318 58
Balance of personal accounts	22,777 82

The equipment of the road consists of 45 locomotives; 29 first class, 1 second class, 5 express and 13 baggage and mail cars; 9 freight train way cars; 335 house freight, 425 platform and gondola, 57 gravel, 31 hand, 20 ditching and 1 wrecking car.

The number of miles run by passenger trains on main line has been 156,203; by freight trains, 159,104. By passenger trains on River division, 184,659; by freight trains, 144,529. By passenger and freight trains on Tuscarawas branch, 20,846. By all other trains, 135,184—total miles run, 800,525, an increase over the previous year of 54,013 miles.

The number of local passengers carried was 216,789; through passengers, 50,493; troops, 30,429—total, 297,711. The mileage of local passengers was 8,041,593; of through passengers, 3,158,880; of troops, 3,523,439—total mileage of passengers, 14,723,912. Number of tons carried one mile, 91,545,830.]

President and Sup't—J. N. McCULLOUGH.

Directors—J. N. McCullough, Wellsville, Ohio; James F. Clark, James Farmer, Henry W. Clark, Cleveland, Ohio; W. W. Holloway, Bridgeport, Ohio; B. P. Drennen, Steubenville, Ohio; Henry C. Kingsley, New Haven, Conn.; D. C. List, Wheeling, Va.; J. Pennock, J. H. Schœnberger, B. Preston, Pittsburgh, Pa.; H. A. Johnson, New York.

Sec'y and Treasurer—EDWARD ROCKWELL.

Oshkosh and Wausau Railroad.

A meeting of the stockholders of this road was held at Oshkosh on the 16th ult., and a board of directors chosen. The officers elected are: President T. J. Townsend; Vice-President, C. G. Finney, Jr.; Secretary and Treasurer, Evan Townsend; Engineer, Robert Campbell.

Canal Boat Building.

According to a statement in the Buffalo *Express*, the yards in that city are doing more than ever before. There is now finished and in process of construction at the several boat yards, thirty canal boats, four canal steamers and two steam tugs, making thirty six in all; which number will probably be increased to sixty or over before the opening of navigation, giving constant employment to about three hundred and forty men.

The number of canal boats navigating the New York State canals is 3,025, of which 1,700 are old style boats, with small carrying capacity, and 1,300 are of the enlarged class, adapted to the enlarged canals. The activity of boat building at the various places on the line of the canals will probably add before the first of June next about 300 more boats of the enlarged class, which will give an increased carrying capacity for the coming navigation season equal to about 14,000,000 bushels of grain.

Finances of St. Louis County.

The quarterly statement of the Treasurer of St. Louis County was laid before the Board of Commissioners on the 14th inst. It is as follows:

Balance in Treasury Nov. 1, 1861....		$127,593 52
Receipts from November 1, 1861, to February 1, 1862....		334,306 62
		$461,900 14
Bond and Interest remittances to New York, to February 1, 1862.....	$233,407 00	
Exchange paid on same..	11,687 50	
County Warrants paid....	60,262 42	
Jury Certificates paid....	2,019 36	
		307,376 28
Leaving balance cash in Treasury Feb. 1, 1862....		$154,523 86

The Board of Commissioners have ordered the County Treasurer to remit funds to New York to meet the unpaid balance of bonds due last December, together with the interest. The balance is $500 on each bond, and $8 75 interest to March 1, 1862.

Finances of Maine.

The report of the State Treasurer of Maine, presents in a concise manner the State receipts and disbursements of 1861.

Total receipts for civil purposes....	$385,712 33
" " " war "	1,003,087 50
Aggregate receipts for 1861...	$1,388,799 83
Am't of expenditures for civil purposes	358,527 02
Total do. for war "	998,578 17
Aggregate expenditures for 1861	$1,357,105 19

The receipts for 1862 are estimated at $415,306 57, of which $222,580 56 are balances due on State tax; $75,000 bank tax; $30,000 from land office, &c.

The estimated expenditures for 1862 amount to $418,063 54. Some items in this estimate are: interest on public debt, $888,600; (last year it was $89,880;) military purposes, $5,000; military pensions, $2,500; furniture and repair of public buildings, $2,500. &c.

The resources of the State are set down at $405,168 98, and the total liabilities at $1,987,398 58. The $30,000 State debt which became due March 1, 1861, was not paid, but renewed. Another $30,000 becomes due the first of March next, and the Treasurer recommends that it be paid; also the $50,000 which falls due March 1, 1863. To effect this a State tax of $300,000 will be required. He also favors the assumption of the United States direct tax and the payment of it by the offset of that amount of war claims against the United States Government, which the law provides may be done.

The National Finances.

The following extract from the Circular of a well-known House in this city will be read with interest, in connection with the condition of the country, however much it may be differed from by parties necessarily formed in reference to the financial policy of Government.

The military successes of the week past have removed all doubt of a speedy and complete overthrow of the rebellion. It is plainly seen to be utterly incapable of resisting the immense forces brought against it. The authority of the United States will soon be re-established in every part of the country as fast as our forces can move; and we do not expect to see their movement materially checked by any amount of resistance that may be offered. The integrity of the Union, as far as this can be effected by force, is virtually restored.

The value of the triumph of our arms cannot be overestimated. It is political salvation; and upon this depend all other interests. But military is not necessarily followed by financial success, although the former is indispensable to the latter. A victory is not equivalent to a tax bill, or a sound system of finance. This may leave the public Treasury empty. The finances of the country rest upon something absolutely different. Unless the basis for a sound system be speedily provided, we shall find ourselves suffering, even in the moment of victory, what should be only one of the consequences of defeat. We greatly fear, that by an inadequate system of finance inaugurated at the very commencement of success, we are throwing away much of the advantage which this should bring us.

The passage of the Treasury Note Bill, may be considered as inaugurating the era of Paper Money—of a currency whose volume bears no necessary relation to that of commercial transactions, but henceforth to be in ratio to the wants of government, by which it is created as a substitute for capital it has found itself unable to borrow. We have been favorable to an issue of Treasury Notes as a means of anticipating taxes to be levied, and as a part of the machinery for their collection; but never as the means of wringing from the people a forced loan; nor as a circulating medium, except so far as this, like other symbols, should be based upon actual values—upon a national tax equal in amount to the notes issued, and payable in them. A sound paper currency is nothing less than the title deeds to capital or merchandise which may be gold, and which must be its equivalent, to the nominal value of the symbol. Treasury Notes based upon a tax presently due would have so far possessed the attributes of a sound currency to serve as such, to the public benefit, and might have been made to anticipate the collection of the tax, and in this way bridge government over its present strait. But the present issue is quite another measure. It stands alone. No Tax is provided, nor will it be for some time to come. The notes issued are to be *legal tender* in all contracts. This clause was inserted for the express reason, that without it, the public would not take them. No other alternative but a forced loan appeared possible to the chief of the Treasury, and he urged his wants so strongly upon Congress, that he succeeded in overcoming it scruples, and it yielded to the argument of imminent necessity.

The step taken will, if persisted in, prove the parent of every possible evil in finance and in domestic economy. Treasury Notes are not money, nor can they be made money. They are securities whose market value depends entirely upon popular estimate. They can be converted into money to-day at four per cent. discount. In a week more they may be at ten per cent. discount; in a month, twenty. It is probable that as far as gold is concerned, they will eventually be at the same discount as the six per cent. bonds of Government into which they are convertible. These are now selling, nominally, at ninety; or for gold, at eighty-six, or fourteen per cent. discount. Treasury Notes are worth no more. As the bonds fall, so will the notes. Government 6's in July were selling at 83, with only a very small amount on the market. With the vast amount of securities of one kind or another which Government must soon issue, it is altogether probable that these may go to a figure much lower than has yet been touched. Treasury Notes will fall very nearly in similar ratio; so that the currency, which as the general measure of value, should, of all things, be uniform in volume and value, will be subject to constant and excessive fluctuations. The idea that the dictum of a legislature can override natural laws, and create values where none before existed, is one of those fallacies which we supposed had long since been driven out of the heads of our people. But it seems that such has not been the case; for the whole argument in favor of the measure has proceeded upon the assumption, that the stamp, or effigy of Government, whether impressed upon a bar of gold or a sheet of paper, raised each to similar dignity and value!

The next question is the effect of the measure. It takes out of every man's pocket who may have a debt owing him, the discount on the depreciated currency. To-day it is four per cent. In a month it may be ten. The banks in this city, the officers of most of which have been the earnest supporters of the measure, have bills receivable, perhaps to the amount of $80,000,000. If these are paid, as they certainly will be, in Treasury Notes, the banks at the present rate of discount, will lose $3,200,000. By a further decline which is inevitable, they will more probably lose $10,000,000. Every trust estate, with the present decline, will lose a sum very nearly equal to the interest for a year. A bank that to-day discounts a note on 90 days will unquestionably lose, from the rapid depreciation of the currency in which it will be paid, a larger sum than the accruing interest. This currency, having no adequate means for its retirement, will insinuate itself into every receptacle of capital; and will be the form and substance into which every contract will resolve itself, till whatever a creditor may have will, in the end, be expressed in Treasury Notes—for we take it that the present issue will be followed by others, according to the wants of government. Long before the Secretary of the Treasury can issue the batch of $100,000,000 just provided, he will be precisely in the same strait in which he was before the present bill becomes a law. There will be vast demands against the Treasury with nothing

wherewithal to pay, but with the moral position of Government greatly weakened from the false step that has been taken. The legal tender clause will have the necessary effect to put up the price of gold. This has already advanced one per cent. since the bill passed the House. Every day consequently is the return to a sound system of finance more and more difficult. The tendency of Government Securities, compared with the gold standard, the only true one, will be steadily downward. With his ordinary resources failing him, the Secretary of the Treasury will be under a necessity to ask for more notes—a necessity similar to that which he fancied recently existed, only a great deal more imperative. Our national credit will have been soiled. Capitalists will have become disgusted with the spoliation committed upon them. From the existence of two currencies, or standards of value, serious complications and embarrassment will arise in commercial circles, impairing in an equal degree the ability of the country to pay.

The suspension of specie payment in England took place in 1797, and continued till 1822, a period of 25 years. The price of gold fluctuated very largely throughout this period. The following statement will show its price, payable in Bank of England Notes, for seven years commencing in 1809, and ending in 1815:

	Mint, or intrinsic value of gold.			Market price, payable in Bank of England notes.			Per-centage of premium paid.
	£	s.	d.	£	s.	d.	
1809	3	17	10½	4	10	9	16 1-3
1810	3	17	10½	4	5	0	9 2-16
1811	3	17	10½	4	17	1	23 1-2
1812	3	17	10½	5	1	4	20
1813	3	17	10½	5	10	0	41
1814	3	17	10½	5	1	8	30 1-2
1815	3	17	10½	4	12	9	19

The moment suspension took place, the Bank notes lost the attributes of money, and became a commodity, convertible into money only by sale, like any other articles of merchandise. Nothwithstanding the discount to which bank notes fell, they approached much nearer money than the Treasury Notes of our government. They were in the first place, amply secured by a deposit of public securities. The Bank had, on an average specie, equalling 25 per cent. of the amount of its bills in circulation. The Bank had all the reputation and prestige attached to it that could be given by the government, which was all powerful, sustained as it was, by the united voice of the nation, struggling as it was believed, for existence. Although the bills of the Bank were not directly made *legal tender*, they were practically, and constituted the currency of the country. All government dues were made payable in them. But in spite of the efforts of the government, the value of bank notes found their level in reference to gold, just as any other article of merchandise—a value dependent upon cost or worth; and which a legislature is just as incapable of regulating, as it is of the weight of material substances. Without any provision for their payment the value of the notes now issued will sink to the level of other government securities when sold for gold.

The Bank of England did not resume specie payment till more than seven years had elapsed after peace was declared. All this time was consumed in collecting specie and in taking in its notes. In 1815, the first year of peace, the Bank had commercial bills under discount to the amount of £14,947,000; and notes in circulation to the amount of £27,248,670. In 1822, the discounts were reduced to £3,366,700, and the bills in circulation to £18,665,350. The bullion in the Bank in 1815 was £2,136,910; in 1822 £11,057,150.

TABLE showing the Specie in Bank, and the Circulation and Deposits of all the Banks in the United States, from 1811 to 1859, included.

YEAR.	Specie in Bank	Specie in Bank to each person of population.	Bank currency, or Deposits and Circulation.	Bank currency to each person of population.	Percentage of specie to Bank currency.

PRICES AT THE N. Y. STOCK EXCHANGE FOR 1859, '60 AND '61.

Below we give the highest, lowest and average quotations for 1859, 1860 and 1861, at the New York Stock Exchange for the Stocks most largely dealt in. The fluctuations have been very great, and being produced by causes, bearing unequally upon different portions of the country, show extraordinary changes in relative prices. Bonds of Southern and Border States have suffered a very great decline; on the other hand, railroad shares in the Loyal States have shown a great improvement over 1859, and under the influence of the success of the Union cause, have reached extraordinary high figures, which may be regarded as excessive for peace prices, and higher than can be maintained. The figures are from the Circular of Thomas Denny & Co.

American Railroad Journal.

Saturday, February 22, 1862.

☞ Railroad Companies will oblige us by sending us copies of their Reports as soon as they are issued.

Share and Money Market.

The anomolous condition of affairs at Washington has its natural effect upon the Stock Market, in producing a decline after a considerable advance, following military success. It is, at the time of writing, this, uncertain whether the legal tender clause will be inserted in the Treasury Note Bill. Other important provisions are still under discussion. The addition of $150,000,000 to the currency of the country, which the bill proposes, will have an immense influence in every department of business, and while the result is uncertain, everything naturally remains in abeyance. The market for railroad shares is weaker. Money is very abundant. There has been a very important advance in Border State Stocks, the successes of the Federal Arms in these States being regarded as tantamount to their restoration to the Union. Exchange is fluctuating for the reasons stated. Upon the passage or rejection of the bill now before Congress, the Share and Money Market will assume a more definite policy. As it is, everything is afloat.

The Oswego and Syracuse R.R. Co. has declared a semi-annual dividend of 3 per cent., payable to stockholders in this city on the 20th instant, by the transfer agent, Mr. H. A. Oakley, at the office of the Howard Insurance Company.

The Panama Railroad Company has resolved to pay dividends in future, quarterly, commencing April, 1862.

The La Crosse and Milwaukee Railroad is advertised, by the United States Marshal for Wisconsin, for sale May 22, 1862. The bonds are received in part payment of the purchase. We understand that the party represented by N. A. Cowdroy and others have over $3,600,000 out of the $4,000 000 mortgage, on the foreclosure of which the sale is made.

The New York Central transfer books reopen on Monday, the 24th inst.

The Railways of the World.

We commence this week the re-publication of an article upon this subject, from the columns of the London *Engineer*. From it we learn that the actual extent of railways now open throughout the world is probably about 70,000 miles; and the capital expenditure nearly $5,850,000,000. This enormous sum has almost wholly been raised and expended within twenty-five years. Of this capital, Great Britain and her Colonies have consumed $2,085,000,000, or about three-eighths of the whole amount, the miles of open railways on which it has been expended being 14,277. On the Continent of Europe about $2,382,000,000 have been expended on 22,592 miles of open railway. On the continent of North and South America, exclusive of British possessions, about $1,377,000,000 have been expended on 32,102 miles of open railway. Of the amount included in the sum attributed to Great Britain and its Colonies, India has spent 173 million dollars on 1,408 miles of open railway, and upwards of 102 million dollars has been expended in Canada on 1,826 miles of open railway.

France has spent upwards of 922 million dollars on 6,147 miles of open railway; Prussia upwards of 220 millions on 3,165 miles; Spain 130 millions on 1,450 miles; Italy 125 millions on 1,350 miles; Russia 215 millions on 1,289 miles; Belgium 90 millions on 955 miles; Switzerland 50 millions on 600 miles; Egypt 20 millions on 204 miles; the United States $1,192,000,000 on 31,800 miles; Brazil 26 millions on 111 miles. We shall give the remainder of the article in our next issue.

Railroad Earnings—Monthly.

The earnings of the Erie Railroad for the month of January, 1862, were..... $695,606 98
Do., 1861 ..... 404,507 55

Increase..... $291,099 43

The earnings of the Norwich and Worcester Railroad for January, 1862, are as follows:

Passengers $8,122 33
Freight 13,946 68

Total..... $22,069 01
1861 ..... 16,260 13

Increase $5,808 88

Valuation of Property in Iowa.

The following table gives the valuation of town property in some of the principal counties, for the years 1860–1:

	1860.	1861.	Decrease.
Dubuque.....	$3,232,867	$2,698,276	$534,291
Lee.....	3,364,040	2,873,633	490,407
Scott.....	3,304,968	2,244,602	1,060,366
Desmoines....	2,215,330	1,990,473	224,857
Polk.....	1,903,033	1,331,800	571,233
Muscatine	1,346,663	1,025,458	321,209
Clinton.....	1,481,807	931,159	550,648
	$16,908,712	$13,096,401	$3,731,011

We presume there will be no important change in this class of property during the present year, and, perhaps, not for several years to come.

The Auditor's report for the year 1861, shows the following statistics in reference to Scott county:

	1860.	1861.
Acres of land assessed ...	282,851	283,688
Value of land.....	$3,494,386	$2,886,188
Value of town property ..	3,804,968	2,244,602
Value of personal property	911,300	1,011,593
Value of land per acre....	.....	8 41
Total valuation	7,710,764	5,642,328
State tax.....	11,528	11,284

The land of Scott county was assessed higher than that of any other county in the State, with the exception of Lee county.

Lee county	$8 45	Dubuque county.	$7 49
Scott county	8 41	Des Moines co..	8 21
Muscantine co....	7 30	Clinton county...	6 45
Henry county	7 20	Cedar county ...	6 40
Van Buren county	7 48	Washington co...	7 11

Dickinson county lands were assessed at $1 70 per acre—the lowest in the State.

Debt of Illinois.

EXECUTIVE DEPARTMENT,
Springfield, January 21, 1862.

Hon. W. A. Hacker, President of the Constitutional Convention:

SIR: In reference to a resolution of the Constitutional Convention, "That the Governor be requested to furnish this Convention with the amount and description of all the indebtedness of this State, whether funded or unfunded, and the period when the same shall become due," I respectfully submit the accompanying statement.

I have the honor to remain, &c.,
RICHARD YATES,
Governor of Illinois.

STATEMENT OF STATE INDEBTEDNESS.

Bonds or certificates of bank and internal improvement stock, dated July 31, 1837, reimbursable at the pleasure of the State after 1860 ..	$31,000 00
Bonds or certificates of Illinois internal improvement stock, dated July 1, 1838, reimbursable at the pleasure of the State after 1870.	11,000 00
Bonds or certificates internal Illinois improvement stock, dated July 1, 1839, reimbursable at the pleasure of the State after 1870...	10,000 00
Bonds or certificates Illinois improvement stock, dated May, 1840, reimbursable after 1870	21,000 00
Illinois and Michigan canal bonds, appropriated towards completing the N. C. R. R. from Jacksonville to Springfield, dated July 1, 1837, reimbursable at the pleasure of the State after 1870	4,000 00
Internal improvement scrip, issued by the Board of Commissioners of Public Works, March, 1840, and scrip issued by the Board of Auditors, 1841, payable at the pleasure of the State	20,877 50
Liquidation bonds, issued under an act to prevent loss to the State upon the McAlister & Stebbins bonds, approved February 12, 1849, reimbursable at the pleasure of the State after 1865	250,590 21
Certificate internal improvement stock, issued under the provisions of an act to authorize the refunding of the State debt, approved February 28, 1847, payable at the pleasure of the State after 1870	2,048,356 70
Interest bonds new internal improvement stocks, payable at the pleasure of the State after 1877..... ..	1,382,966 16
Interest stock issued under the provision of an act to fund the arrears of interest accrued and unpaid on the public debt of the State of Illinois, approved February 18, 1857, reimbursable at the pleasure of the State....	786,223 59
Certificates for arrears of interest...	1,363 83
New refunded stock, issued under the provisions of an act in relation to the payment of principal and interest of the State debt, approved February 22, 1859, reimbursable at the pleasure of the State after 1860.	33,000 00
Same 1862	803,000 00
Same 1865	21,000 00
Same 1869	209,000 00
Same 1870	295,000 00
Same 1876	109,000 00
Same 1877	822,000 00
Bonds issued under the provisions of an act to refund the interest on the College or University fund, &c., approved February 14, 1861, and an act supplementary thereto, approved February 21, 1861, to the Board of Education, for the use of the Normal University, reimbursable at the pleasure of the State, after 1879	650,000 00
Bonds issued under an act to provide for the payment of certain awards in relation to the Thornton loan, approved February 21, 1861, after 1879....	159,000 00
War bonds, issued under the provisions of an act creating a war fund, &c,, approved May 2. 1861, payable after 1879	1,029,400 00
	$7,604,072 99
Illinois and Michigan canal stock—	
Registered bonds....	$2,224,763 88
Not registered	1,525,654 77
Of these canal bonds about $2.000,000 are reimbursable after 1870..	2,000,000 00
The balance, say $1,770,418 65 are reimbursable in 1860	1,770,418 65
Illinois and Michigan canal interest certificates not registered	19,513 38
Canal indebtedness, Governm't scrip	4,039 02
	$11,398,044 04

(122 of the Macalister and Stebbins bonds outstanding are not included in the above statement.)

RECAPITULATION.

Stocks past due and payable at the pleasure of the State	$872,464 12
Canal	1,793,971 05
Stocks payable at the pleasure of the State after 1861....	830,000 00
Stocks payable at the pleasure of the State after 1862....	271,890 21
Stocks payable at the pleasure of the State after 1869.....	209,000 00
Stocks payable at the pleasure of the State after 1870	4,389,351 70
Stocks payable at the pleasure of the State after 1876.....	109,000 00
Stocks payable at the pleasure of the State after 1877	1,704,966 16
Stocks payable at the pleasure of the State after 1879	1,244,400 00
	$11,398,044 04

(From the London Engineer.)

The Railways of the World.

Great Britain and Ireland.—On the 31st December, 1860, the length of railway open and in use in the United Kingdom was 10,433 miles. The total amount of capital raised for their construction, and including that raised for lines then in progress, was £348,130,827. During the past year upwards of 300 miles of new line have been opened; so that the total present length of British railways cannot be far from 10,750 miles, nor their cost less than £355,000,000. The total traffic receipts for 1860 amounted to £27,766,622, and working expenses to £13,187,368, or to 47 per cent. of the receipts. 163,435,678 passengers were carried, besides, 60,386,780 tons of minerals, and 29,470,931 tons of general merchandise. The train mileage for the year was 102,243,692 miles run. The working stock consisted of 5,801 locomotives, 15,076 passenger carriages, and 180,574 wagons. Of the 10,433 miles of railway open, there were 7,583 miles in England and Wales, 1,486 miles in Scotland, and 1,364 miles in Ireland.

India.—According to the reports of Mr. Juland Danvers, 842 miles of railway were open in India at the end of 1860, and of 2,932 1-2 miles then in progress, 1,353 1-2 miles were expected to be opened in 1861. The total railway guarantees had been for £56,000,000, but the construction of certain lines and portions of lines having been postponed, the amount to be expended under guarantee was £49,000,000, of which sum £34,396,445 had been raised up to April 30th last, the end of the Indian official year.

Nothing like the amount of line expected to be opened this year has been completed. The East Indian Railway Company had 458 miles open at the date of their last report, viz, 248 miles in Bengal and 210 miles in the North west Provinces. Mr. Turnbull, the Company's Engineer in Bengal, and who has, from the first, been most punctual in keeping his engagements with the shareholders, had promised to open 50 miles, to Colgong, and 24 miles further to Bhaugulpore, in the course of the year just expired, besides 33 miles to Monghyr in the course of the present month, and 106 miles more to Patna in June next.

The Great India Peninsula Railway Company have 437 3-4 miles of line open, and it is understood that 13 miles of the Bhore Ghaut incline are to be opened this month. The opening of the 19 miles of this incline will be equal in importance to that of any 300 miles of the rest of the line.

The Madras Railway Company, at the date of their last report, had 252 miles of line open, viz, 224 miles westward from Madras, and 28 miles eastward from Beypoor, on the Malabar coast.

The Bombay, Baroda, and Central India Railway was open, at the date of the last report, for a length of 132 1-4 miles, from Doolia to Bulsar. The line for 23 miles northward to Neriad was expected to be open by the first of this month. The whole line of 313 miles will, it is expected, be opened for £3,130,000, or £10,000 per mile. This line, it will be recollected, was pronounced impracticable by Robert Stephenson. The East Indian Railway, of the practicability of which there has never been any doubt, is now estimated to cost £16,000 per mile.

The Scinde Railway, 114 miles long, is open throughout.

The Great Southern of India is open for a length of 14 miles.

It appears, therefore, that, up to the date of the last advices, 1,408 miles of railway were open in India, and we have reason for supposing that at least 110 miles more are now open.

The Eastern Bengal line is expected to be open early this year.

About one-half of the Calcutta and South Eastern, a line about 30 miles long, was expected to be opened by the beginning of this year, and the whole line would, it was thought, be opened in the course of the spring. The Indian railways are of 5 ft. 6 in. guage.

Canada.—The extent of the Canadian railways has been somewhat overated by including with them a considerable length of line leased by the Grand Trunk Railway Company, in the States of Maine and Michigan, U. S. Thus, a year ago, in an address delivered at the Institution of Civil Engineers, the length of Canadian railways was set down as 2,093 miles, which is considerably in excess of the length of line now open.

The Grand Trunk railway is, by the last report, 885 miles in length in Canada, besides the 149 miles of the Atlantic and St. Lawrence Railroad, in Maine, U. S., leased to the Grand Trunk for 999 years, and 59 miles of the Detroit and Port Huron Railway, also leased by the company in Michigan, U. S. Thus the whole length now worked by the Company is 1,093 miles, although, as the Riviere du Loup branch, 110 miles long, has been, "farmed out" at a loss, the mileage given in the weekly traffic returns is 970. Of the whole capital account of £11,888,454, £429,772 stood at the last report to the credit of the account, and nearly £350,000 had been expended on the Atlantic and St. Lawrence leased line. The cost of the Grand Trunk, in Canada, may be set down therefore at £11,000,000, or £12,430 per mile, including the Victoria bridge, the cost of which, up to June 30th last, had been £1,356,021.

The Great Western of Canada is 229 miles long, from Suspension bridge, near Niagara Falls, to Windsor, opposite Detroit. The Sarnia branch, from Komoka, beyond London, to Sarnia, is 51 miles

long; the Toronto Branch (from Hamilton) measures 39 miles, while the Guelph and other short branches make up the total length to 357 miles, the capital account, by a late report being £4,976,049.

The Buffalo and Lake Huron line is 161 miles long; the Northern of Canada, with a short branch to Bell Ewart, is 96 miles long; the Montreal and Champlain line, with the Caughawaga branch, is 81 miles long; the Ottawa and Prescott, 54 miles; Brockville and Ottawa, 48 miles; London and Port Stanley, 24 miles; Welland, 25 miles; Coburg and Peterboro', 28 miles; Erie and Ontario, 17 miles; and Port Hope, Lindsay, and Beaverton Railway, with Peterboro' branch, 50 miles.

Thus the total length of Canadian lines now open is 1,826 miles, and, if we take the cost of the lines other than the Grand Trunk and Great Western at £8,000 per mile, we shall have (584 miles, £4,672,000) £20,648,049 as the total railway investment in Canada. The earnings on this sum are not much more than enough to cover working expenses.

In 1859 an official return showed that 1,578 miles of railway were open in Canada, the locomotives in use being 366 in number. The Grand Trunk had, at the date of a recent report, 212 engines, besides 41 on the Atlantic and St. Lawrence division, and 5 on the Detroit and Port Huron line. Of the 366 locomotives in Canada, on the 1st of January, 1859, 47 had been made in the province, while 209 had been made in the United States and 110 in England, both those made in the United States and here paying an *ad valorem* duty of 12 1-2 per cent. on their importation into the province. Nine-tenths of the length of the Canadian railways are of 5ft. 6 in. gauge, the rest being 4 ft. 8 1-2 in.

New Brunswick.—The European and North American Railway is open for 110 miles from St. John's to Shediac, and the cost may be put down at £700,000. The New Brunswick and Canada Company had 65 miles of line open at the date of a recent report, the cost having been £350,000. Additional sections were about to be opened.

Nova Scotia.—The Nova Scotia Railway, from Halifax to Truro, is 61 miles long, and the Windsor branch 38 miles long, making 99 miles in all, costing, say, £1,000,000, and worked by 20 locomotives, mostly by Neilson, of Glasgow.

Victoria.—Eight short lines of railway now radiate from Melbourne, viz, to St. Bilda and Brighton, 8 miles; to Sandridge, 2 1-2 miles; Melbourne and Williamstown, 9 miles; Melbourne and Geelong, 47 miles; Melbourne and Sunbury, 46 miles; Melbourne and Essenden, 4 1-2 miles, and two short suburban branches of 7 miles. The Sunbury line has, we believe, been extended to Woodend, a distance of 28 miles from Sunbury, and it was some time since promised that the Geelong and Ballarat line, 53 miles long, would be opened in 1861. In this case, 205 miles are now open. The expenditures of the Victorian Government, on account of railways, had been £7,828,233 up to the 1st of January last, and it was estimated that £2,050,000 would be expended during the year 1861. In the mean time the works on the Melbourne and Mount Alexander line, 152 miles long, of which 50 miles, via Sunbury and Woodend, are already open, are in active progress, and the estimated cost is no less than £34,000 per mile. The Victorian lines are of a gauge of 5 ft. 3 in. (Irish gauge.)

New South Wales.—From Sydney three important lines of railway will radiate in directions expressed by their names, viz, Great Southern, Great Western and Great Northern. The Southern line, ultimately to be extended to the Murray river, to join the Victorian railways, is completed via Paramatta and Campbelltown to Picton, a distance of 54 miles. From Sydney to Paramatta, 13 1-2 miles, the cost had been £40,000 per mile, for a double line, and thence, with a single line to Picton, the cost has averaged £10,000 per mile. The works are in progress (under a contract with Sir S. M. Peto & Co.), on the extension to Goulburn, but the cost will be very great. The Western line, leaving the Southern near Paramatta, is open, we believe, to Penrith, a distance of 20 miles. Hence, it is to be extended across the Blue Mountains to Bathurst, on the River Lachlan, one of the principal tributaries of the Murray, which flows many hundred miles westward, finally emptying itself in Encounter Bay. The Northern Railway commences at Newcastle, 60 miles north of Sydney, and has been opened, we believe, to Singleton, a distance of 51 miles. This line is to be extended up the River Hunter to Muswellbrook, a distance of 70 miles. Sir S. M. Peto's contracts for the Goulburn, Bathurst, and Muswellbrook extension, 218 miles in length, cover work to the value of £4,000,000. The lines completed measure 125 miles, and their cost has been about £1,750,000. The New South Wales lines have a gauge of 4 ft. 8 1-2 in.

South Australia.—Railways are open from Port Adelaide to Adelaide, a distance of 3 1-2 miles, and from Gawler to Kapunda, 16 miles. The cost has probably been about £100,000.

Cape of Good Hope.—Of the Cape Town Railway, which will extend for 56 miles to Wellington, the first 28 miles from Cape Town to Stellenbosch were to have been opened by the end of 1861. The capital of the company, upon which a 6 per cent. guarantee is given, is $500,000. A line of 8 miles, to cost £100,000, has since been projected from Cape Town to Wynburg.

New Zealand.—The Christchurch and Lyttleton Railway, to be 6 miles long, and estimated to cost £240,000, has been commenced. A long and difficult tunnel is to be driven, which accounts for the great comparative expense. A line of railway is in progress, also, out of Nelson.

Ceylon.—A line is in progress.

Demerara.—A short line has been open and in use for some time.

CONTINENTAL RAILWAYS.

France.—At the end of 1860 the Minister of Agriculture, Commerce, and Public Works, reported the length of railways open as 5,778 miles, their cost having been £184,440,000, of which £32,440,000 had been contributed by the State and £152,000,000 by companies. The gross receipts for 1860 were £16,320,549. 430 miles were set down for completion in 1861. At the end of September last the whole length of line opened was 6,147 miles, of which 4,347 miles belonged to the old, and 1,800 miles to the new *reseau*. The receipts for nine months had been £13,318,462, or at the rate of £17,797,949 per annum. The new *reseau*, now in course of execution, is to include 5,318 miles, at an estimated cost of £123,400,000, or £23,200 per mile. An expenditure of £14,000,000 was authorized last year. The lines of the Bourbonnais, 420 miles in extent, are reported to be nearly complete. The lines open in France on the 1st of January, 1858, were worked by 2,624 locomotives, and at the present time the number in use, doubtless, exceeds 3,000.

Prussia.—By an official report, made up to the end of 1859, there were 8,162 miles of railway open and in use, the cost of which had been £44,080,000, equal to £13,940 per mile. The gross receipts for 1859 were £5,399,440, and of this the working expenses absorbed 46 per cent. The average dividend paid was 5.36 per cent. 19,279,668 passengers were carried, exclusive of soldiers, and 11,904,761 tons of merchandise were also carried. The Berlin and Breslau, Eastern and Westphalian lines, have been constructed by the State. The eastern line, from Frankfort on the Oder to the Russian frontier, is 450 miles long, or, including the Danzig branch, 466 1-2 miles. It is now under the consideration of the Government to construct a coast line from Danzig, *via* Stettin, to Hamburgh. There is not, we believe, a railway tunnel in all Prussia.

Austria.—The principal railway undertaking in Austria is that of the South Austrian, Lombardo-Venetian, and Central Italy Railway Company, whose lines, it is true, extend somewhat beyond Austria. The whole length of this company's line now open is 1,294 miles, including the Vienna and Trieste line and short branches, altogether 380 miles long. At a recent date, when 1,248 1-2 miles had been opened, there were the Trieste line, just given, the line from Pragerhof to Ofen, opposite Pesth, 205 miles long, besides the branch of 50 miles from Stuhlweissenburg to Comorn; 136,1-2 miles in the Tyrol; 230 miles in Venetia; 156 miles in Lombardy, and 91 miles in Central Italy. At the end of 1860 the company's capital expenditure had been £16,621,802, or £13,311 per mile. At the same time, 648 1-2 miles of the company's concessions remained to be completed.

The Emperor Ferdinand's Nordbahn and the Eastern State Railway extend north-easterly from Vienna, skirting the Silesian-Prussian and Russian frontiers, and reaching 121 1-4 miles east of Cracow far into Galicia. The whole main line is 380 miles long, and, with the Bohm-Truban and Troppan branches, is 464 miles long. Its cost has probably exceeded £8,000,000.

The Austrian State Railways, sold some years since to a French company, comprise three lines, one from a station on the Emperor's Nordbahn, 51 miles from Vienna *via* Prague to the Saxon frontier; another line (from another station on the Nordbahn), *via* Pesth to the Danube at Basiasch, and a third line from Vienna to Raab and Comorn. These three lines are 828 miles in length. The capital expenditure by the last report was £16,121,658.

The Thiess (Hungarian) lines are open from Czegled, 178 miles, to Miskolez, with branches to Arad and Grosswardein, 93 miles and 41 miles, respectively, in length, or 312 miles in all. The cost may be estimated at £3,000,000.

The line towards Munich, *via* Linz to Salzberg, is 195 miles long, the Passau branch being 51 miles more. The cost of these lines may be set down at £4,000,000.

Besides the main lines named there are 320 miles of short railways, and branches other than those already enumerated. The cost of these may be put at £2,000,000, upwards of 120 miles being horse railways, one of which, the Linz and Budweis, 80 miles long, was opened as early as 1828.

Thus we have for Austria, and including that portion of the South Austrian Company's line beyond the empire, 3,465 miles of railways, at a cost of £19,743,460.

Other German States.—It is difficult to separate the railways of the various German States from each other. Indeed, several of those already included in the mileage set down for Prussia are partly in Mecklenburg, Hanover, &c., the states and principalities in the German Confederation being intermingled, so to speak, like many of our counties, as, for example, East Barnet, on a peninsula (if we may employ the term) of Hertfordshire extending into Middlesex; Dudley, belonging to Worcester, but forming a sort of island by itself in Staffordshire; Hale's Owen, really in Staffordshire, and miles away from Shropshire, to which it legally belongs; Craike, in Yorkshire, and Holy Island, off the Northumberland coast, both belonging to Durham, &c., &c. Early in 1859, Mr. J. Ward, her Majesty's consul at Leipzig, reported that 7,360 miles of railway were open for traffic in Germany, including Prussia and Austria. We have already seen that there are now at least 6,627 miles of railway in Austria and Prussia alone, but Mr. Ward reported but 4,144 miles three years ago, and exclusive of Hungary and Galicia. Allowing for these provinces, the remaining mileage of railways in the German States would not have fallen short of 2,700 miles. Taking *Bradshaw's Continental Railway Guide* (and excluding from the enumeration the Luxemburg railways, and also taking care that no portion of any line shall be included but once, although given in connection with two or more routes) we can make up 3,239 miles now open in the German States, exclusive of Austria and Prussia, and this, possibly, does not cover the whole. This, too, although including Mecklenburg, is of course, exclusive of Holstein and Schleswig, the railways of which are to be included with those of Denmark.

The Wurtemburg and Bavarian lines, it is hardly necessary to say, are numerous, long, and important, and these and the Saxon railways have been costly in construction. The line from Frankfort

on the Maine, *via* Bamberg, Nuremberg, and Augsburg, to Munich, is 328 1-2 miles long; the south-eastern extensions to the Tyrolese and Austrian frontiers are of considerable length; the line from Munich *via* Landshut and Ratisbon Nuremberg, with the branch to Passau, on the Austrian frontier, is 240 miles long; the line from Augsburg to Lindau, on Lake Constance, is 121 miles long, and that from Augsburg to Ulm 53 miles; the Wurtemberg line from Bruchsal, near Carlsruhe, to Friedrichshafen, on Lake Constance, and including the Heilbroun branch is 201 miles long, and the Grand Duke of Baden's line, from Mannheim, up the Rhine, to Waldshut, near Zurich, is 215 miles long, including branches.

Estimating the 8,239 miles in question at £18,000 per mile, which cannot be far from the real cost, we shall have £58,302,000 as the total investment in railways in Germany, and exclusive of Austria and Prussia. Mr. Ward estimated the investment at £120,000,000 for the 7,360 miles already referred to. Our present information goes to show that the mileage cannot now be less than 9,866, and the capital expenditure £152,125,460, equal to £15,420 per mile.

(To be continued.)

Flint and Pere Marquette Railway.

The cars have commenced running on this road between Mt. Morris (six miles north of Flint) and East Saginaw. Two trains are running each way daily. The road will be finished to Flint the coming spring.

Railroad Earnings--Weekly.

The earnings of the Milwaukee and Prairie du Chien Railroad, for the 1st week of February, 1862, were:

For passengers	$3,046 71
For freight	11,968 85
For mails and rents	1,015 94
Total	$16,021 50
Corresponding week, 1861	10,665 97
Increase	$5,355 53

The earnings of the St. Louis, Alton and Chicago Railroad for the 1st week in Feb., were:

1862	$15,557 24
1861	18,379 30
Decrease	$2,822 06

The earnings of the Toledo and Wabash Railroad for 1st week of Feb., 1862, were | $12,724
Do., 1861 | 13,352
Decrease | $628

The Chicago and Northwestern Railroad earned in the 1st week of February, 1862 | $10,615 11
Do., 1861 | 10,162 90
Increase | $462 21

The traffic of the Great Western Railway of Canada for the week ending Feb. 7, 1862, was as follows:

Passenger	$11,549 77
Freight and live stock	37,721 38
Mails and sundries	1,290 86
Total	$50,562 01
Corresponding week of last year	34,312 62
Increase	$16,249 39

The following are the earnings of the Great Western Railway of Canada for the week ending February 14, 1862:

Passengers	$11,988 84
Freight and live stock	42,106 89
Mails and sundries	1,294 02
Total	$55,389 75
Corresponding week of last year	41,227 12
Increase	$14,162 63

The earnings of the Michigan Central Railroad, for the 1st week of Feb., 1862, were | $41,289 07
Do. 1861 | 30,047 47
Increase | $11,241 60

The receipts of the Grand Trunk Railway of Canada for the week ending Feb. 8, 1862, were:

9,498 passengers	$17,282 46
Mails and sundries	8,094 28
13,672 tons of freight and live stock	55,115 87
Total	$75,492 61
Corresponding week, 1861	40,470 86
Increase	$35,021 75

The earnings of the Cleveland and Toledo Railroad for the 2d week in Feb., 1862, were. | $24,272
Do., 1861 | 17,715
Increase | $6,557

The earnings of the Galena and Chicago Railroad the 2d week in Feb., 1862, were | $27,740
Do., 1861 | 19,323
Increase | $8,417

The Michigan Central earned in the 2d week in February, 1862 | $42,584 49
Do., 1861 | 29,363 71
Increase | $13,226 78

The Chicago and Rock Island Railroad earned the 2d week in February, 1862 | $21,175
Do., 1861 | 15,265
Increase | $5,910

The Michigan Southern Railroad earned in the 2d week in February, 1862 | $41,584
Do., 1861 | 29,363
Increase | $12,221

OFFICE OF THE ILLINOIS CENTRAL R. R. Co.,
New York, Feb. 10, 1861.

AT a meeting of the Board of Directors of the ILLINOIS CENTRAL RAILROAD COMPANY, held at their office in New York, this day, it was

Resolved, That an assessment of FIVE DOLLARS per Share, upon the Scrip Shares of the Capital Stock of the Company, be, and the same is hereby called, payable on the 10th of March, 1862; and that the same be payable on the Stock registered in the City of New York at the office of the Company in that City; and on the Stock registered in London, at the office of Messrs. ROBERT BENSON & Co., London; and that parties desiring to pay their assessment in London, may pay the same at the rate of four shillings and two pence sterling to the dollar.

Resolved, That the transfer books be closed on the afternoon of the 1st March next, and re-opened on the 10th of the same month; and that no transfer be permitted on or after that day of Shares upon which the foregoing assessment shall not have been paid.

THOMAS E. WALKER, Treasurer.

NEW YORK CENTRAL RAILROAD COMPANY,
TREASURER'S OFFICE, ALBANY, Feb. 5, 1862.

SEVENTEENTH SEMI-ANNUAL DIVIDEND.—The Directors of this Company have declared a Semi-Annual Dividend of Three per cent. on the capital stock thereof, payable on the 20th day of February inst. upon stock registered at New York, Boston, or Albany, and on the 20th day of March next, upon stock registered at London. Stockholders whose stock is registered at New York, will receive their dividends at the office of DUNCAN, SHERMAN & CO.; those whose stock is registered at Boston, at the office of J. E. THAYER & BROTHER; those whose stock is registered at Albany, at the ALBANY CITY BANK; those whose stock is registered at London, at the UNION BANK OF LONDON, the latter at the rate of 4s. 1d. to the dollar. The transfer books, which are now closed, will be re-opened at New York, Albany and Boston, on the morning of Monday, the 24th day of February instant.

Sanford's CHALLENGE HEATERS

SET IN BRICK,

PORTABLE

OR AS

FIRE PLACE

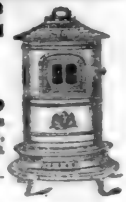
HEATERS,

FOR WARMING BY ONE FIRE WITH PURE, SOFT AIR

Dwellings, Churches, Hotels, Public Halls, Railroad Depots, Vessels, etc.,

WITH AND WITHOUT REGISTERS.

THE MOST POWERFUL HEATERS AND THE



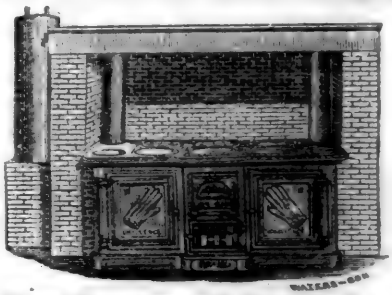
Greatest Fuel Savers in the World:

With an unparalleled mass of unimpeachable testimony of well-known Citizens, Ministers, Doctors, Lawyers, Merchants, Mechanics and others.

Send for pamphlet containing full description and testimonials.

SANFORD, TRUSLOW & CO.,
Nos. 239 and 241 Water st., N. Y.

The COSMOPOLITE PARLOR RADIATOR, & GAS BURNER,



Introduced one year ago, already ranks as the **LEADING STOVE** for PARLORS, SITTING ROOMS, and all places where a small, pleasant heat is desired.

Fire may be kept all winter with an astonishingly small supply of coal.

Send for description and testimonials.

SANFORD, TRUSLOW & CO.,
Nos. 239 and 241 Water st., N. Y.

Challenge Air-tight KITCHEN RANGES,

May be placed in a fire-place without masonry, and with or without water-back; or may be set out on feet, as an ordinary stove.

This range, already very popular, has the **LARGEST OVEN** of any in the market; BAKES PERFECTLY, never burning to brown at the bottom; BOILS, ROASTS and and BROILS with unequalled facility and dispatch, and with extraordinary **ECONOMY OF FUEL,** which may be either coal or wood. Flues large and easily cleaned. A child can manage it, so simple is its construction. Castings extra heavy, and design plain and chaste.

Four sizes, adapted to families and hotels.

Beacon Light SUMMER AND WINTER PORTABLE RANGE,

Is a very popular range, having six boiler holes, one large oven that bakes perfectly, with an arrangement for roasting, or heating irons at the end. It is very economical of fuel. For a FEW DOLLARS a family may be supplied with a PERFECT COOKING APPARATUS, equal to the highest price stove in the market.

Three sizes, adapted to coal, or wood.

SANFORD, TRUSLOW & CO.,
239 and 241 Water st., N. Y

SANFORD'S MAMMOTH OR GLOBE HEATERS.

The best stoves for RAILROAD DEPOTS and SHOPS, and all places where a great heat is required. They are very durable, and very economical of coal.

Beware of imitations that are inferior in strength and in other respects.

TESTIMONIALS.

HUDSON RIVER RAILROAD OFFICE, N. Y

This Company have now in use, over two hundred of Sanford's Mammoth Heaters, in Station Houses, Work Shops, and Engine Houses; we commenced using them in 1853, and some of the first stoves put up are still good and in use. We consider them the best Heaters now in use.

J. M. HEBARD, Supply Agent.

UNION FERRY COMPANY.

The Mammoth Heaters have been used by this Company in their waiting rooms at the several ferries and found to be very excellent stoves and more durable and valuable than any heretofore used. CYRUS P. SMITH, Managing Director.

ENGINEERING WORKS.

LYONS' TABLES.

To Civil Engineers and Contractors.

FOR SALE AT THIS OFFICE—A set of Tables for finding at a glance, the true cubical contents of Excavation and Embankments for all Bases, and for every variety of Ground and Side Slopes.—By M. E. LYONS, C. E.

SHEET No.				SHEET No			
1.	General Table for all Bases and all Slopes.			13.	for Base 18 ft.	Slop.	1½ to 1
2.	For Side Hill Cuts and Fills.			14.	"	20	" 1½ to 1
3.	Base 12 ft.	Slopes	1½ to 1	15.	"	24	" ½ to 1
4.	" 14	"	1½ to 1	16.	"	25	" 1½ to 1
5.	" 15	"	¼ to 1	17.	"	26	" 1½ to 1
6.	" 15	"	1 to 1	18.	"	28	" ¾ to 1
7.	" 15	"	1½ to 1	19.	"	30	" 1 to 1
8.	" 16	"	¼ to 1	20.	"	30	" 1¼ to 1
9	" 16	"	1 to 1	21.	"	30	" 1½ to 1
10.	" 18	"	¼ to 1	22.	"	30	" 1 to 1
11.	" 18	"	¾ to 1	23.	"	32	" 1¼ to 1
12.	" 18	"	1 to 1	24.	"	32	"

The Tables are printed in clear, bold type on tinted paper; sheets 25x16 inches. They may be used by candle-light without injuring the eye-sight. Each sheet is complete in itself, and embraces all that is wanted in connection with the Base or Slope designated, whether on level or side hill cross section.

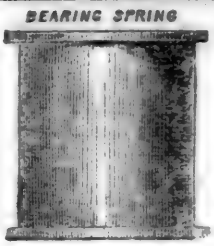
Sent, **free by mail,** in separate sheets, at 25c. each; or the whole, handsomely bound in cloth, in one volume, for **$7.50.**

ENGINEER'S FIELD BOOK,

By **C. S. CROSS, Civil Engineer.**

THIS work is designed as a pocket companion, and embraces, in the most compact form, all the necessary tables for prosecuting railroad surveys. It is subdivided as follows:—

1st. The method of staking out railroad curves and keeping field notes.
2d. Railroad curve tables for expeditiously determining the points at which commences the curving.
3d. Application of the Prismoidal formula in determining the quantities of excavation and embankment of canals and railroads from transverse sections.
4th. Excavation and embankment tables for expeditiously determining the cubic yards from mean area.



It is a plain, clear and most valuable book for practical Railroad Engineers. Sent, **free by mail,** upon receipt of the price. For sale at this office. Price **$1.**

HUDSON RIVER CEMENT COMPANY.

THIS Company is now prepared to furnish at the shortest notice, on the most favorable terms, **HYDRAULIC ROSENDALE CEMENT, NOVA SCOTIA CALCINED PLASTER, FARMERS' PLASTER,** and **MARBLE DUST,** all of full weight, and of a fine and superior quality.

This Cement is manufactured by the Company from a superior selected quality of Cement Stone, from its extensive Quarries at Rosendale, Ulster Co., N. Y., and has been very extensively used during the past eight years in the construction of RESERVOIRS, CISTERNS, TANKS, BATHS, CELLARS, VAULTS, etc., and for a variety of purposes "under water," such as DOCKS, BRIDGES, MILL-DAMS, FOUNDATIONS and BREAKWATERS. It is largely used for any sort of **dry concrete** and **Underwater Works.** Where strong work is needed, or dampness to be excluded, this Cement is unrivalled. It has the unqualified approbation of the most eminent ARCHITECTS, ENGINEERS, CONTRACTORS and BUILDERS in AMERICA, being used in most every department of the **Works under Government.**

It is put up, for shipping purposes, in tight, well-made, and thoroughly papered barrels—each barrel containing **300 lbs.** of Cement—and shipped direc from the works at JERSEY CITY, N. J., (opposite the City of New York), **at all seasons** of the year, thus avoiding all unnecessary handling.

The better condition, therefore, in which its articles are received by purchasers makes it an object for them to purchase its Hydraulic Rosendale Cement, Calcined Plaster, Farmers' Plaster, and Marble Dust; and which, if used by persons of experience, never fail to give entire satisfaction. Orders, however extensive they may be, are respectfully solicited from Dealers, Contractors, Railroad Companies, Masons and others.

Please address, **Hudson River Cement Company, Jersey City, N. J.,** or **J. H. BUTTS, Secretary.**

N. B.—Freights obtained by good vessels on the best terms, and Insurance when required.

American Railroad Journal.

New York, Saturday, March 1, 1862.

Pittsburgh, Fort Wayne and Chicago R. R.

It is well known that this great enterprise is a consolidation of three, or rather four roads, each commenced at different times without any common plan, or scheme of finance. The first undertaken was the Ohio and Pennsylvania Railroad; a work originally designed to extend to central Ohio. This was followed by the Ohio and Indiana Railroad, which extended the trunk line to Fort Wayne. The Fort Wayne and Chicago was then commenced, designed, to form, with the other two, and the Michigan Southern, a great line of 468 miles extending from Pittsburgh to Chicago.

The different links were, by great effort, constructed. The inconvenience of having what was really an unit in object and interest, managed by several independent boards, soon manifested itself, more especially as the three enterprises differed greatly in extent of their means—all having very inadequate capital for the proper completion of their respective sections of road. This inconvenience led to a consolidation of the three companies into one—the Pittsburgh, Fort Wayne and Chicago—which soon after undertook the construction of an independent line from the point of junction with the Michigan Southern Railroad into Chicago

The consolidation accomplished its object as far as unity of action was concerned, but failed to secure all the means needed for the proper completion of the road. Financial embarrassment continued, and led to various expedients for relief. All proving inadequate, it was judged best to thoroughly re-organise the company by consolidating the various interests; and to obtain permission to use the revenues by funding the accruing interest, till the company should be placed in a perfectly independent position. For this purpose the proper legislation was had in the State of Ohio, which was confirmed by special acts in the other States, which authorized the sale of the road, which was made pursuant to such authority to J. F. D. Lanier, L. H. Meyer, Samuel J. Tilden, Samuel Hanna and J. Edgar Thomson, and a plan of re-organization agreed upon by the several parties in interest. This plan provided for the formation of a new company for which the proper legislative authority was obtained, to which the road, was to be conveyed by the purchasers, and the several kinds of indebtedness or liabilities of the three original companies provided for by the following new issues of bonds and stock.

1*st Mortgage Bonds*, $5,250,000. These bonds were issued in exchange for the first mortgage bonds of the old companies, with their coupons, at their nominal value; the new bonds to bear interest from January 1, 1862, at the rate of 7 per cent. payable semi-annually, in six classes—one class on the first of each month; the principal redeemable July 1st, 1911, and after July 1, 1866, at the option of the company. These bonds may be converted into 6 per cent. bonds, irredeemable except by the operation of a sinking fund of 1 per cent., till $2,500,000 are redeemed. The holders of these bonds are entitled to vote at meetings of stockholders at the rate of one vote for $200 par value of said bonds.

2*nd Mortgage Bonds*, $5,100,000. These bonds are to bear interest after April 1st, 1862, and contain the same provisions as the first mortgage bonds in reference to the rate of interest, to their redemption and conversion into irredeemable bonds, and also in reference to voting at the meeting of the stockholders. A further clause provides that in case of sale of the road under this mortgage, bonds to the amount of $100,000 shall have preference as to payment. For this class of bonds are to be exchanged the second mortgage bonds and income bonds of the Ohio and Pennsylvania Company; the second and third mortgage bonds of the Ohio and Indiana, and the construction bonds of the Pittsburg, Ft. Wayne and Chicago Company, that matured previous to Oct. 1, 1859, with unpaid interest accruing before Oct. 1, 1859. The interest accruing after this date to be converted into 3d mortgage bonds.

The holders of the *second* mortgage bonds of the Ohio and Indiana Railroad Company are to be entitled to receive for their bonds, that class of the second mortgage bonds having preference of payment as aforesaid, for the reason that the lien created by the two mortgages on this section of the road does not much exceed, per mile, the first mortgage on other portions of it.

3*d Mortgage Bonds*, $2,000,000. These bonds entitle the holder to interest at the rate of 7 per cent. after the first day of April, 1862, out of such balance of net earnings as may remain after paying the interest and sinking funds previously provided, and maintaining the road. The holders are entitled to cast one vote for every hundred dollars held by them.

The real estate bonds of the Fort Wayne and Chicago, and the Pittsburg, Fort Wayne and Chicago Railroad to be exchanged with this company at their par value into the 3d mortgage bonds. All debts not included in the foregoing classes, are to be exchanged for an equal amount of 3d mortgage bonds.

Share Capital. The share capital of the new company is limited to $6,500,000.

Under the foregoing legal provisions and agreements, the new company has been formed, and the purchasers have been actively and constantly engaged in executing their trusts. The greater portion of the first mortgage bonds have been prepared and will probably be in readiness for exchange during the present month. The second and third will speedily follow. The whole trust is in process of being speedily wound up to the mutual benefit and satisfaction of all parties. The case is a remarkable instance of a vast nd complicated undertaking, being carried forwa and closed up

without any other delay than that caused by the legal steps necessary to be taken. No hinderance has been caused by captious or dissatisfied per-

interests—a high compliment to the agents selected for this important work, who have inspired confidence, and disarmed all opposition by the faithful and disinterested manner in which they have executed their trust. This is soon to be terminated by the final and full surrender of the road and its property to the company, which finds itself in a position vastly more favorable than that ever enjoyed by its predecessor.

Although some delay has been experienced, no loss has really been suffered. The relative rights of all parties have been satisfactorily maintained. The road is in excellent condition, while its earnings, which are on a scale nearly 50 per cent. greater than at any former period, will enable the company to meet every obligation for the future—a result most agreeable to chronicle when such vast interests are at stake, and a high compliment to the faithful labors of the gentlemen through whose instrumentality it has been produced.

The meeting for the election of directors of the new company was held at Pittsburg on the 25th ult., who will assume the management of the road as soon as the remaining duties of the trust can be closed up, to which the Committe named are directing their constant attention.

Central Railroad of New Jersey.

The Directors of the Central Railroad Company of New Jersey present to the stockholders the following report, for the year ending December 31, 1861. For convenience of comparison many of the statements are made to cover the year 1860, as well as the past year.

SERVICE OF THE ROAD AND FERRY.

The service of the road has been as follows:

	1861.	1860.
Miles run by passenger trains.	181,446	152,518
" " merchandise "	144,055	133,763
" " coal "	317,573	376,476
Total by transportation trains.	643,074	662,757
Miles run by wood trains	2,705	2,121
" " gravel "	16,614	30,889
Total miles run by trains	662,393	695,767

The passenger trains have also run 45,890 miles on the New Jersey Railroad between Jersey City and Elizabeth, drawn by the engines of that company, against 40,152 run last year.

During the year the boats have run 36,888 miles on the ferry, between New York and Elizabethport. In 1860, they ran 38,187 miles, including excursions.

PASSENGERS, FREIGHT AND COAL.

A comparison of the passenger business of the year 1861 with the year 1860, gives the following results:

	1861.	1860.
Number of passengers ..	401,638	429,288
Miles traveled by " ..	10,801,933	9,433,056
Equal to through " ..	144,026	123,470

A comparison of the merchandise business of the two years, in tons of 2,000 lbs., (excluding iron,) gives the following results:

	1861.	1860.
Number of tons carried..	162,382	151,378
Tons carried one mile ...	8,996,279	6,908,368
Equal to through tonnage	119,950	92,112

A comparison of the iron tonnage of the two years, in tons of 2,000 lbs., gives the following results:

	1861.	1860.
Number of tons carried..	56,690	55,355
Tons carried one mile ...	3,619,220	3,525,356
Equal to through tonnage	56,550	55,058

A comparison of the coal business of the two years, in tons of 2,240 lbs., gives the following results, the through tonnage being calculated from Easton to Elizabethport:

	1861.	1860.
Number of tons carried ..	823,214	854,769
Tons carried one mile	42,907,260	46,615,764
Equal to through tonnage	670,426	739,933

The decrease in Lackawanna coal was 21,994 tons, and in Lehigh coal, 9,561 tons.

The coal tonnage over the road, since the transportation of coal was commenced, has been as follows:

	Lackawanna. Tons.	Lehigh. Tons.	Total. Tons.
1856	98,670	33,325	131,995
1857	209,950	84,841	294,791
1858	417,726	122,923	540,649
1859	455,681	183,277	638,958
1860	590,863	263,906	854,769
1861	568,869	254,345	823,214
Total	2,341,759	942,617	3,284,376

EQUIPMENT.

The Company own 89 engines, of which 27 burn wood, 1 soft coal, and 11 hard coal. Of these engines, 28 are narrow gauge and 11 broad gauge. Their condition is reported to be as follows: 24 in good order, 6 in fair order, 1 in shop for repairs, 2 rebuilding for hard coal, 3 wanting new fire-box, 2 wanting general repairs, and one (Commodore) not in use for several years, now condemned and taken in part payment for a new engine building at Paterson. One new locomotive has been placed on the road during the year. About thirty engines are required for the ordinary daily service; but as even in the present depressed year there have been times when the Company were short of motive power, early orders will be given for additional engines.

The equipment of cars is as follows: 19 first-class passenger cars, 2 second class passenger cars, 8 baggage and mail cars, 70 house freight cars, 20 covered cattle cars, 123 platform freight cars, 6 caboose cars, 42 four-wheel gravel cars, 16 dirt cars, and 1 wrecking car. No purchases of cars have been made, but 20 platform cars and 1 baggage and mail car have been built in the Company's shops. By thorough repairs and by rebuilding many of the older ones, any depreciation in the stock of cars has been more than made good.

TRANSPORTATION ACCOUNT.

The following is a statement of the ordinary receipts and expenses for the year 1861 compared with 1860:

Receipts:—	1861.	1860.
Passengers	$222,089 93	$206,280 63
Merchandise	382,598 75	362,482 10
Coal	568,275 83	597,323 99
Mail	7,600 00	7,600 00
Express	7,643 71	7,132 32

Balance net earnings.	$679,443 30	$710,391 40

Notwithstanding the general depression in business from the civil war, the receipts for the year show an increase of $16,047 74, and now average more than $100,000 per month. This would have been much larger if the advance in all the other items had not been reduced by a falling off of $29,048 16 in coal, the market for the latter having been heavy and drooping.

The expenses show an increase of $16,995 84, or nearly ten per cent. There has been an increase of $2,821 11 in the running expenses, a decrease of $9,995 71 in cost of fuel consumed, an increase of $53,995 18 in the repairs of road, a decrease of $2,715 02 in the other repair accounts, an increase of $622 93 in general expenses, and an increase of $2,267 35 in the ferry accounts. Included in the cost of repairs of road are 1,420 tons of new rails substituted for old, and over 52,000 cross-ties replaced in the track. The heavy and increasing tonnage now traversing the road will make necessary equally heavy if not greater outlays the coming year. In addition to the ferry expenses here shown, extensive and costly repairs to the boats, including a new boiler for the Wyoming, and amounting in the whole to $13,121 94, have been paid from the Renewal Fund, and so charged in this report.

The following table shows the receipts, expenses, and net earnings from the beginning of the annual reports to the Legislature to the present time:

	Receipts.	Expenses.	Net earnings.
1853..	$349,018	$197,629	$151,889, or 43 p. c.
1854..	378,145	197,349	180,796, or 48 "
1855..	393,729	208,856	184,873, or 47 "
1856..	533,479	258,308	295,171, or 53 "
1857..	682,314	340,502	341,812, or 51 "
1858..	836,934	345,614	491,320, or 58 "
1859..	971,702	385,716	585,986, or 61 "
1860..	1,185,848	475,457	710,391, or 60 "
1861..	1,201,895	522,452	679,443, or 57 "
Total.	$6,553,064	$2,931,883	$3,621,181, or 55 p. c.

DIVISION OF WORKING EXPENSES.

The following table, prepared by Josiah O. Stearns, the Assistant Superintendent, who has charge of the running department, is made up on the same principles as the one submitted last year:

	Passengers.	Freight.	Coal.
Running account	$22,294 50	$46,432 85	$40,970 10
Wood consumed on trains	13,209 74	18,792 57	27,225 15
Coal "	3,844 00	4,728 00	20,839 00
" on ferry	6,416 42	6,416 41	....
" stations and shops.	500 00	....	500 00
Repairs of road	20,494 01	25,703 63	78,068 83
" engines	9,869 23	6,894 37	17,545 90
" cars	12,740 46	14,014 37	....
" buildings, bridges, etc..	500 00	....	....
" tools and machinery ...	1,182 37	1,182 38	1,182 38
Expense account	7,987 10	7,987 10	7,987 10
Miscellaneous expenses	4,332 06	4,333 06	4,332 06
Ferry running expenses	10,214 73	26,792 57	....
Ferry-boat repairs	3,395 10	3,395 10	5,517 08
Ferry miscellaneous expenses	3,269 87	6,325 05	....
Passenger expenses	$141,286 66	$179,518 04	$201,667 60
Merchandise "	179,518 01		
Coal "	201,667 60		
Total expenses as before...	$522,452 30		

By this statement it would appear that that the cost of operating the passenger trains has been 63⅛ per cent of the gross receipts, of merchandise trains 46⅛ per cent, and of coal trains 35⅛ per cent; the average cost of all the trains being

43 per cent. All these per cents are higher than last year, owing to the heavy outlays on the road, and it is not expected to reduce the average the present year, as the same cause of increase will continue.

FINANCIAL CONDITION.

The following is a statement of the financial operations during the year:

	Cr.
Gross earnings, as per statement	$1,201,895 60
Materials, fuel, etc., on hand, decrease	25,027 78
Total	$1,226,923 38

	Dr.
Ordinary expenses, as per statement	$522,452 30
Grading, filling up at High Bridge, etc.	50,126 91
Railway superstructure	6,200 00
Expenditures at Elizabethport	1,057 56
Engine purchased	10,000 00
Barge Green County	6,000 00
Cars built in shops	7,500 00
Tools and machinery, increase	4,800 00
Miscellaneous property "	2,315 00
Sundry accounts	55,298 37
Extraordinary repairs to ferry-boats	13,121 94
Quarterly dividends for year, 10 p. c.	363,000 00
Interest account for year	139,296 06
State taxes for 1861, ½ per cent. on $4,903,410	24,517 05
Cash and accounts payable, increase	21,238 19
Total	$1,226,923 38

The profit and loss account has been credited with the gross earnings $1,201,895 60

It has been debited as follows:

Ordinary expenses	$522,452 30	
Interest account	139,296 06	
Taxes to State	24,517 05	
Dividends, 10 per cent.	363,000 00	
		1,049,265 41
Balance, equal to 4 per cent. on stock, transferred to Rewewal Fund		$152,630 19
Add balance to credit of fund last year		92,174 05
Total		$244,804 24

The Renewal Fund has been debited as follows:

Expenditures of year on new track, charged off to cover depreciation in this account.	$6,200 00
Extraordinary repairs of ferry-boats	13,121 94
Loss on engine condemned	2,500 00
Expenditures of year on construction balanced by an equal amount of discount on second mortgage bonds withdrawn from cost of railroad	50,126 91
Balance to credit of Renewal Fund	172,855 39
	$244,804 24

In pursuance of the policy laid down in the last Annual Report, $50,126 91 of the discount on the second mortgage bonds, charged heretofore as a temporary part of the cost of the railroad, has thus been withdrawn from construction, and replaced by the expenditure of that sum on the road, principally in masonry and filling up at the High Bridge, leaving the cost of the road the same as before. A much larger sum is intended to be withdrawn the present year.

CONSTRUCTION.

The work of changing the stone pier bridge with wooden superstructure, west of Clinton, into a solid embankment, would have been pressed much more vigorously, had not the uncertainty and derangement of public affairs and the possibility of worse troubles and complications, made it the part of prudence to avoid large expenditures of any kind. A large amount of filling has, however, been done, and the masonry for the large double archway, for the passage of the south branch of the Raritan river, is more than half finished. It is estimated that $80,000 will be spent at this place during the present year. No other important work has been on hand, though many improvements have been made to the station buildings, side tracks have been lengthened, additional facilities provided at Elizabethport, and a new track extended at the same place to the old dock, formerly used by the Ferry Company as a landing, and which they are now putting in order again for business.

It has become highly desirable to extend the second track from Hampton Junction, where it now terminates, to Easton. The distance is 15 miles, of which about 12 miles remain to be graded. Part of this work will be very heavy, and will take some time, but the first seven miles require but little time or expense, except the ballast and superstructure. Track will be laid as rapidly as sections are completed, very much to the relief of the trains on the western end of the road. In connection with this work, the filling up of the Bloomsbury and Springtown bridges will be commenced. From the nature of the ground, the bridge over the Morris Canal at Green's Mill can not be filled up, and it is proposed to substitute an iron superstructure for the present wooden one.

TRANSPORTATION FOR GOVERNMENT.

Unexpectedly to this Company, they were called on by the Government, early in the summer, to transport large bodies of troops to Baltimore and Washington, by the way of Harrisburg. Between 26,000 and 27,000 in all have been thus taken, and large amounts of freight have also been taken for the Government. The proportion received by, or coming to this Company, for the transportation of troops, is $30,432 16, and for freight $23,290 68, being in all $53,722 84. All the business has been done at low rates, at great expense, vexation and trouble, and with endless detentions of cars; but the Company did not feel at liberty to decline it, and for a part of the time it came in very well to supply the gap made by the falling off in the regular business. One result of the road becoming known as a military route to Baltimore and Washington, has been an incessant demand for express passenger trains between New York and those places, as the same cars can go from Jersey City to Washington without change or break of any kind, and as the journey can be made easily in twelve hours. The trains, however, have not been put on. The business does not *legitimately* belong to this Company, as their route is 69 miles longer than the more southern route; and though they might temporarily secure a handsome portion, yet as soon as the improvements said to be in progress on the lower line, for securing the same object of a transit without change of cars, should be completed, they would inevitably lose the major part.

CONNECTING ROADS.

Our trains have continued to run to and from Jersey City during the year, over the New Jersey Railroad, drawn by their engines, in a satisfactory manner for the major part of the time, but with many complaints of irregularities and detentions towards its close. These were probably owing principally to the sickness and death of the able Superintendent of that Company, John P. Jackson, which necessarily impared the efficiency of their arrangements. Since the appointment of F. Wolcott Jackson, his son, as his successor, the causes of complaint are being removed.

The business from the Delaware, Lackawanna and Western Railroad has been very good, considering the times. That from the Lehigh Valley Railroad, aided by its connections, has been still better maintained. An express passenger line, east and west, has been run, in close connection with the Pennsylvania Central Railroad, and well sustained.

FUEL.

The annual report of the Superintendent, John O. Sterns, on the subject of fuel, will be found appended to this report. It gives, in detail, the additional light thrown by another year's experience on the substitution of coal, whether anthracite or bituminous, for wood.

BALANCE SHEET, January 1, 1862.

Construction—same as last Report		$4,480,896 79
Station houses, shops, and water stations		132,000 00
Land and work at Elizabethport		291,771 20
Ferry interest and boats		252,650 00
Engines		328,500 00
Passenger and baggage cars		49,000 00
Freight cars		127,000 00
Telegraph, docks, machinery, miscellaneous property, etc.		97,257 81
Chairs, spikes, iron rails, and ties on hand		26,500 00
Workshop, materials on hand		14,000 00
Fuel on hand		36,000 00
Cash and accounts receivable		134,920 49
		$5,970,496 29
Capital stock		$3,630,000 00
First mortgage bonds, due 1865	$500,000	
1870	900,000	
		1,400,000 00
Second mortgage bonds, due 1875		600,000 00
Dividend 2½ per cent., payable in January		90,750 00
Interest on bonds, accrued not yet due		47,833 33
Accounts payable		29,057 57
Renewal fund, balance to credit		172,855 39
		$5,970,496 29

President—JOHN TAYLOR JOHNSTON.

Directors—John Taylor Johnston, John C. Green, William E. Dodge, Adam Norrie, William S. Wetmore, Benjamin Williamson, John O. Sterns, F. T. Frelinghuysen, Henry D. Maxwell.

Secretary and Treasurer—SAMUEL KNOX.

Sup't and Engineer—JOHN O. STERNS.

Assistant Superintend't—JOSIAH O. STEARNS.

New Haven, New London and Stonington Railroad.

At the annual meeting of the Stockholders of this Company, recently held in New Haven, the following plan was proposed for extricating the Company from its present difficulties:

"Secure from the next session of the General Assembly a charter for a new company, to be called the 'Shore Line Railroad Company,' with a capital stock of $750,000, to be apportioned in shares of $100 each. Said stock to be paid in first mortgage bonds and interest at par: second and third mortgage bonds at twenty-five per cent. of their par value, and the stock at $5 per share. Said company to receive the road and entire property from the trustees as soon as three-fourths of the first mortgage bonds are paid in towards said stock. Any party owning said first mortgage bonds, or holding them in trust not fully authorized, or wishing to use them in payment for the stock of said company, shall be entitled to receive the cash for them at their *pro rata* value on $450,000 first mortgage bonds, as per the appraisal of three commissioners to be appointed by the General Assembly for that purpose."

The following resolution was adopted:

"*Resolved*, That a committee be appointed to meet a joint committee from the parties interested in the first, second, and third mortgage bonds of the New Haven and New London Railroad Company, and also a committee from the parties interested in the Extension railroad, to take into consideration some plan for reorganizing and consolidating the several interests, and report at a future meeting."

After the adjournment of the stockholders a meeting of the directors was held, and C. S. Bushnell re-elected president, and William T. Bartlett secretary and treasurer.

The earnings of the road in 1860 were $135,071 55; for 1861 they were $112,419 75, showing a decrease of $22,651 80, while the Extension road

earnings for 1860 were $42,930 45, and for 1861 $63,140 30, being an increase of $20,209 85.

Milwaukee and Prairie du Chien Railway.

The organization of this Company took place on the sale of the Milwaukee and Mississippi Railroad. The articles of association were filed 18th to 21st of January, 1861, in accordance with the laws of the State of Wisconsin. The purchase was completed January 21, 1861, and possession of the entire property taken the following day, since when it has been operated for account of the present proprietors. The law requiring an annual report on the 31st of December, the Board of Directors concluded to make their fiscal year in accordance. The report, therefore, shows the operations of the road for eleven months and ten days, during which time the earnings were:

From freight	$835,172 60
" passengers	211,249 91
" mails and rents	45,594 07
" Mississippi River Ferry	16,337 20
	$1,108,353 78

And the expenses were:

Repairs of road and bridges	$166,155 16	
Repairs of locomotives.	38,035 90	
" cars	43,693 50	
" build'gs, etc.	18,624 50	
General superintendence	20,063 43	
Station service	74,426 79	
Foreign agency & Adv.	10,952 26	
Pay of train hands	71,755 28	
Fuel	72,643 83	
Oil and waste	12,019 87	
Loss and damage	5,276 31	
Taxes	11,143 54	
Miss. River Ferry Exp..	11,710 97	
Interest and exchange .	13,859 71	
Other operating expens.	21,795 57	
Embankment and new bridges	13,485 73	
New buildings	12,865 76	
New locomotive	10,331 82	
New fence, 40½ miles .	14,601 00	
Twenty new stock cars.	13,510 89	
Other extraordin'ry exp.	15,359 55	
		672,314 37
Net earnings		$436,039 41

Disbursed as follows, viz:

Paid Mil. & Miss. R. R. Co. under liens upon property purchased	$15,110 08	
Paid for real estate	500 00	
Interest on bonds for the year	118,405 00	
Contributions to sinking fund	9,150 00	
Balance to new account	292,874 33	
		$436,039 41

The above expenses are divided as follows: Repairs of road and equipment, $266,509 06; ordinary operating expenses, $325,647 56; extraordinary expenditures, $80,157 75—total $672,-314 37.

The earnings of the Southern Wisconsin Branch were $33,030 23, the expenses (of which $6,366 69 were for fencing 17.87 miles) $25,032 51, and the net earnings $7,997 72. The report says:

"The earnings of this portion of the road have been seriously affected by the competition existing between the Racine and Mississippi, Illinois Central, and Galena and Chicago railroads. Freight under this competition has been taken so low, that grain from districts which have been considered tributary to this road has been drawn to stations on the above roads. To meet this, the rates on freights were reduced until the difficulties between the above roads could be adjusted, and paying rates restored; but much freight has been lost to the road, and low rates received for what has been obtained."

The earnings of the Mississippi River Ferry were $16,337 20, the expenses $12,910 97 (of which $1,200 were for two new barges purchased last fall), and the net earnings $3,426 23. The company now have nine barges for the transportation of grain in bulk. One new barge is being constructed to be delivered in the spring.

The following statement shows the material used during the year in repairs of road and bridges:

1,347 tons new and re-rolled iron	$34,822 00
100,099 lbs. chairs	4,059 90
95,900 lbs. spike	3,196 66
102,000 ties	35,700 00
4,618 repaired rails	3,280 98
	$81,059 54

—or 45 per cent. of the entire expense.

The quantity of new and repaired rails laid is equal to 32¾ miles of continuous track, or about one seventh of the whole road. This amount should be increased for the next two years, as the iron on the eastern division, not heretofore renewed (about 84 miles) has been down an average of ten years, and is badly worn, largely increasing the repairs of rolling stock.

Extensive repairs have been made to the engines, the efficiency of those in use at the commencement of the year fully maintained, and two added to the number, one of which was constructed in the shops of the company, and the other one, not in use at the commencement of the year, re-built and made a first-class engine. The company have now: 7 first-class passenger, and 26 first class freight engines; 4 second class, used for switching; and 8 old engines not in use for some years. One of these is now being re-built, and the others can be as the business of the Company may require. The company have also 31 first class, 4 second class, 11 baggage, 426 box freight, 101 platform, 35 gravel, 24 ditching, and 46 hand cars. No additions have been made, or will be required, to the number of passenger cars 20 new stock cars have been added; 157 old freight cars repaired; and 30 grain cars contracted for. These, with 16 to be built in the company's shops, will be all that will be required the coming season.

There being no construction account, all expenditures have been embodied in general account as operating expenses, and are 60.67 per cent. of gross earnings. Deducting the extraordinary expenditures, which may properly be considered construction, as the amount has been added to the property of the company, the expenses would be 53.44 per cent.

The number of way passengers carried has been 120,672; of through passengers, 9,511—total, 130,183. Total mileage of passengers, 7,725,894.

The number of tons of way freight carried was 190,671; of through freight, 115,123—total 805,-794. Total tons carried one mile, 87,175,350.

As stated above, the road passed into the hands of its present proprietors on the 21st of January, 1861. The purchase price was $7,500,000, payable and paid as follows:

In first preferred scrip stock with convertible bonds attached	$2,556,000
In full paid first preferred stock	1,095,400
" second "	1,086,800
" Common "	2,761,800
	$7,500,000

Upon examination, the road proved to be in better condition than was expected considering the financial troubles of the Milwaukee and Mississippi Railroad Company; notwithstanding which, much expenditure was, is yet, and will be for 18 months to come, required, to put it in a condition to be economically worked. The narrow means of the company while building it, necessitated much deficiency and temporary work, and the financial troubles of the same after its completion prevented renewals and repairs to the extent and at the time required for its safe and economical operation. It is believed that if the earnings will enable the company to continue the repairs and necessary station completions on last year's scale, for 18 months longer, the road will then be in a condition to be kept up to an efficient state, and run for from 50 to 52 per cent. on earnings equal to those of last year. Much diversity of opinion exists as to the productiveness of the Southern Wisconsin Branch. Being run in close connection with the main line, it is difficult to apportion to it a proper share of all expenses. No portion of the general office, organization and sinking fund expenses have been charged to it.

The earnings of the road from the 1st to the 21st of January, 1861, were: From freight, $35,-428 32; from passengers, $6,191 45; mails and rents, $3,433 12—total, $45,052 89. The total earnings of the road, therefore, from January 1st to December 31st, 1861, were: $1,153,406 67. In 1860, they were $799,841 45. In 1859, $746,-498 78. In 1858, $883,186 02. In 1857, $882,-817 89. The increase in the earnings of 1861 over 1860, were $353,565 22. The president, in his report, says:

Increase of business requires and necessitates a corresponding increase of facilities to do it.

If, as stated above, the finances of the builders of the road necessitated deficient construction, it is but natural that station facilities should mostly have been of a nature only calculated to meet the undeveloped business of the district tributary to them; hence, that as that business developes, the station facilities must be increased, completed or extended.

Reference to the monthly and yearly tables of earnings clearly shows that the business has increased, and that it is not evenly distributed over the year, but at given periods presses upon us to an extent that it cannot be properly cared for with our present facilities. To stand still is to retrograde. If we cannot accommodate business natural to us, it must and will seek other channels less natural to it. We have but a choice between progress and retrograding—the latter endangers the success of the Company by affecting the productiveness of its property.

The former necessitates additional facility, and consequent expenditure. To make such properly, prudently, and as small as possible, yet supply the deficiency, has been a cause for much careful thought and consultation.

Our rolling stock has been taxed to its utmost, and the bringing in forty per cent. of the total of our cars daily, full loaded, for weeks in succession, is proof that it was well managed; but in the face of so doing, wheat would accumulate, especially at Prairie du Chien, where for four weeks we had from seventy-five to one hundred thousand bushels waiting cars to take it. The wooden storehouse and sheds were filled, and much lay outside exposed to the weather for want of room to shelter it. The locality and nature of our buildings preclude the chance of procuring adequate fire insurance. The risk is greater than the Company can prudently and knowingly continue to run. It was forced upon us this year, but should, if possible be avoided hereafter.

Wooden buildings, with steamboats, sometimes seven at a time, on one side, and locomotives constantly passing up and down on the other, sparks showering from both, from one to two hundred thousand dollars worth of property in and around such buildings, which with the sheds, platforms, and adjoining grounds, are over-crowded, and but a few thousand dollars insurance on the whole, is an amount of risk this Company cannot prudently run.

To obviate such risks and accommodate the increasing business, we have two ways open before us.

1. By an increase of rolling stock. This would seem the most natural. One hundred new cars suitable for wheat transportation, might overcome the difficulty, unless it increases next season; but these cars would stand idle three-fourths of the year, yet would depreciate nearly as much as if in constant good use.

2. By building an elevator of about 250,000 bushels capacity.

Our present elevator, built under the receiver, was too economically built—is only of 18,000 bushels capacity. The stone walls under it, to high water mark, already require repairs. It is not available except at medium stage of water, while the busiest periods are mostly at the highest and lowest stages of water.

An elevator of 250,000 bushels capacity would, to some extent, enable a more even distribution of our business—would obviate the necessity of the purchase of one hundred new cars. While doing more business, and having the power of scattering it, we shall be less pressed for cars at some periods, and have less idle ones at others. Fire insurance can be had, and at reasonable rates. One hundred new cars would cost sixty-five thousand dollars. An elevator, as above, would cost forty-seven thousand dollars. The cars would cost repairs in ratio of ten per cent. yearly, or be worthless in ten years. The elevator would, perhaps without repairs, or at least with very slight repairs, be, ten years hence, as good as new for our purposes, and would be so arranged as to be available at all stages of water, and would pay the interest on its cost in the saving of labor, as compared with our present arrangements. Aside from all this, the elevator would give us 250,000 bushels storage room over winter—a consideration, when, as is already the case, the elevators on our station here are both filled to their utmost capacity.

These views have induced me to cause the necessary plans and contracts to be made. The elevator is required for the Fall business, and every preparation is making to have it ready in proper time. The track will have to be extended to the elevator, and proper side track arranged. The entire improvements and alterations at Prairie du Chien, including the elevator, are calculated to cost not exceeding $75,000 in the aggregate. It is not proposed to alter the passenger station at Prairie du Chien.

This Company assumed, with some alterations, the contract made between Messrs. Angus Smith & Co. and the Milwaukee and Mississippi Railroad Company, relating to elevators on the station at Milwaukee. Under that original contract, one elevator of about 350,000 bushels capacity had been built. It was inadequate for the wants. Under the altered contract with this Company, Messrs. Angus Smith & Co. built a second elevator of 800,000 bushels capacity. Both elevators are now filled, and other storage room has to be found for grain coming in. The building of each elevator necessitated docking, dredging, filling in of station grounds, and laying of track. Under the contract, this Company as well as the Milwaukee and Mississippi Railroad, were to pay the expense of such work, but Messrs. Angus Smith & Co. were to pay the interest, ten per cent. per annum, thereon. On the first contract there was yet due Messrs. Angus Smith & Co. over $10,000, which this Company paid, charging it to Milwaukee and Mississippi Railroad account. Under the second, or present contract, the amount of such work is $7,671 25. It has been paid, and likewise draws interest at ten per cent. per annum.

The amount stated above as paid Mil. and Miss. R. R. Co., was partly for a balance due Angus Smith & Co., which operated as a lien on the property, and partly for other items, rights of way, etc. All liens on the property, when paid, are charged to the Mil. and Miss. R. R. Co., and the total at the end of the year, passed to income account, merely with a view of keeping an account which shall show the payment, of liens, subject to which the property was bought.

The following statement will show the financial condition of the company at the close of the past fiscal year. The sinking fund account amounts to $131,400, by the cancelling of First Preferred Scrip stock with bonds attached to the amount of $30,000; of full paid first preferred stock $34,600; and of full paid second preferred stock, $66,800—which deducted from issues, leaves outstanding $7,368,600. This account has been opened to show the yearly investments, and the total amount cancelled. General property account is left at $7,500,000; whenever sinking fund account shall show $1,500,000 cancelled, it must be carried to general property account, which then will be reduced to $6,000,000, as required by law.

The Gold Question.

The passage of the Treasury Note Bill creates a great deal of discussion and speculation as to its influence on the market price of gold. The Circular of Samuel Hallett & Co. takes ground that the effect will be to put *up* the price of gold, which is an opinion not generally conceded in by the public. The conviction is almost universal that, from the effect of subsequent provisions added to the bill by the Senate, gold will be at only a slight premium:

The creation of a new currency, to consist of the promises of Government payable at its pleasure, is naturally the occasion in which every one ventilates his own notions or ideas upon this subject, most prolific of all in theories and opinions. The views expressed are as novel as the act. We must confess that the advocates of the new currency have a decided advantage in numbers, if not in argument. The latter, whether sound or not, avails little for the present. Among the advocates of the new measure, strange to say, are the managers of the banks. Money, they tell us, is a creation of Government; the adoption of gold and silver being a mere accident. The value of money consisting of the stamp of Government, this may, they affirm, be attached to a slip of paper, as well as a bar of gold. Such is the prevailing belief, and it procured the passage of the Treasury Note Bill. This measure being now a law, its advocates predict a fall in the price of gold. "What do we want of gold," is gravely asked. "Not for hoarding, surely: nobody is hoarding. Foreign exchange is really not against us, and will soon be largely in our favor by the opening of the cotton ports. Treasury notes will furnish all the currency we may need. There being no use for gold, it must become a drug, and its price fall to a level with other kinds of currency." Such is the argument that has overcome all opposition. We are willing to await the proof; for we are very certain that this is the only thing that will have any power to convince. But at the hazard of being entirely wrong, we venture to assert that Treasury notes, payable at the pleasure of Government, are not money, but merchandise, or securities, the market value of which depends upon the popular estimate placed upon them; and that to be converted into money, they must be sold like other merchandise or securities. We expect to see these notes consequently sink very nearly to the value of the 6 per cent. bonds of Government, into which they are convertible, and gold, consequently, at a corresponding premium. The operation of what, to us appears to be a natural law, may be somewhat modified by the new provisions inserted by the Senate, and concurred in by the House—to wit: That the notes may be deposited in the public Treasury to draw an interest at the rate of 6 per cent. per annum. This provision, which is a great improvement upon the original bill, may absorb so large an amount, that the price of those in circulation may be maintained at a higher rate than Government Stocks. But at best this new currency rests upon very uncertain foundations. It may be entirely safe; that it is—it may be redeemed—so may the bond into which it is convertible. We in fact do not entertain a doubt of this. But this assurance, is only an element in *price*, does not give the notes any of the attributes of money. But, say the advocates of the new currency, "there are $250,000,000 of gold in the country, while our mines are producing more than a million per week. The premium paid at the present time consequently, must be wholly caused by spe-

culation. It is in the power of the banks, by cramming speculators, to put the prices at *par*." Such a step is earnestly advocated by several bank managers. We hope to see the experiment tried. If by legislation, or the action of the banks, a currency that costs next to nothing, and which represents nothing but a promise, can be made to take the place of the precious metals and perform all the functions of money, then we have certainly entered into the financial millennium. We have something better than the perpetual motion. At the expense of a cent we can create a dollar. If the value of money is the effigy or stamp of Government, then we have forever solved the most difficult problem of all governments—that of the ways and means. Henceforth nothing is impossible—Let us have ships to overawe the world; (unless other nations discover our secret;) an army of 600,000, at a cost of $600,000,000, and all sorts of peaceful works, among them a half dozen railroads to the Pacific; a telegraph around the world, and every material or physical development that money can bring.

Insurance Companies--Premium and Stock Notes.

THE MOHAWK VALLEY INSURANCE COMPANY—THE CONVERSION OF A PREMIUM NOTE INTO A STOCK NOTE DISCHARGES THE MAKER FROM LIABILITY.

An action was brought by the Receiver of the Mohawk Valley Insurance Company against one David Shibley, as the maker of a certain *premium* note, of which the following is a copy:

$84.00. For value received in policy No. 398, dated October 21, 1851, issued by the Mohawk Valley Insurance Company, I promise to pay the said company, or their treasurer for the time being, the sum of eighty four dollars, in such portions, and at such time or times, as the directors of said company may, agreeably to their charter and by-laws, require.

April 29, 1851. DAVID SHIBLEY.

The case was tried at the Montgomery Circuit of the New York Supreme Court, where a verdict was ordered for the plaintiff for the amount of the note, subject to the opinion of the Court, at General Term. It was proved that the note was used as an original stock note on the organization of the company. The defendant insisted that such use was without his knowledge, consent or approval, and gave evidence showing that the note was made and delivered as a premium note. But such evidence was objected to by the plaintiff's counsel, as irrelevant and improper. The court directed a verdict subject to the opinion of the court at General Term.

The General Term held that where a note is made and delivered to a mutual insurance company as a *premium* note, and not as an original *stock* note, and upon the understanding that it shall be appropriated for no other purpose than that of a premium note, the subsequent use of such note, by the company, as a stock note, without the consent of the maker, is a fraudulent perversion of its object and design, which will render it invalid, except in the hands of a *bona fide* holder. The court, however, ordered a new trial on the ground that the judge erred in directing a verdict subject to the opinion of the court at a General Term. The following is the opinion, in full, of the General Term.

BROCKES, J.—The action is brought by the plaintiff as receiver of the property and effects of the Mohawk Valley Insurance Company, and is based upon a note alleged to have been given as an original stock note, pursuant to sec. 5 of the act providing for the incorporation of insurance companies, passed April 10, 1849. The defendant denies that the note was given as an original stock note, but insists that it was made and delivered as an ordinary premium note, and that he is not liable thereon without due assessment.

The company was organized on the mutual plan, and by the case it is found that the note was made and delivered as a premium note, to be used as a premium note only, and not as an original stock note. On this point the issue of fact is determined in favor of the defendant. It is not pretended, that a recovery can be had on the note, regarded as a premium note, inasmuch as no assessment of it is averred or attempted to be proved.

But the plaintiff insists that the note was in fact used as a part of the original capital stock, on which the company organized, and it is claimed that such use of the note concludes the defendant, notwithstanding it was a misappropriation. By the case it appears that the use of the note, as an original stock note, was without the defendant's knowledge or approval. He executed and delivered it as and for a premium note, and it was then understood that it should be appropriated for no other purpose. It seems impossible, therefore, that he should be bound by its misappropriation. Its use as a stock note was a fraudulent perversion of its object and design. Having given it for a particular purpose, its diversion and appropriation to a different one, without the defendant's knowledge or consent, rendered it invalid, except in the hands of a *bona fide* holder.

The company certainly was not a *bona fide* holder of it. The note was given to the company. It was in form a premium note, carrying on its face a clear presumption against any intention that it was made to be used as an original stock note. Judge Allen when speaking of a note similar in form, remarked: "The note in the absence of evidence that it was one of the original notes of the company, will be presumed to have been received as a premium note, and the defendant only held to the liability incident to a contract of that character." The presumption was against the allegation that it was an original stock not, and it was for the plaintiff in this case to remove such presumption before he could recover in the action. How was this presumption met? It is said by the use to which the note was in fact put. But in addition to that there should have been proof that the defendant assented to such use of it, either expressly or by fair implication. Not only is there no evidence of such assent by the defendant, but there is proof conclusive, and it stands in the case as a fact, that such use was unauthorized and unsanctioned.

It is said that the evidence in regard to the purpose for which this note was given, was improperly received. Admit this, and the plaintiff has not made out a case for a recovery, inasmuch as there is no evidence to overcome the presumption that the note was, according to its terms a premium note; if indeed such evidence would have been competent against the express terms of rhe contract, without averring mistake. Such evidence (evidence of the purpose for which the note was made) was, however, admissible. It did not contradict or tend to contradict the note in any particular. It was entirely consistent with its terms and conditions. Such evidence has always been held to be admissible.

Certainly, if it was competent for the plaintiff to show, against the presumption, that it was a stock note, it was also competent to sustain the presumption by similar or other legal evidence. Evidence of the purpose for which a note is given is competent, or it would be impossible in any case to show its diversion or misappropriation. Such evidence in no way varies or contradicts the written contract.

It is urged that the note was made before the organization of the company, and that the company consequently were not bound by anything which then occurred. But the form of the note raised a presumption that it was given as a premium note, not as a stock note, hence the company were not authorized to use it for the purpose of effecting their organization, if such use would charge the liability of the maker on it, until his assent was obtained. I thing, however, the company were bound by what occurred at the time the note was made and delivered to Menness. He became the agent of the company on its organization, and signed the defendants application for insurance as the agent of the company. The company received the note from him as their agent, and having adopted his acts, must be held to be bound by the transaction. It is a general rule that where a ratification by a principal is established as to a part, it operates as a confirmation of the whole. So if the company used the note they were bound to use it according to the arrangement under which it was made and delivered. The company must be deemed, therefore, to have had notice of the purpose for which the note was given.

It follows that the company could enforce the note only as a premium note. The receivrr is in no better conditton, as he stands in the place of the company, with no greater rights. It has been repeatedly held that a receiver is subject to all the rights and equities existing against the company. Judge Bouson said that the receiver took the place of the company and stands as the representative of the company.

It is not necessary to pass upon the question whether a valid appointment of the plaintiff as receiver is shown, inasmuch as the case is conclusively against a right of recovery on the note as an original stock note.

The verdict in this case was directed, subject to the opinion of the court at general term, pursuant to sec. 26 of the code of procedure. In giving this direction I think the Judge erred. That section provides, that when upon a trial the case presents only questions of law, the judge may direct a verdict subject to the opinion of the court at general term, not to a case in which, as in this, there is a question as to the admissibility of evidence. The evidence which gives support to the defense in this case was allowed, against objection, thus raising in the case a question of evidence. It was not, therefore, regular for the judge to direct a verdict subject to the opinion of the court at General Term. The case must go back for a new trial on account of this irregularity.

☞ RAILROAD COMPANIES will oblige us by sending us copies of their REPORTS as soon as they are issued.

American Railroad Journal.

Saturday, March 1, 1862.

Share and Money Market.

The Share Market, after showing great buoyancy the first part of the week, and an advance of two or three per cent., and a much larger one on Border State Stocks, has fallen off under realizations, and the absence of exciting intelligence. Governments form an exception to the fall, the prices for these remaining firm. The Treasury Note Bill which passed on the 25th ult., has yet exerted no apparent influence upon the market. This provides for an issue of Treasury Notes of $150,000,000 in addition to the issue in July of $50,000,000, and makes the latter receivable for custom duties. The bill makes all the notes legal tender in all contracts, public and private. It will be weeks, we presume, before they can be issued. Money has been active for the week, owing, chiefly, to the demand for stock operations, which have been unusually heavy. American gold is weaker, selling on the 27th down to 102½. Exchange is also dull and weak, selling nominally at 113½ to 114¼.

The interest, due March 1, on the mortgage bonds of the Cleveland and Pittsburg Railroad Company, will be paid at No. 25 William street, by H. C. Kingsley.

The interest on the Second and Third mortgage Bonds of the Erie Railway Company will be paid on presentation of the coupons at the office of the Treasurer, in Erie Place, on the first day of March inst.

At the same time and place the holders of the certificates of D. S. Gregory and J. C. B. Davis, Trustees, will receive payment of the coupon of the Fourth Mortgage bonds, due April 1, 1860, with interest from May 1, 1861, to March 1, 1862.

The Covington and Lexington Railroad Company being unable to pay the principal of the 1st mortgage bonds, maturing on the 1st of March, 1862, asks an extension of the same for ten years, and proposes to issue new coupon sheets to be attached to the bonds. Holders are requested to present the bonds for the new coupon sheets to Schuchardt & Gebhard, No. 21 Nassau st.

The balance of principal unpaid of St. Louis County Bonds, due Dec. 1, 1861—say 50 per cent., with three months' interest thereon, making $508 75 upon each bond—will be paid on and after 1st March, upon presentation at Bank of Commerce in New York.

The 5 per cent. dollar bonds of the State of Alabama, due 1st November last, at the Phœnix Bank, will be paid, principal and interest, by Messrs. Duncan, Sherman & Co.

Central Railroad Company of New Jersey.

This company is a consolidation of the *Elizabeth and Somerville* and the *Somerville and Easton* Railroad Companies. The former company was chartered in 1831, and empowered to construct a railroad from Elizabethport to Somerville, a distance of about 25 miles. The road was completed and brought into use in March, 1839. The latter company was chartered in 1847, to continue the line from Somerville to the Delaware, and by supplement to its charter in 1849, was authorized to purchase the former road, and to change its title to that of the "Central Railroad Company of New Jersey." Under the original charter, 9¼ miles, from Somerville to Whitehouse, had already been constructed at a cost of $236,461. In July, 1850, the two companies were consolidated. The construction of the extension was commenced in September of the same year, and completed and the road opened to Phillipsburg, opposite Easton, 63.80 miles from Elizabethport, in July, 1852. In 1856, a second track was completed from Elizabethport to Hampton, a point of junction with the Warren (Delaware, Lackawanna and Western) Railroad, 48 miles, and a third rail laid for the wide gauge cars of that road. Extensive accommodations have also been provided at Elizabethport for the coal trade of the two companies. By agreement between them, the Central Company receives 1¼ cent per ton per mile from the Delaware, Lackawanna and Western Company for the use of its road; the former furnishing motive power for its trains. The contract is a perpetual one, but subject to revision every five years. The company also has an arrangement with the Lehigh Valley Railroad Company, whereby coal is transported over it from the Lehigh mines—the two companies sharing in expenses and profits in ratio of mileage, after allowing 26 cents per ton to the Lehigh Valley Company for the use of its cars. From Elizabeth to New York, 14 miles, the cars of the Central are drawn over the road of the New Jersey Company, at a charge of 15 cents per passenger.

The amount of capital stock authorized was $2,500,000, which has since been increased to $3,630,000, by the conversion of second mortgage bonds, income bonds, wharf loans, and six per cent. loans. The funded debt of the company is as follows:

First mortgage 7 per cent coupon bonds $1,400,000. The original issue was $1,500,000, dated August 1, 1850, and payable, principal in three series of $500,000 each—one in 10 years, one in 15 years, and one in 20 years, and coupons semi-annually, Feb. 1, and Aug. 1, in New York. The series which became due in 1860, the holders were allowed to extend to 1870, and new sheets of coupons annexed to the bonds, with the exception of $100,000, which were not presented in time, and were therefore paid at maturity.

Second mortgage 7 per cent. coupon bonds,

$600,000. The original issue was $1,500,000, dated May 1, 1855, and payable principal in 20 years, and coupons semi-annually, May 1, and Nov. 1, in New York. $900,000 of these bonds, together with $88,000 income 7 per cent. convertible bonds, $100,000 six per cent. loan of 1859, and $57,000 wharf loans of various dates, amounting in all to $1,145,000, have been converted into stock. The bonded indebtedness has thus been reduced $1,245,000. We give elsewhere the report of the company for the past fiscal year. Since 1853, the company have paid dividends amounting in the aggregate to $1,498,293, or 60 per cent., an average of nearly 7 per cent. upon the capital stock, viz:

In 1853.....	5	per cent. or	$76,359
In 1854.....	7	"	117,173
In 1855.....	.	"	.....
In 1856.....	7	"	140,000

In 1861.....	10	"	363,000
Total	60	"	$1,498,293

War Debt of Kentucky.

The following is a statement of the amount of money borrowed from the banks since the re-organization of the Military Board in September last:

From the Bank of Kentucky	$500,000 00
" Northern Bank	350,000 00
" Bank of Louisville	200,000 00
" Farmers Bank	250,000 00
" Commercial Bank	100,000 00
" Bank of Ashland	35,000 00
	$1,435,000 00
Amount borrowed prior to the re-organization of the Board	80,000 00
	$1,515,000 00
Add to this the amount of the direct tax apportioned to Kentucky	713,695 33
And we have	$2,228,695 33

—as the aggregate of the War Debt of Kentucky at the present time.

(From the London Engineer.)

The Railways of the World.

(Continued from p. 140.)

Spain.—The Madrid and Alicante line, 282 miles long, increased by the Toledo and Cuidad Real branches to 370 miles, has been open for a considerable length of time. The line from Madrid to Jadraque is 65 miles long; that from Barcelona *via* Saragossa to Pamplona is 337 miles long, and 99½ miles of other railway line also extend from Barcelona. A railway of 80½ miles is open between Cordova and Seville, a line extending 94¾ miles from the latter point to Cadiz. A line 73 miles long reaches from Valencia to Almansa, 60 miles north of Alicante, on the railway connecting that port with Madrid. In the north, about 255 miles of railway are open from Santander and Barcena inland, and extended (with the exception of an interruption at the Sierra de Guadarama or Cantabrian Mountains), southward *via* Valladolid with a branch to Burgos.

We have thus enumerated 1,875 miles of Spanish railways, but it is believed that about 1,450 are now open in Spain, while upwards of 1,000 miles more are in course of construction, the contemplated "system" covering the whole kingdom from Bayonne to Cadiz, and from Corunna to Alicante, and thence along the Mediterranean to the French frontier. The actual cost of Spanish railways already executed may be set down at £26,000,000.

Italy.—We have already, improperly perhaps, included the Lombard lines with the great Austrian system to which it belongs. Thus, besides the line entering Milan from Venice, the South Austrian Company work the line from Piacenza to Bologna, and from Plaisance to Bologna, the Piacenza line being 105, and the Plaisance line 91 miles long. Of the whole "system" of 1,294 miles, upwards of 300 are in that part of Italy now subject to the rule of Victor Emanuel. Including this portion, the whole mileage of railways in the kingdom of Italy was, a few months ago, 1,115. Of this, 524 miles were at work, besides 66 miles about to be opened within the Sardinian territory, 212 in the Emilia, 222½ in Tuscany, besides 121 miles in construction, and 125 miles nearly completed in the Neapolitan territory. The Bologna and Ancona, 126 miles long, has since been opened, and, altogether, the present length may be taken at 1,350 miles. In our concluding summary we shall deduct from the mileage already given for Austria the 200 miles of Italian line worked in connection with the South Austrian system, and shall thus give full credit to Italy in respect of railway enterprise.

The Roman States.—The line towards Naples is reported to have so far progressed that it was expected to run locomotives to Ceprano, by the present year. The line to Frascati already open is 11½ miles long, besides a short branch.

Russia.—The St. Petersburg and Moscow line, 400 miles, is owned by the Russian Government, and its cost has never, we believe, been stated officially. Bayard Taylor, an intelligent traveller, who spent some time in Russia and paid much attention to this railway, states that its cost was £18,000,000, or £45,000 per mile.

The Grand Russian Railway Company had 501 miles of line at work at the date of their last report, and expected to open 568 miles more early in the ensuing season. As the company has been authorized to abandon its Southern line to the Crimea, the complete *reseau* will include 1,069 miles only, instead of nearly 2,600, as originally intended. The company's capital has been fixed at £20,000,000, most of which probably has been expended.

The St. Petersburg and Peterhof line, owned by Baron Stieglitz, is 18½ miles long, and is about to be extended to Narva.

The Riga and Dunaburg line, owned by an English company, is 135 miles long, and we may estimate its cost at £1,500,000.

The Warsaw South Western line, extending to the Austrian frontier, and including branches, is 235 miles long. Taking its cost at £3,500,000, we shall have 1,289½ miles, and £43,185,000 capital expenditure, represented in part by extensive works in progress.

Denmark.—The following enumeration includes the railways in Schleswig and Holstein.

Altona and Kiel, 65 miles; and branches to Itzehoe and Rendsburg, 42 miles. Flensburg to Tonning, with branch to Rendsburg, 70 miles; and Copenhagen to Corsoer, 56 miles. The Lubeck branch of the Berlin and Hamburg line, 29 miles long, is in Holstein.

We thus have 262 miles of railway in Denmark, the cost of which may be taken at £3,000,000.

Norway.—The Norwegian Trunk Railway, from Christiania to Eidsvold, is 42 miles long. The Stor Hammer line, of 21 miles, has been opened from the Trunk line to Elverum, and the Kongsvinger line, which is above 60 miles long, is expected to be opened in the spring.

Sweden.—From Gottenburg, the Government railway is open for 113 miles to Toreboda, in the direction of Stockholm. About 50 miles of railway are open also from Malmo, nearly opposite Copenhagen. Of the Royal Swedish Railway extending towards Lake Wener, 45 miles are open. A line of 80 miles is completed also from Gefle inland to Falum. There are thus 288 miles of railway open in Sweden, which have probably cost about £5,000,000, the Government having contracted a debt of £2,200,000 for railway purposes.

Belgium.—The railway system in Belgium is the most complicated, for its extent, of any on the globe. Its extent is now 955 miles, divided in at least 24 lines, most of which are worked by the State. The mileage given includes the Sambre and Meuse line, and that portion of the Great Luxemburg within Belgium, the remainder properly belonging to Holland. The capital expenditure on the Belgian lines has probably reached £18,000,000.

Holland.—The Dutch lines may be set down as 308 miles, including 37 miles of the Great Luxemburg, and portions of other lines which, although not absolutely in Holland, are part of its own railways, and are not included with those of other countries. The Dutch lines have probably cost about £6,000,000 all told. The Government of the Netherlands have resolved to carry out an extensive system of railways, embracing, in addition to those already noted, 668 miles of "first class," and 171 miles of "second class" railway. These lines will involve the construction of extensive bridges, some of which will require to have spans of unusual width.

Switzerland.—The Swiss lines are already upwards of 600 miles in extent, and a large sum has been voted to their extension, *via* the Splugen pass, into Italy.

Portugal.—The two lines, one from Lisbon to Porte d'Asseca, and the other from Barreiro to Vendas Novas, and measuring together rather more than 80 miles, are all that are yet in operation. During the past year, however, upwards of 22,000 men have been employed on the new lines.

Turkey.—In European Turkey the Kustendje and Black Sea line, 40 miles long, and costing £300,000, is open. In Asiatic Turkey, 40 miles of the Smyrna and Aidin line are at work. The whole length of this line will be 80 miles, and its cost is estimated at £1,200,000.

Algeria.—The Algiers and Bildah line has been commenced, and also the Constantine and Philippeville line.

Egypt.—The Alexandria, Cairo, and Suez line, 204 miles long, has cost, probably, about £1,000,000.

NORTH AMERICA.

Returning now to America, the length and cost of British American railways being already given, we come to the United and Confederate States. These countries have, together, by far the most extensive railway system in the world. The railway companies do not report to the national Governments, and only in a few States is any report made to the local Governments. The length and cost, however, of all the lines in the States have been carefully collected, for many years by trustworthy statisticians, among whom the most authoritative is Mr. Henry V. Poor, of New York, for many years the editor of the *American Railroad Journal*. These statistics gave the following results on the 1st of January, 1861, or one year ago:

United States.	Miles open.	Cost.
Six New England States, including 149 miles leased to G'd Trunk of Canada..	3,715¼	£30,249,842
N. York, New Jersey, Pennsylvania, Delaware, Maryland & Dist. of Columbia.	6,922	72,382,200
Ohio, Mich., Indiana, Illinois, Wisconsin and Iowa	10,333	79,579,612
California	70	740,741
Missouri and Kentucky	1,344	10,689,237
Total in the "loyal" States.	22,884¼	£193,591,632
CONFEDERATE STATES.		
Railways in the 11 seceded States	8,784	48,793,300
Total, United and Confederate States	31,168¼	£242,384,932

The railways in the "loyal" States have cost on the average £8,648 10s. per mile. Those in the Confederate States have averaged £5,555 per mile. The average cost of all the lines in the United and Confederate States has been £7,777 per mile.

Of the whole cost of £242,384,932, it is estimated, by the best authorities, that £60,600,000 are held in debentures and shares (chiefly the former), in Great Britain, and probably £40,000,000 on the continent. The gross earnings of all the 31,169 miles was estimated for 1860 at £28,806,584, or 12 per cent. on the whole cost, the net earnings being similarly estimated at £12,245,678, or 5 per cent. As, however, more than one-half of the whole cost of American railways is represented by debentures, bearing from 6 to 10 per cent. interest, the actual average dividends on shares could hardly have averaged as much as 3 per cent., and the whole share capital of American railways did not, previous to the breaking out of the present war, average much more than 50 per cent. of its par value in the share market.

On the 1st of January, 1861, there were, in the 34 States, and in addition to the 31,169 miles of railways then open, 17,080 miles, on which more or less work had been done, making the total of lines constructed, and in course of construction, 48,101 miles. Thus, in the State of Texas, which had but 294½ miles of railway open, there were 2,572½ miles in progress. Minnesota, which had no railways open, had 1,167 miles in progress.

The progressive increase of railways in the States is shown in the following statement of the miles open and in use at the end of quintennial periods:

1831	54 miles
1836	1,102 "
1841	3,319 "
1846	4,870 "
1851	8,856 "
1856	21,440 "
1861	31,169 "

This increase is strikingly illustrated in certain of the principle States, North and South, as follows:

	Miles in 1861.	Miles in 1851.	Increase.
Ohio	3,057	497	2,560
Pennsylvania	2,943	...	.....
Illinois	2,924½	148	2,777
New York	2,809	1,304	1,505
Indiana	2,055	215	1,843
Virginia	1,805	413	1,392
Georgia	1,402½	655	737
Massachusetts	1,314	1,150	164

In Mexico a short line is open from the city of Mexico towards Vera Cruz.

West Indies.—In Cuba upwards of 500 miles of railway are open and in use, the average cost of which may be taken at £11,000 per mile, equal to, in all, £5,500,000.

SOUTH AMERICA.

New Granada.—The Panama Railway across the Isthmus of Panama (Darien) is 49½ miles long, and cost £1,600,000, or say £32,000 per mile. The net receipts have averaged about £400,000, or 25 per cent. on the cost.

Venezuela.—Two or three lines have been commenced—one from Puerto Coabello to San Felipa, a distance of 53 miles, and another running from La Guayra towards Caraccas.

Brazil.—In Brazil 27 miles of the Bahia line are open, and up to the 30th of June last £1,236,405 had been expended on the whole line, open and in progress.

There are also open 36½ miles of the Pernambuco line, the cost of which, thus far, has been £1,409,000.

The Don Pedro II. Railway is open for 38 miles from Rio de Janeiro to Belem, and 220 miles are in course of construction.

On 88 miles of the San Paulo line £314,000 had been expended up to the date of the last report.

Chili.—In Chili the Copiapo Railway extends from the Pacific coast at Caldera, 74 miles inland, *via* Copiapo to Pabellon, whence the Copiapo Extension Railway, 26 miles long, extends to Chanaxillo, 100 miles from the sea. A branch of 53½ miles is in course of construction by the Copiapo Extension Railway Company.

From Valparaiso a line of railway has been opened for nearly one-half the distance of 110 miles to Santiago, the Capital of the Republic. Another line is in progress from Santiago southward to Talca, a distance of 162 miles, upwards of 60 miles being open.

Peru.—Three lines are open in Peru—the Arica and Tacna, 38½ miles long, and one of 8¾ miles from Callao to Lima, and one from Chorillas to Lima. These three lines, nearly 50 miles in extent, may be set down at, in all, £500,000.

RECAPITULATION.

Great Britain and Ireland:	Miles open.	Cost.
England and Wales	7,583	
Scotland	1,486	
Ireland	1,364	
	10,433	£348,140,327
India	1,408	34,306,445
Canada	1,826	20,648,049

Spain	1,450	25,000,000
Italy	1,850	25,000,000
Rome	50	1,000,000
Russia	1,289½	43,185,000
Denmark	262	3,000,000
Norway	63	700,000
Sweden	288	5,000,000
Belgium	955	18,000,000
Holland	308	6,000,000
Switzerland	600	10,000,000
Portugal	80	1,600,000
Turkey	80	1,000,000
Egypt	204	4,000,000
Total	22,692½	£476,550,460
North and South America,		
Exclusive of British America, the railways of which are included with Great Britain and Colonies.		
United States	22,384½	£193,591,632
Confederate States	8,784	48,793,300
Mexico	20	200,000
Cuba	500	5,500,000
New Granada	49½	1,600,000
Brazil	111½	5,000,000
Paraguay	8	80,000
Chili	195	2,000,000
Peru	50	500,000
	32,102½	£257,264,932
Grand total of all the railways in the world	69,072	1,151,168,446

Inasmuch as the particulars given for the various countries are in some cases derived from returns a year, and in a very few cases two years old, it is probable that the actual extent of railway now open in the whole world is about 70,000 miles; and that the capital expenditure to date has been nearly £1,170,000,000.

Syracuse and Cortland Railroad.

This is a short road, only about four miles in length, connecting the village of Sycamore in DeKalb county, with Cortland, a station on the Dixon Air Line Railroad. We are informed that it is a paying investment for the shareholders. William J. Hunt is President and Treasurer, and Norman Beckley, Superintendent.

Commercial Prospects of the Country.

We copy from the Circular of Samuel Hallett & Co. the following remarks in reference to the Foreign Commerce of the country, which, considering the existence of civil war, is certainly in a very favorable position.

The country has now passed through the most trying period, as far as its foreign commercial relations have been concerned, to which a civil war has exposed it, in a manner which has fully justified the ground taken by ourselves in the outset, that it could part with cotton as an article of export, and still maintain its position as creditor in the great family of nations. In an aggregate of exports for 1860, of $372,000,000, cotton stood for $191,000,000. The relation of the latter to the aggregate exports for 1861 was not much different. At the commencement of the civil war, the crop for 1860–'61, had fortunately nearly all reached market. That of 1861–'62, none whatever. We have now reached a period at which the greater part of the crop has usually gone forward, and the whole of it in a position to be realized upon, without using a single cotton bill, or feeling the necessity of using one to make good foreign balances against us. During the year just closed we have imported at least $50,000,000 in specie, to make good balances in our favor, nearly the whole of which still remains in the country. Our mines in the same time have produced at least $65,000,000. The Northern States alone, without realizing a penny on cotton, have been able, within the year, to accumulate at least $115,000,000 in the precious metals, as a capital to be drawn upon in the future, without foreign balances against us, or balances that will call for shipments of gold exceeding for the future, the regular produce of our mines. The year that has closed has been one of great domestic losses, but no embarrassment whatever has been caused on account of foreign commerce, our importations having been reduced in vastly greater ratio than our exports.

But the opening of the spring bids fair to find us in a stronger position than ever in reference to our foreign trade. There were never before such extensive accumulations of breadstuffs in the interior. These will begin to come forward in two months, upon the opening of the canals. We shall have consequently in greater abundance than ever, the staples which make up the bulk of our exports for 1861. In sixty days more, peace will be restored to the entire Tobacco producing section of the country, including perhaps Virginia, so that tobacco will be speedily added to the list of our exports. Kentucky and Missouri are now cleared of rebels in arms, and will soon resume their wonted commerce. It is altogether probable that the next sixty days will witness the opening of every important cotton port, and order restored to a large portion of the cotton States. We have seen enough to prove that all that is wanted to bring forward a large amount of the cotton, is protection against a cabal, which has overawed the whole South, even in sections where the unionists greatly outnumbered the rebels. A fair crop has been grown. It must come to market. All that is wanting is a way, and this will soon be provided by the success of our arms. In the next six months, it is more than probable that we shall have cotton bills to the amount of $100,000,000, in addition to exports from other sources quite equal to our imports, and which will create a balance to a nearly equal amount in our favor, a portion of which must be liquidated in gold; for under the high rates of duty which are likely to prevail, we do not see how we can largely increase our imports over the past year. Upon many

articles which we have been accustomed largely to import, the duties are nearly prohibitory, and must immediately cause a large amount of capital to be invested in this country in their production.

As far as our foreign relations are concerned everything is as favorable as could be desired. We cannot fail to keep other nations largely in our debt. At home the prospect of a speedy termination of the war is fast solving some of the most difficult problems before us. We can certainly see the end of the war. The Treasury Note Bill in its present shape is an unfortunate measure; but we trust we shall not repeat it. Certainly we need not if Congress will only provide an adequate system of taxation. The worst feature in the future, is an inflation in prices, and a wide difference in the market value of gold and a paper currency; but this may in time be restored by providing adequate revenues, which shall convert the Treasury Notes into machinery for their collection, and thus render the market and nominal value of the two currencies identical. It is in the government finances that all our danger for the future lies. The people of the North never possessed greater elements of prosperity. Their industries were never more prosperous or productive. If government will display the prudence and capacity in the management of its affairs that the people have in theirs, all will be well. The Treasury Note Bill has been, by the action of the Senate, divested of many of its worst features, though the most objectionable of all, the legal tender clause, still remains.

Lake Trade and Lake Defences.

We have a copy of a report of the Committee of Public Defence of Buffalo, of which Mr. Vice-President Filmore is President, from which we make the following extract of the American and Canadian Tonnage of the Lakes and River St. Lawrence in 1861.

UNITED STATES TONNAGE.

Description.	No.	Tonnage.	Value.	Av. Tons.	No. of Men.	Total Men.
Steamers	71	40,125	$1,493,300	565	25	1,775
Propellers	182	56,203	2,597,100	309	20	3,640

Total	336	71,505	$2,414,600	—	—	3,732

Condition of Minnesota.

The annual message of the Governor of Minnesota, states that the total expenditures in 1861 were but $76,000; a reduction of two-thirds since 1858. The population of the state is 200,000; an increase of 28,000 since June 1st, 1860. The farmers in three years have nearly doubled the dominion of the plough and the reaper. In place of importing a part of their food, their exports of grain have swollen, in the same short period, to three or four million bushels. In the meantime the expenses of the state government have been reduced; the state tax has been lessened twenty per cent., while the taxable property has largely increased.

The products of Minnesota for 1861 are estimated at the following values:

Products of agriculture	$6,000,000
Products of manufactures	2,500,000
Furs, cranberries, ginseng, and other products	350,000
	$8,850,000

The taxable valuation being about $39,000,000, this is equivalent to a return of about 22 per cent. The exports of wheat in 1861 are given at about 3,000,000 bushels, against 1,650,000 bushels in 1860, and 370,000 bushels in 1859.

Hudson River Railroad.

The annual report of this Company, made to the Legislature, for the year ending September 30, 1861, gives the following statement of business:

EARNINGS.

From Passengers	$1,037,655 88
From freight	892,570 22
From other sources	58,787 64
Total	$1,989,013 74

EXPENDITURES, OTHER THAN FOR CONSTRUCTION.

For transportation expenses	$1,422,552 32
Interest	695,547 99
Total	$2,118,100 81
Construction account; 1860	$11,800,445 50
Construction account, 1861	12,094,599 95
Increase	$294,154 45
Expenditures more than earnings, for year ending Sept. 30, 1861	$423,241 52

HUDSON RIVER RAILROAD STOCK AND DEBTS.

Capital stock as by charter	$4,000,000 00
Amount of stock subscribed	3,770,926 59
Amount paid in as by last report	3,758,466 59
Total amount now paid in of capital stock	3,758,466 59
Funded debt, as by last report*	9,107,000 00
Total amount now of funded debt*	9,137,000 00
Floating debt, as by last report	182,106 10
The amount now of floating debt	773,411 27
Total amount now of funded and floating debt	9,910,411 27
Average rate per annum of interest on funded debt	6.9 per cent.

* Mortgages amounting to $226,750, given for real estate, purchased in the City of New York, during the year 1860, not included in the above.

Montreal and Champlain Railroad.

The annual meeting of this Company was held in Montreal on the 12th ult., at which the following gentlemen were elected Directors for the ensuing year:—Wm. Dow, E. M. Hopkins, Wm. Malson, John Ostell, W. E. Phillips, Johnston Thomson, Wm. Workman, Chas. S. Peirce, and W. Macdonald.

The Report of the Directors was submitted, from which we learn that the business of the past, compared with the previous year, was as follows:

	Earnings.	Expenses.	Nett.
1860	$229,820 01	$136,349 62	$93,470 39
1861	213,706 63	123,247 26	90,459 37
Decrease	$16,113 38	$13,102 36	$3,011 02

Extraordinary expenditures are included in the above, amounting in 1860 to $9,255, and in 1861 to $6,510. The amount of interest paid was $94,011 27. The report says:

Your Directors have the gratification to announce that an agreement has been concluded and carried into effect with the Grand Trunk Company, for the joint use and occupation of the line from the Tanneries Junction, and of the Bonaventure street Station, as a City Terminus; the rental from which will hereafter add to your Company's revenue. Much mutual advantage is expected from this arrangement (so long called for by the public) as the two Companies are brought into closer and more friendly relations.

The question of continuing your line into a more central part of the city, is still under the consideration of the Corporation; it is hoped their decision will result in carrying out a public improvement so very desirable.

The connection with the Grand Trunk at St. Lambert, alluded to in last year's report, is already productive of favorable results.

The Stanstead, Shefford, and Chambly Railroad was completed to Stukely Line, beyond Waterloo last season, not however in time to afford any facility to summer tourists to visit Lake Memphremagog, but it is anticipated that much of the pleasure travel will take advantage of that route in future.

The tracks and bridges of your line are in good order, ten of the latter in the Rouses Point section having been rebuilt in the past year.

Your Directors are enabled again gratefully to report that no passenger has sustained personal injury within the year, showing that the employees in charge of your trains have been careful and attentive.

Since their election last year your Directors have used every exertion to effect a consolidation of the Company's indebtedness, in accordance with the provisions of the Act of 1860. They regret to say, their efforts have been unsuccessful.

The failure is not attributable to the state of the Company's own affairs, but rather to the great distrust exhibited by the monied interests in Canadian Railway enterprises. This difficulty combined with the unsettled state of American affairs, has compelled your Directors to suspend for the present, their negotiations in the English Money market.

Bonds to the amount of £50,000, secured by a first mortgage on the Lachine Section of your Road, matured on the 11th inst. It is hardly necessary to state that the Company has been unable to meet them, but an effort has been made to overcome any difficulty on that account by inducing the holders of the Bonds to grant a delay of one year, to enable the Company to make further efforts to consolidate its debts. The holders of £37,000 of Bonds have already granted such delay.

In conclusion, your Directors now about to retire from office, take the liberty of impressing upon the Stockholders the permanent necessity of effecting a consolidation of the entire Bonded and Floating debt, a measure in which both Bond and Stockholders are deeply interested.

The nett revenue of the Road is more than sufficient to meet the interest on the proposed Consolidation Loan of £300,000 sterling, and your Directors trust the new Board may feel with them that a day should not be lost in devising means to carry out the desirable object.

Railways in Iowa.

Iowa is one of the young giant states of the West, whose progress is almost of a mythical character. Settled almost within the recollection of the youngest inhabitant, its fertile, beautiful prairies, its varied landscape of hill and valley, and its mineral wealth, have attracted a large population, and the tide of immigration has hardly yet begun. In 1840 the territory of Iowa contained 43,112 inhabitants, all told. In 1850 it had become a state, and had a population of 192,114. In 1860 the number reached 674,948, or an increase of over 300 per cent. in a single decade. Notwithstanding the extreme youth of the state, and the exceedingly financial depressed condition of the entire country for nearly one half the period of its existence, it has inaugurated, and in a measure completed, a system of railways which is ahead of many of the older states, and bids fair to rival a large majority of them. Iowa has more lines of railway completed to-day than Kentucky. The following is a list of railways

chartered, with their contemplated length, and the distance already completed, within the boundary of the state

	Whole length.	Miles completed.
Burlington and Missouri	276½	120
Chicago, Iowa and Nebraska	82	82
Cedar Rapids and Missouri	240	40
Dubuque and Sioux City	320	141
Dubuque, Marion and Western	90	51
Keokuk and DesMoines	140	92
Keokuk and Muscatine	68½	25
Mahaska County	12	12
Mississippi and Missouri, about	300	85
Oakaloosa Branch	103	50
Total	1,632	598

The area of Iowa is 50,914 square miles. There is therefore complete and running one mile of railway to about seventy-five square miles of surface; but as few of the roads are completed one hundred miles west of the Mississippi, and the state is nearly 300 miles in breadth, in the settled portion of the state there may be said to be about one mile of railway to twenty-six miles of surface.

Proposed Lines: Minnesota and Cedar Rapids R. R.—North Missouri R. R.—St. Louis to Ottumwa—Open, St. Louis to Macon City in Missouri, 168 miles. Platte County R. R.—Parkeville, Mo., to Council Bluffs, Iowa, 150 miles. Open, Weston, Mo. to Savannah, Mo., 52 miles.

It will be seen that Iowa will be crossed from east to west by three grand trunk lines, viz: The Dubuque and Sioux City, the Cedar Rapids and Missouri Line, branching to Dubuque, Clinton and Davenport on the Mississippi, and the Burlington and Missouri Railroad Line branching to Davenport, Muscatine, Burlington and Keokuk. There is no line as yet which proposes to cross the state its whole length from north to south, and as facilities are afforded for this class of business by the east and west lines, and the rivers Mississippi and Missouri, it is probable that a strictly north and south line of railroad will be delayed some long time yet. The agricultural and mineral wealth of this state are but just beginning to be known and developed, and it is quite probable that the next ten years will exhibit even a greater increase of population and resources than the past.—*Chicago Tribune.*

Railroad Earnings--Weekly.

The earnings of the St. Louis, Alton and Chicago Railroad for the 2d week in Feb., were:

1862	$19,100 92
1861	22,515 69
Decrease	$3,414 77

The earnings of the Milwaukee and Prairie du Chien Railroad, for the 2d week of February, 1862, were:

For passengers	$3,330 81
For freight	11,049 79
For mails and rents	1,015 94
Total	$15,396 54
Corresponding week, 1861	9,489 08
Increase	$5,907 46

The earnings of the Toledo and Wabash Railroad for 2d week of Feb., 1862, were $11,983 42
Do., 1861 12,135 33
Decrease $151 91

The earnings of the Galena and Chicago Railroad the 3d week in Feb., 1862, were $23,569
Do., 1861 18,189
Increase $5,380

The earnings of the Cleveland and Toledo Railroad for the 3d week in Feb., 1862, were $21,876
Do., 1861 20,561
Increase $1,315

The following are the earnings of the Buffalo, New York and Erie Railroad for the first half of

February, 1862	$31,100 98
Do., 1861	17,751 28
Increase	$13,349 70

The earnings of the Detroit and Milwaukee Railroad for the week ending February 13th,

1862	$10,217 00
1861	5,734 73
Increase	$4,482 27

The receipts of the Grand Trunk Railway of Canada for the week ending Feb. 15, 1862, were:

10,846 passengers	$22,382 56
Mails and sundries	3,432 28
13,397 tons of freight and live stock	60,199 27
Total	$86,014 11
Corresponding week, 1861	42,226 94
Increase	$43,787 17

The traffic of the Great Western Railway of Canada for the week ending Feb. 21, 1862, was as follows:

Passenger	$10,992 45
Freight and live stock	38,695 82
Mails and sundries	1,289 93
Total	$50,978 20
Corresponding week of last year	40,034 20
Increase	$10,944 00

The earnings of the Michigan Central Railroad, for the 3d week of Feb., 1862, were $38,776 10
Do. 1861 26,454 10
Increase $12,322 00

The Chicago and Rock Island Railroad earned the 3d week in February, 1862 $20,642 00
Do., 1861 15,154 48
Increase $5,447 52

Reverse Acting Tumbler LOCKS

For Railroad and other Purpose,

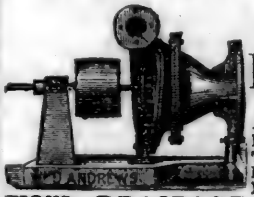
MADE to order and with different keys if desired. **One Thousand Dollars** has been offered by the inventor to any person who will pick one of their locks or get it out of order by any ordinary usage.

Orders filled, samples and prices furnished by application to the **Sole Agent** *of the Manufacturer.*

New York, January 4, 1862

GEO. T. M. DAVIS,
47 Exchange Place.

3m2



FOR SALE.

5 Locomotives, 4 ft. 8½ in. gauge.
50 House Freight Cars, that have had but slight use.
The above are at Chicago, Ill.
January 4, 1862.

Apply to GEO. T. M. DAVIS,
47 Exchange Place.

And all first-class SECURITIES
BOUGHT AND SOLD.

OFFICE OF THE ILLINOIS CENTRAL R. R. Co.,
New York, Feb. 10, 1862.

AT a meeting of the Board of Directors of the ILLINOIS CENTRAL RAILROAD COMPANY, held at their office in New York, this day, it was

Resolved, That an assessment of FIVE DOLLARS per Share, upon the Scrip Shares of the Capital Stock of the Company, be, and the same is hereby called, payable on the 10th of March, 1862; and that the same be payable on the Stock registered in the City of New York at the office of the Company in that City; and on the Stock registered in London, at the office of Messrs. ROBERT BENSON & Co., London; and that parties desiring to pay their assessment in London, may pay the same at the rate of four shillings and two pence sterling to the dollar.

Resolved, That the transfer books be closed on the afternoon of the 1st March next, and re-opened on the 10th of the same month; and that no transfer be permitted on or after that day of Shares upon which the foregoing assessment shall not have been paid.

THOMAS E. WALKER, Treasurer.

NEW YORK CENTRAL RAILROAD COMPANY,
TREASURER'S OFFICE, ALBANY, Feb. 6, 1862.

SEVENTEENTH SEMI-ANNUAL DIVIDEND.—The Directors of this Company have declared a Semi-Annual Dividend of Three per cent. on the capital stock thereof, payable on the 20th day of February inst. upon stock registered at New York, Boston, or Albany, and on the 20th day of March next, upon stock registered at London. Stockholders whose stock is registered at New York, will receive their dividends at the office of DUNCAN, SHERMAN & CO.; those whose stock is registered at Boston, at the office of J. E. THAYER & BROTHER; those whose stock is registered at Albany, at the ALBANY CITY BANK; those whose stock is registered at London, at the UNION BANK OF LONDON, the latter at the rate of 4s. 1d. to the dollar. The transfer books, which are now closed, will be re-opened at New York, Albany and Boston, on the morning of Monday, the 24th day of February instant.

12.	" 18 "	"	1 to 1	24.	" 32 "	"	1½ to 1

The Tables are printed in clear, bold type on tinted paper; sheets 25x16 inches. They may be used by candle-light without injuring the eye-sight. Each sheet is complete in itself, and embraces all that is wanted in connection with the Base or Slope designated, whether on level or side hill cross section.

Sent, **free by mail,** in separate sheets, at **25c.** each; or the whole, handsomely bound in cloth, in one volume, for **$7.50.**

ENGINEER'S FIELD BOOK,
By **C. S. CROSS, Civil Engineer.**

THIS work is designed as a pocket companion, and embraces, in the most compact form, all the necessary tables for prosecuting railroad surveys. It is subdivided as follows:—

1st. The method of staking out railroad curves and keeping field notes.
2d. Railroad curve tables for expeditiously determining the points at which commences the curving.
3d. Application of the Prismoidal formula in determining the quantities of excavation and embankment of canals and railroads from transverse sections.
4th. Excavation and embankment tables for expeditiously determining the cubic yards from mean area.

It is a plain, clear and most valuable book for practical Railroad Engineers. Sent, **free by mail,** upon receipt of the price. For sale at this office. Price **$1.**

HUDSON RIVER CEMENT COMPANY.

THIS Company is now prepared to furnish at the shortest notice, on the most favorable terms, **HYDRAULIC ROSENDALE CEMENT, NOVA SCOTIA CALCINED PLASTER, FARMERS' PLASTER,** and **MARBLE DUST,** all of full weight, and of a fine and superior quality.

This Cement is manufactured by the Company from a superior selected quality of Cement Stone, from its extensive Quarries at Rosendale Ulster Co. N. Y., and has been very extensively used during the past eight years in the construction of RESERVOIRS, CISTERNS, TANKS, BATHS, CELLARS, VAULTS, etc., and for a variety of purposes "under water," such as DOCKS, BRIDGES, MILL-DAMS, FOUNDATIONS and BREAKWATERS. It is largely used for any sort of **dry concrete** and **Underwater Works.** Where strong work is needed, or dampness to be excluded, this Cement is unrivalled. It has the unqualified approbation of the most eminent ARCHITECTS, ENGINEERS, CONTRACTORS and BUILDERS in AMERICA, being used in most every department of the **Works under Government.**

It is put up, for shipping purposes, in tight, well-made, and thoroughly papered barrels—each barrel containing **300 lbs.** of Cement—and shipped direc from the works at JERSEY CITY, N. J., (opposite the City of New York), **at all seasons** of the year, thus avoiding all unnecessary handling.

The better condition, therefore, in which its articles are received by purchasers makes it an object for them to purchase its Hydraulic Rosendale Cement, Calcined Plaster, Farmers' Plaster, and Marble Dust; and which if used by persons of experience, never fail to give entire satisfaction. Orders, however extensive they may be, are respectfully solicited from Dealers, Contractors, Railroad Companies, Masons and others.

Please address, **Hudson River Cement Company, Jersey City, N. J.,** or **J. H. BUTTS, Secretary.**

American Railroad Journal.

New York, Saturday, March 8, 1862.

Foreign Commerce of the United States for 1861.

We have the Annual Report on the Finances of the Country for the year ending June 30th, 1861. The total value of the imports are shown to have been $334,350,453, against $362,163,942 for 1860—a falling off of only $27,813,489. Of the imports, $46,339,611 were in specie, against $8,556,135 for 1860, showing a reduction in imports of merchandise equal to $65,602,965. The total exports were $248,505,454, against $400,122,296 for 1860. The exports of specie for the year were $23,799,870, against $56,946,851 for the year previous. The falling off in the exports of general merchandise, or produce, consequently was $183,431,861. The value of cotton exported is put down at only $34,051,483, against $191,806,555 for 1860; the excess in value for that year being $157,755,078. The total crop for 1860, of 3,656,000 bales, went to market, and it is probable that the value of that exported was fully up to $175,000,000, of which amount $140,948,517 was not reported to the Treasury, in consequence of the seizure by the rebels of the Custom-houses in the seceding States. The whole crop went into commerce, and the ordinary business relations between the North and the South were not discontinued till after its proceeds were distributed as fully as in former years. The falling off in the exports of tobacco was not so great as in cotton; the value of that exported for 1861, being $13,784,710, against $15,906,547 for 1860. The value of exports of Rice for the past year were $1,382,178 against $2,567,399 for the previous one. The exports of both of these articles for 1861 were probably as great as in 1860. If we assume that the value of Southern produce exported for 1861, deducting cotton, of which the crop was a short one, to equal that exported for 1860, we shall have a larger exportation for the whole country for the past year, than for 1860, with a reduction of imports, exclusive of specie, of more than $65,000,000. The large balance that was manifestly in favor of the country, resulting from its foreign commerce of the last fiscal year, explains the financial ease which has prevailed, and which enabled us to accumulate specie reserves unprecedentedly large.

The cotton went forward at a very early day at high prices. When the Southern ports were closed, they were entirely clear of produce. The demand for breadstuffs then set in, which has continued to the present moment. The exportation of these have not been affected by the war. In the meantime our imports had become reduced one-half their ordinary volume, enabling our people to meet the payment of them, for the first time, almost, in their history, with the produce of the Northern States. The value of the exports, being the products of agriculture of these States was $101,655,833 for 1861, against $48,451,894 for 1860. But no portion of the crop of 1861 went forward in that year. It is probable that the exports of domestic produce for 1862 will exceed that of 1861 by at least $50,000,000. With the exports of manufactures, and the products of the forest and the sea, and foreign merchandise re-exported, together with some portion of the tobacco and cotton crops, and perhaps the whole of them, it will be readily seen that we are likely to have the balance of trade with foreign nations still more largely in our favor for the current than the past fiscal year. The falling off in our exports, counting cotton out, will be by no means in ratio to that of our imports. The imports into the port of New York, for the first six months of the present fiscal year, have been only $60,196,000, against $131,941,000 for the previous year. The exports of domestic produce, for the same period, were $81,810,000 against $66,990,000 for 1860—a result most remarkable and most fortunate, considering the trying position of the country.

St. Louis, Alton and Chicago Railroad.

We have received a copy of the Second yearly report of the Receiver of this road to the trustees, of which the following is an abstract:

The earnings of the road for the fiscal year ending December 31, 1861, were:

From passengers	$426,388 96
" freight	630,420 82
" mails	24,127 58
" express, etc.	17,528 03
	$1,098,464 89

And the expenses were:

Repairs of road	$112,818 18	
" bridges	13,597 98	
" build'gs, etc.	13,913 71	
" locomotives.	62,075 46	
" cars	112,728 88	
Locomotive running	126,728 10	
Traffic expenses	189,765 54	
General charges	65,744 97	
		646,372 27
Total net earnings—41.16 per cent.		$452,092 62

Extraordinary renewals, viz:

Locomotives	$12,025 00
Cars	12,507 98
Road	133,118 81
Bridges and culverts	39,945 90
Buildings, etc.	14,459 67
	212,056 86
Balance of earnings	$239,935 76

The receipts of the road from December 5th, 1859, (the commencement of the Receivership) to December 31, 1860, being five days less than 13 months, amounted to $994,569 40. The expenses of its operation, and maintaining its ordinary repairs and rolling stock, for the same period, amounted to $768,783 20, or 77.52 per cent. of its receipts—being an excess of 18.68 per cent. over the average expenses of 1861.

The cost of extraordinary renewals in 1859-'60 were $285,517 70; in 1861, $212,056 86—making a total of $497,574 56. In addition to which the

sum of $317,017 34 has been expended in the extinguishment of liens and liabilities directed to be paid by the "Decree," besides other general expenses, inclusive of interest on loan from bondholders, amounting to $212,056 76—making a total of $814,591 80 met from earnings, less $240,405 70 loan from bondholders and receipts from other sources, leaving the total balance of assets in the hands of the Receiver December 31, 1861, over and above current and outstanding liabilities, inclusive of cash and stores, of $88,759 68, from which $22,054 58 should be deducted for the interest of 1861, due on bondholders' loan, now being paid, leaving the assets proper of the Receivership December 31, 1861, $66,695 10. Its liabilities outstanding under the decree creating it, it is impossible to fix until the Commissioners, appointed to examine and verify various claims, file their award. If the liabilities of all classes outstanding are fixed at $580,000, and $50,000 of assets on hand as available in reducing them, about $530,000 will have to be met by the future profits of the road, or liquidated by arrangements between the trustees and the creditors, before redeeming the road from the jurisdiction of the U. S. Court.

The decree of Nov. 30, 1859, directs that $50,000 be expended annually out of the net earnings of the road in defraying the expenses of extraordinary renewals. As this appropriation was inadequate to meet the outlays of necessary improvements, the Court ordered an additional expenditure of $400,000, which, if we include the present year, it being the third of the Receivership, gives the right to expend $550,000 on permanent renewals. Of this sum, $497,574 56 have been expended, leaving $52,425 44 as applicable to future renewals.

Since the 3d of December, 1859, 14 locomotives, 6 passenger (including 1 sleeping car), 2 mail and express, 30 box freight, 20 cattle and 20 platform cars, costing in the aggregate $190,489 60, have been added to the equipment of the road; which amount is included in the cost of permanent renewals.

The lease of the Joliet and Chicago Railroad, which expired on the 1st of July last, has been continued since as a verbal agreement, subject, however to the conditions previously made, viz: $1,666 66 per month in consideration of the exclusive right to use and control its road stations and depots, with the benefit of its local business. 2d, the division of gross earnings of the line from Chicago to Alton, in proportion of 220 to 37, these numbers being the respective length in miles of each road. 3d, 35 per cent. is retained by the Receiver out of the proportion of gross earnings on the division above stated, for the operating and other expenses of the two roads, besides $3,333 33 per month is computed as compensation for use of rolling stock, divided in the proportion of 220 to 37. 4th, the Joliet and Chicago Railroad Company maintains at its own cost, the repairs of its track, stations, turn-outs and depots.

The traffic over the Terre Haute road between Alton and East St. Louis, is fixed by an agreed tariff, and freight carried by the Alton Packet Company is adjusted on like conditions. The amounts paid for service performed from December 5, 1859 to December 31, 1861, has been as follows:

	1860.	1861.
Joliet & Chicago R.R.	$118,111 84	$130,315 51
T. H. Alt. & St. Louis	37,620 13	27,057 56
Alton Packet Co.	42,103 46	21,226 26

The machine shops, a portion of the engines, and the important bridges are insured for $190,000 at a cost of $2,915 62.

The traffic of 1861, as well as that of the previous year, confirm the importance of the local over the through—the amount received from freight and passengers on the former being equal to 82.75 per cent of the total receipts of the road.

Within the last two years, new and re-rolled iron, to the amount of about 15 per cent. of the total iron in the main track has been substituted for rails most worn. So much of the old iron taken from the track as was fit has been repaired and re-laid—the remainder re-rolled and re-laid as new iron. Over 200,000 new cross-ties have been placed in the track. Two bridges, each 550 feet long, have been replaced with new and well constructed truss bridges.

During the past year 90,000 cubic yards of earth have been used in filling old and trestle bridges, and in widening embankments; 120,000 ties have been laid in the track; more than forty miles of track have been ballasted; considerable ditching has been done for the draining of the roadway; two new water tanks have been erected; a new coach house built at Bloomington; the engine house at Bloomington enlarged; a new engine house built at Alton; and nearly all the station buildings repaired and painted.

There have been used in repairs and renewals of road the past year 1000 tons of new, 607 tons of re-rolled, and 1,780 tons of repaired rails; 126,435 new ties; 16,047 wrought, and 3,450 cast chairs; and 185,000 lbs. spike. It is estimated that there will be required during the coming year 2,552 tons re-rolled and 1,584 tons repaired iron; 170,000 cross-ties, 21,000 chairs; and 183,000 lbs. of spike. In 1863 there will be required 2,552 tons re-rolled and 1,584 tons repaired rails; 95,000 ties; 5,000 chairs, and 155,000 lbs. spike.

The company have 50 locomotives; 80 passenger, 9 baggage and mail, and 754 freight cars.

General Balance Sheet.

Earnings since Dec. 5, 1859.	$2,093,034 29

Receiver—James Robb.
Superintendent—C. H. Allen.
Treasurer—Joseph Price.

New London Northern Railroad.

The New London Northern Railroad is the successor of the New London, Willimantic and Palmer Railroad, which was commenced in 1848, and completed in 1850. The original company soon fell into financial embarrassments, and in consequence was forced into liquidation. At that time it was owing three classes of bonds, viz: First mortgage 7 per cent. coupon bonds, $500,000, issued in 1849, and payable in 1859, 1864, and 1869, interest payable May 1 and Nov. 1, in New London; Second mortgage, 6 per cent., $300,000, dated in 1850 and payable in 1857; and income and convertible 6 per cent. bonds, $152,000, dated in 1851 and payable in 1870—making a total of $952,000. It also owed the city of New London $100,000. The amount of capital stock paid in was $510,900. The proceedings for foreclosure being in favor of the first mortgage bondholders, they were authorized by law to convert their bonds with interest into the stock of the new company, which now constitutes its total share capital. All other kinds of indebtedness was cut off by the foreclosure. The road is 66 miles in length, extending from New London, Ct., via Norwich, Willimantic and Stafford, to Palmer, Mass., and cost, including equipment, $1,573,569. The following is a statement of its cost, earnings and expenses from 1851 to 1860, inclusive:

	Cost of road, etc.	Gross earnings.	Operating expenses.	Net earnings.
1851 ..	$1,450,400	$168,469	$86,200	$82,259
1852 ..	1,511,111	114,410	62,519	51,901
1853 ..	1,524,329	128,715	73,820	54,891
1854 ..	1,527,827	137,060	79,031	58,029
1855 ..	1,594,882	124,043	64,732	59,311
1856 ..	1,603,230	120,571	75,866	44,705
1857 ..	1,608,230	115,803	78,790	37,013
1858 ..	1,575,147	104,464	73,622	80,842
1859 ..	1,573,569	119,146	119,146	.. ....
1860 ..	1,573,569	130,295	130,310	(loss, $15)

During 1859, 1860 and a portion of 1861, the road was operated by trustees of the First mortgage bondholders. No report, except to the Legislature, has been made since 1858.

The organization of the present company was completed, March 31, 1861, and the directors received from the trustees possession of the road and all its equipment on the 1st of April, 1861. We have received the report of the directors giving a statement of the operations of the road from that time to the 31st of December last, during which time the earnings were:

From passengers	$44,403 55	
" freight.	41,547 13	
" mails, express and rents..	7,884 34	
		$93,835 02
And the expenses were:		
Repairs of road	$9,998 42	
" rolling stock 10,082 39		
New bridges	12.026 87	
Salaries and wages	16,989 42	
Rent to City of New London.	2,250 00	
Fuel	9,036 19	
Fencing.....	4,256 64	
Oil and waste	1,324 51	
Taxes and insurance	1,015 00	
All other expenses..... ...	9,685 16	
Interest	3,000 27	
		79,664 87
Balance net earnings.....		$14,170 15

The road, when delivered up by the trustees, had the ordinary stock of wood and materials on hand; also about 100 tons of old rails, which have been

applied towards the purchase of new iron. The company also received from the trustees $401 89 in cash.

On the 13th of April, a contract was concluded between this company and the Norwich and Worcester Railroad Co. and the Norwich and New York Transp. Co., to continue in force till July 1, 1871, by the terms of which the latter agreed to transact their through passenger and express freight business over that portion of the road lying between New London and Norwich. In order to accommodate this business, a new wharf, depot accommodations, side tracks, etc., were required, involving an expenditure of $85,936 53. The payment of this amount was provided for by a mortgage to the Savings Bank of New London for $25,000, and the issue of $60,000 7 per cent. bonds, payable in ten years, secured by a mortgage of all the road and equipment in the State of Connecticut. At the date of the report only $36,500 of these bonds had been sold.

When the road passed into the hands of the trustees, it was found that extensive repairs and renewals were required to place it in a safe and reliable condition. Measures were accordingly taken for the rebuilding and general repairs of road, bridges, buildings and equipment. The work was commenced in April, 1859, and has progressed to the present time with favorable results. Of the bridges built by the old company, only five were covered. All the rest, 26 in number, have been re-built and properly covered. They measure 2,187 feet in length, and may be expected to remain serviceable for 30 years. All the pile bridges have been re-built with top pile timbers, ties and iron, and additional piles. About 900 tons of iron have been added and 10,238 rails repaired and replaced—making over 24 miles of track renewed. Over 9,000 chairs, 23 tons of spike and 83,000 cross-ties have been placed in the road. Extensive repairs and additions have been made to the motive power and rolling stock. The equipment now consists of 7 locomotives; 7 passenger, 4 baggage, 32 house freight, 49 flat, 8 gravel and 8 hand cars. A large and convenient workshop has been erected at New London, a new car house at Palmer, a turn-table at Norwich, and 5,500 rods of fence on the line of the road. These extensive repairs and expenditures have required the purchase and use of over 3,000,000 feet of timber and lumber, 800 tons of iron and steel and 10 tons of nails, exclusive of railroad iron and spike.

Although the stockholders have not been directly remunerated by dividends, still the large amount expended, has placed the road in good condition, and been the means of circulating its receipts in New London and upon the line of the road. Over $100,000 have been expended in the city of New London, and $130,000 on the line of the road for labor, materials, etc.

On the 1st of January last the directors declared a dividend of $2 per share, amounting to $12,042 76—leaving a surplus of $2,132 23.

BALANCE SHEET, January 1, 1862.

First mortgage bonds surrendered	$602,138 00
Stock cancelled	601 89
New wharf and depot	85,936 53
Due from agents and U. S. Gov.	976 14
Cash on hand	13,287 69
	$702,940 25
Capital stock	$602,138 00
Seven per cent. bonds issued	86,500 00
Due Savings Bank mortgage	24,800 00
Bills payable	24,300 00
Bond for cancelled stock	601 89
Received from Trustees	401 89
Due agents	23 48
Dividend	12,042 76
Profit and loss	2,132 23
	$702,940 25

President—HENRY P. HAVEN.
Superintendent—RICHARD N. DOWD.

Hudson River Railroad.

The following is a statement of the earnings of the Hudson River Railroad since Sept. 30, 1861. The increase of the five months will do something toward compensating for the unfavorable showing of the annual report for the fiscal year ending Sept. 30, 1861, submitted to the Legislature:

Earnings for—	1860-'61.	1861-'62.		
October	$193,951	$173,261	Dec.	$20,690
November	169,549	197,662	Inc.	28,113
December	220,370	246,283	Inc.	25,913
January	223,157	307,330	Inc.	84,173
February	205,343	281,568	Inc.	76,225
Increase in Nov., Dec., Jan. and Feb.				$214,424
Decrease in October				20,690
Increase for five months				$193,734

The annual report of the Hudson River Railroad is made up to September 20, 1861, the above figures show the increase of earnings since that time.

Financial Condition of the Country.

At no time since the commencement of our political troubles have affairs presented an aspect so favorable as at the present moment. The financial condition of the Northern States is very satisfactory, while the steady extension of the authority of the United States is enlarging the area of their trade, which is fast assuming its wonted volume. The following *resume* from the Circular of Samuel Hallett & Co. gives a cheerful, and we believe a correct view of the financial condition of Government and the country:

We have now reached a point at which we can daily witness progress toward the solution of the embarrassments by which the nation has so long been surrounded, and which at one time created in the minds of many, great apprehensions as to the maintenance of our national integrity. With military success every thing else follows as a matter of course; not perhaps instant pacification, but such a strengthening of the arms of government as to render continued resistance entirely hopeless. The capture of Nashville is perhaps more important than would be that of Richmond. If that point could not be held nothing can. Its capture has been followed by the evacuation of other important points, among them Columbus and Bowling Green; and though it may not be a termination of the campaign in the West, it renders the issue there no longer doubtful.

The assumed confidence in the strength of government has had the natural effect upon its securities, which have largely advanced. They are still low, in consequence of the immense prospective issue; but it is certain that at about the ordinary rate of interest, government can now command the available capital of the country, provided, of course, that the various tax measures proposed make their appearance in due time, and are satisfactory, of which no doubt is now felt. The passage of the Treasury Note Bill will give it at once $100,000,000; while the issuing of certificates of indebtedness for the demands against the Treasury, to bear 6 per cent. interest, and payable in a year, will prove a most efficient aid to the Treasury, as they will in effect, be a loan to the amount issued. They are considered so desirable a security, as to be readily taken at about par. The two measures, consequently, will do all that can be done for the immediate necessities of government, and give it so large an amount of money, as to relieve all apprehensions for the future, confident as the people are that a few months more will see an end to the rebellion.

Such, to-day, is the position of government. Its relations to capital are now most favorable. The suspension of specie payment unquestionably immensely increased its present means, whatever may be the final effect of this step. The next question naturally asked, is—how will all this influence business and trade. There can be no doubt that the tendency of both will be toward an inflation; for the new currency is to act the part of capital, while the shape in which the claims against the Treasury are to be put, will tend to draw out and put into circulation all the active capital of the country. Business, consequently, will receive a great impetus. What will be the effect upon the price of money? It will certainly make it very active, and keep up the rates and may end in creating a scarcity; especially should the present abundance lead to speculation in real estate and other kinds of property. But we have so little experience of the kind, it is perhaps useless to predict the result, as this may be greatly modified by causes which, at this early day, cannot be taken into consideration.

With regard to commercial affairs, the season opens most favorably. The possession of the Tennessee and Cumberland rivers, has already been followed by an order opening them to the trade of the whole country. This is both politic and beneficient. The government makes no distinction, but the moment we regain a foot of territory, we restore the rights it has forfeited, without too nice an inquiry into the guilt of the people occupying it. We leave no apology for contumacy; neither do we inflict unnecessary humiliation. The result will be an immediate restoration of trade, however long political matters may remain in abeyance. The Southern people show no disposition to resort to the desperate expedients of destroying, so often threatened, either themselves or their property. We may regard, therefore, the Cotton question as pretty nearly solved. A fortnight more ought to take us to Memphis, which is the great entrepot of the Northern district of production. With the war closed, as it speedily will be, the entire crop of the great valley can come to market through the Northern routes, should the blockade of New Orleans be indefinetely prolonged. Europe can receive the crop as well through the port of New York, as through the accustomed Southern channels—as expeditiously and as cheaply. When this is seen we do not believe that the people of New Orleans or any other Southern port will persist in a resistance which enriches others at the same time it destroys them.

There is every reason for expecting with the opening of the Spring, an active internal and a heavy export trade. We never had so large a surplus of breadstuffs of the crops of previous years, and probably never a more active and extensive demand. We shall soon commence the exportation of cotton and tobacco, which should have gone forward in the fall and winter months. With these entirely excluded from our list of exports, we accumulated last

year an immense reserve of specie. If we can add $100,000,000 to our exports for 1861, we should place foreign countries still morelargely in our debt. We cannot probably have large increase in our imports on account of the high rate of duties which prevail, and which are still further to be increased. We enter upon the Spring and Summer business, consequently, with prospects much brighter than they were a year ago, when the foundation on which we stood seemed crumbling beneath our feet. Our political integrity will soon be established, with our material strength unimpaired.

Liability of Directors as Stockholders.

WHAT IS COMPETENT EVIDENCE OF SUBSCRIPTION TO STOCK BY A DIRECTOR: CALLS MADE BY A TREASURER UNDER A GENERAL AUTHORITY OF THE BOARD ARE VALID.

The Pittsburg and Steubenville Railroad Company recently brought suit in the District Court of Alleghany County, Pennsylvania, against Robert S. Hays and George Block, partners trading as Hays & Block, to recover an alleged subscription for one hundred shares of stock of said company, amounting to $5,000, and the penalty of twelve per cent. interest thereon.

At the trial evidence was given that the original subscription book was lost, or could not be found, among the books and papers of the company; and the plaintiffs offered in evidence and relied on the following matters, which it was contended estopped the defendants from denying that they had made a valid subscription for one hundred shares to the capital stock of the company, to wit: That the defendants were returned by the commissioners and incorporated by the Letters Patent as stockholders owning one hundred shares, which report of the commissioners and letters patent were ordered to be engrossed on the minutes on the 4th of December, 1851, and were so engrossed. That Block, one of the defendants, was elected a director on the 12th day of January, 1852, and continued to act as such till July 6th, 1853, when he resigned. That R. S. Hays, the other defendant, was elected a director on the 8th of January, 1855, attended the meetings of the board, and took an active part in the business of the company till the 2d day of July, 1855, when he resigned. That Block was present at nearly all the meetings of the board while he was a director, and actively participated in the proceedings. That on the 12th of January, 1852, the defendants paid $500 on account of said subscription, being five dollars a share; and on twenty shares of their subscription they paid nine instalments, of $100 each. That Block was present at a meeting of directors on the 5th of August, 1852, at which were read and approved the minutes of the previous meeting of July 1, 1852, when the second instalments were called in. He was also present at a meeting of the board on the 12th of November, 1852, when the fourth and all subsequent instalments were called in, and voted for the call, and with his knowledge the firm of Hays & Block were returned to the Mayor as subscribers for one hundred shares of stock, with a credit of $500 paid thereon as a preliminary to obtaining the subscription of the City of Pittsburg to the stock of the company; and was one of the committee of the company to procure said subscription. That he was also a member of the committee on accounts, to which was referred the report of the treasurer of the company, showing that Hays & Block were subscribers for one hundred shares of stock, upon which they had paid $500. That the defendants had assumed to be proprietors of the same stock, by assigning 81 shares of it to Edwin M. Stanton.

The defendants' counsel then produced the original subscription book, found in the possession of Edwin M. Stanton, and objected to the admission of the foregoing evidence, on the ground that it was irrelevant and incomplete, and the subscription book being in court, such evidence was only secondary evidence. The plaintiffs' then offered the book in evidence: which was objected to, on the ground that the contract of subscription offered was variant from the contract declared on; but the court overruled the objection, and admitted the evidence.

The plaintiffs then proved, under exception, by the stock book or ledger of the company, the transfer of eighty shares of the stock held by Hays & Block to Mr. Stanton at his request; the credits for the instalments paid by them from time to time; the calls made by the treasurer by order of the board of directors; and the published notice given of the several calls.

The defendants' counsel submitted among other points that the plaintiffs were not entitled to recover without proof that the moneys mentioned in the added count of the declaration, were duly called for agreeably to the 8th section of an act of Pennsylvania regulating Railroad Companies, and due and public notice of said calls were published according to said act; and that the evidence given by the plaintiffs was wholly insufficient to prove that said money were called for, as required by said act.

A verdict and a judgment was rendered in favor of the plaintiffs, and the defendants appealed to the Supreme Court. The following is that portion of the opinion delivered by the court necessary to a correct understanding of the principal points in the case.

STRONG, J.—The second assignment of error is to the admission of proof of such acts of the defendants as in the case of Groff *vs.* Pittsburg and Steubenville Railroad Company, 7 Casey, 494, were held sufficient to establish a subscription without the production of the original contract. These acts were, such as serving as directors of the company by both the defendants, after the commissioners had reported to the Governor, the names of the original subscribers, including a subscription by Hays & Block for one hundred shares, and after letters patent had been issued and engrossed upon the minutes of the company. Other acts of the defendants were, serving as judge at a meeting of the stockholders; holding themselves out as owners of one hundred shares stock; offering to transfer some of those shares; making payments on account of instalments; and active participation in a movement to obtain a municipal subscription from the City of Pittsburg, which was obtained on the faith of an actual subscription certified to have been previously made by individuals among whom the defendants are named as subscribers for one hundred shares. These acts are such as were held in the case cited to be not merely evidentical of an original subscription, but conclusive, amounting to an estoppel upon the defendants against denying it. The objection to this evidence is that it was secondary, that the primary proof was within the reach of the plaintiffs, and that it had actually been laid before the jury in the book obtained from Mr. Stanton. The answer to the objection is direct and easy. It is fallacious in assuming that that the Stanton book was primary evidence of the identical thing, of which that received by the court was secondary proof. The evidence received was not secondary to anything contained in that book. It indicated the existence of a subscription to the stock of the plaintiffs, but it did not point to any such writing as the defendants allege was the original contract. On the contrary it pointed to an entirely different subscription, in regard to which there was full preliminary proof that it could not be found, of that other subscription, the one declared upon, it was the best evidence of which the case was susceptible, assuming that the proof was made that the original could not be produced. And if the first piece of evidence offered by the plaintiffs, failed to prove their case as laid, it cannot be doubted that it was competent for them to adduce other and more permanent proof.

The fourth, sixth, seventh, tenth, eleventh, twelfth and fourteenth assignments may be considered together. They attack the sufficiency of the evidence that calls were made for the instalments on the stock subscribed. They might all be dismissed with the remark that the same evidence was adjudged sufficient in the case reported in 10 Casey 858. But it may be well to notice what the evidence was. * * * *

Now were we to hold that proof of these facts was not properly submitted to the jury, because it was not evidence that calls for instalments had been duly made, we should be, in our judgment, trifling with the administration of Justice. It is insisted that it fails to show that the directors specified the times and places of payment, and the proportions or amounts of each instalment, and the time and place of payment. The treasurer was the instrument of the board of directors, and was by them required to give notice of the calls which they had made. Why then was not his action their action? It is time that the law required them to keep minutes of their proceedings, fairly entered in a suitable book to be kept for that purpose, but it does not follow from this that every act of theirs not recorded is of no effect. Nor can it be said that the statute direction to keep minutes of their proceedings required that full and minute details of every act should be recorded. And how can these defendants be permitted to deny that the directors fixed the amount of each call, and the time and place of each payment, when the calls were made by one of themselves? If these particulars of the calls should have been spread upon the minutes, whose fault is it that they were not? Can these defendants relieve themselves from liability by setting up their own failure to keep proper minutes? Shall they be permitted to say that the calls under which they required payment from other subscribers are insufficient to charge them? May they do this in face of the fact that they recognized their sufficiency, by making partial payments upon each of the instalments? We cannot return an affirmative answer to these questions. Whatever others might do, it is not for these defendants to say there was no adequate proof that the calls were duly made. Judgment affirmed.

The New Tax Bill.

The Committee of Ways and Means after a long delay have reported a bill for internal taxation, in which it is proposed to levy the following rates of duties:

Articles Taxed.	Amount of Tax. $	Cts.	Mls.
Spirituous liquors, per gallon	..	15	..
Ale and beer, per bbl.	1	..	..
Stem or leaf tobacco, per lb.	..	2	..
When manufactured, additional per lb.	..	5	..
Segars, per lb., according to value.	..	5	..
	..	10	..
	..	20	..
Lard, Linseed oil, burning fluid, per gal.	..	5	..
Coal oil, per gal.	..	5	..
Refined coal oil, per gal.	..	10	..
Gas, per 1,000 feet	..	25	..
Bank note paper, per lb.	..	5	..
Printing paper, per lb.	..	..	3
Soap, per lb.	..	..	5
Salt, per 100 lbs.	..	4	..
Sole leather, per lb.	..	1	..
Upper leather, per lb.	..	½	..
Flour, per bbl.	..	10	..
All other manufactures, per cent. ad valorem	..	3	..
Railroad passengers, per mile of travel.	..	..	2
Do. commutation tickets, per cent.	..	3	..
Steamboat passengers, per mile	..	..	1
Omnibuses, ferry boats and horse railroads, per cent. on gross receipts from passengers	..	3	..
Advertisements, per cent. on annual receipts	..	5	..
Carriages, per annum	1 to 10	..	..
Gold watches	1	..	..
Silver watches	..	50	..
Gold plate, per ounce	..	50	..
Silver plate, per ounce	..	3	..
Billiard tables	20	..	..
Slaughtered cattle, per head	..	50	..
" Hogs, per head	..	10	..
" Sheep, per head	..	5	..
Licenses—			
Bankers	100	..	..
Auctioneers	20	..	..
Wholesale dealers	50	..	..
Retail liquor dealers	20	..	..
Retail dealers in goods	10	..	..
Pawnbrokers	50	..	..
Rectifiers	100	..	..
Brewers	50	..	..
Hotels, inns and taverns, according to rental	5 to 200	..	..
Eating houses	10	..	..
Commercial brokers	50	..	..
Other brokers	20	..	..
Theatres	100	..	..
Circuses	50	..	..
Bowling alleys, each	5	..	..
Wholesale pedlers	50	..	..
Other pedlers	5 to 20	..	..
Coal oil distilleries	20	..	..
Income—			
On all over $600, excepting income from dividends, which are taxed separately, per cent.	..	3	..
Railroad bonds, dividends of banks and savings institutions, per cent.	..	3	..
All salaries of officers in the civil, military and naval service, also Senators and Members of Congress, per cent.	..	3	..
Legacies, and distributive shares of personal property of deceased persons, according to degree of relationship, per cent.	..	1 to 5	..
And stamp duties on all kinds of legal and commercial papers, all patent medicines, telegraphic messages, and all goods by expresses	..	..	..

The Bill is expected to produce, at least, one hundred millions of dollars.

Railroad Earnings--Weekly.

The earnings of the Milwaukee and Prairie du Chien Railroad, for the 3d week of February

1862, were	$14,215 47
Corresponding week, 1861	8,672 88
Increase	$5,542 59

The earnings of the St. Louis, Alton and Chicago Railroad for the 3d week in Feb., were:

1862	$14,340 15
1861	20,552 21
Decrease	$6,212 06

The traffic of the Great Western Railway of Canada for the week ending Feb. 28, 1862, was as follows:

Passenger	$10,944 73
Freight and live stock	35,316 70
Mails and sundries	1,444 11
Total	$47,705 54
Corresponding week of last year	44,073 39
Increase	$3,632 15

The receipts of the Grand Trunk Railway of Canada for the week ending Feb. 22, 1862, were:

9,826 passengers	$17,231 09
Mails and sundries	2,709 28
9,933 tons of freight and live stock	50,016 39
Total	$69,956 76
Corresponding week, 1861	54,306 81
Increase	$15,649 95

Railroad Earnings--Monthly.

The earnings of the Michigan Central Railroad, for February, 1862, were $159,658 59
Do. 1861 119,763 97
Increase $39,894 62

The earnings of the Chicago and Rock Island Railroad for February, 1862, were $86,697
Do., 1861 64,015
Increase $22,682

The earnings of the Hudson River Railroad for February, 1862, were $281,568 10
" 1861 205,342 69
Increase $76,225 41

The earnings of the Cleveland and Toledo Railroad in February, 1862, were $90,657
Do., 1861 75 751
Increase $14,906

The following statement shows the business of the Philadelphia and Reading Railroad Company for January, 1862, compared with that of 1861:

	1861.	1861.
Rec'd from coal	$124,123 21	$105,474 80
" " merch'dise	40,007 62	32,080 40
" " travel, etc.	28,085 04	23,551 45
Total	$192,215 87	$161,106 15
Transportation, roadway, dumpage, renewal fund, and all charges	112,831 51	102,678 88
Net profit for the m'th,	$79,384 36	$58,427 27
Profit for the previous month	155,433 56	128,412 56
Total net profit 2 mos.	$234,817 92	$186,839 83

The earnings of the Cincinnati and Indianapolis Railroad in December were:

1861	$51,500
1860	32,000
Increase	$19,600

The following are the official earnings of the Cleveland and Pittsburg Railroad for the first two months of the new fiscal year:

December, 1861	$113,174 81
January, 1862	90,174 73
	$203,849 54

Same time previous year:

December, 1860	$68 980 91
January, 1861	62,208 27
	126,189 18
Increase in two months	$77,660 86

The earnings of the Galena and Chicago Railroad for February, 1862, were $101,593 27
Do., 1861 76,859 69
Increase $24,734 18

Detroit and Milwaukee Railway.

The following is an extract from the Annual Report of the Directors of this Company:

The liabilities of the company on December 31, 1861, were as follows:

Bills payable	$265,039 29
Coupons outstanding	28,394 12
Balance due by the Company	58,485 91
	$351,919 32
Less the balance in bankers' hands, and traffic debt due to the Company, including a large amount due by the United States Government for the carriage of troops, &c.	101,359 59
Balance	$250,559 73

The traffic is now nearly double what it was at the corresponding period of last year, and as there seems every prospect of its continuing good, it would seem to be a safe estimate to say that by May 15, after paying the accruing interest on the "Funded Coupon," the "Detroit and Pontiac," and the "Oakland and Ottawa" bonds, that the amount of floating debt ordered by the court to be paid in cash will be reduced to $150 000.

The position of the company on the 15th of May, 1862, will then be in round figures as follows:

Balance of debt ordered by the Court to be paid in cash	$150,000
Engineer's estimate to complete blasting, &c.	50,700
River front mortgages	102,679
	$303,379

To this must be added $50,000 to perfect the harbor at Grand Haven, and to include all contingencies that may arise, the whole amount is placed at $400,000.

The cost of the line, on the 15th of May, 1862, will stand at about $7,000,000, and with the liabilities and expenditures as just stated, may be called in round figures, $7,400,000. For this the company will possess 189 miles of well-built railway, which can be cheaply worked—a fair amount of rolling stock, stations and sidings sufficient for a considerably increased traffic—and two powerful steames on Lake Michigan, expressly built for the requirements of the line, besides an interest in a ferry steamer on the Detroit river.

The net revenue for the year 1861, notwithstanding the adverse circumstances already mentioned, of the civil war in America and the great freshet in the Grand River, amounted to $318,264.

The interest charges for that year were as follows:

On Detroit and Pontiac bonds	$40,000	paid.
On Oakland and Ottawa "	12,622	paid.
On 1st D. & M. Mortgage bonds	171,750	funded.
On 2d do. do. "	79,840	
On River Front "	9,624	
On funded Coupons "	16 504	paid.
	$330,640	
Difference	$12,876	

The traffic for the month of January, 1862, is

nearly double that of the corresponding month last year, whilst the expenses are not materially larger.

The Legal Tender Note Bill.

The following is an official copy of the Loan and Treasury Bill, passed by Congress, and approved by the President on the 25th ult.:

An Act to authorize the issue of United States Notes, and for the Redemption or Funding thereof, and for Funding the Floating Debt of the United States.

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That the Secretary of the Treasury is hereby authorized to issue, on the credit of the United States, one hundred and fifty millions of dollars of United States notes, not bearing interest, payable to bearer at the Treasury of the United States, and of such denomination as he may deem expedient, not less than five dollars each; that fifty millions of said notes shall be in lieu of the Demand Treasury notes authorized to be issued by the act of July 17, 1861; which said demand notes shall be taken up as rapidly as practicable, and the notes herein provided for substituted for them; that the amount of the two kinds of notes together shall at no time exceed the sum of one hundred and fifty millions of dollars, and such notes herein authorized shall be receivable in payment of all taxes, internal duties, excises, debts and demands of every kind due to the United States except duties on imports (and for all salaries, debts and demands owing by the United States to individuals, corporations and associations within the United States), and of all claims and demands against the United States of every kind whatsoever, except for interest upon bonds and notes, which shall be paid in coin, and shall also be lawful money and a legal tender in payment of all debts, public and private, within the United States, except interest and duties on imports as aforesaid. And any holders of said United States notes depositing any sum not less than fifty dollars, or some multiple of fifty dollars, with the Treasurer of the United States, or either of the Assistant Treasurers, shall receive in exchange therefor duplicate certificates of deposit, one of which may be transmitted to the Secretary of the Treasury, who shall thereupon issue to the holder an equal amount of bonds of the United States, coupon or registered, as may by said holder be desired, bearing interest at the rate of six per centum per annum, payable semi-annually at the treasury or sub-treasuries of the United States, and redeemable at the pleasure of the United States after five years, payable twenty years from the date thereof. And such United States notes shall be received the same as coin, at their par value, in payment for any loans that may be hereafter sold or negotiated by the Secretary of the Treasury, and may be reissued from time to time as the exigencies of the public interests shall require. [There shall be printed on the back of the United States notes which may be issued under the provisions of this act the following words: "The within note is a legal tender in payment of all debts, public and private, and is exchangeable for bonds of the United States bearing six per centum interest, at twenty years, or in seven per centum bonds at five years."]

Section 2. *And be it further enacted*, That to enable the Secretary of the Treasury to fund the Treasury notes and floating debt of the United States, he is hereby authorized to issue, on the credit of the United States, coupon bonds, or registered bonds, to an amount not exceeding five hundred millions dollars, [and] redeemable at the pleasure of the United States after five years, and payable at twenty years from date, and bearing interest at the rate of six per centum per annum, payable semi-annually. And the bonds herein authorized shall be of such denominations, not less than fifty dollars, as may be determined upon by the Secretary of the Treasury. And the Secretary of the Treasury may dispose of such bonds at any time, at the market value thereof, for the coin of the United States, or for any of the Treasury notes that have been, or may hereafter be, issued under any former act of Congress, or for United States notes that may be issued under the provisions of this act, and all stocks, bonds and other securities of the United States held by individuals, corporations, or associations within the United States shall be exempt from taxation by or under State authority.

Section 3. *And be it further enacted*, That the United States notes, and the coupon or registered bonds authorized by this act shall be in such form as the Secretary of the Treasury may direct, and shall bear the written or engraved signatures of the Treasurer of the United States and the Register of the Treasury, and also, as evidence of lawful issue, the imprint of a copy of the seal of the Treasury Department, which imprint shall be under the direction of the Secretary, after the said notes or bonds shall be received from the engravers, and before they are issued; or the said notes and bonds shall be signed by the Treasurer of the United States, or for the Treasurer, by such persons as may be specially appointed by the Secretary of the Treasury for that purpose, and shall be countersigned by the Register of the Treasury, or for the Register by such persons as the Secretary of the Treasury may specially appoint for that purpose; and all the provisions of the act entitled "An act to authorize the issue of Treasury notes," approved the twenty-third day of December, eighteen hundred and fifty-seven, so far as they can be applied to this act, and not inconsistent therewith, are hereby revived and re-enacted, and the sum of three hundred thousand dollars is hereby appropriated, out of any money in the Treasury not otherwise appropriated, to enable the Secretary of the Treasury to carry this act into effect.

Section 4. *And be it further enacted*, That the Secretary of the Treasury may receive from any person or persons, or any corporation, United States notes on deposit for not less than thirty days, in sums of not less than one hundred dollars, with any of the Assistant Treasurers or designated depositaries of the United States authorized by the Secretary of the Treasury to receive them, who shall issue therefor certificates of deposit, made in such form as the Secretary of the Treasury shall prescribe, and said certificates of deposit shall bear interest at the rate of five per centum per annum; and any amount of United States notes so deposited may be withdrawn from deposit at any time after ten days' notice on the return of said certificates. Provided, that the interest on all such deposits shall cease and determine at the pleasure of the Secretary of the Treasury; and provided, further, that the aggregate of such deposits shall at no time exceed the amount of twenty-five million dollars.

Section 5. *And be it further enacted*, That all duties on imported goods shall be paid in coin, or in notes payable, or in demand notes heretofore authorized to be received, and by law receivable in payment of public dues, and the same so paid shall be set apart as a special fund, and applied as follows:

First—To the payment in coin of the interest on the bonds and notes of the United States.

Second—To the purchase or payment of one per centum of the entire debt of the United States, to be made within each fiscal year after the first day of July, eighteen hundred and sixty-two, which is to be set apart as a sinking fund, and the interest of which shall, in like manner, be applied to the purchase or payment of the public debt, as the Secretary of the Treasury shall, from time to time direct.

Third—The residue thereof to be paid into the Treasury of the United States.

Section 6. *And be it further enacted*, That if any person or persons shall falsely make, forge, counterfeit, or alter, or cause or procure to be falsely made, forged, counterfeited, or altered, or shall willingly aid or assist in falsely making, forging, counterfeiting, or altering, any note, bond, coupon, or other security issued under the authority of this act or heretofore issued under acts to authorize the issue of Treasury notes or bonds; or shall pass, utter, publish, or sell, or attempt to pass, utter, publish, or sell, or bring into the United States from any foreign place, with intent to pass, utter, publish, or sell, or shall have or keep in possession or conceal with intent to utter, publish, or sell, any such false, forged, counterfeited, or altered note, bond, coupon, or other security, with intent to defraud any body corporate or politic, or any other person or persons whatsoever, every person so offending shall be deemed guilty of felony, and shall, on conviction thereof, be punished by fine not exceeding five thousand dollars, and by imprisonment and confinement to hard labor not exceeding fifteen years, according to the aggravation of the offence.

Section 7. *And be it further enacted*, That if any person, having the custody of any plate or plates from which any notes, bonds, coupons, or other securities mentioned in this act, or any part thereof, shall have been printed, or which shall have been prepared for the purpose of *printing* any such notes, bonds, coupons, or other securities, or any part thereof, shall use such plate or plates, or knowingly permit the same to be used for the purpose of *printing* any notes, bonds, coupons, or other securities, *or any part thereof*, except such as shall be printed for the use of the United States by order of the proper officer thereof; or if any person shall engrave, or cause or procure to be engraved, or shall aid in engraving, any plate or plates in the likeness or similitude of any plate or plates designed for the printing of any such notes, bonds, coupons, or other securities, or any part thereof, or shall vend or sell any such plate or plates, or shall bring into the United States from any foreign place any such plate or plates, with any other intent or for any purpose, in either case, than that such plate or plates shall be used for printing of such notes, bonds, coupons, or other securities, or some part or parts thereof for the use of the United States, or shall have in his custody or possession any metallic plate engraved after the similitude of any plate from which any such notes, bonds, coupons or other securities, or any part or parts thereof, shall have been printed, with intent to use such plate or plates, or cause or suffer the same to be used, in forging or counterfeiting any such notes, bonds, coupons, or other securities, or any part or parts thereof, issued as aforesaid, or shall have in his custody or possession any blank note or notes, bond or bonds, coupon or coupons, or other security or securities, engraved and printed after the similitude of any notes, bonds, coupons, or other securities, issued as aforesaid, with intent to sell or otherwise use the same; or if any person shall print, photograph, or in any other manner execute, or cause to be printed, photographed, or in any manner executed, or shall aid in printing, photographing, or executing any engraving, photograph, or other print, or impression, in the likeness or similitude of any such notes, bonds, coupons, or other securities, or any part or parts thereof, except for the use of the United States, and by order of the proper officer thereof, or shall vend or sell any such engraving, photograph, print, or other impression, except to the United States, or shall bring into the United States from any foreign place any such engraving, photograph, print, or other impression for the purpose of vending or selling the same, except by the direction of some proper officer of the United States, or shall have in his custody or possession any paper adapted to the making of such notes, bonds, coupons, or other securities, and similar to the paper upon which any such notes, bonds, coupons, or other securities shall have been issued, with intent to use such paper, or cause or suffer the same to be used, in forging or counterfeiting any of the notes, bonds, coupons, or other securities issued as aforesaid, every such person so offending shall be deemed guilty of a felony, and shall, on conviction thereof, be punished by fine not exceeding five thousand dollars, and by imprisonment and confinement to hard labor not exceeding fifteen years, according to the aggravation of the offence

AMERICAN RAILROAD BOND LIST.

American Railroad Journal.

Saturday, March 8, 1862.

Share and Money Market.

The Share Market the past week has been pretty uniform, with a slight decline in nearly the whole list, but governments. The decline may be probably attributed to the embargo which is put upon intelligence from nearly all the scenes of military operations. The market, however, is strong, while the conviction is almost universal that an important improvement in prices is not far distant. This conviction has put a check upon operations for a fall. Money has been very active during the week, having been made so, in part, by the passage of the Treasury Note Bill, which for a short time had the effect to put the notes issued to a small premium. Greater ease is already manifest, and will be increased by the issue of the new notes, which must make their appearance in a few days. The belief is universal that money must soon be very abundant, and the advantage is fast coming to be in favor of the borrower. Gold is still weak, selling at 102⅛ to 102½. Sixty day bills on London are quoted at 113¼.

The Chemung Railroad Company has declared a quarterly dividend of 2 per cent., payable on demand at the office of the Treasurer, Park Fire Insurance Company, 237 Broadway.

The trustees of the 1st mortgage bondholders of the Vermont Valley Railroad Company have declared a dividend of 50 per cent. on coupons of April 1st, 1857, payable on and after March 10th, 1862. For the convenience of the bondholders in New York and elsewhere, the dividend will be paid for the space of one month, viz: from the 10th of March to the 10th of April, at the office of Alexander Hamilton, Jr., 41 Wall street, Jauncey Court, and thereafter will only be paid at the office of the treasurer in Bellows Falls.

Michigan Central Railroad.

The following table will show the earnings of the Michigan Central for the past three months, as compared with the corresponding months of the previous year:

Dec., 1860..	$129,022 26	Dec., 1861..	$200,133 76
Jan., 1861..	142,333 70	Jan., 1862..	230,159 08
Feb., 1861..	119,768 97	Feb., 1862..	159,658 64
Total ..	$391,129 93	Total...	$589,951 88

The Treasury Note Bill.

Since our last issue this bill has been passed by Congress and received the approval of the President. We give it entire elsewhere. The following is a synopsis of the several sections:

1. The Secretary of the Treasury is authorized to issue $150,000,000 of notes, not bearing interest, of no less denomination than $5, payable to bearer at the United States Treasury.

Fifty millions of this issue shall take the place of the notes issued under the act of July 17, 1861, and are to be substituted therefor as rapidly as practicable.

The amount of the two kinds of notes together shall at no time exceed $150,000,000.

The new notes are receivable in payment of all taxes, internal duties, excise, debts and demands of every kind to the United States, *except duties on imports, and for claims of all kinds against the United States, except interest on bonds and notes, which is to be paid in coin.* They shall also be lawful money and *a legal tender in payment of all debts, public and private,* (except duties on imports and interest.)

Holders of the notes depositing any sum not less than $50, or some multiple of $50, at the Treasury or Sub-Treasury, may receive duplicate certificates of deposit, entitling them to an equal amount of United States bonds (registered or unregistered as they may elect) at 6 per cent. interest, payable semi-annually, redeemable after five years and payable twenty years from date.

The notes are to be received the same as coin, at their par value, in payment of loans hereafter sold or negotiated, and may be reissued from time to time as the exigencies of the public interest may require.

2. Funding is provided for as follows: The Secretary of the Treasury may issue coupon or registered bonds, not exceeding $500,000,000, redeemable after 5 years, and payable in 20 years, bearing 6 per cent. interest, payable semi-annually. Denomination not to be less than $50. These bonds may be sold at the market value, at any time, for United States coin, or for Treasury notes issued under any former act of Congress, or for notes issued under this act.

All United States securities held by corporations or individuals within the United States are exempted from taxation by the State authority.

3. The notes and bonds are to be signed by or for the United States Treasurer and Register, and bear the seal of the Treasury Department, and be countersigned by or for the Register. The act of December 23, 1857, relating to Treasury notes, is revived and re-enacted in all its provisions not inconsistent with this act; and $300,000 is appropriated for the preparation of the new notes and bonds.

4. The Sub-Treasurers may receive the note on deposit for not less than 30 days, in sum not less than $100, for which certificates o deposit shall be issued, bearing 5 per cent. in

terest. Deposits may be withdrawn on ten days' notice. Interest to cease at the pleasure of the Secretary of the Treasury. Amount of such deposits limited to $25,000,000.

5. *Duties on imported goods must be paid in coin, or in demand notes heretofore issued* and by law receivable in payment of public dues.

The coin so paid is set apart as a special fund, to be applied to *the payment of interest on bonds;* to the payment of one per cent. on the entire debt of the United States; and the residue payable into the treasury.

6. Penalties for counterfeiting are fixed as follows: A fine of not more than $5,000, and imprisonment at hard labor not more than fifteen years.

7. Unauthorized persons who may print notes from the plates or copy them are punishable by similar penalties.

Finances of Michigan.

The State Auditor of Michigan reports to the Legislature that the total available means in the Treasury the past year, were $1,230,000, including $523,083 derived from the war fund and the balance from taxes, amount left over from the previous year, and other sources of revenue. The expenses of the year have been $1,258 235, (or $28,000 in excess of receipts,) the war portion of the expenses being $539.428. Of this sum the Government is sure to refund $500,000, or enough to turn upon that portion of the National tax which falls to Michigan. The deficit of $28,000 is more than balanced by the taxes due from the Detroit and Milwaukee and the Michigan Southern Railroads; from the former $22,000, and from the latter $35,000. The total debt of the State is $2,736,264, including $449,100 war loan bonds. The aggregate delinquent taxes returned in 1860, was $318,423 60. The State is debtor to the Counties $33,533 01, and credited by $200,146 72.

Pittsburgh Fort Wayne and Chicago R. R.

The bondholders of the old corporation of the Pittsburgh, Fort Wayne and Chicago Railroad Company, met at the office of the Company, on the 27th ult., to elect a Board of Directors for the new corporation of the Pittsburgh, Fort Wayne and Chicago Railway Company. The election resulted in the choice of the following gentlemen: J. F. D. Lanier, Louis H. Meyer, Samuel J. Tilden, of New York; J. Edgar Thomson, G. W. Gass, Springer Harbaugh, of Pennsylvania; Kent Jarvis, Willis Merriman, Robert McKelly, of Ohio; Sam'l Hanna, Josse L. Williams, Pliny Hoagland, of Indiana; Wm. B. Ogden of Illinois. The Board organized by the election of Geo. W. Cass as President and William H. Barnes as Secretary. The election of other necessary officers was postponed until the purchasing committee shall be ready to convey the railway, &c., to the new corporation.

Sault Ste. Marie Canal.

The annual report of the Superintendent, gives a very satisfactory exhibit of the business of the Canal for the past year, in spite of the diminution of traffic. While the receipts are one-third less than last year, and nearly the same amount has been expended on the embankment, the expenses are less by one-third than in 1860. The report presents some facts and figures to prove that the law regulating tolls operates onerously upon steamers for the benefit of sail craft. While only $4,183 20 has been received from 232 sail vessels, 295 steam vessels have paid $15,414 78; yet it is asserted that it costs as much, if not more, to lock the above number of sail vessels than it does the above number of steamers, including damage to gate locks, piers, and embankments.

Rates of Foreign Exchange.

The rates of Foreign Exchange, as quoted by N. Brandt, Broker, No. 39 Exchange-place, for the steamer of March 8, were as follows:

London—60 days' sight	112¾ per cent.
London—3 days' sight	113¼ "
Paris—60 days' sight, per dollar	5f. 2½c.
Paris—8 days' sight, per dollar	4f. 97½c.
Amsterdam—60 days' sight, per guilder	43c.
Hamburg—60 days' sight, per marc banco	37¾c.
Frankfort—60 days' sight, per florin	43½c.
Bremen—60 days' sight, per rix dollar	82⅞c.

Harlem Railroad.

The following is from the annual report of this company made to the Legislature of the State for the fiscal year ending September 30, 1861:

EARNINGS.

Passengers		$448,193 48
Freight		533,657 56
Mail service		6,525 00
Expresses		7,456 39
Rent receivable		15,961 55
Miscellaneous		966 65
New Haven Company—		
For passengers	$78,702 03	
For freight	12,038 86	
For mail	1,146 82	
For expresses	2,303 60	
For rent	14,999 92	
For haulage of cars	23,028 40	
		132,219 63
Total		$1,144,980 26

EXPENDITURES.

Transportation expenses	$753,727 26
Interest	403,318 47
Total	$1,157,045 67

STOCK AND DEBTS.

Capital stock, as by charter		$8,000,000 00
Amount of stock subscribed		5,717,100 00
Common stock		4,217,100 00
Preferred stock		1,500,000 00
Amount paid in, as by last report		5,717,100 00
Total amount now paid in of capital stock		5,717,100 00
Funded debt as by last report		5,372,179 21
Total amount now of funded debt—		
1st mortgage	$3,000,000 00	
2d "	1,000,000 00	
3d "	980,300 00	
4th "	72,750 00

Sinking Fund bonds, due 1881	69,270 00	
Past due bonds	209,243 06	
		5,537,664 41
Floating debt as by last report		None.
The amount now of floating debt		43,788 53
Total amount now of funded and floating debt		5,581,452 94
Average rate per annum of interest on funded debt*		7 per cent.

* Real estate mortgages not included above, amounting to $218,273 35.

There are outstanding $244,500 of Albany Extension Certificates, on which, according to a certain deed of trust, the Company is to pay interest out of the earnings of that part of the road between Dover Plains and Chatham. The Company is now exchanging these (at less than their par value) for the bonds of the Company.

The Company hold $1,755,500 of the $2,000,000 issued of Albany Extension Certificates, which was purchased by old stock, cash and bonds. This amount does not appear in the cost of the road, but is included in the above statement of stock and debts.

The increase in the funded debt (165,485 20) is caused by the issue of 3d Mortgage and Sinking Fund Bonds to retire the Albany Extension Certificates, of which $320,500 principal, and $125,386 24 accrued interest, have been thus retired during the current year.

This amount of floating debt is caused by the cash payments for retiring the Albany Extension Certificates, and for additional cars.

COST OF ROAD AND EQUIPMENT.

	Last Report.	Pres't Report.
Construction	$7,371,982 54	$7,385,739 50
Locomotives and fixtures & snow plows	306,410 73	306,410 73
Horses and stable equipage	52,506 92	52,506 92
Passenger, baggage freight and other cars	291,835 50	291,836 50
Total cost of road and equipment	$8,022,786 69	$8,036,543 65

The above amount ($7,385,739 50) covers only the cost of the road from New York to Dover Plains. The cost of the remaining distance, from Dover Plains to Chatham, is represented by $2,000,000 Albany Extension Certificates, of which the company hold $1,755,500. Within the past year, one locomotive engine and a large number of freight cars have been purchased.

The inventory of equipment taken Sep. 30, 1861, shows an increased value of $56,111 15 over the preceding year, which amount is included in the current expenses of the road.

Real estate owned by this company	$1,137,014 46
Less mortgages	218,573 35
Not inclu. in cost of road and equip.	$918,441 11

Railroads in New Jersey.

The following is an abstract of the Reports of the Railroad Companies of New Jersey, made to the Legislature of the State:

Camden and Amboy Railroad Co.—Capital stock of the railroad, $2,710,800; Capital stock of canal, $2,294,400. The funded debts are: Loan 6 per cent., $800,000; loan 5 per cent., $210,000; loan 6 per cent., $225.000; loan 6 per cent., $367,000; loan 3 per cent., $800,000; loan 6 per cent., $1,700,000. Also a loan authorized by the stockholders for straightening and doubling track, of $2,500,000. Of this loan only $867,000 has been issued. In addition to the above there has been a loan for £185,000 sterling for the stock of the Philadelphia and Trenton Railroad. Also a loan of $1,175,000 to the Belvidere Delaware Railroad and branches, and Freehold and Jamesburg Agricultural Railroad. Also, a premium loan in England of £48,333 for the extension of the sterling loan to 1860. A sinking fund has been established for redemption of said loans. The cost of the Delaware and Raritan Canal was $3,255,302 55; of the Railroad, $5,918,658 15. Receipts of the Canal last year, $469,895 73; expenses, $157,509 53, leaving net $312,387 20. Receipts of Railroad were $2,058,989 65; expenses, $1,145,159 85, leaving net $963,829 80.

Central Railroad Co.—Capital stock, $3,630,000; 1st mortgage bonds, $1,400,000; 2d mortgage bonds, $600,000; quarterly dividend 2½ per cent., due Jan. 15, $90,750; interest accrued, not yet due, $47,833 33; accounts payable, $29,057 57; balance to credit of revenue fund, $172.855 89. Total, $5,970,496 29. Cost of railroad &c., $4,-

904,667 99; equipments, $504,500; ferry-boats, &c., $426,407 81; cash and accounts receivable, $134,920 49. Total, $5,970,496 29. Receipts last year—passengers, $222,089 93; merchandise, $382,598 75; coal, $568,275 83; mails and express, rents, &c., $28,931 09; total, $1,201,895 60. Expenses, $522,452 30. Net earnings, $679,443 80. Dividends, amounting in the whole to ten per cent., have been made during the year.

Millstone and New Brunswick Railroad Co.—Capital stock, $102,365; debt, $8,749; cost, $111,-114; receipts last year, $8,385 02; expenses, $4,-653 22; total, $3,731 80. No accidents.

Hackensack and New York Railroad.—Capital stock, $70,000; less not paid, $3,000—total $67,-000. Mortgage bonds, $40,000; less not issued, $6,000—total, $36,000. Unsecured debt, $7,000; cost of main line, $108,000; cost of Lodi Branch, $20,000. Receipts past year, $15,700; expenses, $15,200. No loss of life.

Millville and Glassboro Railroad.—Capital stock, etc., $189,998 56; cost of road, $190,422 06; receipts last year, $12,231 40; expenses, $8,910 87.

Paterson and Hudson River Railroad.—Capital stock, $630,000; cost, $630,000. Road is leased and worked by another company, which pays $53,400 rent per annum. Dividends of 4 per cent. are paid semi-annually. Seven lives lost by accident during the year.

Camden and Atlantic Railroad.—Capital stock paid in, $899,363 56; funded debt, $1,037,375 80; floating debt, $92,211 20; cost of road and equipments, $1,833,934 88; receipts during past year, $99,432 61; expenses, $69,356 70. No accidents.

Morris and Essex Railroad.—Capital stock, $1,157,800; funded debt, $340,000; contingent fund, $260,181 12; cost of road, &c., $1,757,991 12; receipts past year, $210,984 01; expenses, $121,949 41; interest, $22,543 70. Dividends have been paid amounting to $81,046; passengers carried, 455,107; miles run, 155,000; 3 lives lost by accident.

Sussex Railroad Co.—Capital stock, $187,776; funded debt, $266,855 86; floating debt, $3,021 18; cost of road, &c., $417,143 04; receipts during the past year, $23,811 51; expenses, $13,746 89; no dividends, no accidents.

Belvidere Delaware Railroad.—Capital stock, $997,862 24; funded debt, $2,082,000; special loans, $75,086 70; temporary loans, $81,105 31; cost of road and equipments, $3,134,656 39; receipts during past year, $241,502 64; on the Flemington Railroad, $11,599 94; expenses, $162,647 68.

Morris Canal and Banking Co.—Capital stock, $2,200,000; debts, $773,000 22; cost of canal, &c., $2,882,544; income during year past, $290,-890 83; navigation, $29,292 25; repairs, 81,458 90; superintendence and management, $32,599 56; dividends paid, $138,000.

West Jersey Railroad.—Capital stock, $556,370 43; loan at 6 per cent., $210,500; debt, $23,075 82; cost, &c., $780,455 05; receipts past year, $34,801 76; expenses, $17,645 47; passengers carried, 96,966½

Newark and Bloomfield Railroad.—Capital stock, $103,950; cost of road, &c., $110,098 47; receipts past year, $16,736 65; expenses, $13,-359 80. Dividend of 8 per cent. declared.

Flemington Railroad.—Capital stock, $150,011; debt funded, $93,100; other debts, $91,673 66; cost of road, $287,086 74; receipts past year, $11,599 94; expenses, $12,838 95.

Freehold and Jamesburg Railroad.—Capital stock, $230,844 80; cost of road, $231,173 96; receipts past year, $31,683; expenses, $21,487 85.

Paterson and Ramapo Railroad.—Capital stock $248,000; funded debt, $100,000; other debts, $1,089; cost of road and equipments, $350,000; income, (rent from Erie Road,) $26,500; dividends paid from earnings, 5¼ per cent., $13,020. This road is leased to the Erie Road.

Warren Railroad.—Capital stock, $1,276,000; bonds, $600,000; debts, $712 92, which is the amount of the cost of the road; receipts, $220,-827 12; expenses, $114,830 10.

Northern Railroad Co.—Capital stock, $156,-850; funded debt, (bonds,) $200,000; floating debt, $60,785 73; floating debt unadjusted, (estimated,) $10,000; cost of road and equipments, $411,929 16; receipts for the year ending Sept. 30, 1861, $890,804 41; expenses, $80,050 49; passengers carried, 131,867½; no dividends.

Central Railroad of New Jersey.

We give below the Annual Report of the Superintendent of this Road on the subject of Fuel. It gives, in detail, the additional light thrown by another year's experience on the substitution of coal, whether anthracite or bituminous, for wood:

REPORT ON FUEL.

To the President and Directors of the Central Railroad Company of New Jersey.

Gentlemen—In compliance with your request, that the Superintendent should annually make a special and separate report, giving the experience of the Company in the use of different kinds of fuel, I respectfully report, that, for the year 1861, our locomotive engines have run, in the aggregate, 662,393 miles; using for fuel 11,303.25 cords of wood, rated at $5 per cord, ready for the tender; and 2,071.5 tons of bituminous coal, at $5 per ton; and 6,188.03 tons of anthracite coal, at $3 per ton, making the aggregate cost of fuel used, $85,-437 84, averaging 12.88 cents for each mile run.

Twenty-two of the engines burnt wood exclusively, consuming 10,069, and running 350,915 miles, using a cord of wood for every 34.85 miles run, and at an average cost of 14.34 cents per mile run.

Seven of the engines burned both wood and bituminous coal, consuming 796.25 cords of wood, and 2,071.50 tons of coal, averaging 41 miles to a ton of coal or cord of wood consumed, and at a cost of 12.23 cents for each mile run.

The ten engines burning anthracite coal, and wood for kindling fires only, run 193,898 miles, consuming 436 cords of wood, and 6,188.03 tons of coal, averaging 28.05 miles to a ton of coal used, and at a cost of 10.44 cents per mile run.

All the bituminous coal burning engines, with the exception of the Mulford and the Craneville, have a portion of the time burnt wood, and the mileage, while burning wood, not having been kept separate from the mileage when burning coal, prevents a correct comparison of the difference in the costs between bituminous coal and wood for these engines.

The only anthracite coal burning engine, running upon passenger trains, is the Essex. She has run 25,216 miles, averaging 52.26 miles to a ton of coal used, and at a cost of 5.70 cents per mile run; and in comparing her with the New York, one of the most economical wood-burning engines, which has run upon like trains 27,392 miles, averaging 57.30 miles to a cord of wood, at a cost of 8.72 cents per mile run, the capacity and services of the two engines being about equal, shows the cost of fuel to be 3 cents per mile run, or about 35 per cent. in favor of anthracite coal over wood upon a passenger train.

Other engines, running upon merchandise, iron, cattle, mixed and passenger trains, have not uniformly taken full trains, or were uniformly performing the same kinds of service, some of them a part of the time burning soft coal, at other times wood, which renders a difficulty in making a comparison at all reliable.

Annexed will be found an abstract table giving in detail the capacities and performances of all the principal engines employed in hauling coal, showing the difference in the results of the different engines with the same kinds of fuel, as well as the comparative results between the different kinds of fuel used which, if carefully examined, will be found interesting.

	Names of Engine.	No. of Driving Wheels.	Size of Driving Wheels.	Size of Cylinders.	No. of 5 ton Cars hauled to each load.	Miles run.	Cost of Fuel.	Cost in cents per mile run.	Tons of Coal moved one mile.	Cost in mills of a ton a mile.	Kinds of Fuel used.
20	Bound Brook	4	4½	16×22	55	13,600	$2,270 00	16.69	1,795,200	1.26	Wood.
21	Somerville	4	4½	16×22	55	12,400	2,123 75	17.10	1,638,800	1.38	"
22	Phillipsburg	4	4½	16×22	55	14,857	2,458 75	19.91	1,921,562	1.53	"
24	Springtown	4	4½	16×21	55	17,596	2,952 50	16.78	2,322,512	1.22	"
25	New-Market	4	4	16×22	60	13,800	2,163 75	15.68	1,973,250	1.09	"
29	North-Branch	4	4	16×22	60	17,340	2,693 75	15.54	2,498,050	1.07	"
30	Clarksville	4	4	16×22	60	17,600	2,617 50	15.46	2,531,400	1.03	"

39	Mulford	4	4	16×22	60	8,125 40	14.69	3,062,850	1.02	Soft Coal.
23	Craneville	4	4½	17×22	60	533 00	16.10	465,200	1.18	"
"	"	4	4½	17×22	60	8,800	976 67	11.50	1,224,000	0.79	Hard Coal.
26	Middlesex	6	4	17×24	71	16,700	1,821 09	10.91	2,845,680	0.64	"
27	Union	4	4	16×22	60	23,100	2,419 50	10.47	3,820,400	0.72	"
31	Somerset	6	4	17×24	75	16,052	2,589 50	16.14	2,888,250	0.89	"
32	Hudson	6	4	17×24	75	13,136	1,662 99	13.71	2,184,562	0.76	"
33	Bergen	4	4½	16×24	60	25,000	2,490 25	9.96	8,600,000	0.29	"
35	Hunterdon	4	4½	16×24	60	24,282	2,467 37	10.19	8,489,800	0.70	"
36	Warren	4	4½	16×24	60	24,262	2,345 02	9.70	8,493,600	0.67	"
34	Passaic	6	4	18×24	82	18,700	2,531 68	14.09	8,680,160	0.68	"

It will be seen, by the foregoing exhibit, that the Craneville run 3,300 miles with bituminous coal, at a cost of 16.10 cents per mile run, and moved equal to 566,200 tons one mile, at a cost of 1.18 mills for the movement of a ton of coal one mile; then she had a new and larger fire-box put in to burn anthracite coal since which she has run 8,500 miles, at a cost of 11.50 cts. per mile run, and moved equal to 1,224,000 tons of coal one mile, at a cost of 0.72 mills for a ton of coal one mile, showing the saving of fuel to be a very large per centage in favor of anthracite over bituminous coal in the same engine. Still the comparison of the difference for the two kinds of fuel is not a true test; for a new and perfect fire-box, in either case, would consume less fuel in doing

the same amount of work, than one old, worn-out, and imperfect for the use, would.

It will also be seen, by comparing the cost of wood used by the engine Valley, with the cost of the bituminous coal used by the Mulford, there is a difference of over 90 per cent. in favor of the coal. These two engines are of the same man's make, size and capacity, except that the wood-burner has one inch the largest cylinder; this is also an unreliable comparison, for the wood-burner was employed at hauling coal from Phillipsburg to New Hampton, mostly all up grade and distance of only 16 miles, while the coal-burner run from New Hampton to Elizabethport, a distance of 48 miles.

By comparing the results of the Bergen, Hunterdon and Warren anthracite coal burners, with the New Market, North Branch and Clarksville wood-burners, the average cost of the three wood burners was 15.36 cents per mile run, and for the hauling of a ton of coal, one mile, 1.06 mills, while the average cost of the three coal-burners was but 9.80 cents per mile run, and 0.68 mills for the movement of a ton of coal one mile, showing 37 per cent. saving in favor of using anthracite coal instead of wood as a fuel to generate steam. These engines have all drawn equal loads, and their capacities are about equal in all respects, which makes the comparison of the difference in the cost for the kinds of fuel used a fair one.

By one year's more experience of the consumption of bituminous coal in the company's engines, has confirmed my opinion then expressed, that there was a large saving in the cost of fuel, by using it in proper constructed fire-boxes instead of wood as fuel; and the further experience has more than fully proved the fact, that not any of the fire boxes of our wood-burning engines, except the Mulford, are large enough to economically burn bituminous coal; consequently the expediency of altering more of them to burn it, does not at this time appear to be judicious; for if an enlargement of the fire-boxes is required, the interest of the Company would then be to construct them to burn anthracite coal. With the exception of the bituminous coal used in the Mulford, no fair test of its use has or could be made with deficient fire-boxes. Most of the engines burning bituminous coal the first part of the year, are now burning wood in consequence of the high price and difficulty of procuring the coal, and the injury being done to fire-boxes, caused by their deficiency in size for its use.

The further experience in the use of anthracite coal as a fuel to generate steam, both for passenger and freight engines, confirms the fact that there is a very large saving by its use instead of wood; but to arrive at an actual amount of saving, will require yet several years' more experience to average the cost of their maintenance, as most of the engines using it are comparatively new, with the approved (Millholland) fire box, some having recently been altered, and others with new and enlarged fire-boxes from wood burners; while the wood engines have been in use long enough to arrive at an average of their maintenance.

JOHN O. STEBBINS.
January, 1862. *Superintendent.*

Baltimore and Ohio Railroad.

Now that the Baltimore and Ohio Railroad Company has been granted by the Government the most effectual guard for such sections of the road as were destroyed by the Rebels, in order to protect the workmen engaged in the reconstruction of bridges, &c., a heavy force is engaged and a general resumption of trade is anticipated within a comparatively brief period of time. Detachments of men are hard at work in the building of bridges east of Hancock, viz.: Sleeping Creek, Cherry Run and Old Fort Frederick, and these will be completed before the close of the week. All the track has been relaid with the exception of about three miles west of Martinsburg, and as far as military operations are concerned the road will be open forthwith on next Saturday. The usual passenger and freight trains will be running according to the regular schedule about the latter part of the month. In addition to this work, there are several hundreds of our skilful mechanics and citizens earnestly engaged in the construction of locomotives and passenger and freight cars.—*Balt. Am., March 4.*

Cost of Transportation for the U. S. Army.

The following is a statement of all bills presented by railroad companies, for transportation for the United States Army, from April 1, 1861, to Feb. 1, 1862:

Allegheny Valley Railroad Company	$1,302 28
Androscoggin and Kennebec	7,084 80

The Brooklyn City Railroad Company.

The Brooklyn City Railroad Company comprises seven consolidated lines, with thirty miles of double track, 833 horses and 150 cars. They carried 11,500,000 passengers during the fiscal year ending September 30, 1861. Average fare from passengers (cash, and tickets twenty five for $1.) 4½ cents. Their expenses, with all economy, were 75 per cent. of the gross earnings. They pay $20 for each car run, repair between tracks and three feet outside of same, and pay tax on personalty and realty the same as other owners, provided it does not amount to more than the tax would be on *capital stock;* that is, they deduct bonds. The dividend for the year 1861 was $80.000—$1,350,000 stock, and $200,000 bonds—and they did much better than most other roads in the city.

Pacific Railroad.

The project of a railroad to the Pacific is attracting great attention in Congress, and Mr. MacDougall, United States Senator, from California, has introduced a bill into the body of which he is a member, for the construction of such a work with a line of telegraph, of which bill we give the following synopsis:

It conveys————alternate sections per mile each side of the road. All lands not sold in three years after its completion may be settled and preempted at ten shillings per acre, to be paid to the company. These grants to be made upon the completion of every forty consecutive miles, and in addition to this land grant the Secretary of the Treasury is required to issue to the company sixteen United States six per cent. 30 year bonds, of $1,000 each per mile, except for 300 miles along the base of the Sierra Nevada and Rocky Mountains—most difficult of construction—for which the number shall be trebled, for which bonds the company is to issue to the United States a first mortgage on every forty miles, free from all incumbrances.

The Government to have preference in the use of the road and telegraph, at reasonable rates, which, with five per cent. of the net earnings, is to be applied to the payment of their bonds.

The company must file their assent to this act in the Interior Department within one year after its passage; locate the route within two years thereafter, and complete the road and telegraph from the western boundary of Kansas to the eastern boundary of Nevada Territory, before July 1, 1874. The road and telegraph to run from the western boundary of Kansas, or at the 102d deg. parallel of longitude west of Greenwich, at the termination of the Leavenworth, Pawnee, and Western Railroad and Telegraph line, (which is to run from the Leavenworth, via Fort Ripley, to 102 deg. parallel), thence westerly upon the most direct, central, and practical route, through the Territories of the United States, to the eastern boundary of Nevada Territory, there to connect with the Nevada Railroad line across that Territory, and which connects the Central Pacific Railroad of California, running thence to San Francisco. The track upon the entire line is to be of uniform width, and the grades and curves not to exceed the maximum of those of the Baltimore and Ohio Railroad; and the road and telegraph to be operated as one continuous line from the Missouri River to the Pacific coast.

The Hannibal and St. Joseph and Pacific Railroads may extend their roads from St. Joseph, via Atchison, and from Kansas City, to connect with the road through Kansas; and up to such point of junction double the amount of lands and bonds are to be granted to them and equally divided. In case all the roads provided for in the bill are constructed, and in case of failure of these companies to construct such connections, any company organized by the State of Kansas may construct a connection on the same conditions.

The Dubuque and Sioux City, the Mississippi and Missouri, and the Burlington and Missouri River Railroads, may construct a single line, not to exceed three hundred miles, from a common point on the western boundary of Iowa, to connect with the Kansas line, on the same conditions.

In case the company incorporated by this bill does not complete the road and telegraph in a reasonable time, or keep the same in repair and use, Congress may pass an act to insure its speedy completion and use, and direct the income thereafter to be devoted to the use of the United States to repay all expenditures caused by default of the company.

The company is required to make an annual report to the Secretary of the Interior, showing the cost, income, and expenditures of the entire road and telegraph, and if the earnings, including the amount allowed for services rendered for the United States, after deducting all expenditures, shall exceed ten per centum on its cost, exclusive of the five per cent. to be paid to the Government, Congress may reduce the tariff of rate of fare, if unreasonable, and fix the same by law.

OFFICE OF THE ILLINOIS CENTRAL R. R. Co.,
New York, Feb. 10, 1862.

AT a meeting of the Board of Directors of the ILLINOIS CENTRAL RAILROAD COMPANY, held at their office in New York, this day, it was

Resolved, That an assessment of FIVE DOLLARS per Share, upon the Scrip Shares of the Capital Stock of the Company, be, and the same is hereby called, payable on the 10th of March, 1862; and that the same be payable on the Stock registered in the City of New York at the office of the Company in that City; and on the Stock registered in London, at the office of Messrs. ROBERT BENSON & Co., London; and that parties desiring to pay their assessment in London, may pay the same at the rate of four shillings and two pence sterling to the dollar.

Resolved, That the transfer books be closed on the afternoon of the 1st March next, and re-opened on the 10th of the same month; and that no transfer be permitted on or after that day of Shares upon which the foregoing assessment shall not have been paid.

THOMAS E. WALKER, Treasurer.

NEW YORK CENTRAL RAILROAD COMPANY,
TREASURER'S OFFICE, ALBANY, Feb. 6, 1862.

SEVENTEENTH SEMI-ANNUAL DIVIDEND.—The Directors of this Company have declared a Semi-Annual Dividend of Three per cent. on the capital stock thereof, payable on the 20th day of February inst. upon stock registered at New York, Boston, or Albany, and on the 20th day of March next, upon stock registered at London. Stockholders whose stock is registered at New York, will receive their dividends at the office of DUNCAN, SHERMAN & CO.; those whose stock is registered at Boston, at the office of J. E THAYER & BROTHER; those whose stock is registered at Albany, at the ALBANY CITY BANK; those whose stock is registered at London, at the UNION BANK OF LONDON, the latter at the rate of 4s. 1d. to the dollar. The transfer books, which are now closed, will be re-opened at New York, Albany and Boston, on the morning of Monday, the 24th day of February instant.

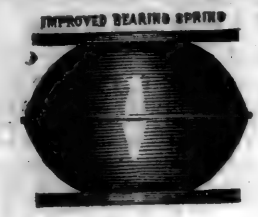
LYONS' TABLES.
To Civil Engineers and Contractors.

FOR SALE AT THIS OFFICE—A set of Tables for finding at a glance, the true cubical contents of Excavation and Embankments for all Bases, and for every variety of Ground and Side Slopes.—By M. E. LYONS, C. E.

SHEET No.				SHEET No			
1.	General Table for all Bases and all Slopes.			13.	for Base 18 ft. Slop.		1½ to 1
2.	For Side Hill Cuts and Fills.			14.	" 20 "		1½ to 1
3.	Base 12 ft. Slopes		1½ to 1	15.	" 24 "		¾ to 1
4.	" 14 "		1½ to 1	16.	" 24 "		1½ to 1
5.	" 15 "		¾ to 1	17.	" 25 "		1½ to 1
6.	" 15 "		1 to 1	18.	" 26 "		1½ to 1
7.	" 15 "		1½ to 1	19.	" 28 "		¾ to 1
8.	" 16 "		¾ to 1	20.	" 30 "		1 to 1
9	" 16 "		1 to 1	21.	" 30 "		1¼ to 1
10.	" 18 "		¾ to 1	22.	" 30 "		1½ to 1
11.	" 18 "		¾ to 1	23.	" 32 "		1 to 1
12.	" 18 "		1 to 1	24.	" 32 "		1¼ to 1

The Tables are printed in clear, bold type on tinted paper; sheets 25x16 inches. They may be used by candle-light without injuring the eye-sight. Each sheet is complete in itself, and embraces all that is wanted in connection with the Base or Slope designated, whether on level or side hill cross section.



Sent, **free by mail,** in separate sheets, at 25c. each; or the whole, handsomely bound in cloth, in one volume, for **$7.50.**

ENGINEER'S FIELD BOOK,
By **C. S. CROSS, Civil Engineer.**

THIS work is designed as a pocket companion, and embraces, in the most compact form, all the necessary tables for prosecuting railroad surveys. It is subdivided as follows:—

1st. The method of staking out railroad curves and keeping field notes.
2d. Railroad curve tables for expeditiously determining the points at which commences the curving.
3d. Application of the Prismoidal formula in determining the quantities of excavation and embankment of canals and railroads from transverse sections.
4th. Excavation and embankment tables for expeditiously determining the cubic yards from mean area.

It is a plain, clear and most valuable book for practical Railroad Engineers. Sent, **free by mail,** upon receipt of the price. For sale at this office. Price $1.

American Railroad Journal.

New York, Saturday, March 15, 1862.

Survey of the Central Pacific Railroad.

This is the name of a projected railroad over the Sierra Nevada mountains, connecting the city of Sacramento, California, with the Washoe mineral region, and ultimately forming a great link in the system of railroads which will one day stretch across the continent. A copy of the surveys of this work, made by THEODORE D. JUDAH, Esq., has been received. Considering the well-known difficulties besetting such a work, we must say the result is eminently satisfactory. The gist of the report is that the Western slope of the mountains, which is much more arduous than the Eastern, can be ascended with a grade never exceeding one hundred and five feet to the mile, which is less than the steepest grade on the Baltimore and Ohio road in its passage over the great Alleghany.

Mr. Judah alludes to the physical obstacles which must be overcome in crossing the Sierra. The first of them is the great elevation of that range, the lowest practicable passes being 7,000 feet above tide level. This can only be reached, with an average grade of 100 feet to the mile on a base of 70 miles, allowing nothing for irregularities. This distance is only about the average length of the Western slope. In the present instance the distance is 81 miles.

The second obstacle consists in the impracticability of crossing rivers in the mountains, or even using their banks to any great extent. The principal streams between the extremes mentioned above have cut for themselves channels from 1,000 to 2,000 feet in depth; while their sides vary from perpendicular to an angle of forty-five degrees. The 'divides' between those rivers are often so narrow at the top that they will scarcely allow the passage of a wagon along them. No bridges have been or probably ever will be thrown across most of those canons. To visit a neighbor within speaking distance it may be necessary to journey twenty miles. Usually each of the ridges forms a county, having its own thoroughfare entirely independent of those of its neighbors. Sacramento and Marysville are the great *foci* of mountain travel.

The third great obstacle is the second summit of the Sierra Nevada, which is separated by a pretty broad table-land from the Western summit. But in the present instance a route has been discovered which entirely avoids the former. From the few facts here given, the reader will readily observe that engineering is but child's play in the Eastern States when compared with California.

The line surveyed takes a north-easterly course from Sacramento for 25 miles to Lincoln, the point of intersection with the California Central Railroad, which is 140 feet above Sacramento. Thence it follows an indentation in the "foot hills," with fifty feet grades, for six miles, when grades of eighty-four feet are first used. In its course here it traverses Doty's ravine, Shipley's ravine, Boyen Ranche, Sailor's ravine, Dry Creek, Clipper Gap and other localities, with grades ranging from fifty to one hundred and five feet (the maximum). Near Illinoistown it passes a summit with a tunnel of 500 feet; the shortest curves are also in that neighborhood. Further up, near Secrettown, two tunnels, each about 600 feet long, will be necessary. Beyond these the line reaches Dutch Flat, near which it finally leaves the crest of the ridge and bends over to Yuba river. For some distance up the latter the maximum grade will have to be used. The summit is exactly 7,027 feet above the sea level.

The descent is comparatively short and easy, though the maximum grade will exist for some distance downward. The route pursued follows the main Truckee for a distance; then seeks the valley of Donner Creek, and returns to the Truckee, which it follows to the Washoe region. The general results are expressed in the following statement of the prominent features of the line:

It crosses the Sierra Nevada Mountains, and reaches the Truckee River, in 123, and State line 140 miles from Sacramento.

Big Bend of Truckee, or Humboldt Desert, is reached in 178 miles.

It crosses the State at nearly its narrowest width.

It pursues nearly a direct course from Sacramento to Big Bend of Truckee.

It forms a local road for the counties of Sacramento, Placer, and Nevada.

It commands, and will perform, the entire business of Nevada Territory, Washoe, and the Silver mineral region.

It will also command the business of newly-discovered Humboldt mineral district, Pyramid Lake, Esmeralda, and Mono mineral districts.

It crosses the Truckee Meadows at the head of Steamboat Valley, which, with Washoe Valley and Eagle Valley, connects with Carson Valley, enabling a branch road, with light grades, to be built to any point on Carson River.

It reaches eastern base of Sierra Nevada in 11½ miles from Summit.

It follows the valley of Truckee River, without obstacle, to Big Bend or Humboldt Desert.

It entirely avoids the second summit of Sierra Nevada.

Its maximum grades is 105 feet per mile, or less than those of the Baltimore and Ohio Railroad.

The grades down the Truckee will not exceed 40 feet per mile.

The elevation of line is maintained, continuously, to the summit—there being no down grade running easterly to Summit.

An uniformly descending grade is maintained from the summit easterly to the Truckee, or eastern base.

Encounters no elevated plateau of table-land at Summit.

Running to and from Summit with maximum grades, cannot have an extensive snow-line.

Runs through extensive forests of Pitch and Sugar Pine, Fir, Cedar, and Tamarack, which latter two species of timber are abundant, and will furnish excellent cross-ties.

Crosses no deep river canons or gorges.

Its longest tunnel will not exceed 1,350 feet in length, and no shafting will be required.

Shortest radius of curvature, 573 feet.

Navigable waters of the Sacramento River at all seasons of the year its western terminus; Washoe and the great Basin its eastern terminus.

At Big Bend of Truckee, the line is in position to proceed *via* the Humboldt to Salt Lake, or follow the Simpson route to some point.

Saving in distance over route *via* Madelin Pass and head-waters of Sacramento, as surveyed by Lieut. Beckwith, from Lassers Meadows or Humboldt crossing, 184 miles.

Saving in cost of Pacific Railroad line, taking Lieut. Beckwith's estimate from Lasseur's Meadows or Humboldt crossing, as compared with cost of present proposed line, in thirteen and one-half millions of dollars.

Reduces the time of passenger transit to and from Washoe to 8½ hours. Passengers leaving Virginia station at 5 A. M., will reach San Francisco the same evening.

Saving in cost of transportation of freight to citizens of Washoe or Nevada Territory, one million of dollars per year.

Affords a market for low-class silver ores (now thrown aside), for shipment to Europe, from over 3,000 mining claims.

Is advantageously located for an extension to Oregon.

Completes first western link of Pacific Railroad, overcoming its greatest difficulties.

As to the obstructions apprehended from snows, it is believed that the road can be kept open during the year round. Numerous observations show that the greatest depth of undisturbed snow at the summit is thirteen feet, this being the accumulation of all the storms of the winter season. The snow line begins on the Western side near Dutch Flat and terminates at Niel's Flat, twelve miles east of the summit, making the whole distance where deep snows prevail, fifty-two miles. Occupying either the crest or the sides of ridges, it is believed the snow would be easily capable of removal by means of ploughs. As to the absence of shelter in case of storms, it is observed that the Placerville wagon road is kept open for travel all winter, hotels being established every few miles. With a railroad built upon this route, the objection would be speedily obviated.

The estimated cost of the road to the State line, 140 miles, is $12,380,000, or an average of $88,428 per mile for a single track. Adding estimates to Virginia station, it amounts to $13,270,000, or to Humboldt Desert (178 miles) $14,880,000.

Coal Oil Wells of Pennsylvania and Canada

The production of coal oil by the wells in Pennsylvania is enormous, and the amount goes on increasing every day. The prodigious quantity thrown on the market has caused a glut and reduced the prices below paying standard. A Venango paper says, that if a barrel of oil could be had for nothing at this time, it would not pay in New York the cost of freight, commission, &c. Still the product goes on, and the stock accumulates too fast to warrant its being stored away to wait for a rise. Some operators, however, are plugging up their wells in consequence of the low prices, but other wells are increasing in their yield. A fortnight since 20,000 barrels of oil were on the wharf at Oil City, Pa., waiting shipment to Pittsburg. At one of the great wells 114 large cisterns were counted, holding 30,000 barrels of oil. The chief vein, the Phillips, yields 3000 barrels daily. Like the others, it is fitted with a stop-cock, and only allowed to run as fast as the oil can be taken care of. The stop-cock is inserted in the tubing, which is sunk as soon as oil is reached. The bore of this well is five inches in diameter. One party at Oil Creek pays $3000 a day for the transportation of his oil to the various railroads, the nearest point being twenty miles distant. The lands are leased, the owners receiving one-half or quarter of the oil. Fleets of flatboats are building to go down the river with the spring freshets. They are to be drawn up alongside the flowing wells, and by a hose will be run full, and then floated down to Pittsburg, the oil being thus taken to the refineries in bulk, and the expense of barrels, which is from $2 to $2 25, being saved. Hundreds of thousands of dollars have been lost by sinking wells where no oil vein has been struck.

The oil wells of Enniskillen, Canada West, are reported to exceed in production those of Pennsylvania, enormous as that production is. The Yankees are said to have got ahead of the slow-moving Canadians in availing themselves of the newly discovered riches, and have opened numerous wells. The wells are only about fifty miles from Detroit, and many Michigan capitalists have invested in them. About three hundred wells have been sunk. The principal one is said to be capable of yielding oil sufficient to load a four hundred ton vessel daily. This flow has been curtailed by tubing, so that the daily yield is now only about six or seven hundred barrels. Several extensive refineries have been erected in Michigan for refining the oil from these wells.

Pittsburg and Connellsville Railroad.

This company was chartered April 8, 1837, with authority to construct a railroad from Pittsburg, by the course of the Monongahela and Yonghiogeny rivers, to some suitable point at or near Connellsville. The charter having lapsed, was revived by an act passed April 18, 1843, and the company authorized to extend their road beyond Connellsville to Smithfield, or any other point on the waters of the Youghiogeny. In January, 1853, the company obtained a charter from the State of Maryland, which conferred authority for the extension of the road into that State as far as Cumberland. The necessary surveys were commenced July 20, 1853, and the contract for the work on the division between West Newton and Connellsville, 25 miles, given out March 22, 1854. This portion of the road was completed and opened for business September, 1855, at a cost of $547,639. On the 26th of April, of the same year, that portion of the first division of the road between West Newton and Turtle Creek was contracted for, and the work immediately thereafter commenced, and in the Spring of 1856, the contract was given out for the tunnel at Sand Patch Summit. The road was opened from West Newton to Guffey's Station, 8 miles, August 10, 1856; and to the Mouth of Turtle Creek, 15 miles, January 14, 1857. Operations at the tunnel works were suspended October 1, 1857, and have not since been resumed. Early in 1859 the work of construction was commenced between Turtle Creek and Pittsburg, and the road completed and brought into use on the 10th of October, 1861. The length of the Turtle Creek Extension is 10⅙ miles. On the 1st of November, 1861, this company took a lease of the Fayette County Railroad, of 12 miles in length, from its junction with their road, a mile east of Connellsville, to Uniontown, at an annual rental of $4,000 out of the revenue of that road, which it is not doubted will enable them to meet the rent and all current engagements. The road having been injured by the great flood of September last, this company has agreed to repair the damage for a specific sum, reimbursable out of the rent, and also to purchase the rolling stock of the road, consisting of two small locomotives and a few cars, for the sum of $4,000, payable in two years. The total length of the Pittsburg and Connellsville Railroad, including the Fayette County Railroad, the Turtle Creek Extension, and the branch connecting with the Pennsylvania Railroad at Brinton's, will be 72 miles.

The road as far as constructed, with the exception of the Turtle Creek division, has been paid for chiefly in county and city bonds subscribed as capital. These securities are guaranteed in principal and interest by the company, and to a certain extent are a lien on the road. No interest on any class of securities has been paid since 1857, and those issued by the city of Pittsburg and the county of Allegheny have been repudiated. Their validity however has been established by the legal tribunals of the State, but these have not not thus far succeded in enforcing the payment of the accruing interest. Baltimore city has largely aided the company—at first by guaranteeing its bonds to the amount of $1,000,000, and subsequently by exchanging them for a like amount of its own stock and bonds. The work upon the Turtle Creek Extension was paid for by the proceeds of bonds secured only upon the work itself. The amount of capital stock authorized is $3,000,000, of which $1,756,636 60 has been paid.

Classes.	No. of shares.	Par value.	Paid in bonds.	Paid in cash.	Total paid.
Allegheny County	15,000	$750,000	$750,000	.....	$770,000

Grand total	42,864	$2,143,200	$1,450,000	$183,136	$1,756,646

The funded debt of the company, $1,500,000, is described as follows:

City of Baltimore, 6 per cent. loan, $1,000,000, dated July 1, 1856, and payable, July 1, 1886, and interest semi-annually, Jan. 1 and July 1, at Baltimore. On the 24th of June, 1843, an ordinance passed the Baltimore City Councils, which guaranteed the bonds of this company to the amount of $1,000,000. The price these bonds commanded in the market was unsatisfactory; and on representations of the company a supplementary ordinance

was passed, June 10, 1856, authorizing the issue of city coupon bonds and inscribed stock in exchange for the guaranteed bonds, which last were subsequently cancelled. This loan, which constitutes a first lien on the road, consists of $94,000 in city bonds, and $906,000 in city stock. A sinking fund, constituted of $12,000, payable annually, was provided for the redemption of the loan at maturity.

First mortgage construction 6 per cent. bonds $400,000, dated August 1, 1859, and payable August 1, 1889, and interest semi-annually February 1 and August 1, at New York. The whole provision under this mortgage is $400,000, which is secured on the section of road between Pittsburg and Turtle Creek, 10½ miles, a special release from the Baltimore mortgage to this extent having been granted.

Bonds given for real estate, $100,000, due in 1868 and 1883.

The following statement exhibits the present condition of bonds and stocks issued in favor of the company by corporate bodies, including the bonds issued by the company for the construction of the Turtle Creek Division:

	Amount issued.	Amount sold.	Per cent. realized.
City of Pittsburg..	$500,000	$500,000	80.70
Allegheny county.	750,000	660,000	80 1-16
Boro' of McKeesp't	100,000	100	100
" Connellsville.	100,000	100,000	15
Balt. guaranteed..	1,000,000	.....	....
" City.....	300,000	94,000	92.36
" " stock ...	906,000	906,000	89.90
T. C. Div. 1st mort.	400,000	268,000	96 3-5
	$4,056,000	$2,528,100	

The following is a statement of construction expenditures, (omitting organization expenses, profit and loss and interest account) distributed between the Eastern, Western and Turtle Creek Divisions:

	Expended last year.	Total expenditures.
At Sand Patch Tunnel and east thereof	$975 24	$219,900 52
West of S. P. Tunnel....	15,702 56	1,479,784 23
On T. C. Division.....	80,694 87	264,379 02
	$97,372 67	$1,964,063 77

The earnings of the road for the fiscal year ending October 31, 1861, have been as follows:

From passengers	$22,426 80
" freight.....	43,993 24
" mails, etc	3,686 21
	$70,105 75

And the expenses were:

Conducting transportation..	$11,980 26	
Maintenance of way	11,586 91	
" cars.....	3,162 93	
" motive power.	14,671 06	
		41,401 15
Difference		$28,704 60

The entire receipts of the company during the year were $70,228 20; and the current expenditures, $48,888 69—leaving $21,217 06 as the net revenue of the year. Of this amount, $10,310 95 has been expended upon the Turtle Creek Division for right of way, station houses, interest on construction bonds, etc.; $3,246 25 for interest on mortgage, debt and taxes on Monongahela depot; $2,954 93 for real estate; and $4,704 93 for new machinery and buildings. The floating debt has increased $17,442 78. The gross earnings show a decrease of $10,447 06; with a decrease in expenses of $9,461 07. The construction account has been increased $13,996 08 chiefly by the purchase of new equipment. The number of miles run by engines was 11,408—being 2,367 miles less than the previous year. The number of passengers carried was 60,968; the number carried one mile was 860,497. Tons of freight carried, 56,539.

The equipment of the road consists of 8 locomotives; 5 passenger, 3 baggage and mail, 48 freight, and 8 dumping cars.

President—BENJ. H. LATROBE, Baltimore.
Sec. and Treas.—W. O. HUGHART, Pittsburg.
Sup't—HENRY BLACKSTONE, Connellsville.

The Cumberland River.

The Cumberland river rises in the Cumberland Mountains, near the boundary between Virginia and Kentucky, and pursuing a westerly or southwesterly course enters Tennessee. After an extensive sweep to the south it turns north-westwardly and northerly, and enters and crosses Kentucky, entering the Ohio 11½ miles east of the mouth of Tennessee river, and 59 miles above the mouth of the Ohio. The entire length of the river is about 600 miles, and it drains a territory of 17,500 square miles. It is navigable for large steamboats and vessels to Nashville, 203 miles from the mouth, and for boats of 15 tons 300 miles further. At certain seasons of high water vessels of 400 tons can descend the river 400 miles to the Ohio, and for half its length boats may navigate it at all seasons. It is the second river in size which enters the Ohio, being inferior only to the Tennessee. Below Nashville, the river is deep and narrow. There are on the borders of the Cumberland 19 furnaces, 9 forges, and 2 rolling mills, producing annually 44,500 tons of iron, valued at $1,673,000.

The National Finances.

We copy the following as the leading article in the Circular of Samuel Hallett & Co.:—

The events of the past week have been of unusual interest and importance, and have exerted a corresponding influence upon financial and commercial affairs. The Banks have again extended important aid to government by making a large loan of Treasury Notes, which henceforth are to be used as specie in the settlement of balances at the Clearing House. The Treasury Certificates of deposit are to be used for the same purpose. Such an arrangement has the effect to put immediately into circulation a large amount of notes which have been accumulating in the banks, which are now, in commercial transactions, the equivalents of money, and which greatly facilitates the settlements between the banks. We are thus, at last, fairly launched, for better or worse, upon the broad sea of paper money. The result so far is certainly agreeable, as everybody appears to be benefitted thereby. Money is plenty. Business revives, and the expenditures of the war only seem to tend to increase the national prosperity.

Another important event is the message of the President recommending to Congress the passage of a resolution declaring it expedient to aid the several States in the emancipation of their slaves. Such a declaration has been favorably received by all shades of political parties, and bids fair to unite all upon a definite and uniform policy, which shall at the same time be humane in its intent, without working a violent change in the social condition of the country. The favorable reception of the message has exerted an influence over the Share and Money Market, as unity of sentiment gives increased confidence of strength.

Another favorable feature is the steady progress of the national authority. Every day adds to its area. The conviction is now universal that in a comparatively short time, the integrity of the country will be restored. Trade follows our arms, so that military and commercial progress go hand in hand.

Another important element toward an improved state of feeling is the tax bills recently prepared, and which are now fully reported. We do not deem it important to give these in greater detail than we have already done, till they become a law. They are looked upon as a guarantee for ample revenues to meet the wants of government, certainly on a peace footing. The effect upon government securities, consequently, has been marked. The leading transactions in the market have been in these. They are still firmly held, though the large amounts that must speedily be offered, will prevent for the present, we believe, a continued advance. Government wants money by the hundreds of millions, and though the country was apparently never richer, yet sums so vast cannot be supplied without making money active, which will have an effect upon governments, if not upon all kinds of securities. We entertain no doubt of the ability of the Treasury to borrow all that may be needed, but a party with wants so vast, whether it be an individual or a nation, must pay pretty much in proportion to its necessities. Such will be the result, however unclouded the present prospects.

The new batch of Treasury Notes must soon make their appearance. Their influence upon business and prices of all kinds will be a most interesting subject. As they are to perform all the functions of money, we do not see how

a great inflation of prices can be helped, to keep pace with the increased abundance of the common standard or measure of value. We anticipate a large increase in our foreign trade, notwithstanding the probable increase in rates of duties upon many articles. The consumer will pay with his Treasury Notes, while the importer must pay in coin. We anticipate from this cause an increase in the market value of this as of all other articles.

On the whole the aspect of affairs have at no time been so favorable since the commencement of our political disturbances. The progress of the national forces are now most rapid in every section of the country. Effectual resistance is already seen to be utterly hopeless. The insurgents can no longer oppose adequate forces or resources to those operating against them. They have lost the whole sea coast, and the provision growing districts of the west, a loss which must soon leave them without food; and have abandoned the works which they have been a year in constructing, and which during all this time have threatened Washington. We refer to these matters, for the reason that the commercial affairs of the country are bound up in its political affairs. Every inch of territory gained by our armies is so much added to the volume of our trade, and to the value of every kind of property.

An Atlantic Telegraph.

The London *Observer*, in an article relative to a telegraph between Europe and America, says:—

"There is reason to believe that attempts will shortly be made to connect England and America once more by the electric telegraph, and this time with greater increased prospects of permanent success. Recent occurrences have impressed the Government of England and of the United States with the enormous importance of such a means of communication, and the President and Government of the United States have decided on giving every support in their power to any well-considered project of that kind. The Government of the United States have, in a liberal manner, offered to subscribe one-half of the sum which would be required for making the cable, and give the use of vessels of their navy in assisting to lay it, provided the British Government will grant the remaining portion of the sum.

Mr. Cyrus Field, who took so active a part in reference to the former Atlantic telegraph, has, we are informed, undertaken a mission to this country for the purpose of inducing the British Government to act in a spirit of equal liberality and co-operation with this friendly offer on the part of the United States. As further evidence of the friendly spirit which has actuated this offer, the Government of the United States are perfectly content that the telegraph should have its terminus on British territory, as that will afford the nearest point of communication with England and Ireland. Any arrangements that would be entered into between the two Governments would, of course, provide for the efficient working and use of the line, and would guarantee its protection by both countries in the event of hostilities. We are at a loss to see upon what grounds our Government can refuse to respond favorably to the offer, which, if not already made, will shortly be submitted to its consideration.

The cost of the cable, calculated with the greatest amount of care, and with every improvement, would not be greater than that which was expended on the line from Malta to Alexandria, and which was wholly defrayed by the Government. Our interests with the American Continent are not less important than those with India, and, even if greater importance were to be attached to our Eastern possessions, it would only render still more necessary a line actoss the Atlantic, seeing that with the telegraphs which already exist on the American continent, and which now exist to the Pacific coast, it would afford a means of rapid and valuable communication, from the West, with China and our Indian Empire."

Albemarle and Chesapeake Canal.

The Albemarle and Chesapeake Canal commences in North Carolina, at the mouth of North River, a wide and deep tributary of Albemarle Sound. The line extends up that river to the canal, thence through the canal to Currituck Sound, and up the North Landing river to the Virginia section of canal, and thence westerly through said canal to the South-west branch of Elizabeth River in the vicinity of Norfolk.

The length of the company's line of navigation is about 65 miles, but all except 5½ miles in North Carolina from North River to Currituck Sound, and 8½ miles in Virginia through Great Bridge swamp, consists of natural water courses varying in width from 200 feet to several miles.

This improvement completed a chain of inland navigation from New York southward a distance of about 600 miles. It makes a line of continuous inland navigation from New York to Newbern, N. C., with only 71 miles of canal namely:—

Delaware and Raritan Canal in New Jersey, 43 miles; Chesapeake and Delaware Canal in Delaware, 14 miles; Albemarle and Chesapeake Canal in Virginia and North Carolina, 14 miles.

Albemarle, Pamlico and Currituck Sounds, receive the waters of twenty-one rivers, and a great number of smaller navigable streams, altogether watering upwards of twenty fertile counties, and affording about 1800 miles of navigation.

Old Colony and Fall River Railroad.

The Old Colony and Fall River Railroad Company is a consolidation of the Old Colony Railroad Company and the Fall River Railroad Company.

The Old Colony Railroad Company was incorporated in March, and organized on the 25th of June, 1844. The work of construction was immediately commenced, and the whole line between South Boston and Plymouth, 37.26 miles, opened Nov. 10, 1845. In 1846, the road was extended to its present station in the city. The Abington and Bridgewater branch, 7.76 miles in length, was constructed in 1846–7. In 1848 a second track was laid between Boston and South Braintree, the point of connection with the Fall River Railroad, 11 miles. In 1847 leases were taken of the South Shore Railroad, and the Dorchester and Milton Branch. That of the former was for a period of five years, during which the Old Colony Company agreed to run and maintain the road, and pay as rent, 6 per cent. on its cost. The lease terminated in 1854, resulting in a considerable loss to the Old Colony Company. The Dorchester and Milton road, 324 miles, was operated by the Old Colony Company up to the time of the consolidation, September 7, 1854. The cost of the Old Colony road at that date was $2,393,544; share capital $1,964,070; funded debt $223,200; floating debt $70,888. The following statement will show the earnings, expenses, etc., from 1846 to 1853, inclusive:

	Gross earnings.	Operating expenses.	Net earnings.	Divi- dends.	Per cent.
1846..	$125,711	$57,230	$68,481	$68,000	6

The Fall River Railroad Company was a consolidation of the Fall River Branch, the Middleboro', and the Randolph and Bridgewater Companies. The Fall River Branch Company was incorporated in March, 1844, with authority to build a railroad from Fall River to Myrick's. The Randolph and Bridgewater Company was incorporated in March, 1845, and authorized to construct a railroad from Bridgewater to the Old Colony Railroad in Braintree or Quincy. The Middleboro' Company was also incorporated in March, 1845, with authority to construct a railroad from Bridgewater to the Fall River Branch at Myrick's. The three companies were consolidated on the 8th of August, 1845. The share capital of the original companies was as follows: of the Fall River Branch, $400,000; of the Randolph and Bridgewater, $400,000; and of the Middleboro', $250,000—making a total of $1,050,000. The road was opened from Fall River to Myrick's Station, on the 9th of June, 1845; and the whole road to its Junction with the Old Colony in Braintree, 42.24 miles, was completed and put in operation on the 16th of December, 1846. On the 7th of September, 1854, the Fall River and the Old Colony Railroad Companies were consolidated under authority conferred by an act of the Legislature, passed on the 25th of March previous. At that time the Fall River Company had no debt; and the cost of the road, etc., $1,050,000, was represented solely by the original share capital. The following statement will show the earnings, expenses, etc., from 1846, to 1853 inclusive:

	Gross earnings.	Operating expenses.	Net earnings.	Divi- dends.	Per cent.
1846...	$64,119	$53,784	$10,335	*nil.*	*nil.*
1847...	111,354	77,229	34,125	$31,500	3
1848...	184,344	71,924	112,420	68,250	6½

1853...	294,183	167,593	126,590	84,000	8
8 yrs.	$1,499,890	$847,886	$652,004	$378,000	36
Av..	187,486	105,985	81,501	47,250	4½

The length of the united roads, from Boston to Fall River is 79.50 miles; of the Bridgewater Branch, 7.76 miles—making the total length of road owned by the company, 87.26 miles. Including the Dorchester and Milton Branch, 3.24 miles, (leased), the total length of road operated is 90.50 miles. In the agreement for consolidation, the value of the Old Colony Railroad was estimated at $1,650,000, and that of the Fall River Railroad at $1,050,000. The share capital of the former was $1,965,100; that of the latter $1,050,000; and it was agreed that the share capital of the new company should equal the aggregate of those of the two old companies, to be divided between the stockholders of each, in ratio to the estimated value of the respective roads. The company operates the Dorchester and Milton Branch under a contract which provides that it shall supply the rolling stock, and receive one-half the gross earnings of the road, and in addition 50 cents per mile for every mile run by its trains over it—the Dorchester and Milton Company to maintain its road. The amount of capital stock authorized is $3,200,000, of which $3,015,100 has been paid. Funded debt, $81,500, consisting of 6 per cent. coupon bonds, falling due April 1, 1862, 1863, and 1864; interest payable semi-annually April 1, and October 1, in Boston. Cost of road and equip-

ment, $3,434,164—less $71,216 charged off for depreciation.

The income account for the years ending November 30, 1860 and 1861 is as follows:

Having obtained authority from the Legislature of Massachusetts to extend the road in Fall River to the State Line, there to connect with the Newport and Fall River Railroad, chartered by the Assembly of the State of Rhode Island, the directors have located the road through the city of Fall River to the State Line, and appointed Samuel F. Johnson, Esq. to superintend the engineering of the Extension. The construction of the road has been let to Messrs. Gilmore & Co. The directors have again petitioned the General Court for further legislation in regard to the extension to Newport and hope by another year to report the successful completion of the enterprise.

The company have 27 locomotives, 49 passenger and 15 baggage cars, and 363 cars for merchandise, etc.

President—ALEXANDER HOLMES.

Directors—James H. Beal, Wm. J. Walker, F. B. Crowninshield, C. C. Gilbert, Richard Borden, Geo. A. Kettle.

Treasurer—JOHN M. WASHBURN.

Superintendent—GEORGE HAVEN.

Mechanic's Liens upon Railroad Property.

CITY RAILROAD COMPANIES; WHEN THEIR PROPERTY IS LIABLE TO BE SOLD UNDER EXECUTION—WHEN THE RULE OF PROTECTION CEASES TO OPERATE, OR TO BE A BAR TO A MECHANIC'S LIEN.

It is a familiar principle of law, that the property of railroad companies is free from liability to seizure and sale under the ordinary execution against property; and for the reason that were such seizure and sale allowed by the Courts, at the suit of any and every individual who might have debts of either small or large amounts due to them, and who might have recovered judgments thereon, it would often result in the entire stoppage of the working of the road and the business of the company; and this would result in an injury to the public, who are supposed to have a permanent interest in the steady and continuous running of the cars. This rule, however, is limited to those cases in which the reason upon which it is founded exist; and where the sale of the property levied upon will not interrupt or interfere with the ordinary business of the company, the property may be sold. This has been recently held in a District Court in Pennsylvania, in the case of McIlvain *vs.* The Hestonville and Mantuaville Railroad Company.

The plaintiff had filed a mechanic's lien for materials furnished in and about the erection of a stable which was built and used by the company for the purpose of sheltering the horses employed in drawing the cars of the defendants over their road. The defendants pleaded in bar the allegation that the stable was necessary to the enjoyment of the corporate rights and privileges of the defendants. The court, however, held these facts insufficient; and that a stable so built and occupied by a Passenger Railway is liable to a mechanic's lien, and to a sale under the same. The following is the opinion of the court deliveredat the decision of the case:

HARE, J.—This case comes before us on a demurrer to a plea in bar, to a *scire facias* issued on a mechanic's lien filed for materials furnished in and about the erection of a stable, which the plea avers to have been built, and to be now used for sheltering the horses employed in drawing the cars of the defendants over their road, and to be, therefore, necessary to the enjoyment of the corporate rights and privileges of the defendants. The decisions undoubtedly establish that as the interest of the public in the administration of a public franchise, survives the grant by which it is made the property of a corporation, or an individual, and is paramount to the right of the creditors of the grantees, it cannot be taken in execution and sold for the payment of debts. This is true, not only of the franchise itself, as for instance, of the right to carry passengers or freight on a railroad, but of everything necessary to its enjoyment, and without which it cannot be exercised. It was accordingly said during the argument, that a *fieri facias* cannot be levied on the rolling stock of a railway, or on the building where a turnpike or canal company collects its tolls, and there is good authority for the latter position, if not for the former. The exception thus made in favor of the possessors of franchises of this description is, however, in derogation of the general rules of law, and should not be carried further than the necessity in which it has its origin requires. To sell the cars or locomotives of a railway to the highest bidder, is at once and necessarily to stop the working of the road, and the same result must follow, though indirectly, from the sale of the toll-houses of a canal, because tolls cannot be collected without the necessary means, nor the canal kept in repair without the collection of tolls. But it cannot be said to be absolutely requisite, that the stabling owned by the passenger railroads which traverse our great cities should be exempt from execution, because, although their cars are propelled by horses, and horses cannot be kept without proper buildings to keep them in, still those buildings may be rented and need not be owned by the company. And, although it may be more convenient to have the stable at the point which the company select as the terminus than elsewhere, yet any other point on or near the route, will do nearly as well, which cannot be said with regard to a toll-house, which must usually be placed at a particular spot, and cannot serve its purpose unless close to the line of the road or canal. The allegation in the plea that the stable in question is necessary for the enjoyment of the corporate rights and privileges of the defendants, is not admitted by the demurrer, because the necessity which exempts from liability to execution, must be a necessity implied by the law from the impossibility of using and enjoying the franchise without the aid of the specific thing sought to be exempted. We, therefore, think the plea insufficient, and give judgment for the plaintiff on the demurrer.

French Statistics.

The recent quinquennial report of the census exhibits the population of France to be 37,382,225. When the last census was taken, in 1856, it was 36,039,364. This has not, however, been all natural increase, as since that time the annexation of Savoy and Nice have added 669,059 new French citizens to the population of France. The Minister of France has just given publicity to the receipts of the past year. The direct taxes collected up to the 31st of December, 1861, amounted to 479,827,000 francs, upon a total of assessments of 492,936,000 francs. The indirect taxes yielded, in 1859, 1,094,644,000 francs; in 1860, 1,073,712,000 fancs, and in 1861, 1,099,566,000 francs. The augmentation of indirect taxes gathered from the sale of wines, liquors and tobacco, had been considerable. In 1859, the liquor taxes yielded 174,-

271,000 francs; in 1860, 176,036,000 francs, and in 1861, 195,316,000 francs. The product of the sale of tobacco amounted, in 1859, to 176,744,000 francs, and in 1861, to 215,255,000 francs. The price at which the government sells it has been raised twenty per cent. since the first named year. The number of suicides in France during the year just passed was 8899—an average of more than ten a day, and one in a little less than every ten thousand inhabitants. Three thousand fifty-seven of these were males and 842 females; 16 were children under 15 years of age; 38 men and 11 women were 90 years of age and upward, while the majority were between 40 and 60. Suicides were most frequent in the months of April, May, June and July, which in France, are usually the most pleasant of the year. The causes of death were: Hanging and drowning, 2833; suffocation by charcoal, 271; guns, 206; pistols, 189; cutting instruments, 153; jumping from high buildings, 110; poison, 93; not specified, 44.

South American Trade.

The British are making strong efforts to secure the trade of Chili and other South American States on the Pacific coast, by the establisment of a line of steamers between the Atlantic and Pacific, through the Straits of Magellan, which will connect Chili more closely with England, by way of Brazil on the Atlantic side, and thence in a direct line with Southampton.

Whilst the United States have almost a straight line, by way of the Isthmus of Panama, with Chili and the Pacific coast, and while she has a direct ocean communication with Brazil much nearer than England, yet she appears to be letting the trade of those countries, in a great measure, slip through her fingers, and run into a European channel. This apparent neglect or indifference will soon be felt and deeply regretted when her merchants shall behold a successful rival, with far less natural advantages, in the enjoyment of the commerce of South America.

It seems astonishing that the United States have no steam communication with Brazil—a country of the first importance in South America—and it appear like a fatal, or at least an unaccountable, exception to the general enterprise and sagacity of her intelligent commercial men. England has steam communication with Brazil, and her steamers carry the mail from Valparaiso in Chili. Should her present project of a line of steamers through the Straits of Magellan be carried into effect it will very materially operate against the interests of the American Panama line, and must injuriously affect our commerce with both the Atlantic and Pacific coasts of South Ameria.— *Philadelphia Com. List.*

The Tennessee River.

The Tennessee river has its course chiefly in the State of Tennessee, and is the largest tributary of the Ohio. Its most remore sources are Clinch and Holsten rivers, which rise in the Alleghany Mountains of Virginia. From Knoxville it pursues a south-west direction across the State and enters Alabama, when it pursues a westerly course for one hundred and fifty or two hundred miles, and then turns north and enters Tennessee again, crossing the State and the western portion of Kentucky and entering the Ohio eleven and a half miles below the mouth of the Cumberland, and forty-seven and a half miles above the mouth of the Ohio. The whole descent of the river from its most remote source to its mouth is about seventeen hundred feet. Its whole length by the course of the river is twelve hundred miles. It drains a surface of forty-one thousand square miles. There are no perpendicular falls and few rapids which obstruct navigation through its whole course. The greatest obstruction is at Muscle Shoals, Alabama, two hundred and fifty-seven miles from the mouth, to which point steamboats ascend. A canal thirty-six miles in length has been built around these shoals, and above the navigation for boats is unobstructed for two hundred and fifty miles. The river being rapid, is chiefly favorable for navigation down stream.
